Dr. Jean Ospital
AQMD Health Officer

Dear Dr. Ospital:

I would like to comment on the draft Multiple Air Toxics Exposure Study III (MATES III).

Wildlife should also be studied as to the effect of toxics on them - in particular endangered species such as the California Least Tern in San Pedro Bay.

As a resident I know how bad the environmental effects can be on myself

please study and assess the impacts on San Pedro Bay, as well.

Respectfully,

Dave Hall
