				Total (tpd)	1.0

* Emissions calculated using 3-year average throughput (2015 - 2017) and the NOx permit limit. Facilities with no emissions listed indicates insufficient data and not necessarily that there were no flare emissions (e.g. throughput was not available). Default values were used for flares with no NOx permit limit: 0.06 lb/MMBtu for enclosed flares and 0.0068 lb/MMBtu for open flares.
