PROPOSAL: Annual Meeting of the Brain & Lung Tumor and Air Pollution Foundation

SYNOPSIS: This item is to conduct the annual meeting of the Brain & Lung Tumor and Air Pollution Foundation. The Foundation staff will present an annual report detailing the research supported by the Foundation over the past year, the Foundation’s plans for the future, and a financial report.

COMMITTEE: No Committee Review

RECOMMENDED ACTIONS:
Receive and file the annual report and ratify the Foundation disbursements described in the annual report.

Barry R. Wallerstein, D.Env.
Executive Officer

2014 Annual Report

1. Background
In February 2003 the Board established the Brain Tumor and Air Pollution Foundation. In March 2004 the Foundation amended its Articles of Incorporation to change its name to Brain & Lung Tumor and Air Pollution Foundation (Foundation) and to specify that its purpose is related to the effects of air pollution on brain tumors and lung cancer. The mission of the Foundation is to support research studies on the association between air pollution and brain and lung tumors, as well as research for the development of novel therapeutics for such tumors. To carry out its purpose, the Foundation has funded research projects investigating the links between air pollution and brain and lung
tumors. The dollar amount of the funding provided to date is $5,722,568. The current projects are described below.

2. **Directors and Officers**
The Directors of the Foundation are: Michael D. Antonovich, Chairman  
Dennis Yates, Vice Chairman  
Josie Gonzales  
Dr. Clark Parker

The Foundation’s staff is: Barry Wallerstein, Chief Executive Officer  
Denise Whitcher, Secretary  
Michael O’Kelly, Treasurer

3. **Report on the Foundation’s Activities**

*Previous Research Projects*

Previous projects funded by the Foundation have found alterations in brain molecular biochemistry in laboratory animals after exposure to particulate air pollutants. Several alterations in gene expression were found that were similar to those found in human brain tumors. A paper reporting on these results was accepted for publication in 2013. The citation follows.

Gene expression changes in rat brain after short and long exposures to particulate matter in Los Angeles basin air: Comparison with human brain tumors.  

*Current Research Projects*

In 2013 the Foundation Board accepted $1,000,000 from the SCAQMD’s Health Effects Research Fund, and approved funding for the following project.

Chronic Exposure of Mice to Ambient Particles to Study Cancer-Related Stem Cell Activation in the Brain  
Principal Investigator: Keith Black, M.D., Cedars Sinai Medical Center  
Approved Funding: $1,000,000
This project was approved by the Foundation Board in September 2013 as a follow up to previous laboratory studies conducted by Cedars Sinai. In the current study, laboratory animals are exposed to ambient particulate matter, including ultrafine particles, for a period of one year for additional investigation of potential stem cell activation into cancer precursor cells. The elucidation of such molecular pathways involved in survival, proliferation, and differentiation of cancer stem cells may be fundamental information to help develop therapies for brain tumors and to develop potential preventive measures. The research is being done in collaboration with the UC Irvine School of Medicine. The project is scheduled to be completed by the end of 2015.

4. **Financial Report**
As of February 28, 2014, the Foundation had a cash balance of $1,060,733. Following is an accounting of the Foundation’s operations since its inception (7/23/03):

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Revenue from Operations</strong></td>
<td></td>
</tr>
<tr>
<td>Contributions</td>
<td>$ 5,722,568</td>

5. **Plans for Upcoming Year**
The Foundation will continue monitoring the progress of existing research projects. The Foundation will evaluate new projects and provide funding to the extent that additional funds become available.
