CONSENT CALENDAR (Items 1 through 23)

Note: Consent Calendar items held for discussion will be moved to Item No. 24

1. Approve Minutes of September 4, 2015 Board Meeting **McDaniel/2500**

2. Set Public Hearings to Consider Amendments and/or Adoption to SCAQMD Rules and Regulations **Wallerstein/3131**

November 6, 2015:

- A. Amend Regulation XX - Regional Clean Air Incentives Market (RECLAIM) **Fine/2239**

Proposed amendments to Regulation XX (RECLAIM) will achieve additional NOx reductions pursuant to the 2012 AQMP Control Measure #2012CMB-01. The proposed amendments also address requirements for demonstrating Best Available Retrofit Control Technology equivalency in accordance with California Health and Safety Code §40440. A portion of the RECLAIM Trading Credit (RTC) reductions for power producing facilities may be placed into an adjustment account where the RTCs could be used for compliance purposes, such as meeting new source review holding requirements and emergency power generation needs. In addition to rule clarifications, other changes would include a delay in Relative Accuracy Test Audit due dates. (Reviewed: Stationary Source Committee, March 21, 2014 and July 24, 2015 and Special Stationary Source Committee, September 23, 2015)

B. Amend Rule 1156 - Further Emission Reductions from Cement Manufacturing Facilities **Fine/2239**

The proposed amendment seeks to minimize hexavalent chromium (Cr+6) emissions and risk from cement manufacturing operations and the property after facility closure while streamlining Cr+6 ambient monitoring. The proposed amendments will establish the conditions under which monitoring can be reduced or eliminated. In addition, the proposed amendments include a proposed modification to the fence-line ambient Cr+6 threshold to reflect changes made by the Office of Environmental Health Hazard Assessment to risk assessment guidelines, as well as proposing minor revisions. (Reviewed: Stationary Source Committee, April 17, May 15 and September 18, 2015)

December 4, 2015:

C. Amend Rule 1110.2 - Emissions from Gaseous- and Liquid-Fueled Engines **Fine/2239**

SCAQMD staff has met with several biogas engine operators that have committed to installing control equipment for biogas engines. However, some installations will take longer than expected and will reach full compliance after the current deadline of January 1, 2016. Additionally, U.S. EPA has raised concerns regarding the approvability of Rule 1110.2 into the State Implementation Plan because the current breakdown provisions in the rule allow unlimited emissions during breakdowns that are not subject to any enforcement action if they are reported. The proposed amendments would extend the compliance date for all biogas engines, provide a compliance option for additional time with the payment of a compliance flexibility fee, and address U.S. EPA's concerns on equipment breakdowns and potential excess emissions without enforcement by proposing a tiered approach where different levels of exceedances are defined and the number of incidences would be limited per calendar quarter. (Reviewed: Stationary Source Committee, September 18, 2015)

Budget/Fiscal Impact

3. **Execute Contracts to Implement Two Major Recommendations by Abt Associates to Enhance Socioeconomic Assessments** **Fine/2239**

To assist in implementation of two major recommendations by Abt Associates, Inc. to enhance SCAQMD socioeconomic assessments, two RFPs were released on June 5, 2015. The purpose of the first RFP was to review sectoral economic impact analyses for small scale/small business impacts, and a total of four bids were received. The second RFP solicited proposals to review environmental justice methodologies and application tools, and a total of three bids were received. Two separate review panels were formed, each consisting of SCAQMD staff and two external topic experts. Using the prescribed evaluation criteria to consider cost and technical qualifications, Industrial Economics, Inc.(IEc) received the highest overall score for its submitted proposals in response to both RFPs. This action is to award a contract for sectoral economic impact analysis to IEc in the amount of \$49,994. This action is also to award a contract for environmental justice methodologies review to IEc in the amount of \$74,116. The combined total of both contracts will not exceed \$124,110. Funding is available in the General Fund Undesignated Fund Balance. (Reviewed: Administrative Committee, September 11, 2015; Recommended for Approval)

4. **Execute Contract for Enhancement of Web-Based Annual Emissions Reporting Tool** **Whynot/3104**

At its July 10, 2015 meeting, the Board approved the release of an RFP for Enhancement of Web-Based Annual Emission Reporting Tool that includes enhancements to the existing tool features based on user feedback. One proposal was received in response to the solicitation and that firm is highly qualified. This action is to award the contract to Ecotek Consulting Inc. for Enhancement of Web-Based Annual Emission Reporting Tool at a total cost not to exceed \$150,000, which is included in the Planning, Rule Development, and Area Sources FY 2015-16 Budget. In order to fuel their fleet of natural gas solid waste collection vehicles, CR&R Environmental Services (CR&R) is producing biomethane, a renewable natural gas (RNG), at its material recovery facility in Perris, CA. CR&R proposes to expand their current RNG production with the addition of a second anaerobic digester. This expansion would displace 890,000 gallons of fossil-based fuel annually used in their vehicles and additional RNG produced would be injected into the Southern California Gas Company pipeline. CR&R is also interested in demonstrating the use of RNG with the next generation natural gas engine that achieves 90 percent lower NOx emissions than the existing 2010 heavy-duty engine exhaust emissions standard. This action is to execute a contract with CR&R in an amount not to exceed \$900,000 from the Clean Fuels Fund (31) to cost-share construction of a second anaerobic digester and demonstrate the use of RNG with the next generation natural gas engine. (Reviewed: Technology Committee, September 18, 2015; Recommended for Approval)

7. **Recognize Funds and Amend Contracts to Extend Implementation of Enhanced Fleet Modernization Program** **Miyasato/3249**

On December 5, 2014, the Board recognized funds and authorized contracts to implement the Enhanced Fleet Modernization Program (EFMP) and EFMP Plus-Up, which provides increasing incentives to eligible low- and middle-income owners of older vehicles to scrap their existing vehicle and receive a voucher to help acquire a newer vehicle or cover the cost of alternative mobility options. The EFMP is well received by the public and already oversubscribed. Staff has requested \$21,400,000 from CARB to extend implementation of the EFMP. These actions are to: 1) recognize up to \$21,400,000 in grants as approved by CARB to extend implementation of the EFMP and authorize the Executive Officer to accept grant terms and conditions; 2) amend four contracts in an amount not to exceed \$1,000,000 from the HEROS II Special Revenue Fund (56); 3) authorize the Executive Officer to allocate up to an additional \$300,000 from the HEROS II Special Revenue Fund (56) to increase any of the four contracts on an as-needed basis; and 4) authorize the Executive Officer to approve vouchers to qualified program participants up to \$30,592,000. 33. Adopt Proposed Rule 1420.2 – Emission Standards for Lead from Metal Melting Facilities (*Continued from September 4, 2015 Board Meeting*) **Fine/2239**

On October 15, 2008, the U.S. EPA lowered the National Ambient Air Quality Standard (NAAQS) for lead from 1.5 µg/m³ to 0.15 µg/m³ averaged over a rolling 3-month period to protect public health and the environment. The SCAQMD staff is proposing Rule 1420.2 – Emission Standards for Lead from Metal Melting Facilities to further protect public health from exposure to lead and to help ensure and maintain attainment of the lead NAAQS. The SCAQMD staff is proposing an initial ambient air lead concentration limit of 0.150 µg/m³ averaged over any consecutive 30 days which will be lowered to a final limit of 0.100 µg/m³ by 2018. The proposed rule also establishes requirements for enclosures, point source lead emission limits, source testing, ambient air monitoring, housekeeping and maintenance activities, and submittal and implementation of a Compliance Plan if the facility exceeds ambient air lead concentration limits set forth in the rule. This action is to adopt the resolution: 1) Certifying the Final Environmental Assessment for Proposed Rule 1420.2 – Emission Standards for Lead from Metal Melting Facilities; and 2) Adopting Rule 1420.2 – Emission Standards for Lead from Metal Melting Facilities.
