BOARD MEETING DATE: November 2, 2018

AGENDA NO. 22

REPORT: Mobile Source Committee

SYNOPSIS:The Mobile Source Committee held a meeting on Friday,
October 19, 2018. The following is a summary of the meeting.

RECOMMENDED ACTION: Receive and file.

Dr. Clark E. Parker, Sr., Chair Mobile Source Committee

PMF:AF

Committee Members

Present: Dr. Clark E. Parker, Sr./Chair (videoconference) Dr. Joseph Lyou, Vice Chair Mayor Pro Tem Judith Mitchell Supervisor V. Manuel Perez (videoconference) Supervisor Hilda L. Solis (videoconference)

Absent: Mayor Larry McCallon

Call to Order

Chair Parker called the meeting to order at 9:01 a.m.

ACTION ITEM:

1. Summary of 2018 Ozone Season and Issue an RFP to Evaluate Meteorological Factors and Trends Contributing to Recent Poor Air Quality in the South Coast Air Basin

Philip Fine, Deputy Executive Officer/Planning, Rule Development and Area Sources, summarized the 2018 ozone season, including recent trends and variability in ozone levels and meteorological conditions, emissions, as well as the photochemistry involved in ozone formation. Staff also proposed to issue an RFP to evaluate various meteorological factors conducive to poor air quality and the potential impact of climate changes on those variables. Dr. Parker asked how adverse meteorological factors were addressed in SCAQMD's strategy to improve air quality. Staff responded that weather conditions are likely the biggest factor in day to day changes in air quality. Climate may play a bigger role if meteorology is shifting to a level that can exacerbate air quality despite having emission reductions. The meteorology study could assist staff to develop appropriate strategies to reflect the potential impacts of climate change. This may require greater amounts of emission reductions if adverse meteorology is expected to be more frequent in the future. SCAQMD has taken a leadership role in air quality management and would need to continue this leadership role in climate change issues in relation to regional air quality.

Supervisor Perez supported issuing the RFP and recommended that staff report the progress from the study to the Climate Change Committee.

Mayor Pro Tem Mitchell asked about the time period that would be included in the study and CARB's role in research projects similar to the study in question. Staff explained that the time period will be determined based on proposals received. CARB and other agencies have conducted studies to evaluate air quality in response to future climate, but this study would look at a shorter time period that is more relevant to the region's near-term attainment deadlines.

Supervisor Solis asked how staff responded to the L.A. Times article stating that 2018 is the worst ozone air quality year based on the number of consecutive days exceeding the federal air quality standard. Staff responded that they communicated with the Times reporter multiple times to explain that the number of consecutive ozone exceedances is not the preferred metric to judge progress.

Supervisor Solis suggested that staff coordinate with other entities such as National Oceanic and Atmospheric Administration (NOAA) and NASA Jet Propulsion Laboratory (JPL) and with the media, academia and other public health agencies to protect the public from adverse health impacts of air pollution. Staff responded that they will contact researchers at NOAA, JPL and other entities capable of conducting similar research.

Dr. Lyou raised concerns regarding the impact of the persistent poor air quality on public health exposure. Even though the National Ambient Air Quality Standards (NAAQS) does not focus on the consecutive number of days exceeding the standard, the cumulative impact from persistent exposure should be considered. Dr. Lyou also expressed concern about uncertainties associated with the emissions inventory, the trend of ozone precursor emissions, and changes in ozone in response to NOx reductions. He recommended that the results of recent refinery VOC emission studies be addressed in the meteorology study. He also asked whether staff had inhouse expertise for this work. Staff replied that the study will be an independent evaluation.

Supervisor Solis recommended that staff consider promoting carpooling to reduce emissions on high ozone days. Staff responded that the employee carpool program and clean fuel fleet vehicle regulations are addressed in existing SCAQMD rules. Dr. Parker suggested that the media could leverage carpooling on days with poor air quality.

Moved by Perez; seconded by Mitchell; unanimously approved

Ayes:Lyou, Mitchell, Parker, Perez and SolisNoes:NoneAbsent:McCallon

INFORMATIONAL ITEM:

2. Updated 1-hour Ozone Standard Attainment Demonstration

Zorik Pirveysian, Planning & Rules Manager, presented the updated attainment demonstration for the federal 1979 1-hour ozone standard which reflects updated emissions inventory, revised modeling analysis, and revised attainment strategy. The emissions inventory used in this update is now consistent with the final emissions inventory in the 2016 AQMP which was slightly different than the inventory version used for the 1-hour ozone standard attainment demonstration in the 2016 AQMP. Based on the revised modeling analysis, the updated attainment strategy relies only on SCAQMD's stationary and mobile source measures, and emission reductions from CARB's SIP strategies are not needed for meeting the 1-hour ozone standard by 2022.

Dr. Parker requested clarification regarding SCAQMD's commitment for NOx emission reductions targeted for meeting the 1997 8-hour ozone standard by 2023. Staff responded that this updated 1-hour ozone standard attainment demonstration is merely a technical update to reflect the final emissions inventory in the 2016 AQMP to update the attainment strategy (i.e., rely exclusively on emission reductions associated with SCAQMD's stationary and mobile source measures). As such, the reduction commitments by SCAQMD and CARB for meeting the 8-hour ozone standards in 2023 and 2031, respectively, remain unchanged.

Dr. Lyou asked about progress in achieving the 2022 NOx emission reductions, especially those expected from incentive-based programs. Staff responded that the majority of the reduction commitments allocated to incentive-based programs for the year 2022 were based on SCAQMD's existing incentive programs (e.g., Carl Moyer, Prop 1B) with available secured funding for at least the next several years. These reductions include projects that have already been funded since 2013 and also future projects that will be funded through 2022. In addition, there are ongoing rulemaking activities for SCAQMD measures which are expected to provide reductions toward attainment of the 1-hour ozone standard by 2022 (e.g., Rule 1168 adopted in October 2017). Finally, additional reductions beyond SCAQMD's stationary and mobile

source measures are also anticipated from recent CARB regulatory activities which were not quantified in the 2016 AQMP (e.g., CARB's Innovative Clean Transit Regulation, proposed Ocean-Going Vessels At-Berth regulation) as well as projects to be funded under the Incentives RFP released earlier this year.

WRITTEN REPORTS:

- **3.** Rule 2202 Activity Report: Rule 2202 Summary Status Report This item was received and filed.
- 4. Monthly Report on Environmental Justice Initiatives: CEQA Document Commenting Update

Supervisor Solis inquired about the status of the Quemetco project for which the SCAQMD is the lead agency under CEQA. Mr. Nastri recused himself and left the room for the discussion. Staff highlighted the recent CEQA Scoping meetings that took place in the community and the high level of interest in the project. Dr. Lyou mentioned he attended that meeting and that all public testimony at the meeting opposed the project. Supervisor Solis requested that staff inquire about the status of releasing the soil sample results from the Department of Toxic Substances Control (DTSC), and Dr. Fine noted that DTSC was planning on releasing the results in an upcoming public meeting yet to be scheduled.

This item was received and filed.

OTHER MATTERS:

- 5. Other Business There was no other business.
- **6. Public Comment Period** There were no public comments.
- 7. Next Meeting Date:

The next regular Mobile Source Committee meeting is scheduled for Friday, November 16, 2018.

Adjournment

The meeting adjourned at 10:24 a.m.

BOARD MEETING	B DATE: November 2, 2018	AGENDA NO.
REPORT:	Lead Agency Projects and Environmenta SCAQMD	l Documents Received By
SYNOPSIS:	This report provides, for the Board's cons CEQA documents received by the SCAQ 2018 and September 30, 2018, and those SCAQMD is acting as lead agency pursu	MD between September 1, projects for which the
COMMITTEE:	Mobile Source, October 19, 2018; Review	wed
RECOMMENDED Receive and file.	ACTION:	

Wayne Nastri Executive Officer

PF:SN:MK:DG:LW

CEQA Document Receipt and Review Logs (Attachments A and B) – Each month, the SCAQMD receives numerous CEQA documents from other public agencies on projects that could adversely affect air quality. A listing of all documents received and reviewed during the reporting period September 1, 2018 through September 30, 2018 is included in Attachment A. A list of active projects from previous reporting periods for which SCAQMD staff is continuing to evaluate or has prepared comments is included in Attachment B. A total of 90 CEQA documents were received during this reporting period and 42 comment letters were sent. Notable projects to highlight in this report include the Berths 97-109 [China Shipping] Container Terminal Project, the Santa Susana Field Laboratory Project, and the Aerocraft Heat Treating Dust Collection Project.

The Intergovernmental Review function, which consists of reviewing and commenting on the adequacy of the air quality analysis in CEQA documents prepared by other lead agencies, is consistent with the Board's 1997 Environmental Justice Guiding Principles and Environmental Justice Initiative #4. As required by the Environmental Justice Program Enhancements for FY 2002-03 approved by the Board in October 2002, each of the attachments notes those proposed projects where the SCAQMD has been contacted regarding potential air quality-related environmental justice concerns. The SCAQMD has established an internal central contact to receive information on projects with potential air quality-related environmental justice concerns. The public may contact the SCAQMD about projects of concern by the following means: in writing via fax, email, or standard letters; through telephone communication; as part of oral comments at SCAQMD meetings or other meetings where SCAQMD staff is present; or by submitting newspaper articles. The attachments also identify for each project the dates of the public comment period and the public hearing date, if applicable, as reported at the time the CEQA document is received by the SCAQMD. Interested parties should rely on the lead agencies themselves for definitive information regarding public comment periods and hearings as these dates are occasionally modified by the lead agency.

At the January 6, 2006 Board meeting, the Board approved the Workplan for the Chairman's Clean Port Initiatives. One action item of the Chairman's Initiatives was to prepare a monthly report describing CEQA documents for projects related to goods movement and to make full use of the process to ensure the air quality impacts of such projects are thoroughly mitigated. In response to describing goods movement, CEQA documents (Attachments A and B) are organized to group projects of interest into the following categories: goods movement projects; schools; landfills and wastewater projects; airports; general land use projects, etc. In response to the mitigation component, guidance information on mitigation measures were compiled into a series of tables relative to: off-road engines; on-road engines; harbor craft; ocean-going vessels; locomotives; fugitive dust; and greenhouse gases. These mitigation measure tables are on the CEQA webpages portion of the SCAQMD's website at: http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/mitigationmeasures-and-control-efficiencies. Staff will continue compiling tables of mitigation measures for other emission sources, including airport ground support equipment and other sources.

As resources permit, staff focuses on reviewing and preparing comments for projects: where the SCAQMD is a responsible agency; that may have significant adverse regional air quality impacts (e.g., special event centers, landfills, goods movement, etc.); that may have localized or toxic air quality impacts (e.g., warehouse and distribution centers); where environmental justice concerns have been raised; and those projects for which a lead or responsible agency has specifically requested SCAQMD review. If staff provided written comments to the lead agency as noted in the column "Comment Status," there is a link to the "SCAQMD Letter" under the Project Description. In addition, if staff testified at a hearing for the proposed project, a notation is provided under the "Comment Status." If there is no notation, then staff did not provide testimony at a hearing for the proposed project. During the period September 1, 2018 through September 30, 2018, the SCAQMD received 90 CEQA documents. Of the total of 116 documents* listed in Attachments A and B:

- 42 comment letters were sent;
- 23 documents were reviewed, but no comments were made;
- 39 documents are currently under review;
- 11 documents did not require comments (e.g., public notices);
- 0 documents were not reviewed; and
- 1 document was screened without additional review.

* These statistics are from September 1, 2018 to September 30, 2018 and may not include the most recent "Comment Status" updates in Attachments A and B.

Copies of all comment letters sent to lead agencies can be found on the SCAQMD's CEQA webpage at the following internet address: http://www.aqmd.gov/home/regulations/ceqa/commenting-agency.

SCAQMD Lead Agency Projects (Attachment C) – Pursuant to CEQA, the SCAQMD periodically acts as lead agency for stationary source permit projects. Under CEQA, the lead agency is responsible for determining the type of CEQA document to be prepared if the proposal is considered to be a "project" as defined by CEQA. For example, an Environmental Impact Report (EIR) is prepared when the SCAQMD, as lead agency, finds substantial evidence that the proposed project may have significant adverse effects on the environment. Similarly, a Negative Declaration (ND) or Mitigated Negative Declaration (MND) may be prepared if the SCAQMD determines that the proposed project will not generate significant adverse environmental impacts, or the impacts can be mitigated to less than significance. The ND and MND are written statements describing the reasons why proposed projects will not have a significant adverse effect on the environment and, therefore, do not require the preparation of an EIR.

Attachment C to this report summarizes the active projects for which the SCAQMD is lead agency and is currently preparing or has prepared environmental documentation. As noted in Attachment C, the SCAQMD continued working on the CEQA documents for four active projects during August.
