14. Explain why it is beyond your reasonable control to comply with the rule(s) and/or permit condition(s). Provide specific event(s) and date(s) of occurrence(s), if applicable.

Enery Holdings LLC believes that it reasonably and completely complied with the RECLAIM rules, but has not been afforded an opportunity to demonstrate such because AQMD's Office of Compliance and Enforcement makes the presumption that untimely data = missing data without an appeal process, ignoring RECLAIM Rule 2012(c)(3)(D) (NOx emissions). RECLAIM Rule 2012(c)(3)(D) (NOx emissions) states "The requirement of calculating emissions using Missing Data Procedures under subparagraph (c)(3)(A) shall not apply if the failure to report the total daily mass emissions of NOx and daily status codes is due to a demonstrated failure at the District's Central Station preventing it from receiving the data. The Facility Permit holder shall submit the report within 48 hours of the demonstrated failure being corrected, provided that the raw data as obtained by the direct monitoring device is stored at the facility".

In early 2021, Enery updated its 2012 vintage CEMS computer to a current model. This upgrade was approved by SCAQMD, who regulates and certifies all CEMS hardware. In 2021, Enery's upgraded CEMS modem failed to connect and/or transfer daily emissions data to SCAQMD's Private Data Network (PDN) modem on 27 random days during the year. As a Public Utility, Enery operates AT&T Account 310 635-4689 499 0 as a Priority Government service modem line for our CEMS modem. On 6-30-2021 Enery initiated trouble ticket PG442529 defining a random failure of our CEMS modem to connect with AQMD's PDN modem. AT&T reported that there was no trouble on Enerys' Priority Government line. The trouble resided on the AQMD line. Enerys' CEMS modem attempted data transfer to AQMD PDN modem a total of 10,307 times on the 27 MDP days AQMD listed in Enery's 2021 RECLAIM audit report (See Appendix 4). This is an average of 429 daily attempts on each MDP day. On MDP day 10/2/2021 alone, Enerys' CEMS modem attempted to transfer data 990 times. The top failure reasons were "MODEM line BUSY" 2692 times, "Unexpected return from modem connect" 1,243 times, "RTUTransmit terminated abnormally" 425 times," Error waiting for connection" 252 times. Each of these errors represents an error on the part of AQMD's antiquated and poorly maintained Private Data Network (PDN) system.

Upon information and belief, AQMD has been told by the U.S. Environmental Protection Agency that its analogue Private Data Network (PDN) system is antiquated, unsecure, and prone to error.

Nonetheless, Enery transmitted its data for each of the 27 MDP days from its AQMD approved CEMS database within 48 hours of communications being restored. These transmissions are noted in Enery's 2021 RECLAIM Audit Report authored by Inspector C. Baluyot beginning on page 39 of 59.

On 5/24/2023, again on 5/29/2023 Enery contacted Mr. S. Caso of AQMD's Compliance & Enforcement Office seeking answers to the below questions. When Mr. S. Caso failed to respond, Enery contacted the Deputy Executive Officer of Compliance & Enforcement, Mr. T. Mann, on 8/6/2023 with the same questions:

- 1. Does AQMD's Office of Compliance and Enforcement interpret the RECLAIM Rules to allow Enery to avoid default to the MDP calculations by providing valid daily emissions data, even where the data was not timely submitted?
- 2. Does AQMD's Office of Compliance and Enforcement interpret the RECLAIM Rules to allow Enery a dispute resolution process to contest the 10,064 MDP calculated "emissions", and the resulting RTC deficiency?

Mr. Mann responded on 8/15/2023 with the message: "Mr. Munoz: I have received your email. We are evaluating it and will respond soon. Thank you. -TM".

Mr. Mann has not responded as of the writing of this Petition.

AQMD itself recognizes that its PDN system and the associated WATERS database is prone to inoperability and has built in provisions for permit holders to reasonably comply with communications issues. As stated above, Rule 2012(c)(3)(D) makes provisions for PDN network failures. However, Rule 301(l)(9)(D) explicitly outlines the process permit holders are to execute is such a circumstance. Enery sought specific guidance on how to process PDN failures beyond its control from AQMD's Compliance & Enforcement office. As reported above, the AQMD PDN experienced communications issues 10,307 times during 27 MDP days listed in Enery's 2021 RECLAIM Audit Report. These errors are beyond the control of Enery.

Unfortunately, AQMD's Compliance & Enforcement office has failed to provide a path forward for Enery to address RECLAIM Rule 2012(c)(3)(D) (NOx emissions) in regard to its 2021 RECALIM Audit Report. .

Instead, AQMD's Compliance & Enforcement Office makes the presumption that untimely data = missing data without appeal.

In summary, Enery believes that it reasonably and fully complied with the RECLAIM rules. However AQMD's Compliance & Enforcement Office does not recognize that the RECLAIM rules allows for the late transmission of CEMS data within 48 hours of communications being restored. AQMD's Compliance & Enforcement Office has exceeded its delegated statutory authority, or the authority implied in the overall purposes of the RECLAIM programs, by the imposition of such "per se" rules and seeks to take \$250,000 of NOx credits without due process and in violation of RECLAIM Rule 2012(c)(3)(D).

15. When and how did you first become aware that you would not be in compliance with the rule(s) and/or permit condition(s)? Provide specific event(s) and date(s) of occurrence(s).

On 6/30/2021 Enery initiated trouble ticket PG442529 defining a random inability of its new CEMS modem to connect with AQMD's PDN modem. The trouble was not at Enery, but rather with AQMD PDN services. During root cause analysis, it was found that restoring Enery's 2012 vintage modem reduced the communication issues.

The next day, on 1 July 2021, CAISO began issuing dispatch orders for the ICEGEN power plant. Staff are extremely busy during summer run, often working 12 hour days. ICEGEN staff were unaware that the AQMD PDN modem was experiencing communication issues, though all information was being recorded and saved into an AQMD approved database as required by the RECLAIM Rules.

As part of the RECLAIM regime, SCAQMD performs an annual audit of Enery's compliance with the RECLAIM program. On 29 June 2022 Inspectors C. Baluyot and M. Sanchez visited ICEGEN to conduct Enery's 2021 RECLAIM audit. Unbeknownst to Enery, Inspectors Baluyot found that on 27 days during the calendar 2021 year, ICEGEN's modem had not successfully transmitted its CEMS data within 24 hours to AQMD PDN Waters Database. CEMS logs show that these "late" transmissions were due to AQMD's PDN experiencing communication errors. Enery transmitted the "late" data within 48 hours of restoration of communications. Nonetheless, AQMD Office of Compliance and Enforcement made the presumption that untimely data = missing data, regardless of AQMD PDN communication issues and RECLAIM rules.

In an email dated 12/2/2022, Mr. Caso informed Enery that its 2021 RECLAIM Audit Report was completed. However no copy was provided. At that time, Enery had no way of knowing that it was accused of violating Rule 2012 for Calendar year 2021.

The first notice that Enery had violated Rule 2012, daily reporting of emissions, occurred on 1/5/2023 when Inspector Baluyot emailed version 1 of NOV P76069 to Enery's Compliance Officer Michael Munoz. Mr. Munoz immediately requested a detailed understanding of the violations and MDP calculations in his email of 1/5/2023. Mr. Munoz sent follow up requests for detailed information concerning NOV P76069 on 2/23/2023, 3/4/2023, 3/8/2023, and 3/19/2023. Inspectors C. Baluyot and M. Sanchez and Mr. S Caso did not respond substantively to these requests.

In an email from Mr. S Caso on 3/7/2021, Mr. Munoz was told that a detailed explanation of the Rule 2012 violations made in NOV P76069 were contained in Enery's 2021 RECLAIM Audit Report. In his email of 3/7/2023, Mr. Caso provided a non functioning link to Enery's 2021 RECLAIM Audit Report. Unable to obtain an electronic copy of Enery's 2021 RECLAIM Audit Report, Mr. Munoz went to the public records department at AQMD headquarters in Diamond Bar, CA. Mr. Munoz was refused a copy of Enery's public record 2021 RECLAIM Audit Report. After appealing to AQMD counsel Ms. Hanizavareh, on 3/17/2023 Mr. S. Caso finally shared Enery's 2021 RECLAIM audit report in an email, though that report was completed on 12/2/2023.

Enery's 2021 RECLAIM Audit Report showed that Inspectors Baluyot disregarded RECLAIM rules and inflated Enery's ICEGEN power plant emissions from actual emissions of 2,249 pounds of NOx to 12,311 pounds of NOx; an increase of 10,062 pounds. Of the 27 MDP days, Enery's ICEGEN power plant actually combusted natural gas 6 of these days; with an actual emissions of 144 NOx pounds.

- 16. List date(s) and action(s) you have taken since that time to achieve compliance.
  - On 6-30-2021 ICEGEN initiated trouble ticket PG442529 defining a random inability failure of our CEMS modem to connect with AQMD's PDN modem.
  - On 6/30/2021 reverted to 2012 old CEMS modem to best communicate with AQMD's antiquated modem.
  - Upon realizing that Energy's ICEGEN CEMS records had not properly uploaded to SCAQMD, our CEMS provider CEMTEK uploaded the records, which were stored in a AQMD certified onsite database and backed up on an SCAQMD certified storage device.
  - On each of the 27 MDP days, Enery uploaded daily emissions data when AQMD's PDN modem became available.
  - 3/9/2023 ICEGEN is now paying CEMTEK to run tests to ensure transmission is achieved as AQMD PDN continues to have communications issues.
- 17. What would be the harm to your business during **and/or after** the period of the variance if the variance were not granted?

Economic losses: \$251,550	
Number of employees laid off (if any):2	

Provide detailed information regarding economic losses, if any, (anticipated business closure, breach of contracts, hardship on customers, layoffs, and/or similar impacts).

Enery Holdings claims that the incorrect findings of its 2021 RECLAIM Audit Report will damage it in the following ways:

Suffer economic hardship of \$251,550 for invented emissions in violation of RECLAIM legislation and Rules.

Abrogate Enery's rights under the RECLAIM Rules- RECLAIM rules specifically allow for daily reports to be submitted within 48 hours after connection issues are resolved, so long as the raw data used to compile the reports is stored at the facility. AQMD was aware of Enery's transmissions after AQMD's analogue PDN system was unavailable, but ignored these facts during Enery's 2021 RECLAIM Audit. When specifically asked about the appeal process for AQMD's use of MDP in Enery's 2021 RECLAIM Audit Report, Deputy Executive Officer of Compliance & Enforcement, Mr. T. Mann and his subordinates have not responded in over 9 months.

Abrogate right of Due Process under the California and United States Of America Constitutions - AQMD has violated Enery's rights by taking Enery's NOx credits without Due Process. When specifically asked the appeal process for AQMD's use of MDP in Enery's 2021 RECLAIM Audit Report, Deputy Executive Officer of Compliance & Enforcement, Mr. T. Mann and his subordinates have not responded in over 9 months.

Violate the Takings Clause of the Constitution of the United States Of America - AQMD has taken Enery's NOx credits without just compensation.

Violate Enry's rights under the Excessive Fines Clause of the California Constitution- The functionality of AQMD's analogue PDN system to be available to transfer data is outside of the control of Enery, the permit holder. As such, any fines accruing from the unavailability of AQMD's analogue PDN system is a violation of the "Excessive Fines" clause of the California Constitution. Further, the application of MDP that equates untimely data = missing data and seeks to quadruple actual emissions and fines is a violation of this clause.

ICEGEN must run when ordered to r	der jurisdiction of the Californ run or face civil and criminal p		m Operator (CAISO)

#### ATTACHMENT A

#### ITEM 1

Type of Variance Requested:

- (a) **SHORT:** If compliance with District rule(s) can be achieved in <u>90 days or less</u>, request a short variance. (Hearing will be held approximately 21 days from date of filing--10-day posted notice required.)
- (b) **REGULAR:** If compliance with District rule(s) will take <u>more than 90 days</u>, request a regular variance. If the variance request will extend beyond one year, you <u>must</u> include a specific detailed schedule of increments of progress [see Page 8, No. 24] under which you will achieve final compliance. (Hearing will be held approximately 45 days from date of filing--30-day published notice required.)
- (c) **EMERGENCY**: If non-compliance is the result of an unforeseen emergency, such as a sudden equipment breakdown, power failure, or accidental fire, you may request an emergency variance. You may request an ex parte emergency variance in addition to an emergency variance. An emergency variance cannot be granted for more than 30 days. (Hearing will be held within 2 working days from the date of filing, whenever possible, excluding Mondays, weekends, and holidays.) If you request an emergency variance, you must answer No. 4 on page 1.
- (d) **EX PARTE EMERGENCY:** If variance coverage is required on a weekend or when the Board is not in session, and you cannot wait until an emergency variance hearing can be held, you may request an ex parte emergency variance. An ex parte emergency variance will be granted or denied solely on the information contained in the petition and the District's response to the petition. Under most circumstances, an ex parte emergency variance will remain in effect only until a hearing can be held. If you request an ex parte variance, you must answer No. 4 on page 1.
- (e) INTERIM: If you require immediate relief (other than for emergencies) to cover the time until a short or regular variance hearing can be held, request an interim variance. If you request an interim variance, you must also request a short or a regular variance on the same petition. (Hearing will be held approximately 2 working days from date of filing, whenever possible, excluding Mondays, weekends and holidays.) If you request an interim variance, you must answer No. 4 on page 1.

#### ITEM 4

**GOOD CAUSE:** The Hearing Board is required to provide public notice of variance hearings, as the public has a right to attend and testify at such hearings. In order for the Hearing Board to hold an Interim, *Ex Parte* Emergency or Emergency Variance hearing without the required public notice, a petitioner must present facts which will support a determination by the Board that "good cause" exists to hear a variance without notifying the public about the variance and providing the public with an opportunity to present evidence concerning the variance.

#### ITEM 6

#### Example #1:

Cc: Sheri Hanizavareh <shanizavareh@aqmd.gov>

Subject: [EXTERNAL]FW: Enery Holdings LLC (#186899) 2021 RECLAIM Summary and Enforcement Action

Dear Mr. Mann,

I have previously sent this enquiry to Mr. Scott Caso in May of this year. I copied you on the communication. To date, I have not received an answer to my query. Inspector Baluyot has communicated that Mr. Caso has retires. I will therefore, address my enquiry to you as head of Compliance & Enforcement.

In NOV P76079 your office claims Enery generated 10,064 more NOx pounds than we reported for 2021 in our QCER and APEP reporting. The source of these additional "emissions" were Missing Data Procedure calculations conducted by AQMD staff. I understand that these MDP calculated "emissions" resulted in your offices belief that Enery was deficient 6,284 RTC credits for 2021.

Beginning on page 39 of 59 in the CY2021 RECLAIM Audit Review Summary for Facility ID: 866899, each reporting day is listed with its successful transmission date in column six. For each day in 2021, the audit shows that AQMD received a successful transmission of RTU data. There are no dates that show blank, meaning ICEGEN never failed to upload required data.

I have two questions reference the MDP calculations and the resulting RTC credits:

- 1. Does AQMD's Office of Compliance and Enforcement interpret the RECLAIM Rules to allow ICEGEN to avoid default to the MDP calculations by providing valid daily emissions data, even where the data was not timely submitted?
- 2. Does AQMD's Office of Compliance and Enforcement interpret the RECLAIM Rules to allow ICEGEN a dispute resolution process to contest the 10,064 MDP calculated "emissions", and the resulting RTC deficiency?

If the answer to either question is yes, please refer me to the process or Rule that governs the process.

This is my third communication to your office concerning this matter.

Mike Munoz

Mr. Munoz,

You are correct, my reference to the 2022 Compliance Year in my previous email should have been 2021 Compliance Year. Thank you for catching that typo.

During this audit cycle, staff attempted to keep you informed of the status of the audit and alert you that situations had been identified in which Missing Data Procedure (MDP) may be applied increasing emissions beyond what Enery had reported. I have attached the following emails that were sent to you during this compliance year related to this topic:

- The 09/14/2022 email explained that Missing Data Procedure (MDP) would be calculated for days on which electronic data was not reported within the 96-hour extension period of a facility system failure.
- The 12/20/2022, in which Christer explained how MDP was applied in the audit to both the late reporting of electronic data and to the PERP equipment issue.
- The 04/29/2022 email provided detailed guidance on calculating NOx emissions for PERP equipment, in the event PERP was used by Enery in CY2022 for otherwise in the future.

For your convenience, I have attached a copy of Enery's audit for CY 2021, which contains information on the situations that prompted the application of MDP to be applied, the method of MDP used and the resulting total.

Any additional documents may be requested from the agency at <a href="https://www.aqmd.gov/nav/online-services/public-records">https://www.aqmd.gov/nav/online-services/public-records</a> or <a href="https://onbase-pub.aqmd.gov/sAppNet/UnityForm.aspx?d1=Abflbz0Kh7IjrGip6gBbEMmRtYgGtJcygIZ2MKgwwdlcy7oSfh8OhABCPGRKLeE55NegBJDGjcIlgnR0Bbdm8KEj%2fk%2bR0jB46Ij0VOvQzOCkuX23bEyWJwsVuUYYMp58fcy7L7e%2bYjT2xrb%2bZghciq0NeEA7id01t21NNIEfY0iJ</a>. I understand the link I provided in the previous email did not work. Please let me know if there are similar challenges with the two links provided above.

I understand you have been in contact with our Legal division, this is the appropriate as the Notice of Violation (P76069) and associated report have been turned over to that group.

#### Thank You.

Subject: RE: Enery Holdings LLC (#186899) 2021 RECLAIM Summary and Enforcement Action

Dear Mr. Caso,

Thank you for your email of 7 March 2023. I would like to first confirm that the compliance year of NOV P76079 is 2021. I think you mistakenly wrote "Enery's 2022 Compliance Year (CY) audit".

Our goal is to understand how AQMD arrived at the incredible value of 12,311 pounds of NOx for year 2021. Your letter of 17 February 2023 indicates that this number was the result of Missing Data Procedures.

In your email you say "I believe these emails included the information you are seeking, including an explanation of how the MDP would be calculated and the impact this would have on Enery's audit". I agree that the NOV and Inspector Baluyot referenced RECLAIM rule sets. However, to date, your office has not provided the calculations for each quarter totaling 12,311. We seek to understand specifically how AQMD arrived at this fantastical number.

You indicate that we can find a copy of AQMD's audit including the application of MDP. However the link in your email of 7 March 2023 (<a href="https://onbase-pub.aqmd.gov/sAppNet/UnityForm.aspx?key=UFKey">https://onbase-pub.aqmd.gov/sAppNet/UnityForm.aspx?key=UFKey</a> ) is a dead link. Please let us know how we can receive a copy of AQMD's approved audit with the specific calculations. Please be on notice that we challenge the findings of AQMD's 2021 audit. We cannot make specific allegations of incorrect computations and other errors until we receive a copy of the audit and AQMD's calculations.

In your email you also state: "As some of the situations identified during the audit (that would result in MDP) stemmed from the agency's inability to obtain requested information from Energy, these emails were sent to you to ensure Energy was aware of these situations and given the opportunity to provide the required information or resolve any incorrect information we may have prior to the audit being completed". I believe you are referring to your email of 2 December 2022, with a deadline of 7 December 2022. As you are aware, I replied to your additional data request on 5 December 2022. To my knowledge there was no other outstanding information Inspector Baluyot required. Please confirm.

In your letter of 17 February 2023 you state: "a written request must be sent to South Coast AQMD no later than 60 days from the date of this letter". Please suspend this arbitrary deadline until we resolve our assertion that AQMD errored in its calculations and audit.

Mike Munoz

Telephone: 406-544-3326 Conference Call: 701-779-9705 From: Scott Caso < SCaso@aqmd.gov > Sent: Tuesday, March 7, 2023 8:12 AM
To: Michael Munoz < mmunoz@ches.biz >

Melissa Sanchez < msanchez@aqmd.gov >; Christer Baluyot < cbaluyot@aqmd.gov >

Subject: RE: Enery Holdings LLC (#186899) 2021 RECLAIM Summary and Enforcement Action

Mr. Munoz,

Please refer to the various emails my staff and I have sent to you in the previous months related to Enery's 2022 Compliance Year (CY) audit. Specifically, those that outlined situations identified during the audit that would result in the application of Missing Data Procedure (MDP). I believe these emails included the information you are seeking, including an explanation of how the MDP would be calculated and the impact this would have on Enery's audit. As some of the situations identified during the audit (that would result in MDP) stemmed from the agency's inability to obtain requested information from Energy, these emails were sent to you to ensure Enery was aware of these situations and given the opportunity to provide the required information or resolve any incorrect information we may have prior to the audit being completed. Throughout the audit cycle considerable effort has been made to interact with you via email to answer your questions and to keep you informed of the process.

If, after reviewing these emails, you still have question regarding how MDP was applied or the NOx calculations associated with Enery's audit, an approved copy of this audit can be requested online at <a href="https://onbase-pub.aqmd.gov/sAppNet/UnityForm.aspx?key=UFKey">https://onbase-pub.aqmd.gov/sAppNet/UnityForm.aspx?key=UFKey</a>

Subject: FW: Enery Holdings LLC (#186899) 2021 RECLAIM Summary and Enforcement Action

Dear Mr. Caso,

In the email below, I asked for your help in providing ICEGEN with the calculations showing us specific dates and calculations that support AQMD's allegations that ICEGEN was required to use missing data procedures. What I have received so far is the attached letter from Mr. Sanford making the incredible allegations that ICEGEN produced over 12,000 pounds of NOx emissions in 2021.

Nonetheless, in order to arrive at these very specific numbers for Q2,Q3, and Q4 of 2021, AQMD must have conducted calculations defining the date of alleged offense, and the MDP used in the calculations. AQMD must have a spreadsheet detailing these calculations. Is there a reason that your organization has not shared this information with ICEGEN despite our specific request for this information?

If there is, please tell me the reason so we may act to solve the issue. If there is not, please provide the detailed information.

Subject: FW: Enery Holdings LLC (#186899) 2021 RECLAIM Summary and Enforcement Action

Importance: High

# Good afternoon,

Christer has complete Enery's RECLAIM audit for CT 2021 and his findings, as well as the compliance actions are listed below.

Please see the compliance notices that have been attached for your convenience and note that pending items listed on the attached Notice to Comply specifies the following actions be completed by 12/30/2022:

- 1. Submit a permit modification application to update the power rating of ICE D10 to the correct brake horsepower.
- Data Recalculations for CY 2022
  - Apply MDP to the NOx Major Source according to Rule 2012, Appendix A, Chapter 2 (E) for late reported days that do not meet allowable extensions
  - Calculate NOx mass emissions using acceptable method for PERP equipment
- 3. Submit QCER corrections for Quarters 1 through 3 of the 2022 compliance year.

- Revise reported Major Sources NOx mass emissions to reflect any MDP applied
- Revise reported Process Unit emissions to include only D10 NOx mass emissions
- Report PERP NOx mass emissions under "Equipment Operating without an AQMD Permit" category
- 4. Submit attached Corrections to Electronically Reported Emissions (CERE) forms for Quarters 1 through 3 of the 2022 compliance year.
  - Revise reported Major Source NOx mass emissions to reflect any MDP applied
  - Revise reported Process Unit emissions to include only D10 NOx mass emissions
  - Report PERP NOx mass emissions using the record identifier "NWF" and aggregate quarterly NOx mass emissions using the record identifier "NUQ"

My staff and I are available to provide you with assistance should it be needed.

Thanks.

Subject: Enery Holdings LLC (#186899) 2021 RECLAIM Summary and Enforcement Action

Hi Melissa,

My email regarding discrepancies found during the audit, summary of enforcement action, and action items for the facility are below. Attached are notices of enforcement action and CERE form.

Thanks, Christer

Mr. Munoz,

Upon completion of the 2021 compliance year RECLAIM audit for Enery Holdings LLC (ID 186899), the annual audited emission totals are **12,311 lbs NOx**. Enery reported **2,249 lbs NOx**. There is a difference of **10,062 lbs NOx**.

# Summary to RECLAIM/Discrepancies

Reasons for the difference between audited total emissions and facility reported emissions:

• Portable Equipment Registration Program (PERP) emissions were not calculated correctly.

- Enery provided only NOx emission calculations for PERP equipment for an unidentifiable PERP unit from Sunbelt Rentals. Records indicated that the unit operated during Quarters 2 and 3. A fuel consumption rate was calculated incorrectly by failing to use Equation 28 or the manufacturer's provided fuel consumption rate.
- o NOx emissions from this unidentifiable PERP unit were incorrectly reported under Process Units.
- During the audit, Enery provided invoices from Sunbelt Rentals for two PERP units that included timer readings when the units were operated at the facility. With these timer readings, emissions were calculated using Equation 28 for each of the two PERP units, their respective brake horsepower ratings, the diesel Higher Heating Value of 137 mmbtu/mgal, and the default NOx emission factor for diesel ICEs of 469 lbs/mgal.
- Major Source Missing Data Procedures (MDP) applied to reporting days per Rule 2012 (c)(3)(C).
  - The facility is limited to three (3) non-consecutive occurrences of a power, computer, or other system
    failure system that prevent a facility from reporting daily NOx emissions by 5 pm. For each occurrence,
    the facility is granted 96 hours to electronically submit the required daily report.
  - For reporting days where emissions were transmitted late and did not meet an allowable extension, audited emissions were calculated by applying Missing Data Procedures (MDP) per Rule 2012, Appendix A, Chapter 2. Percent availability for the given missing data periods was greater than 95%. The following MDP was applied:
    - Single days (24 hours) of invalid data was determined using the 1N procedure.
    - The MDP lookback data provided by the facility was not complete and several data gaps appeared between daily 30-day max values and between daily 365-day max values. For these days, MDP values were determined by checking the lookback values of the dates before and after the reporting date. If these lookback values were the same, it would be reasonable to assume the MDP value for the reporting date is also the same. If the lookback values of the dates before and after the reporting date were different, the higher value would be used.
    - For a missing data period greater than 24 hours, substitute data were calculated using the maximum hourly emissions for the previous 30 days per Rule 2012, Appendix A, Chapter 2 (E)(3)(b)(ii).
    - For reporting days where there were no emissions for the previous 30 days, the given 365-Day Max value was used per Rule 2012, Appendix A, Chapter 2 (E)(3)(c)(iii).
    - For reporting days where a 30-Day Max value is shown as "NULL", the 365-Day Max value was used.

# **Enforcement Action**

# **Notice to Comply E55272**

Observation	Requirement	Rule Citation
Power rating on the nameplate of ICE D10 does not match the equipment	Submit a permit modification application to	2004 (#\/2\
description in the Facility Permit. The Facility Permit indicates ICE D10 is rated	update the power rating of ICE D10 to the correct brake horsepower.	2004 (f)(2)

at 302 BHP. The nameplate was observed to indicate a power rating of 250 BHP.		
NOx mass emissions from PERP equipment were not calculated correctly. PERP NOx mass emissions were not electronically reported.	Calculate PERP NOx emissions using acceptable method. Electronically report quarterly PERP NOx mass emissions using the record identifier "NWF" and aggregate quarterly NOx mass emissions using the record identifier "NUQ".	2012 (g)(8)

# Notice of Violation P76069

Date of violation: 03/01/2021

Observation	Violation	Rule Citation
Quarter 2 and Quarter 3 QCERs were submitted with inaccurate emissions due to incorrect PERP emission calculations and MDP not applied to late reporting days.	Failure of Facility Permit holder to submit accurate QCERs for Quarter 2 and 3.	2004 (e)
APEP report was submitted with inaccurate emissions due to incorrect PERP emission calculations and MDP not applied to late reporting days.	Failure of Facility Permit holder to submit APEP report with accurate emissions.	2004 (b)(4)
Several reporting days of late transmissions of total daily emissions and status codes from NOx Major Source Gas Turbine D19.	Failure of Facility Permit holder of a NOx Major Source to transmit total daily NOx mass emissions and daily status codes by 5:00 PM of the following day.	2012 (c)(3)(A)
MDP was not applied for the reporting days with late transmissions.	Failure of Facility Permit holder of a NOx Major Source to follow correct MDP in reporting daily total emissions when report is late.	2012, Appendix A, Chapter 2 (E)
An annual tune-up was not performed for Process Unit ICE D10 during the 2021 compliance year.	Failure of operator of a NOx Process Unit to tune-up their equipment as required.	2012, Appendix A, Chapter 5 (C)
Electronic reporting was not transmitted for Process Unit quarterly aggregate emissions for Quarter 2 (NPQ).	Failure to electronically report Process Unit aggregate emissions.	2012, Appendix A, Chapter 7 (D)(2)
Semi-Annual 500-SAM report due on 02/28/2022 was submitted late on 03/02/2022.	Failure to submit 500-SAM report by February 28, 2022.	3002 (c)(1)

# **Action Items for Enery Holdings LLC**

The following must be completed to achieve compliance.

- 1. Submit a permit modification application to update the power rating of ICE D10 to the correct brake horsepower.
- 2. Data Recalculations

- Apply MDP to the NOx Major Source according to Rule 2012, Appendix A, Chapter 2 (E) for late reported days that do not meet allowable extensions
- Calculate NOx mass emissions using acceptable method for PERP equipment
- 3. Submit QCER corrections for Quarters 1 through 3 of the 2022 compliance year.
  - Revise reported Major Sources NOx mass emissions to reflect any MDP applied
  - Revise reported Process Unit emissions to include only D10 NOx mass emissions
  - Report PERP NOx mass emissions under "Equipment Operating without an AQMD Permit" category
- 4. Submit attached Corrections to Electronically Reported Emissions (CERE) forms for Quarters 1 through 3 of the 2022 compliance year.
  - Revise reported Major Source NOx mass emissions to reflect any MDP applied
  - Revise reported Process Unit emissions to include only D10 NOx mass emissions
  - Report PERP NOx mass emissions using the record identifier "NWF" and aggregate quarterly NOx mass emissions using the record identifier "NUQ"

## South Coast Air Quality Management District 21865 Copley Drive, Diamond Bar, CA 91765-4178

Section B Page: 1 Facility ID: 186899 Revision #: 4

Date: January 01, 2023

# FACILITY PERMIT TO OPERATE ENERY HOLDINGS LLC/LGHTHP\_6\_ICEGEN

## SECTION B: RECLAIM ANNUAL EMISSION ALLOCATION

The annual allocation of NOx RECLAIM Trading Credits (RTCs) for this facility is calculated pursuant to Rule 2002. Total NOx emission shall not exceed such annual allocations unless the operator obtains RTCs corresponding to the facility's increased emissions in compliance with Rules 2005 and 2007.

The level of Starting Allocation plus Non-Tradable Credits used to determine compliance with Rule 2005(c)(4) and applicability of Rule 2005(e) - Trading Zone Restrictions is listed on the last page of this Section.

The following table lists the annual allocations that were issued to this facility and the amounts of RTCs held by this facility on the day of printing this Section.

# RECLAIM POLLUTANT ANNUAL ALLOCATION (POUNDS)

Yes Begin (month/	End	Zone	NOx RTC Initially Allocated	NOx RTC <sup>1</sup> Holding as of 01/01/2023 (pounds)	Non-Tradable Non-Usable RTCs (pounds)
7/2020	6/2021	Coastal	7531-0	1625	0.000 0.000

### Footnotes:

- This number may change due to pending trades, emissions reported under Quarterly Certification
  of Emissions Report (QCER) and Annual Permit Emission Program (APEP) Report required
  pursuant to Rule 2004, or deductions made pursuant to Rule 2010(b). The most recent total RTC
  information can be obtained from the District's RTC Listing.
- 2. The use of such credits is subject to restrictions set forth in paragraph (f)(1) of Rule 2002.

## SECTION B: RECLAIM ANNUAL EMISSION ALLOCATION

The annual allocation of NOx RECLAIM Trading Credits (RTCs) for this facility is calculated pursuant to Rule 2002. Total NOx emission shall not exceed such annual allocations unless the operator obtains RTCs corresponding to the facility's increased emissions in compliance with Rules 2005 and 2007.

The level of Starting Allocation plus Non-Tradable Credits used to determine compliance with Rule 2005(c)(4) and applicability of Rule 2005(e) - Trading Zone Restrictions is listed on the last page of this Section.

The following table lists the annual allocations that were issued to this facility and the amounts of RTCs held by this facility on the day of printing this Section.

# RECLAIM POLLUTANT ANNUAL ALLOCATION (POUNDS)

	Yes Begin (month/	ar End year)	Zone	NOx RTC Initially Allocated	NOx RTC <sup>1</sup> Holding as of 01/01/2023 (pounds)	Non-Tradable Non-Usable RTCs (pounds)
	1/2029	12/2029	Coastal	75314	2350	0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0

## SECTION B: RECLAIM ANNUAL EMISSION ALLOCATION

The annual allocation of RECLAIM Trading Credits (RTCs) for this facility is calculated pursuant to Rule 2002. If the facility submits a permit application to increase in an annual allocation to a level greater than the facility's starting Allocation plus Non-Tradable credits as listed below, the application will be evaluated for compliance with Rule 2005 (c)(4). Rule 2005 (e) - Trading Zone Restrictions applies if an annual allocation is increased to a level greater than the facility's Starting Allocation plus Non-Tradable Credits:

Year Begin End (month/year)	Zone	NOx RTC Starting Allocation (pounds)	Non-Tradable Credits(NTC) (pounds)
1/1994 12/1994	Coastal	104220	0 7 7 8 9 7
