Local Government & Small Business Assistance Advisory Group

2022 Accomplishments

Throughout the year, the Local Government & Small Business Assistance (LGSBA) Advisory Group receives information and/or provides direct input on a variety of policy initiatives and proposed regulations that affect local governments, small businesses, and the general public.

Where appropriate, new additions and/or revisions were made by staff to improve proposals or policies, based on LGSBA members' input. A wide variety of comments were received on each of these items from LGSBA members representing local governments, small businesses, and the communities in general. Further details may be found in the minutes of meetings, where each item was discussed in depth.

Significant Items Addressed in 2022

Significant discussions were held during 2022 on many items. A few notable items that were discussed during 2022 are summarized below and an additional list of topics discussed follows.

(1) Update on South Coast AQMD Mobile Source Incentive Programs

Mr. Walter Shen, Planning & Rules Manager, Technology Advancement Office, presented an overview and highlights of South Coast AQMD mobile source incentive programs. Funding for these programs is approved by South Coast AQMD Governing Board. The programs require that electrification projects meet cost-effectiveness thresholds established by the Carl Moyer guidelines, which is based on public feedback. Programs use the cost-effectiveness threshold of \$30,000 per weighted ton of total reduced emissions to get equipment to current standards, while the \$100,000 per weighted ton of reduced emissions is for zero-emission projects.

(2) Update on 2022 Air Quality Management Plan (AQMP) Related Activities

Dr. Sarah Rees, Deputy Executive Officer, Planning, Rule Development and Implementation, presented a summary of the overall process and work completed to date on the 2022 AQMP. Dr. Rees stated that it is important that the federal government develop and implement new regulations as most of the nitrogen oxides (NOx) come from federal sources such as ships, locomotives, aircrafts, and interstate trucks. Dr. Rees discussed South Coast AQMD's regulatory authority and rulemaking proceedings which require public input, including the business community, and support for science-based targets. Dr. Rees stated that NOx and volatile organic compound (VOC) reductions are important for attainment of the ozone standard.

(3) Health Effects of Criteria Pollutants

Dr. Rees presented a summary of the Health Effects Analysis of the Revised Draft 2022 AQMP. Dr. Rees indicated that U.S. EPA models were used for health effects modeling and did not include actual physical samples. Baseline models are used for the Draft 2022 AQMP and does not account for unusual weather events. Dr. Rees further stated that lower ozone standards would impact urbanized areas with high number of mobile sources, including highways and transportation hubs.
