2017 Clean Air Choice Vehicles

Advanced Technology - Zero-Emission Vehicles (ZEVs)

ZEV is an acronym for **Zero Emission Vehicle**. A ZEV has zero tailpipe emissions and emits 98 percent cleaner emissions than the current model year's average vehicle. Electric-only vehicles and fuel-cell vehicles qualify as ZEVs.

Vehicles on the ZEV list are eligible for White Clean Air Vehicle Decals (allow single occupant HOV Lane Usage) through Jan. 1, 2019

AT-PZEVs & TZEVs (except non-plug-in hybrids)

Vehicles listed on page 2 are eligible for Green Clean Air Vehicle Decals (allow single occupant HOV Lane Usage) through Jan. 1, 2019.

The zero emission and plug-in vehicles are also eligible to receive incentives through the Clean Vehicle Rebate Project (AB 118). More information is available at www.cleanvehiclerebate.org.

*Approximate MPGe based on 2017 model year data; Tailpipe Carbon Footprint information based on vehicle driven 15,000 miles per year.

2017 Clean Air Choice Vehicles

Advanced Technology-Partial Zero-Emission Vehicles (AT-PZEVs) and (TZEVs)

AT-PZEV is an acronym for **Advanced Technology Partial Zero Emission Vehicle**. These are vehicles that meet the super ultra-low emission vehicle (SULEV) and PZEV tailpipe emissions requirements, but also include components on the cutting edge of technology that help to improve the fuel mileage of PZEVs. Hybrid drivetrain components are a good example. PZEVs run on gasoline, yet offer extremely clean SULEV tailpipe emissions with zero evaporative emissions and 150,000 mile emission warranty.

The term AT-PZEV is being replaced by the term **TZEV**, and is an acronym for **Transitional Zero Emission Vehicle**.

Advanced Technology-Partial Zero-Emission Vehicles (AT-PZEVs) and (TZEVs)

These gasoline-fueled hybrid (gasoline-electric) vehicles do not plug-in to recharge, and do not qualify for incentives, but they are certified to the same vehicle emission standards.
