---

Dear CSC Members,

The last email that staff sent included the South Coast AQMD presentation and Blank Community Emission Reduction Plan (CERP) action template.

The template is a "fillable" form which has been provided to all CSC members to provide any additional ideas they have for the CERP. South Coast AQMD staff has formatted it to streamline the feedback collection. Staff would like to meet with all stakeholders in person to make sure that more ideas are collected in this format.

We are also including the DRAFT Focused List of Actions to Address AQ Concerns with three DRAFT action examples as a guide to filling out the template.

- The first page of this document, includes a summarized focused list of DRAFT proposed actions based on community input for the CERP. This is still work in progress and CSC members may add, erase or modify the actions proposed. The following three pages are three filled out CERP action **template examples** are provided as a reference. These are not final and may also be modified by the CSC.

Please let us know if you have any questions. Looking forward to our meeting!

~ AB 617 Team
