

About this data

This file provides emissions information for all facilities within the Eastern Coachella Valley AB 617 community that report emissions to South Coast AQMD through the Annual Emissions Reporting (AER) program. The data shown are for the reporting year 2019.

The Annual Emissions Reporting (AER) program requires a facility to report annual emissions and pay applicable fees if it exceeds any of the criteria pollutant emission thresholds specified in Rule 301 (e). Amendments to Rule 301 last year also made reporting explicitly applicable to facilities subject to AB 2588 or CARB's Criteria and Toxics Reporting Regulation (CTR).

CARB recently adopted the Criteria Pollutant and Toxics Emissions Reporting (CTR) regulation, which implements statewide annual reporting of criteria air pollutant and toxic air contaminant emissions data from facilities. This regulation will require additional facilities to report such emissions, so there may be additional facilities with reported emissions in future years.
