

Air Quality Standards Compliance Report (AQSCR)

Statistics for July-August 2010

Vol. 23, No. 4

July and August 2010 Air Quality

Air quality statistics in the South Coast Air Basin and the desert area of Coachella Valley in the Salton Sea Air Basin for the months of July and August are shown and summarized in the following tables and figure.

Table 1 (below) summarizes the maximum concentrations recorded and location of the maximum during July and August 2010. Figure 1 shows the location of the District's air monitoring stations in each source/receptor area. The source/receptor area names and numbers, air monitoring station numbers, and monthly air quality statistics for the South Coast Air Basin and the desert area of Coachella Valley monitoring areas for the months of July and August 2010 are summarized in Tables 2 and 3, respectively. The tables show maximum concentrations of the pollutants in each source/receptor area and number of days on which the locations monitored exceeded federal and/or state standards.

This bimonthly publication satisfies the requirements for reporting on air quality in the South Coast Air Basin set by California legislation (Chapter 1301, Statutes of 1987; Health and Safety Code Section 40451(d)), and supplies similar information for the areas of the Salton Sea Air Basin (Coachella Valley) served by the District.
