

Training

CalEEMod & GHG Mitigation

May 18, 2012
9 a.m.- noon
Monterey Bay
Unified APCD
24580 Silver Cloud Ct.
Monterey, CA
93940

Sponsored by:

CAPCOA

**Monterey Bay Unified Air Pollution Control District
California Chapter of the American Planning Association**

You have been INVITED!

On **May 18, 2012**, the Monterey Bay Unified Air Pollution Control District (MBUAPCD) will co-host a training class for the new **California Emission Estimator Model (CalEEMod)** at the MBUAPCD Board Room. CalEEMod is the newest statewide computer emissions estimating model developed by the South Coast Air Quality Management District in collaboration with other California air districts. The model calculates criteria pollutant and greenhouse gas (GHG) emissions from a variety of land uses, including residential and commercial projects. CalEEMod also calculates both direct and indirect GHG emissions from energy use, water conveyance, wastewater treatment and vegetation planting/removal. In addition, the model calculates the benefits from implementing mitigation measures, including GHG mitigation, in a project. The model was released in February 2011 and air districts throughout the state are recommending the use of this model for air quality analysis. Air quality analysis is necessary for compliance with the California Environmental Quality Act (CEQA), National Environmental Policy Act (NEPA) and useful for pre-project planning and showing compliance with local air quality rules and regulations.

The training will benefit those who would use the model, such as government agencies, land use planners, consultants and environmental professionals required to quantify and review air emissions associated with the construction and operation of a land use or transportation project. **The training is free of charge and does not require a reservation in advance.** The training will include an overview of the model, a detailed hands-on demonstration of the operation, user tips and an explanation of the quantification of the GHG mitigation measures derived from a document prepared by the California Air Pollution Control Officers Association (CAPCOA).

The model is also free of charge and can be downloaded onto your computer. The model files, User's Guide, user's tips, frequently asked questions, etc. can be accessed at www.caleemod.com.

Friday, May 18, 2012

9:00 a.m. to noon

MBUAPCD Board Room (limited seating so come early!)

24580 Silver Cloud Court, Monterey, CA 93940

The training is being held throughout California and is sponsored by **CAPCOA**, your **local air district**, and the **California Chapter of the American Planning Association (CCAPA)**. CCAPA is working on providing CM credits for planners who attend this training. Please sign-in and fill out evaluation form at the training.
