The South Coast Air Quality Management District (SCAQMD) staff appreciates the opportunity to comment on the above-mentioned document. The following comments are meant as guidance for the Lead Agency and should be incorporated into the Final MND.

SCAQMD Staff’s Summary of Project Description
The Lead Agency proposes to subdivide 4.65 acres of vacant land and construct 29 single-family residences (“Proposed Project”). The Proposed Project is bounded by residential development to the north, east, and west and commercial development to the south. Based on a review of aerial photographs, the Proposed Project would be located approximately 100 feet from a gasoline dispensing station. Construction is expected to begin in 2017 and be completed over a period of approximately 256 days.

Health Risk Assessment due to the Proposed Project’s Proximity to a Gasoline Dispensing Station
Based on the project description, future residents at the Proposed Project would be exposed to toxic emissions from the gasoline dispensing station. Therefore, SCAQMD staff recommends that the Lead Agency conduct a Health Risk Assessment (HRA) to disclose the potential health risks to the people who will live and work at the Proposed Project. Guidance for performing a gasoline dispensing station HRA (“Emission Inventory and Risk Assessment Guidelines for Gasoline Dispensing Stations”) can be found at: http://www.aqmd.gov/docs/default-source/planning/risk-assessment/gas_station_hra.pdf.

Guidance on Siting Sensitive Receptors Near Sources of Air Pollution
SCAQMD staff recognizes that there are many factors Lead Agencies must consider when making local planning and land use decisions. To facilitate stronger collaboration between Lead Agencies and SCAQMD to reduce community exposure to source-specific and cumulative air pollution impacts, SCAQMD adopted the Guidance Document for Addressing Air Quality Issues in General Plans and Local Planning¹ in 2005. Additionally, the California Air Resources Board’s (CARB) Air Quality and Land Use Handbook: A Community Health Perspective² recommends avoiding siting residences within 300 feet of a large gas station or 50 feet for a typical gas station. These Guidance documents provide recommended policies that local governments can use in their General Plans or through local planning to prevent or reduce potential air pollution impacts and protect public health. SCAQMD staff recommends that the Lead Agency review and consider these Guidance documents when making local planning and land use decisions.

Pursuant to CEQA Guidelines Section 15074, prior to approving the Proposed Project, the Lead Agency shall consider the MND for adoption together with any comments received during the public review process. SCAQMD staff is available to work with the Lead Agency to address any air quality questions that may arise from this comment letter. Please contact Ryan Bañuelos, Air Quality Specialist, CEQA Section, at (909) 396-3479, if you have any questions.

Sincerely,

Lijin Sun
