**Negative Declaration (ND) for the Proposed Installation, Use and Maintenance of a Wireless Telecommunications Facility Project at 11822 Burke St. (Verizon Wireless Valla Monopine)**

The South Coast Air Quality Management District (SCAQMD) staff appreciates the opportunity to comment on the above-mentioned document both as a commenting agency and a responsible agency. The following comments are meant as guidance for the Lead Agency and should be incorporated into the Final ND.

In the project description, the Lead Agency proposes the installation, operation, and maintenance of wireless telecommunications facility consisting of a 12 panel antennas, 12 remote radio units, two raycaps, cabinets, and generator. If the proposed project includes a diesel-fueled generator which is rated greater than 50 brake horsepower (bhp), a permit would be required in accordance with SCAQMD rules including Rule 1470 – Requirements for Stationary Diesel-Fueled Internal Combustion and Other Compression Initial Engines and Rule 1110.2 – Emissions From Gaseous- and Liquid-Fueled Engines. If there are permit questions concerning the generator, they can be directed to Engineering and Compliance Staff at (909) 396-2315. Additionally, in the event that the diesel-fueled generator is in close proximity to sensitive receptors, the SCAQMD staff recommends that the Lead Agency evaluate, quantify, and perform a health risk assessment.

Please provide SCAQMD with written responses to all comments contained herein prior to the adoption of the Final ND. The SCAQMD staff is available to work with the Lead Agency to address these issues and any other air quality questions that may arise. If you have any questions regarding the comments, please contact Jack Cheng, Air Quality Specialist, CEQA IGR, at (909) 396-2448.

Sincerely,

*Lijin Sun*
