IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. If a portion of the plan revision meets all the applicable requirements of this chapter and Federal regulations, the Administrator may approve the plan revision in part. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices that meet the criteria of the Act, and to disapprove state choices that do not meet the criteria of the Act. Accordingly, this proposed action approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

• Is not a “significant regulatory action” subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
• Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.);
• Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
• Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4); and
• Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
• Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
• Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
• Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act;
• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994); and
• This rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

Authority: 42 U.S.C. 7401 et seq.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

Disapproval of Implementation Plan Revisions; State of California; South Coast VMT Emissions Offset Demonstrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to withdraw its final approvals of state implementation plan revisions submitted by the State of California to meet the vehicle-miles-traveled emissions offset requirement under the Clean Air Act for the Los Angeles-South Coast Air Basin 1-hour and 8-hour ozone nonattainment areas. EPA is also proposing to disapprove the same plan revisions. EPA is proposing the withdrawal and disapproval actions in response to a remand by the Ninth Circuit Court of Appeals in Association of Irritated Residents v. EPA. The effect of this action, if finalized as proposed, would be to trigger deadlines by which new plan revisions meeting the applicable requirements must be submitted by the State of California and approved by EPA to avoid sanctions and to avoid an obligation on EPA to promulgate a federal implementation plan.

DATES: Written comments must be received on or before October 19, 2012.

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2012–0713, by one of the following methods:
B. South Coast Ozone Designations and Classifications and Related SIP Revisions
C. Litigation on EPA’s Final Action on 2003 South Coast 1-Hour Ozone SIP
D. Litigation on EPA’s Final Action on 2007 South Coast 8-Hour Ozone SIP
II. Proposed Withdrawal of Previous Approvals, and Proposed Disapproval, of VMT Emissions Offset Demonstrations
III. Proposed Action and Request for Public Comment
IV. Statutory and Executive Order Reviews

I. Background
A. Regulatory Context

The Clean Air Act (CAA or Act) requires EPA to establish national ambient air quality standards (NAAQS or “standards”) for certain widespread pollutants that cause or contribute to air pollution that is reasonably anticipated to endanger public health or welfare (see sections 108 and 109 of the CAA).

In 1979, under section 109 of the CAA, EPA established a primary health-based NAAQS for ozone \(^1\) at 0.12 parts per million (ppm) averaged over a 1-hour period. See 44 FR 8202; (February 8, 1979). The Act, as amended in 1990, required EPA to designate as nonattainment any area that had been designated as nonattainment before the 1990 Amendments [section 107(d)(1)(C) of the Act; 56 FR 56694; (November 6, 1991)]. The Act further classified 1-hour ozone nonattainment areas, based on the severity of their nonattainment problem, as Marginal, Moderate, Serious, Severe, or Extreme.

The control requirements and date by which attainment of the 1-hour ozone standard was to be achieved varied with an area’s classification. Marginal areas were subject to the fewest mandated control requirements and had the earliest attainment date, November 15, 1993, while Extreme areas were subject to the most stringent planning requirements and were provided the most time to attain the standard, until November 15, 2010. The various ozone planning requirements to which Extreme ozone nonattainment areas are subject are set forth in section 172(c) and section 182(a)–(e) of the CAA.

\(^{1}\)Ground-level ozone or smog is formed when oxides of nitrogen (NO\(_x\)), volatile organic compounds (VOC), and oxygen react in the presence of sunlight, generally at elevated temperatures. Strategies for reducing smog typically require reductions in both VOC and NO\(_x\) emissions. Ozone causes serious health problems by damaging lung tissue and sensitizing the lungs to other irritants. When inhaled even at very low levels, ozone can cause acute respiratory problems, aggravate asthma, temporary decreases in lung capacity of 15 to 20 percent in healthy adults, inflammation of lung tissue, lead to hospital admissions and emergency room visits, and impair the body’s immune system defenses, making people more susceptible to respiratory illnesses, including bronchitis and pneumonia.

Instructions: All comments will be included in the public docket without change and may be made available online at http://www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through http://www.regulations.gov or email. The http://www.regulations.gov Web site is an “anonymous access” system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: The index to the docket for this action is available electronically on the http://www.regulations.gov Web site and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California 94105. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (e.g., copyrighted material), and some may not be publicly available at either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the FOR FURTHER INFORMATION CONTACT section below.

SUPPLEMENTARY INFORMATION:
Throughout this document, “we,” “us” and “our” refer to EPA.

Table of Contents
I. Background
A. Regulatory Context

\(^{2}\)In 2008, EPA tightened the 8-hour ozone NAAQS to 0.075 ppm, see 73 FR 38885; (July 18, 1997). We promulgated final rules to implement the 1997 8-hour ozone standard in two phases. The “Phase 1” rule, which was issued on April 30, 2004 (69 FR 23951) establishes, among other things, the requirements arising from the classifications and designation of the South Coast with respect to the 1979 1-hour ozone and 1997 8-hour ozone standards.

\(^{1}\)In 2003, EPA replaced the 1-hour ozone standard with an 8-hour ozone standard of 0.08 ppm. See 62 FR 38856; (July 18, 1997).
classification structure and corresponding attainment deadlines, as well as the anti-backsliding principles for the transition from the 1-hour ozone standard to the 8-hour ozone standard. For an area that was designated nonattainment for the 1-hour ozone standard at the time when EPA designated it as nonattainment for the 1997 8-hour ozone standard as part of the initial 8-hour ozone designations, most of the requirements that had applied by virtue of the area’s classification for the 1-hour ozone standard continue to apply even after revocation of the 1-hour ozone standard (which occurred in June 2005 for most areas). See 40 CFR 51.905(a)(1) and 40 CFR 51.900(f). Thus, for example, an area that was designated nonattainment and classified as Extreme for the 1-hour ozone standard at the time of an initial designation of nonattainment for the 8-hour standard remains subject to the VMT emissions offset requirement under CAA section 182(d)(1)(A) for the 1-hour ozone NAAQS even if the area would not otherwise have been subject to that particular requirement based on the area’s classification for the 1997 8-hour ozone standard. See 40 CFR 51.905(a)(1) and 40 CFR 51.900(f)(11).

The Phase 2 rule, which was issued on November 29, 2005 (70 FR 71612), addresses the SIP obligations for the 1997 8-hour ozone standard. Under the Phase 2 rule, an area that is designated as nonattainment for the 1997 8-hour ozone standard, and classified under subpart 2 (of part D of title I of the CAA), is subject to the requirements of subpart 2 that apply for that classification. See 40 CFR 51.902(a).

Among the requirements for areas classified as Severe or Extreme for the 1997 8-hour ozone standard is the VMT emissions offset requirement under CAA section 182(d)(1)(A).

B. South Coast Ozone Designations and Classifications and Related SIP Revisions

As noted above, the CAA, as amended in 1990, required EPA to designate as nonattainment any area that had been designated as nonattainment before the 1990 Amendments. The CAA also required EPA to classify nonattainment areas as Marginal, Moderate, Serious, Severe, or Extreme depending upon the design value of the area. On November 6, 1991, EPA designated the Los Angeles-South Coast Air Basin Area (“South Coast”) as nonattainment and classified it as Extreme for the 1-hour ozone standard; thus the area had an attainment date no later than November 15, 2010 (56 FR 56694).

The California Air Resources Board (CARB) has submitted a number of SIP revisions over the years for the South Coast Air Basin to address 1-hour ozone SIP planning requirements. Specifically, in 1994, CARB submitted a 1-hour ozone SIP that, among other things, included for the South Coast an attainment demonstration, ROP demonstrations, and transportation control measures (TCMs). In 1997, EPA approved the 1994 Ozone SIP as it applied to the South Coast for the 1-hour standard. See 62 FR 1150; (January 8, 1997).

In 1997 and 1999, CARB submitted revisions to the 1994 South Coast 1-Hour Ozone SIP, including revised ROP demonstrations, and a revised attainment demonstration (“1997/1999 South Coast 1-Hour Ozone SIP”). See 65 FR 18903; (April 10, 2000). In 2004, CARB submitted revisions to the 1997/1999 South Coast 1-Hour Ozone SIP (“2003 South Coast 1-Hour Ozone SIP”). In 2008, the 2003 South Coast 1-Hour Ozone SIP was supplemented by submittal of a VMT emissions offset demonstration 4 that was intended to comply with the VMT emissions offset requirement by showing that there would be no upturn in emissions between the area’s base year for the SIP revision and the area’s attainment year. In 2009, EPA disapproved the revised ROP demonstrations and attainment demonstration in the 2003 South Coast 1-Hour Ozone SIP, but approved the VMT emissions offset demonstration that had been submitted in 2008. 74 FR 10176; (March 10, 2009).5

With respect to the 1997 8-hour standard, EPA designated the South Coast as nonattainment and classified the area as “Severe-17,” but later approved a request by California to reclassify the South Coast to “Extreme.”

4 Letter from Elaine Chang, Deputy Executive Officer, South Coast Air Quality Management District, dated September 10, 2008, approved at 40 CFR 52.226(c)(1)(2).

5 In response to comments on EPA’s proposed rule to partially approve and partially disapprove the 2003 South Coast 1-Hour Ozone SIP, EPA indicated that the second and third elements of CAA section 182(d)(1)(A) were satisfied in 1997 when EPA approved the 1994 South Coast 1-Hour Ozone SIP’s transportation control strategies and TCMs, such as TCM-1 (“Transportation Improvements”), which includes the capital and non-capital facilities, projects, and programs contained in the Regional Mobility Element and programmed through the Regional Transportation Improvement Program (RTIP) process to reduce emissions, in the same action in which EPA approved the South Coast ROP and attainment demonstrations. See 74 FR 10176, at 10176; (March 10, 2009).

6 See pages 6–23 and 6–27 (table 6–12) of the Final 2007 Air Quality Management Plan, June 2007, prepared by the South Coast Air Quality Management District.
amended on January 27, 2012, 666 F.3d 668, further amended February 13, 2012 ("AIR v. EPA"). Based on this reasoning, the court remanded the approval of the VMT emissions offset demonstration back to EPA for further proceedings consistent with the opinion. In May 2011, EPA filed a petition for panel rehearing requesting the court to reconsider its decision as to the VMT emissions offset requirement. In January 2012, the court denied the request and issued the mandate shortly thereafter.

D. Litigation on EPA’s Final Action on 2007 South Coast 8-Hour Ozone SIP

As of December 15, 2011, the time of signature on the final rule approving the 2007 South Coast 8-hour Ozone SIP, the court had not yet responded to our petition for panel rehearing in AIR v. EPA. Notwithstanding adverse comments on the proposed approval of the VMT emissions offset demonstration in the 2007 South Coast 8-Hour Ozone SIP, EPA proceeded to approve the demonstration on the basis of the same rationale that had been rejected by the Ninth Circuit in connection with the VMT emissions offset demonstration submitted as part of the 2003 South Coast 1-Hour Ozone SIP. The final rule was ultimately published on March 1, 2012 (77 FR 12674). Shortly thereafter, several environmental and community groups filed a lawsuit in the Ninth Circuit challenging that approval. Communities for a Better Environment, et al. v. EPA, No. 12–71340.

II. Proposed Withdrawal of Previous Approvals, and Proposed Disapproval, of VMT Emissions Offset Demonstrations

As noted above, the Ninth Circuit rejected EPA’s long-standing interpretation of the first element of section 182(d)(1)(A) that states could demonstrate compliance with the VMT emissions offset requirement through submittal of aggregate motor vehicle emissions estimates showing year-over-year declines in such emissions. These demonstrations formed the basis for our consideration and approval of the section 182(d)(1)(A) VMT emissions offset demonstrations submitted in connection with the 2003 South Coast 1-Hour Ozone SIP and the 2007 South Coast 8-Hour Ozone SIP. In response to the court’s rejection of our interpretation of the Act and its demand of our action approving the VMT emissions offset demonstration for the 1-hour ozone standard, we are proposing to withdraw our previous approval of the VMT emissions offset demonstration in our March 8, 2009 final action on the 2003 South Coast 1-Hour Ozone SIP. Second, we are proposing to withdraw our March 1, 2012 approval of the portion of the 2007 South Coast 8-Hour Ozone SIP that was submitted to address the VMT emissions offset requirement of CAA section 182(d)(1)(A).

Withdrawal of our approvals of the two section 182(d)(1)(A) demonstrations would remove them from the California SIP and we would be obligated to take action on them under section 110(k), unless the State were to also withdraw the demonstrations from their submissions to us. To date, the State has not withdrawn these demonstrations. Therefore, in this action, we are proposing to disapprove them. Specifically, we are proposing to disapprove the demonstrations submitted by California to demonstrate compliance with the VMT emissions offset requirement under CAA section 182(d)(1)(A) with respect to the 1-hour and 8-hour ozone standards because they are predicated on EPA’s previous interpretation of section 182(d)(1)(A) that has been rejected by the Ninth Circuit. The demonstrations are not consistent with the court’s ruling on the requirements of section 182(d)(1)(A) because they fail to identify, compared to a baseline assuming no VMT growth, the level of increased emissions resulting solely from VMT growth and to show how such increased emissions have been offset through adoption and implementation of transportation control strategies and transportation control measures.

III. Proposed Action and Request for Public Comment

EPA is proposing to withdraw and to disapprove our final approvals of SIP revisions submitted by the State of California to demonstrate compliance with the VMT emissions offset requirement under CAA section 182(d)(1)(A) with respect to the 1-hour and 8-hour ozone standards in the South Coast nonattainment area. EPA is proposing this action in response to a decision of the Ninth Circuit in AIR v. EPA. Under section 110(k) of the Clean Air Act, we are proposing to disapprove these same plan elements because they reflect an approach to showing compliance with section 182(d)(1)(A) that was rejected by the court as inconsistent with the CAA section 182(d)(1)(A) VMT emissions offset requirement. Should we finalize the disapproval proposed here, the offset sanction in CAA section 179(b)(2) would apply in the South Coast ozone nonattainment area 18 months after the effective date of the final disapproval. The highway funding sanctions in CAA section 179(b)(1) would apply in the area six months after the offset sanction is imposed. These sanctions will apply unless we take final action approving SIP revisions meeting the relevant requirements of the CAA prior to the time the sanctions would take effect. If we propose approval of a SIP revision meeting the relevant requirements of the CAA and determine at that time that it is more likely than not the deficiency has been corrected, sanctions would be deferred. See 40 CFR 52.31 which sets forth when sanctions apply and when they may be stopped or deferred.

In addition to the sanctions, CAA section 110(c) provides that EPA must promulgate a federal implementation plan addressing the deficiency that is the basis for this disapproval two years after the effective date of the disapproval unless we have approved a revised SIP before that date.

We are soliciting comments on these proposed actions. Comments will be accepted for 30 days following publication of this proposal in the Federal Register. We will consider all comments in our final rulemaking.

IV. Statutory and Executive Order Reviews

A. Executive Order 12988, Regulatory Planning and Review

The Office of Management and Budget (OMB) has exempted this regulatory action from Executive Order 128665, entitled “Regulatory Planning and Review.”

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. Burden is defined at 5 CFR 1320.3(b).

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small governmental jurisdictions.

This rule will not have a significant impact on a substantial number of small entities because SIP approvals or disapprovals under section 110 and subchapter I, part D of the Clean Air Act do not create any new requirements but simply approve or disapprove...
requirements that the State is already imposing. Therefore, because the
proposed withdrawal of previous approvals of certain SIP revisions, and
proposed disapproval of the same, do not create any new requirements, I
certify that this proposed action will not have a significant economic impact on
a substantial number of small entities. Moreover, due to the nature of the
Federal-State relationship under the Clean Air Act, preparation of flexibility
analysis would constitute Federal
inquiry into the economic
reasonableness of State action. The
Clean Air Act forbids EPA to base its
actions concerning SIPs on such
grounds. Union Electric Co., v. U.S.
EPA, 427 U.S. 246, 255–66 (1976); 42

D. Unfunded Mandates Reform Act

Under section 202 of the Unfunded Mandates Reform Act of 1995
("Unfunded Mandates Act"), signed
into law on March 22, 1995, EPA must
prepare a budgetary impact statement to
accompany any proposed or final rule
that includes a Federal mandate that
may result in estimated costs to State,
local, or tribal governments in the
aggregate; or to the private sector, of
$100 million or more. Under section
205, EPA must select the most cost-
effective and least burdensome
alternative that achieves the objectives
of the rule and is consistent with
statutory requirements. Section 203
requires EPA to establish a plan for
informing and advising any small

governments, or to the private sector,
result from this proposed action.

E. Executive Order 13132, Federalism

Federalism (64 FR 43255, August 10,
1999) revokes and replaces Executive
Orders 12612 (Federalism) and 12875
(Enhancing the Intergovernmental
Partnership). Executive Order 13132
requires EPA to develop an accountable
process to ensure “meaningful and timely
input by State and local officials
in the development of regulatory
policies that have federalism
implications.” “Policies that have
federalism implications” is defined in
the Executive Order to include
regulations that have “substantial direct
effects on the States, on the relationship
between the national government and
the States, or on the distribution of
power and responsibilities among the
various levels of government.” Under
Executive Order 13132, EPA may not
issue a regulation that has federalism
implications, that imposes substantial
direct compliance costs, and that is not
required by statute, unless the Federal
government provides the funds
necessary to pay the direct compliance
costs incurred by State and local
governments, or EPA consults with
State and local officials early in the
process of developing the proposed

This rule will not have substantial
direct effects on the States, on the
relationship between the national
government and the States, or on the
distribution of power and
responsibilities among the various
levels of government, as specified in
Executive Order 13132, because it
merely proposes to withdraw previous
approvals of certain SIP revisions
implementing a Federal standard, and
proposes disapproval of the same, and
does not alter the relationship or the
distribution of power and
responsibilities established in the Clean
Air Act. Thus, the requirements of
section 6 of the Executive Order do not
apply to this rule.

F. Executive Order 13175, Coordination
With Indian Tribal Governments

Executive Order 13175, entitled
“Consultation and Coordination with
Indian Tribal Governments” (65 FR
62749, November 9, 2000), requires EPA
to develop an accountable process to
ensure “meaningful and timely input by
tribal officials in the development of
regulatory policies that have tribal
implications.” This proposed rule does
not have tribal implications, as specified in
Executive Order 13175. It will not
have substantial direct effects on tribal
governments, on the relationship
between the Federal government and
Indian tribes, or on the distribution of
power and responsibilities between the
Federal government and Indian tribes.
Thus, Executive Order 13175 does not
apply to this proposed rule.

G. Executive Order 13045, Protection of
Children From Environmental Health
Risks and Safety Risks

EPA interprets Executive Order 13045
(62 FR 19885, April 23, 1997) as
applying only to those regulatory
actions that concern health or safety
risks, such that the analysis required
under section 5–501 of the Executive
Order has the potential to influence the
regulation. This rule is not subject to
Executive Order 13045, because it
proposes to withdraw previous
approvals of certain SIP revisions
implementing a federal standard, and
proposes disapproval of the same.

H. Executive Order 13211, Actions That
Significantly Affect Energy Supply,
Distribution, or Use

This proposed rule is not subject to
Executive Order 13211, “Actions
Concerning Regulations That
Significantly Affect Energy Supply,
Distribution, or Use” (66 FR 28355, May
22, 2001) because it is not a significant
regulatory action under Executive Order
12866.

I. National Technology Transfer and
Advancement Act

Section 12 of the National Technology
Transfer and Advancement Act
(NTTAA) of 1995 requires Federal
agencies to evaluate existing technical
standards when developing a new
regulation. To comply with NTTAA,
EPA must consider and use “voluntary
consensus standards” (VCS) if available
and applicable when developing
programs and policies unless doing so
would be inconsistent with applicable
law or otherwise impractical.

The EPA believes that VCS are
inapplicable to this proposed action.
Today’s proposed action does not
require the public to perform activities
conducive to the use of VCS.

J. Executive Order 12898: Federal
Actions To Address Environmental
Justice in Minority Populations and
Low-Income Population

Executive Order (EO) 12898 (59 FR
7629 (Feb. 16, 1994)) establishes federal
executive policy on environmental
justice. Its main provision directs
federal agencies, to the greatest extent
practicable and permitted by law, to
make environmental justice part of their
mission by identifying and addressing,
as appropriate, disproportionately high
and adverse human health or
environmental effects of their programs,
policies, and activities on minority
populations and low-income
populations in the United States.

EPA lacks the discretionary authority
to address environmental justice in this
ENVIRONMENTAL PROTECTION AGENCY

Finding of Substantial Inadequacy of Implementation Plan; Call for California State Implementation Plan Revision; South Coast

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: In response to a remand by the Ninth Circuit Court of Appeals, and pursuant to the Clean Air Act, EPA is proposing to find that the California State Implementation Plan (SIP) for the Los Angeles-South Coast Air Basin (South Coast) is substantially inadequate to comply with the obligation to adopt and implement a plan providing for attainment of the 1-hour ozone standard. If EPA finalizes this proposed finding of substantial inadequacy, California would be required to revise its SIP to correct these deficiencies within 12 months of the effective date of our final rule. If EPA finds that California has failed to submit a complete SIP revision as required by a final rule or if EPA disapproves such a revision, such finding or disapproval would trigger clocks for mandatory sanctions and an obligation for EPA to impose a Federal Implementation Plan. EPA is also proposing that if EPA makes such a finding or disapproval, sanctions would apply consistent with our regulations, such that the offset sanction would apply 18 months after such finding or disapproval and highway funding restrictions would apply six months later unless EPA first takes action to stay the imposition of the sanctions or to stop the sanctions clock based on the State curing the SIP deficiencies.

DATES: Written comments must be received on or before October 19, 2012.

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2012–0721, by one of the following methods:

• Email: tax.wienke@epa.gov.
• Mail or deliver: Wienke Tax, Air Planning Office, U.S. Environmental Protection Agency, Region 9, Mailcode AIR–2, 75 Hawthorne Street, San Francisco, California 94105–3901.

Instructions: All comments will be included in the public docket without change and may be made available online at http://www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through http://www.regulations.gov or email. The http://www.regulations.gov Web site is an “anonymous access” system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: The index to the docket for this action is available electronically on the http://www.regulations.gov Web site and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California, 94105. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (e.g., copyrighted material), and some may not be publicly available at either location (e.g., CBI). To inspect the hard copy materials, please schedule an appointment during normal business hours with the contact listed in the FOR FURTHER INFORMATION CONTACT section below.

SUPPLEMENTARY INFORMATION: Throughout this document, “we,” “us” and “our” refer to EPA.

I. Background

A. Regulatory Context

The Clean Air Act (CAA or Act) requires EPA to establish national ambient air quality standards (NAAQS or “standards”) for certain widespread pollutants that cause or contribute to air pollution that is reasonably anticipated to endanger public health or welfare (see sections 108 and 109 of the CAA).

In 1979, under section 109 of the CAA, EPA established a primary health-based NAAQS for ozone at 0.12 parts per million (ppm) averaged over a 1-hour period. See 44 FR 8202 (February 8, 1979). The Act, as amended in 1990, required EPA to designate as nonattainment any area that had been designated as nonattainment before the 1990 Amendments [section 107(d)(1)(C) of the Act; 56 FR 56694; (November 6, 1991)]. The Act further classified these areas, based on the severity of their...
