Invalid means sample collected was invalid due to a variety of reasons such as loss of power, equipment malfunction, etc.  
 NS Means samplers were not operating due to a variety of reasons such as limited access, weather, samplers under repair, etc.  
 Site #1 was discontinued in 2013.

Sites #29 and 30 are located in northern Long Beach.

Additional monitoring data available for Sites #2 and #3 at: <http://www.aqmd.gov/home/regulations/compliance/air-monitoring-activities>

^ Sample does not count towards a three day sample average per conditions in the Stipulated Order of Abatement. See below for additional information

^^ Samplers owned by the City of Paramount were deployed with SCAQMD monitors. SCAQMD samplers and those owned by City of Paramount are rotated between sample locations for each sampling date.

^ Sampler owned by the City of Paramount.

\* Collocated sampler result, data from primary sampler was invalid.

\*\* Sampler located in the City of Long Beach

\*\*\* July 4th fireworks

† Non-routine source testing was being conducted on this sample day and SCAQMD sent recommended measures to Anaplex on ways to minimize potential fugitive emissions.

Date	Site #	Note
03/11/17	8	Neighborhood power outage which affected air pollution control devices. SCAQMD confirmed power outage with Southern California Edison. Aircraft to provide backup power remediation
07/15/17	14 & 15	Site #16 results did not meet the criteria for a reportable number; however, a winds analysis and the result at Site #16, which is partially upwind of Sites #14 and #15 for this date, is likely higher than those for Site #14 and #15 and therefore the results at Sites #14 and #15 do not trigger the curtailment action under the Stipulated Order of Abatement
