PROJECT: EXIDE TECHNOLOGIES FACILITY ID NO. 124868,
ORDER OF ABATEMENT CASE NO. 3151-32
RE: WEEKLY STATUS REPORT # 55 (9/24/15 – 9/30/15)

Dear Mr. Pupka,

Tetra Tech Inc. is pleased to present the following Weekly Status Report for the above referenced project. This report covers the period of September 24, 2015 through September 30, 2015.

CURRENT ACTIVITIES WHERE PREVIOUSLY APPROVED MITIGATION MEASURES WERE FULLY IMPLEMENTED

Major items of work performed by Exide and/or its contractor(s) (including specific mitigation measures) during this reporting period where mitigation measures were observed to be implemented in full compliance with the previously approved mitigation measures under the Mitigation Plan for RCRA RFI Sampling, and Other Plant Activities or other Mitigation Plans, as approved by the SCAQMD, at the site during this period include:

RCRA RFI Soil Sampling

Advanced Geoscience and their subcontractors Cascade Drilling and Avocet continued RCRA RFI Soil Sampling at an offsite location on Bandini Blvd. Offsite locations do not require oversight by Tetra Tech Inc. RCRA RFI Soil Sampling will continue into the next reporting period at other off-site locations.
Soil Sampling – 2nd Round Feed Room Enclosure

Advanced Geoscience and their subcontractors Cascade Drilling, Advanced Construction, and Avocet completed backfilling the second round of soil sampling locations in the feed room enclosure on Friday, September 25, 2015.

Verification activities included:

- Visual observation of the backfilling of the second round of Feed Room floor soil sampling locations for fugitive dust within the Total Enclosure Building.
- Verification that the Total Enclosure Building was maintained under negative pressure and vented to operational air pollution control equipment during all feed room floor soil sampling activities.
- Verification that all equipment was decontaminated before it was removed from the Total Enclosure Building.

**CURRENT ACTIVITIES WHERE A DEVIATION FROM PREVIOUSLY APPROVED MITIGATION MEASURES WERE OBSERVED AND THE CORRECTIVE ACTIONS TAKEN**

Major items of work performed by Exide and/or its contractor(s) (including specific mitigation measures) currently under way or completed during this reporting period where for each of the activities described below, mitigation measures were implemented which to some extent deviated from the previously approved mitigation measures under the Mitigation Plan for RCRA RFI Sampling, and Other Plant Activities or other Mitigation Plans, as approved by the SCAQMD:

In general accordance with the Order for Abatement Case No. 3151-32 Findings and Decision, air monitoring, if required, was conducted during a portion of all repair work performed within the temporary enclosures on a daily basis. If the results of continuous Dust Trak air monitoring detected excessive dust, additional suppression activities are required to be implemented. For this reporting period, Dust Trak monitoring did not detect excessive dust being generated from repair activities.
