**PROJECT: EXIDE TECHNOLOGIES FACILITY ID NO. 124838,  
ORDER OF ABATEMENT CASE NO. 3151-32**  
**RE: WEEKLY STATUS REPORT # 74 (2/4/16 – 2/10/16)**

---

Dear Ms. Snyder,

Tetra Tech Inc. is pleased to present the following Weekly Status Report for the above referenced project. This report covers the period of February 4, 2016 through February 10, 2016.

**CURRENT ACTIVITIES WHERE PREVIOUSLY APPROVED MITIGATION MEASURES WERE FULLY IMPLEMENTED**

Major items of work performed by Exide and/or its contractor(s) (including specific mitigation measures) during this reporting period where mitigation measures were observed to be implemented in full compliance with the previously approved mitigation measures under the Mitigation Plan for RCRA RFI Sampling, and Other Plant Activities or other Mitigation Plans, as approved by the SCAQMD, at the site during this period include:

TASK ID	Major Work Item	Mitigation Measure(s)
EX83/4	RCRA RFI Soil Sampling	Temporary Enclosure Under Negative Pressure
DTSC Ordered	Parking Lot Planter Soil Removal	Temporary Enclosure Under Negative Pressure*
DTSC Ordered	LA County Flood Control Open Channel Clean up	Temporary Enclosure Under Negative Pressure*

\* Dust Trak monitoring performed for this work item.

**RCRA RFI Soil Sampling**

No work occurred related to the RCRA RFI Soil Sampling. RCRA RFI Soil Sampling activities on the Exide property will continue once a revised scope of work to address changed field conditions is developed and approved by the regulatory agencies.

### Parking Lot Planter Soil Removal

On Thursday, February 4, 2016, Exide and its contractors began DTSC ordered work on the planter box located on the east side of Indiana Street north of the administrative offices. While an independent mitigation plan was not prepared for this task, fugitive dust mitigation methods were incorporated into the work plan which were observed and verified. Work related to the parking lot planter box soil removal began with Castlerock installing a temporary enclosure over the planter box on Thursday, February 4, 2016. On Friday, February 5, 2016, NRC began removal of shrubs and fencing. The debris was wrapped in plastic prior to removal from the temporary enclosure and disposed of as hazardous waste. NRC resumed activities on Monday, February 8, 2016 with the removal of soil. The soil was placed in drums within the temporary enclosure. By Wednesday, February 10, 2016 the soil removal was complete and the fencing was replaced. Castlerock will remove the temporary enclosure during the next reporting period. Tetra Tech personnel were onsite to monitor work related to the removal of soil from the parking lot planters including downwind Dust Trak monitoring.

Verification activities included:

- Visual observation of the installation activities to verify compliance with the DTSC and SCAQMD approved work plan.
- Downwind Dust Trak monitoring of the areas when activities were conducted, to monitor for fugitive dust emissions. Review of Dust Trak data did not indicate that work associated with securing the removal of soil from the parking lot planter was generating fugitive dust emissions.

### LA Flood Control Open Channel Clean Up

On Thursday, February 4, 2016, Exide and its contractors began DTSC ordered work on LA County Flood Control Open Channel Between 26<sup>th</sup> Street and Bandini Avenue. While an independent mitigation plan was not prepared for this task, fugitive dust mitigation methods were incorporated into the work plan which were observed and verified. Work related to the open channel began with liquid and sediment removal by NRC using a vacuum truck and 2 SCAQMD permitted HEPA backpack type vacuums began on Thursday, February 4, 2016. The sediment removal activities were conducted within temporary enclosures maintained under negative pressure. NRC will continue the open channel clean up activities into the next reporting period. Tetra Tech personnel were onsite to monitor work related to the removal of sediment from the channel including downwind Dust Trak monitoring.

Verification activities included:

- Visual observation of the installation activities to verify compliance with the DTSC and SCAQMD approved work plan.
- Downwind Dust Trak monitoring of the areas when activities were conducted, to monitor for fugitive dust emissions. Review of Dust Trak data did not indicate

that work associated with securing the removal of soil from the parking lot planter was generating fugitive dust emissions.

**CURRENT ACTIVITIES WHERE A DEVIATION FROM PREVIOUSLY APPROVED MITIGATION MEASURES WERE OBSERVED AND THE CORRECTIVE ACTIONS TAKEN**

Major items of work performed by Exide and/or its contractor(s) (including specific mitigation measures) currently under way or completed during this reporting period where for each of the activities described below, mitigation measures were implemented which to some extent deviated from the previously approved mitigation measures under the Mitigation Plan for RCRA RFI Sampling, and Other Plant Activities or other Mitigation Plans, as approved by the SCAQMD:

TASK ID	Major Work Item	Deviation(s)	CORRECTIVE ACTION
		None	

In general accordance with the Order for Abatement Case No. 3151-32 Findings and Decision, air monitoring, if required, was conducted during a portion of all repair work performed within the temporary enclosures on a daily basis. If the results of continuous Dust Trak air monitoring detected excessive dust, additional suppression activities are required to be implemented. For this reporting period, Dust Trak monitoring did not detect excessive dust being generated from repair activities.

Activity Which Resulted in Excessive Dust	Additional Suppression Activity
None	None

**ACTUAL vs. FORECAST PROGRESS:**

Exide Technologies submitted a schedule which outlines the tasks needed to be completed in response to this abatement order. The attached Gant Chart shows scheduled progress for all activities planned for the upcoming two week period. The following table shows the status of these activities.

TASK	STATUS
None	None

**WORK SCHEDULED DURING THE UPCOMING PERIOD:**

The following activities are anticipated for the upcoming weeks:

Week	Anticipated Activities
Feb. 11 – Feb. 17	<ul style="list-style-type: none"><li>• No Mitigation Work Scheduled</li></ul>

Week	Anticipated Activities
Feb. 18 - Feb. 24	<ul style="list-style-type: none"><li>• No Mitigation Work Scheduled</li></ul>

KEY MILESTONES:

The following key milestones were achieved during this reporting period:

- None at this time.

WORKER SAFETY CONCERNS:

The following Health and Safety issues, as they apply to Tetra Tech employees, were observed during this reporting period:

- None.

POTENTIAL CHANGES AND ACTION ITEMS REQUIRING RESOLUTION:

The following items require resolution:

- None at this time.

SUMMARY:

The summary provided herein covers the activities for the period of February 4, 2016 through February 10, 2016. Please note that while no Mitigation Plan related activities were scheduled, Tetra Tech was on-site to oversee DTSC ordered work that had the potential to generate fugitive dust. Please find attached a copy of Exide's upcoming two weeks schedule and site map identifying the location of the activities on the upcoming two weeks schedule.

Should you have questions regarding this report, or require additional information, please contact me at your earliest convenience.

Sincerely,

Nick Somogyi  
Project Engineer
