SCAQMD Continues Smoke Advisory Due to Multiple Wildfires

This advisory is in effect through Monday morning. SCAQMD will issue an update if additional information becomes available.

A wildfire, named the Valley Fire, is burning in San Bernardino County within the San Bernardino National Forest near Forest Falls. The burn area is currently reported to be approximated at 1,139 acres with five percent containment. Onshore flow will prevail throughout Sunday afternoon and then transition to downslope overnight. This will bring smoke into the central and east San Bernardino Valley and the Coachella Valley. There is a slight chance of thunderstorms this afternoon and evening. Any thunderstorms that develop in the area could cause conditions to change rapidly. Air quality may reach **Unhealthy for Sensitive Group** levels or higher in areas directly impacted by smoke.

Three brush fires are currently burning in the Camp Pendleton area in San Diego County. The Vandegrift Fire was last reported at 560 acres with seventy percent containment. The Horno Fire was last reported at 1,200 acres with thirty percent containment. And the 409 Fire was last reported at 40 acres with zero percent containment. Winds are expected to continue from the southwest throughout Sunday and overnight into Monday. This may bring smoke into south Orange County and the Lake Elsinore area at times. Air quality may reach **Unhealthy for Sensitive Group** levels or higher in areas directly impacted by smoke.

Areas of direct smoke impacts and Unhealthful air quality may include portions of:

- San Bernardino County: Areas 29 (Banning Pass Area), 34 (Central San Bernardino Valley), 35 (East San Bernardino Valley), 36 (West San Bernardino Mountains), 37 (Central San Bernardino Mountains), and 38 (Big Bear Lake)
- Orange County: Areas 19 (Saddleback Valley), 20 (Central Coastal Orange County), and 21 (Capistrano Valley)
- Riverside County: Areas 25 (Lake Elsinore) and 30 (Coachella Valley)

In any area impacted by smoke: Everyone should avoid any vigorous outdoor or indoor exertion; people with respiratory or heart disease, pregnant women, older adults, and children should remain indoors. Keep windows and doors closed or seek alternate shelter. Run your air conditioner if you have one and keep the fresh air intake closed and the filter clean to prevent bringing additional smoke inside. Avoid using a swamp cooler or whole-house fan to prevent

bringing additional smoke inside. To avoid worsening the health effects of smoke, don't use indoor or outdoor wood-burning appliances, including fireplaces.
