FOR IMMEDIATE RELEASE: October 30, 2019

South Coast AQMD Continues Smoke Advisory Due to Martinez Fire in City of Thermal

Valid: Weds., October 30, through Thurs. October 31, 2019

This advisory is in effect through Thursday morning. South Coast AQMD will issue an update if additional information becomes available.

A large debris fire called the Martinez Fire is burning near the intersection of Avenue 66 and Martinez Road in the city of Thermal in the Coachella Valley. The burn area is approximately 52 acres with 100% containment. Information on the fire can be found at https://inciweb.nwcg.gov/incident/6651/. Smoke from the fire has been impacting Thermal, La Quinta, and Mecca, as well as communities near the Salton Sea. The South Coast AQMD has deployed two temporary PM2.5 monitors west of the fire in Thermal and east of the fire in Mecca. Visit https://xappprod.aqmd.gov/SMSDataSite/Home/AdminIndex?MonitoringSiteld=13 to view current readings from the South Coast AQMD’s monitor in Thermal and https://xappprod.aqmd.gov/SMSDataSite/Home/AdminIndex?MonitoringSiteld=14 to view current readings from the South Coast AQMD’s monitor in Mecca.

Forecasted Smoke Impacts

- Winds are predicted to be from the north on Wednesday with wind gusts between 15 – 25 mph during the morning. This will push any smoke generated by the fire to the south towards the Salton Sea.
- On Wednesday evening and overnight into Thursday morning, winds are expected to be from the west and northwest, pushing smoke to the east and southeast towards Mecca, Desert Camp, and the Salton Sea. Elevated ground level concentrations of PM2.5 are expected in the early morning hours.
- After sunrise on Thursday morning, winds are expected to come from the south, pushing smoke to the north towards Thermal.

If the fire continues to generate smoke, impacts are expected to continue throughout the Coachella Valley.
Overall, meteorological conditions may bring smoke and ash into portions of the Coachella Valley. Air quality may reach Unhealthy for Sensitive Groups or higher in areas directly impacted by smoke.

**In any area impacted by smoke:** If you smell smoke or see ash due to a wildfire, limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter, and avoiding vigorous physical activity. For more tips on protecting yourself during a wildfire, see South Coast AQMD’s Wildfire Smoke & Ash Health & Safety Tips page: [http://www.aqmd.gov/wildfire-health-info-smoke-tips](http://www.aqmd.gov/wildfire-health-info-smoke-tips).

**Riverside County:** Coachella Valley (Area 30)

---

**Previous Smoke Impacts**

At the monitor in Thermal, since Tuesday afternoon, 24-hour average PM2.5 concentrations have been between 7.4 and 35.6 micrograms per cubic meter (ug/m³). The highest hourly concentrations are occurring on Wednesday morning, with a peak hourly concentration of 98 ug/m³. Peak air quality index values, calculated with the NOWCAST method, were in the Unhealthy category.

At the monitor in Mecca, since Tuesday afternoon, 24-hour average PM2.5 concentrations have been between 10.1 and 19.8 ug/m³. The highest hourly concentrations are occurring on Wednesday morning, with a peak hourly concentration of 164 ug/m³. Peak air quality index values, calculated with the NOWCAST method, were in the **Unhealthy** category.

Note that on Wednesday morning, the AQI due to PM10 concentrations, which are not related to the fire, reached the **Hazardous** category in the Coachella Valley.
