South Coast AQMD Issues Windblown Dust Advisory for Portions of Los Angeles County

Valid: Monday, April 11 through Tuesday, April 12, 2022

This advisory is in effect through 3:00 p.m. Tuesday. South Coast AQMD will issue an update if additional information becomes available.

A PM10 Dust Advisory is in effect from 6:00 p.m. Monday through 3:00 p.m. Tuesday due to high winds and dry conditions in Coastal and Central Los Angeles County, and the Santa Clarita, San Fernando, and San Gabriel Valleys. As of Monday morning, the National Weather Service (NWS) posted Wind Advisories through late Tuesday morning. For information regarding the NWS advisories, please visit the NWS Los Angeles/ Oxnard (<https://www.weather.gov/lox/>) website.

These conditions can lift dust and soil and lead to poor air quality. Blowing dust may result in **Moderate** and **Unhealthy for Sensitive Groups** or higher Air Quality Index (AQI) levels on Monday night and Tuesday. Air quality can vary hour by hour and by location depending on wind conditions.

In areas directly impacted by high levels of windblown dust, limit your exposure by remaining indoors with windows and doors closed and avoiding vigorous physical activity. Run your air conditioner or an air purifier. If temperatures allow, avoid using whole house fans or swamp coolers that bring in outside air. Exposure to high particle pollution levels can cause serious health problems, including asthma attacks, heart and lung disease symptoms, and increased risk of respiratory infections. People with heart or lung diseases should follow their doctor's advice for dealing with episodes of unhealthy air quality. Children, older adults, and people with respiratory or heart disease should avoid prolonged exposure and strenuous activities when particle pollution levels are high.

Areas of direct impacts and poor air quality may include portions of:

- **Los Angeles County:** Central Los Angeles (Area 1), Northwest Coastal LA County (Area 2), Southwest Coastal LA County (Area 3), South Coastal LA (Area 4), West San Fernando Valley (Area 6), East San Fernando Valley (Area 7), West San Gabriel Valley (Area 8), South Central Los Angeles County (Area 12), Santa Clarita Valley (Area 13)

In areas directly impacted by windblown dust: Limit your exposure by remaining indoors with windows and doors closed and avoiding vigorous physical activity.
