South Coast AQMD Issues a Windblown Dust Advisory for Portions of Riverside and San Bernardino Counties

Valid: Tuesday, November 15 through Wednesday, November 16, 2022

This advisory is in effect through 10 PM Wednesday. South Coast AQMD will issue an update if additional information becomes available.

A PM10 Dust Advisory is in effect from 8 p.m. today through 10 p.m. Wednesday due to a strong Santa Ana wind event in most of the Inland Empire, the Coachella Valley and eastern Riverside County. As of Tuesday afternoon, the National Weather Service (NWS) has posted High Wind Warnings and Wind Advisories for these areas. For information regarding the NWS warnings and advisories, please visit the NWS San Diego (<https://www.weather.gov/sgx/>) and NWS Phoenix (<https://www.weather.gov/psr/>) websites.

These winds can lift dust and soil and lead to poor air quality. Air quality categories will vary from **Moderate** to **Unhealthy** or higher, mostly on Wednesday. The most significant impacts are expected below passes and in the foothills of the Inland Empire. Air quality can vary hour by hour and by location depending on wind conditions.

Exposure to high particle pollution levels can cause serious health problems, including asthma attacks, heart and lung disease symptoms, and increased risk of respiratory infections. People with heart or lung diseases should follow their doctor's advice for dealing with episodes of unhealthy air quality. Children, older adults, and people with respiratory or heart disease should avoid prolonged exposure and strenuous activities when particle pollution levels are high. Run your air conditioner or an air purifier. If temperatures allow, avoid using whole house fans or swamp coolers that bring in outside air.

Areas of direct impacts and poor air quality may include portions of:

- **Riverside County:** Corona-Norco (Area 22), Metropolitan Riverside County (Area 23), Perris Valley (Area 24), Lake Elsinore (Area 25), Temecula Valley (Area 26), Anza Valley (Area 27), Hemet-San Jacinto Valley (Area 28), San Geronio Pass (Area 29), Coachella Valley (Area 30), East Riverside County (Area 31)
- **San Bernardino County:** Central San Bernardino Valley (Area 34), East San Bernardino Valley (Area 35)

In areas directly impacted by windblown dust: Limit your exposure by remaining indoors with windows and doors closed and avoiding vigorous physical activity.
