## **INTRODUCTION**

The Annual Emissions Reporting (AER) Program provides facilities that are subject to Rule 301(e) with a new computer tool (AER Reporting Tool) to estimate emissions for criteria pollutants (VOC, NO<sub>x</sub>, SO<sub>x</sub>, CO and PM), Specific Organic Compounds (HFC & HCFC) and toxic air contaminants/ozonedepleting compounds (TAC/ODC) and prepare the annual emission reports.

### **AER Reporting Tool Features**

**Work at your own pace** - Users can stop a session anytime. Entered and saved data is automatically stored and will remain in the South Coast AQMD's central database. Users will be logged out automatically if a session is inactive for a long period.

**Security** - Only registered users will be able to use the AER Reporting Tool. Facility ID# and PIN Code are required to access facility information.

**Flexibility** - The AER Reporting Tool allows a single user to access multiple facilities with separate ID#'s and PIN codes. Likewise, multiple users can concurrently work on different sections of an emission report for a single facility.

**Ease of Access** - AER Reporting Tool is a web-based program that allows users access to the reporting process using a personal computer from anywhere with an internet connection. Please check "Internet Browser Requirements" below for compatibility.

**Ease of Navigation** - Users can navigate to different sections of an emissions report and check the reporting progress.

**Emissions Sources** - The AER Reporting Tool uploads permitted equipment as Emission Sources (ES). The permit profile contains devices identified by ES# and, sometimes, other information such as Permit Device ID (starting with D, C or E), Permit Number (Permit NO), Application Number (A/N).

**Default Emission Factors** - The AER Reporting Tool contains default emission factors for certain limited types of operations/processes/equipment. Additional default factors are available in a separate guidance document posted on the South Coast AQMD [AER web page](#). Default emission factors should only be used when source-specific data is not available or report is qualified and submitted as Abbreviated Report in case 2022 and future data year reports.

**Importing of Tank Emissions** - Users may import batch emissions data from liquid storage tanks using EPA's TANKS format. Storage tanks must be properly identified with the ES# matching those listed in the facility permit profile. Detailed guidelines are available on the AER web page on how to import the results into the AER reporting tool.

**Importing of Previous Year Data** - This command is available on the AER Reporting Tool Home Page for importing and merging previous year's emissions data with current uploaded permit profile, with exception to throughput data.

**Export to Excel** - This command is available for users to export all emission sources and process data into an Excel spreadsheet.

**Reporting Emissions from Similar Equipment** - The AER Reporting Tool allows the user to build a model for one emission source (i.e., combustion equipment) and apply it to similar emission sources in order to minimize redundant data entry. For detailed instructions and restrictions, see the document titled "Guidelines for Reporting Emissions from Multiple Identical Devices/Equipment."

**On-line Help and Support** – Available in electronic form. No more hard-copy guidelines to thumb through.

### **Internet Browser Requirements**

Supported browsers:

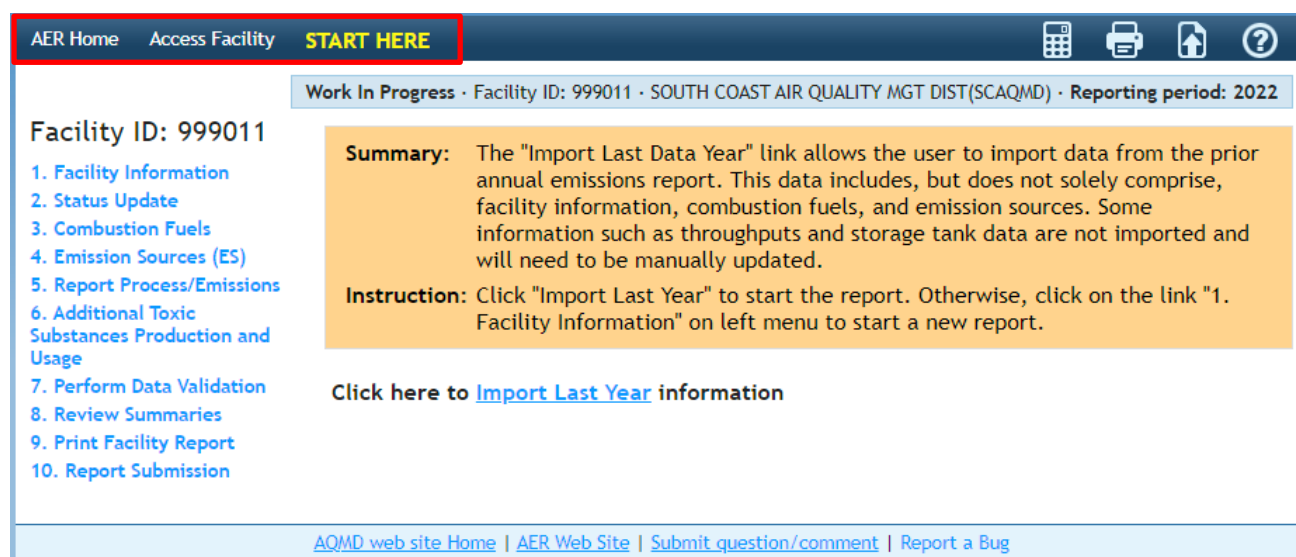

- Microsoft Edge
- Internet Explorer
- Firefox, and
- Chrome

Compatibility View must be turned **off** for Internet Explorer users.

Cookies and JavaScript execution must be enabled in the browser.

### **Toolbar**

Every screen in the AER Reporting Tool displays the navigation toolbar along the top of the screen and along the left side of the screen. The links will take users to different parts of the reporting tool.

**AER Home** - This is the starting point where existing users can log in with username and password (created by the user during the registration process) or request to reset a forgotten password. This page also provides a link so that new users can register to use the tool.

**Access Facility** - Clicking on this tab will take users to the main page of the AER Reporting Tool where users can select the reporting year to work on or access a different facility.

**START HERE**- This is the starting page where users can download data from the previous AER (if exists) or navigate to different sections of a facility's annual emission report.

**Conversion Calculator Icon Button** - It is not an ordinary calculator. Clicking on this icon will open a conversion tool for a limited number of units.

**Print Icon Button** - Clicking this icon allows users to print the page they are working on, similar to the "print screen" function on most computers. Note: If you wish to print a full list of emission sources from a facility's permit profile, please select the "Print Preview" button on the Emission Source (ES) Classification page, instead of the printer icon.

**Upload Supporting Documentations Icon Button** - Clicking on this icon will open a tool for uploading supporting documents in electronic form. There is no limit on the number of documents for uploading. Each file must be 5 megabytes (MB) or less.

**Help and Support** - Clicking on this icon will open the AER Reporting Tool Help and Support Manual, which contains detailed instructions on how to use the web tool as well as a listing of default emission factors for select equipment/ processes.

### **Import Data from Last Year Link**

Clicking the START HERE link on the brown menu bar will take the user to the Facility Home Page.

Clicking on the Import Last Year link will import available data from the previous reporting year to the current report.

Note: For first time reporter, facility will not be able to import any information. All permitted devices are preloaded in the AER Reporting Tool the first year a facility is asked to report. However, for any missing or newly permit equipment, it's the reporter's responsibility to manually add these devices.

The screenshot shows the AER Reporting Tool interface for Facility ID: 999011. The top navigation bar includes 'AER Home', 'Access Facility', and 'START HERE'. The main content area displays a summary and instruction for the 'Import Last Year' link. The left navigation menu lists the following items:

1. Facility Information
2. Status Update
3. Combustion Fuels
4. Emission Sources (ES)
5. Report Process/Emissions
6. Additional Toxic Substances Production and Usage
7. Perform Data Validation
8. Review Summaries
9. Print Facility Report
10. Report Submission

The main content area includes a summary and instruction for the 'Import Last Year' link, which is highlighted in a red box. The text reads: 'Click here to **Import Last Year** information'.

### **Left Navigation Menu**

Note: The menu will be slightly different for Core CTR and AB2588 facilities comparing to other facilities (Abbreviated reporting). Please refer to those guidelines, which can be downloaded on the AER webpage, for more detailed information.

The screenshot shows the AER Reporting Tool interface for Facility ID: 999011. The left navigation menu is highlighted with a red box. The menu items are:

1. Facility Information
2. Status Update
3. Combustion Fuels
4. Emission Sources (ES)
5. Report Process/Emissions
6. Additional Toxic Substances Production and Usage
7. Perform Data Validation
8. Review Summaries
9. Print Facility Report
10. Report Submission

The main content area includes a summary and instruction for the 'Import Last Year' link, which is highlighted in a red box. The text reads: 'Click here to **Import Last Year** information'.

**1. Facility Information** - The link on this menu opens the facility information page where users can input facility information, provide facility operational status, and enable special features for the tool to create specialized reports.

**2. Status Update** - This link opens the Status Update page, which informs the South Coast AQMD about any changes in business operating status.

**3. Combustion Fuels** - This link opens combustion fuel specification section. This section must be completed before combustion emission sources can be completed in the Process pages.

**4. Emission Source (ES)** – This link opens the Emission Sources (ES) Classification page. The table with a green table on this page lists all emission sources. Emission sources are also referred to as devices.

**5. Report Process/Emissions** - This link opens a page containing worksheets based on Emission Source Group Categories (e.g., external combustion, internal combustion, other processes, etc.) as defined by the user in the previous steps. By clicking on the “Open” link next to an emission source on these worksheets, users can begin entering specific data to calculate emissions.

**6. Additional Toxic Substances Production and Usage** - This link opens a page in which users can report additional toxic and substances production and usage. Note, The Additional Toxic Substances Production and Usage page is included for all facilities. However, applicability guidelines can be found in “Additional Toxic Substances Production and Usage Guidelines” posted in the Guideline Documents section of the main AER webpage.

**7. Perform Data Validation** - Clicking this link will execute the preliminary quality control procedures and display warnings and errors. Warnings alert users to review the entered data for reasonableness and accuracy. Errors require users to revisit and correct the data. Once all errors have been corrected, users can submit the report.

**8. Review Summaries** - Clicking this link opens emissions summary pages for criteria pollutants, toxic air contaminants, and associated emissions fees.

- **Criteria Pollutants** - Link for a summary of criteria pollutants emissions.
- **Toxic (TAC/ODC) Pollutants** - Link for a summary of toxic air contaminants (TAC) and ozone depleting compounds (ODC) emissions, including the AER Toxic Fees Breakdown which provides a detailed accounting of toxic emissions and applicable toxics fees.
- **Fees** - Link for summary of emissions subject to fees and associated fees due.

## **9. Print Facility Report**

- **Print Full AER PDF Report (all listed below)** – Clicking on this check box allows the user to select all sections of the AER PDF Report to print.
- **Print Individual PDF Sections** - Clicking on individual check boxes allows the user to selectively generate and print the reports in pdf format for recordkeeping purposes.

- **Excel Reports** - Clicking the Download Report button will export all reported emission sources and process data into an Excel spreadsheet. Clicking on the Download TAC Report button will export all reported TAC emission sources and process data, and associated emission fees into an Excel spreadsheet. The TAC Report also includes facility information, and total and individual summaries of each type of TAC emission fee.

**10. Report Submission** - Clicking this link opens the report submittal page, where users should perform a final review of emissions data prior to submitting the annual emissions report in electronic form.

- **Request Amendments Button** - Clicking this link will enable users to submit proposed amendments to a submitted report. For detailed instructions, see the guideline document titled, “How to Amend an Annual Emission Report.”

### **General Tips**

South Coast AQMD periodically reviews selected Annual Emissions Reports to verify accuracy, completeness, and correct fee payment. Carefully noting the following tips can help minimize possible emission and fee discrepancies:

- Follow all instructions.
- Make sure units of measure are correct. Common conversion factors have been provided in the AER Reporting Tool to assist with unit conversions and emission calculations.
- Document all emission factors other than default factors. Upload documentation with report submittal as needed including, but not limited to: Material Safety Data Sheets; CEMS summary data; South Coast AQMD pre-approved source test results; permit evaluation data or rule/permit emissions limits or BACT emissions requirements.
- Use comment fields as needed to provide additional explanation.

### **Common Mistakes**

Review this list to avoid mistakes when completing your annual emissions report (AER):

- Late submittal due to a delay in issuing the check for emission fees.  
The report is completed on time. However, a delay in issuing the check for emission fees causes the report to be submitted past the deadline, thus incurring a surcharge. Anticipate a delay in approval and issuing of the check from facility’s headquarters or central office to avoid a late surcharge.
- Reporting emissions from fuel combustion in mobile equipment such as forklifts, bulldozers, and tractors.  
Emissions from self-propelled on-road or off-road mobile source vehicles should not be reported in this program.
- Reporting liquid fuel (e.g., diesel) in wrong units.  
The default emission factors provided for burning of liquid fuel or fuel dispensing are given in pounds per 1,000 gallons (lbs/1000 gals, or lbs/Mgal). Therefore, please convert all liquid fuel used or dispensed to 1,000 of gallons when using the default emission factors.
- Annual throughput units not consistent with emission factor units.  
Throughput units must be consistent with emission factor units to ensure that emissions are calculated correctly (in pounds). For example, if you report material usage (throughput) in pounds, then your emission factor units should be in pounds of pollutant per pound of material used (i.e.,

lb/lb). If reporting throughput in gallons, then your emission factor units should be in pounds of pollutant per gallon of material used (i.e., lb/gal).

### **How to Get Help and Support**

Support is available from South Coast AQMD staff between 8:00 a.m. and 5:00 p.m., Tuesday through Friday through the following channels.

- **Help Hotline: (909) 396-3660**  
South Coast AQMD staff will be available to provide immediate responses to the extent possible.
- **E-mail: [aer@aqmd.gov](mailto:aer@aqmd.gov)**  
Always include Facility ID# with inquiries.
- **Internet: <http://www.aqmd.gov/home/regulations/compliance/annual-emission-reporting>**  
Information relative to the AER Program is incorporated herein. The AER Reporting Tool Help and Support includes specific instructions for each screen, supplemental instructions, tables of default emission factors, etc. In addition, other useful information is available on the web such as the South Coast AQMD rules and Clean Air Solvents.
- **In-Person:**  
Scheduled in-person/virtual appointments may be arranged upon request. Support staff will help you with your questions on how to enter your data into the Annual Emissions Reporting system. There is no charge for this service. However, support staff cannot enter the data and submit the report for facility. Please call the AER Hotline at (909) 396-3660 or email to [aer@aqmd.gov](mailto:aer@aqmd.gov). Appointment times are limited and usually fill up rapidly the last three weeks before the reporting deadline.

### **How to Submit a Completed AER**

Submitting a completed report is done entirely online.

Once the AER has been reviewed for completeness and verified for accuracy, the user should run Data Validation to ensure that all warnings are reviewed and there are no errors. If all errors have been corrected, and warnings have been reviewed, users should navigate to the Report Submission Process and complete the following steps:

- 1) Click on the “Generate AER Submission Report” button, which will create one pdf and two Excel files of your completed report. Once the reports have been generated, please review the final documents prior to submittal.
- 2) Following report generation, users will be routed to the Certify and Submit Generated AER Report page. Once the final report has been reviewed, check the three boxes indicating “I have read and accepted this document” in Step 1 on the Certify and Submit Generated AER Report page.
  - If any corrections to the AER are deemed necessary upon review, proceed to Step 2 and click the “Cancel Generated Report & Modify Report Data” button to return to the AER data entry module. Note: Clicking this button will only delete the pdf and Excel files generated in the previous step and will not delete any entered AER data.
- 3) At Step 2, read the South Coast AQMD Certification Statement, then check the two boxes acknowledging and agreeing with the Certification Statement.

- 4) Next, for security and identity verification purposes, you are required to enter your user password and facility pin code.
- 5) Finally, click on the “Certify & Submit AER Report” button to electronically deliver the AER data to the South Coast AQMD database. A confirmation email will be generated by the AER Reporting Tool and sent to the AER user.

Once the report has been submitted, you will be redirected to the online payment portal, where you can pay your emission fees (if any) via credit card or e-check. The online payment option is only available to you for the initial submittal and when total emission fee for the submitted report is less than \$300,000.

If you prefer or are required to pay via check, please print the “AER Payment Voucher” and include it with your check. Mail the AER Payment Voucher along with any fee payments to the South Coast AQMD in the provided envelope. If a different envelope is used, please mail the required forms and fees to the following address:

South Coast Air Quality Management District Annual Emission Reporting Program File No. 54493 Los Angeles, CA 90074-4493
--

If a messenger service is used (or hand delivered), the package should be delivered to Cash Management at South Coast AQMD Headquarters at the address listed below in Diamond Bar on or before 5:00 p.m. on the last day of the filing period. Please note that South Coast AQMD is closed on Mondays.

South Coast Air Quality Management District ATTN: Cash Management Annual Emission Reporting Program 21865 Copley Drive Diamond Bar, CA 91765-4178
---

## **How to Amend an Annual Emission Report**

Please refer to the “How to Amend an Annual Emission Report” Guideline.

For amending report prior to DY 2019, refer to “How to Amend an Annual Emission Report Prior to DY2019” Guideline.

## **How to Amend Calendar Year 2019 or Later Annual Emission Reports Using the AER Reporting Tool**

Amendments to the 2019 AERs or later can be made within the AER Reporting Tool.

Note the “Request Amendment” option will not appear until emission fees have been paid.

1. Click on Report Submission on the right-hand menu of the AER Reporting Tool and press the Request Amendments orange button.
2. Enter the reason for your amendment in the text box and click the gold request button (see screenshot above).

AER Home Access Facility **START HERE**

Request Amendment · Facility ID: 999125 · ABC Tracking Company · Reporting period: 2019

Facility ID: 999125

1. Facility Information  
2. Status Update  
3. Combustion Fuels  
4. Emission Sources (ES)  
5. Report Process/Emissions  
6. Perform Data Validation  
7. Review Summaries

Comment: Please open the 2019 AER for amendment. We forgot to add PM emissions for Device ID E5.

Show More AER Report History

**Review of the amendments can result in any of the following actions:**

- **Additional Fees** – Additional fees are subject to the surcharge provisions and time frame outlined earlier under the “Underpayment Surcharge” section. Emission data will be updated accordingly after the amendment has been verified.
- **Refund** - A refund may be made as a result of the amendment only if a written claim for refund is filed with South Coast AQMD within one year and seventy five days from the official due date,). However, the facility emissions will be updated accordingly, after the amendment has been verified.
- **Denial** - As a result of South Coast AQMD evaluation, the amendment or fee refund may be denied. This action can be appealed to the Fee Review Committee. See “Other Fee Issues” in Help and Support manual.

Any questions regarding amending AERs can be emailed to AER staff at [aer@aqmd.gov](mailto:aer@aqmd.gov) or by calling the AER Support Hotline at (909) 369-3660.

**Non-Payment/Late Payment Surcharge**

If no fee payment is received by South Coast AQMD or postmarked by the deadline of the reporting period, a surcharge shall be assessed and the emission fee due shall be increased as follows:

<b><u>When payment is received late:</u></b>	<b><u>Emission fees and surcharge due are as below:</u></b>
• Less than 30 days,	Unpaid fees +5%
• 30 to 90 days,	Unpaid fees +15%
• 91 days to one year,	Unpaid fees +25%
• More than one year,	Unpaid fees +50%*
* Based on fee schedules in effect at the time the emissions occurred.	

If emission fees are paid on time, but the amount paid is determined to be underestimated, total fees due shall be calculated as follows:

Within one year after the seventy-fifth (75<sup>th</sup>) day from the official due date:

<b><u>If the payment was</u></b>	<b><u>Underpayment and surcharge due are as below:</u></b>
• Less than 90% of amount due,	Underpayment + 15%
• 90% or more of the amount due,	Underpayment + 0%

After one year and seventy five days from the official due date, all underpayments as determined by the District or as disclosed by the facility will be assessed a 50 percent surcharge on the underpayment, calculated based on the fee schedules in effect when the emissions actually occurred.

**Refund Request**

Rule 301(e)(9)(B) requires all requests for refund of overpayment of emission fees be submitted in writing. A written request can be in the form of letter, email, Facility Status Update, or a negative fee figure as calculated and displayed on Fees Due Summary. Refund requests are considered valid if submitted within one year and seventy-five days from the official due date. **Note that credit from previous year cannot be applied toward the current year’s Annual Emissions Report fees.**

Other Fee Issues

Facility may contact the South Coast AQMD Fee Review Committee for the following matters:

- Financial hardships;
- Alleged District billing or fee errors; and
- Surcharges assessments.

Coordinator for the Fee Review Committee can be contacted at (909) 396-3529. More information relative to Fee Review Committee can be found at the following web page:

<http://www.aqmd.gov/home/permits/fees>

Questions related to billing or payment may be direct to South Coast AQMD Finance Billing Services toll free at 866-888-8838 from inside California, or call (909) 396-2900.

## GETTING STARTED

This section includes instructions and procedures for accessing the AER Reporting Tool. The following screen displays the place where new users can start the registration process; existing users can log in or request to reset Password or find the Username, if forgotten.

### Welcome to South Coast AQMD Annual Emissions Reporting (AER)

#### About AQMD Annual Emissions Reporting (AER)

The South Coast Air Quality Management District's (AQMD's) Annual Emission Reporting (AER) program was developed to track emissions of air contaminants from permitted facilities. Emission fees are also assessed based on reported data. The data collected by AER is used to update the comprehensive emissions inventory for the AQMD, which includes Orange County, the non-desert portions of Los Angeles and San Bernardino counties, and the Riverside county areas west of the Palo Verde Valley. This annual emissions inventory of pollutants and source categories is essential to effectively design and evaluate clean air strategies to comply with state and federal public health standards.

The AER is required for all facilities subject to Rule 301(e) and 301(l) (10). Additional information on the AER Program can be found at [www.aqmd.gov/aer/aer.html](http://www.aqmd.gov/aer/aer.html)

 Zip Four:

#### Work Phone

Phone Number: 714 596-8837 Ext.  
 Fax Number:

An email with link for confirmation of the registration will be sent to the valid email address in the user profile as illustrated in the image below. The link for confirmation will stay active for **72 hours**. It is essential that the user confirms the registration within the allotted time. Upon confirmation, the tool will activate user account and direct user back to the AER Program home page.

### **Existing User Log-In**

Once registered, returning users can log into the AER Reporting Tool using the registered Username and Password. For problems with LOG-IN, please contact program Help and Support via an e-mail to [aer@aqmd.gov](\"mailto:aer@aqmd.gov\"), or call the AER Help and Support Hotline at 909-396-3660.

### **Resetting Password**

The tool also allows user to reset a password, if forgotten. Note that the requestor must provide the registered email address as shown in image #1 below; otherwise, the tool will display an error message as shown in image #2 below.

To reset your password, click on the blue link “Click Here”.

### **Image #1**

A screenshot of the "AER Home" web page. The header includes "AER Home" and "Access Facility" with a printer icon and a help icon. The main heading is "Welcome to South Coast AQMD Annual Emissions Reporting (AER)". There are two main columns. The left column, titled "About AQMD Annual Emissions Reporting (AER)", contains text about the program and a link to "www.aqmd.gov/aer/aer.html". The right column has a "User Login" section with fields for "Username:" and "Password:", a "Sign In" button, and a link "Forgot your username or password? Click Here". Below that is a "New User?" section with the text "Complete a one-time registration process." and a "Register here" button. At the bottom of the right column is a "Notice" section with a disclaimer. The footer contains links: "AQMD web site Home", "AER Web Site", "Submit question/comment", and "Report a Bug".

### Welcome to South Coast AQMD Annual Emissions Reporting (AER)

**About AQMD Annual Emissions Reporting (AER)**

The South Coast Air Quality Management District's (AQMD's) Annual Emission Reporting (AER) program was developed to track emissions of air contaminants from permitted facilities. Emission fees are also assessed based on reported data. The data collected by AER is used to update the comprehensive emissions inventory for the AQMD, which includes Orange County, the non-desert portions of Los Angeles and San Bernardino counties, and the Riverside county areas west of the Palo Verde Valley.

This annual emissions inventory of pollutants and source categories is essential to effectively design and evaluate clean air strategies to comply with state and federal public health standards.

The AER is required for all facilities subject to Rule 301(e) and 301(l)(10). Additional information on the AER Program can be found at [www.aqmd.gov/aer/aer.html](http://www.aqmd.gov/aer/aer.html)

E-mail:  [Send](#)

**No record of this email has been found, please register as a user.**

**New User? Complete a one-time registration process.**

[Register here](#)

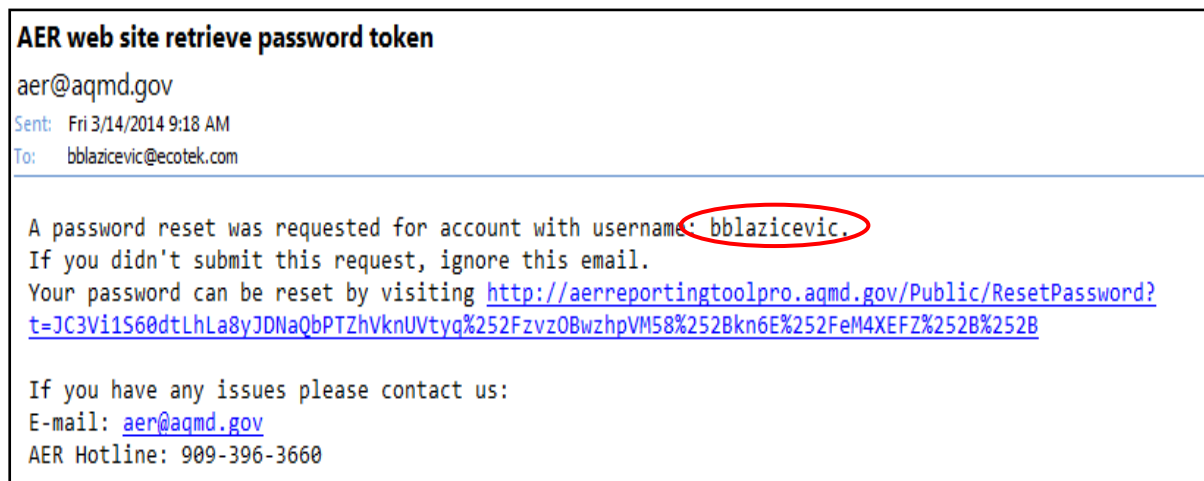

After establishing a user account, you can access and update the AERs for your facility(ies) using AQMD-assigned access pin codes.

**Notice**

All information entered on this computer system may be monitored, recorded, read, copied, and disclosed by and to authorized personnel for official purposes. Access or use of this computer system by any person, whether authorized or unauthorized, constitutes consent to these terms.

Once the registered email address of the active user is entered, a link with a reset password token will be sent to the requestor's email as shown.

**Here is a sample of email with link to reset password. NOTE that the registered Username is also included in the email.**

Clicking on the link included in the email will take the user to the password reset screen as shown below.

Once your password has been reset you can login in with your username and new password by clicking the AER Home button on the top left corner.

## **Update User Profile**

Users can always update their User profile by following the “Edit Profile” link under Username at the top right corner of the tool as shown. Make sure to always “Save” any changes.

## **Welcome to South Coast AQMD Annual Emissions Reporting (AER)**

## **ACCESSING THE FACILITY’S AER AND COMPLETING THE REPORT**

This section contains information and instructions for accessing facility information, entering emission data, preparing, and submitting the reports.

### **Accessing Facility Data**

Accessing facility data for preparing and reporting emissions requires two important pieces of information: Facility ID# and PIN code. The combination of ID# and PIN serves as a key to open the gate for accessing the facility permit profile where emission data can be reported for each device. PIN codes are issued by the South Coast AQMD for each Facility ID and must be entered exactly as presented.

## **Access Facility**

Upon successful access to a facility's information, the tool will open the facility's home screen where the facility's basic information such as ID#, name, and address are presented. User can access the facility's device level emission data for a specific year by clicking on the "Open..." link adjacent to the desired reporting year, as shown below. At any time, the user can access a different facility by entering the Facility ID# and PIN on the "Access Different Facility" section located on the right side of the screen, as shown below. Please note that users may not work on more than one facility at a time. Attempting to enter data for multiple facilities simultaneously (e.g., attempting to access more than one facility by logging in using multiple browser tabs/windows at the same time) may result in data loss or other system errors.

## Facility Home

The START HERE page allows users to import information from previous AERs. User's that want to use data imported from the previous reporting year should click on the link "Import Last Year" info. A previous AER must have been submitted using the AER Web Tool to use the data import feature.

## **Importing Previous Year Data**

A previous AER must have been submitted using the AER Web Tool in order to use the data import feature. In the following Facility Home screen, click the link to “Import Last Year” to import the Reporting Structure from the previous year’s AER.

AER Home Access Facility **START HERE**

3	Imported emission source: ES27
3	Emission source is editable.

During uploading of facility's permit profile, the current permit profile is compared to the previous year data and the matching emission sources (ESs) are assigned the same AER Device ID (ES number). ESs are matched first by Permit Device ID, then by Application Number (A/N) and the indicator for ESs uploaded from facility permit profile last year.

During import, all data from "last year" will be imported **except**:

- Throughput,
- Proposed NAICS for Next Year in Facility Information,
- Proposed SIC for Next Year in Facility Information,
- Status Code in Facility Information,
- Status Code Year if any, in Facility Information,
- Facility Status Update data,
- Fee Summary installments and postmark date,
- Imported EPA TANKS process data (ES data is imported, but all process data is blocked),
- Any data on Upset Worksheet.

After importing data from last year, click on the 1. Facility Information link in the left-side menu to begin updating data for the current reporting year.

## 1. Facility Information

The following screen will be displayed after clicking on the “1. Facility Information” link on the navigation menu located at the left side of the screen. This page contains the facility’s general information that is extracted from the South Coast AQMD Permitting database. It also identifies the facility as subject to various programs: local (i.e., RECLAIM), state level (i.e., CTR, AB2588), and federal level (i.e., Title V). Please verify the equipment location address and enter the Mailing Address (if different from equipment location). Notify South Coast AQMD if any errors or discrepancies are noted in the “Equipment Location” section. Note that all fields marked with a red asterisk (\*) are mandatory and must be completed before submitting the report.

Facility ID: 999013

### **Residential and Worker Receptors (mandatory):**

Facilities preparing their quadrennial update (once every four years) for the AB2588 Program must provide the distance (in feet) from their facility to the nearest residential and worker receptors. Clicking on the “Edit” or “Add” button will pop up a data entry screen as shown in the following images.

- Identifier (mandatory):** User defined IDs for the receptors, max four characters. For example, RR01, WR01, etc.
- Description (non-mandatory):** User defined description of the receptor. The purpose of the description is to help user document facility’s entered data.
- Distance (mandatory):** Distances in **feet** from the primary emission source to the nearest residential and worker receptors.
- UTM E & UTM N (non-mandatory):** Universal Transverse Mercator (UTM) coordinates (East and North) if available and known. Units can be either meters or kilometers.

Receptor data sample:

**Edit Receptor**

Identifier: WR01

Description: Closest Work Receptor

Distance: 30 ft

UTM E: 312345 m

UTM N: 3123456 m

#### 4. Emission Source (ES) Classification

This page allows the classification of emission sources (ES). Click on the “Emissions Sources (ES)” link on the left navigation menu or the second blue bar in the Build Reporting Structure to go to the next screen for an overview of the emission sources at the facility based on South Coast AQMD’s permit database. A list of devices is preloaded for each facility. If the list of devices is not available in the South Coast AQMD database, the user must add the devices manually by clicking the “Add New Emission Source” orange button. If the device to be entered has a valid South Coast AQMD permit, it should be referenced using the appropriate permit Application Number (A/N). User can also sort the Emission Sources table by clicking on the header of the column to be sorted. User can sort similar equipment by entering keywords in the “Search” box located above the ES list (e.g., to view a list of only the boilers, enter “boiler” in the search field and the list will display all equipment with the word “boiler” in the permit equipment description). Clicking the “Print Preview” button above the ES list will enable the user to print the entire ES list.

The next few screens provide user with a closer look at different parts of this screen for data entry. The top part of this screen contains one useful tool: Storage tank emissions data import.

## Tank Data Import

Instructions for importing storage tank data files can be found in “Guidelines for Importing Storage Tank Data into the New AER System” posted in the “Guideline Documents” section of the main AER webpage.

## Adding an Emission Source

An Emission Source (ES) can be added for one of the following cases:

1. Equipment that does not require a written permit (Rule 219) or un-permitted operation,
2. An additional device connected within an existing permit listed in the facility permit profile, and
3. A permitted source that is missing from the facility permit profile.

The examples below illustrate how a facility can add an ES to the facility permit profile. All three cases begin by clicking the “[Add New Emissions Source](#)” button at the Emission Sources (ES) Classification screen, as shown in the image below. Clicking the “Add New Emissions Source” button will open the “Edit Emission Source” window.

## Build Reporting Structure

### Emission Sources (ES) Classification

**Summary:** This section contains facility permit profile. Please make sure that every device has a specified Emission Source (ES). New emission sources can also be added.

**Instruction:** Add Devices (emissions sources) by clicking “Add New Emission Source”. Edit devices by clicking “Profile” under the Emission Source (ES) Column. Add emission data by clicking “Open” under the Emissions column. Upload storage tank data by clicking on link “Click here” below.

### Abbreviated Reporting

Starting in Reporting Year 2022 some facilities can qualify for Abbreviated Reporting. Your eligibility to file Abbreviated Report depends in part on the types of Emission Sources used at your Facility.

Click [here](#) to find out more details about Abbreviated Reporting and its possible benefits.

## Case 1: Adding equipment that does not require a written permit (Rule 219) or un-permitted operation

In the “Edit Emission Source” window (below), enter the “ES Name” as the Rule 219 equipment name (e.g., Rule 219 - Ink jet printer). Identify the “Operating ES Status” by selecting from the drop-down list. Next, classify the equipment/operation by clicking on the orange button labeled “Determine Emission Source Group Type.” Once you have classified the equipment/operation, click “Save and Proceed to Process Reporting.”

☐ Emissions are not included when calculating emission fees

## Case 2: Adding a source connected with an existing permit listed in the facility permit profile (i.e., there is more than one device associated with an existing application number.)

An example of when this would be applicable is if there is a permitted control device attached to basic equipment which is not listed in the permit profile. In this example, both devices may be associated with the same permit application number (A/N), but the emissions would be reported under the basic equipment. The “Operating ES Status” for the control equipment should be marked as “Not Generating Emissions.” (Note: Some control devices, such as afterburners/oxidizers, will have reportable emissions from fuel combustion). To add the basic equipment in this example, first, in the “Edit Emission Source” window (below), indicate this is connected to a permitted device by clicking the checkbox for “Permitted.” From the drop-down list of available permitted devices, select the appropriate application number (A/N) for that device. Identify the operating status, classify the equipment/operation, and then click “Save and Proceed to Process Reporting”.

### Defining Emissions Source

Clicking on the “Profile” link in the first column (labelled “Emission Source (ES)”) of the Emission Source list will open the “Edit Emission Source” screen for a specific device, as shown below. Note that each emission source is identified by applicable information including Application Number (A/N), Permit Number, Permit Device ID, and AER Device ID as shown in the screen below. The information including Permit Equipment Description is uploaded from the South Coast AQMD permit database. Data entry by user is illustrated in the next several screens.

Work In Progress - Facility ID: 999011 - SOUTH COAST AIR QUALITY MGT DIST(SCAQMD) - Reporting period: 2022

[Save](#) or [Save and return to List of Emission Sources](#) or  
[Save and proceed to Process Reporting](#) or [Cancel](#)  
Optional: [Save and Mark as Completed](#)

Select an operating status for an ES. The following table defines each Operating ES Status type.

Operation ES Status	Definition
Normal Operation	Operated during the Reporting Period and operation resulted in emissions
Not Generating Emissions	Operated but was not generating emissions
Not in Operation	Did not operate during the reporting period
Shut-Down or Removed	ES permanently shut down or removed prior to the reporting period
Duplicate	Duplicate device (ES) number

For control device that generates emissions (e.g., afterburners, etc.), select ES Status “Normal Operation” and report associated emissions. For control device that does not generate emissions (e.g., absorbers, baghouses, filters, etc.), select ES Status “Not Generating Emissions” (normal operation and not an emission source).

Note that by selecting the first choice, which is “normal operation”, the tool offers a button to “Categorize Emission Source”. Other selections will not enable this button. The “Comment” field is for user to elaborate the details relative to this device. The “ES Name” field should also be completed to identify any specific information about the device that is not described in the Permit Equipment Description or Comment fields.

Optional: Save and Mark as Completed

Clicking on the “Determine Emission Source Group Type” button (above) will bring up a screen with 7 category options for the device, as shown below.

Permitted	A/N	Permit No	Permit Device ID	Permit Equipment Description	AER Device ID	ES Name
No					ESnull	

1. External Combustion Equipment (e.g., boiler, dryer, oven, furnace, heater, afterburner, flare, kiln or incinerator) [click here](#) to select one the following Equipment:
2. Internal Combustion Equipment (e.g., internal combustion engine (excluding vehicles), turbine or micro turbine) [click here](#) to select one of the following Equipment:
3. Spray Coating/Spray Booth (e.g., coatings, solvents, adhesives, etc.) [click here](#) to select one of the following Equipment:
4. Other Use of Organics (e.g., coatings, solvents, inks, adhesives, etc.) except in Spray Coating/Spray Booth, [click here](#) to select one of the following Equipment:
5. Liquid Storage Tank (e.g. Underground, Aboveground, Small Tanks, Dispensing Systems) [click here](#) to select one of the following Equipment:
6. Fugitive Components (Emission Leaks from Process Components per Rule 462, 1173 and 1176), [click here](#) to select all applicable Equipment:
7. Other Processes (does not fit in any of the groups mentioned above), click [click here](#) to mark "Other Process Equipment":

Save Cancel

Under category #1, FURNACE is displayed as an external combustion source, which is applicable for this device according to the permit description shown right above the categories list, as shown

above. User then selects “Furnace <10 MMBTU/HR” because this emission source is rated at 6 MMBTU/HR and clicks on “Save” as shown in the image below.

Permitted	A/N	Permit No	Permit Device ID	Permit Equipment Description	AER Device ID	ES Name
Yes	123457	T00117	D7	FURNACE, FORGE, NO. 8, NATURAL GAS, WITH LOW NOX BURNER, 6 MMBTU/HR WITH A/N: 377043C\$ BURNER, NATURAL GAS, HAUCK MFG. COMPANY, MODEL SVG-125, WITH LOW NOX BURNER, 6 TOTAL; 1 MMBTU/HR	ES9	

1. External Combustion Equipment (e.g., boiler, dryer, oven, furnace, heater, afterburner, flare, kiln or incinerator) [click here](#) to select one the following Equipment:

☐ Boiler <10 MMBTU/HR  
☐ Boiler 10-100 MMBTU/HR  
☐ Boiler >100 MMBTU/HR  
☐ Oven <10 MMBTU/HR  
☐ Oven 10-100 MMBTU/HR  
☐ Oven >100 MMBTU/HR  
☐ Dryer <10 MMBTU/HR  
☐ Dryer 10-100 MMBTU/HR  
☐ Dryer >100 MMBTU/HR  
☒ Furnace <10 MMBTU/HR

☐ Heater <10 MMBTU/HR  
☐ Heater 10-100 MMBTU/HR  
☐ Heater >100 MMBTU/HR  
☐ Space/Water heater - not related to a process <10 MMBTU/HR  
☐ Afterburner <10 MMBTU/HR  
☐ Afterburner 10-100 MMBTU/HR  
☐ Afterburner >100 MMBTU/HR  
☐ Kilns  
☐ Incinerator  
☐ Flare

In this example, in addition to burning fuel, this furnace also processes material. User then scrolls down to category #7 and checks the “Other Process Equipment”. User can change the selection or cancel the classification with “Cancel” button. Clicking on “Save” button will bring user back to “Edit Emission Source” screen.

☒ Furnace <10 MMBTU/HR  
☐ Furnace 10-100 MMBTU/HR  
☐ Furnace >100 MMBTU/HR  
☐ Flare  
☐ Charbroiler  
☐ Deep Fat Fryers

**⚠ In addition to burning fuels, if this device processes other materials, make sure box “Other Process Emissions” is checked under Category 7 below.**

2. Internal Combustion Equipment (e.g., internal combustion engine (excluding vehicles), turbine or micro turbine) [click here](#) to select one of the following Equipment:

3. Spray Coating/Spray Booth (e.g., coatings, solvents, adhesives, etc.) [click here](#) to select one of the following Equipment:

4. Other Use of Organics (e.g., coatings, solvents, inks, adhesives, etc.) except in Spray Coating/Spray Booth, [click here](#) to select one of the following Equipment:

5. Liquid Storage Tank (e.g. Underground, Aboveground, Small Tanks, Dispensing Systems) [click here](#) to select one of the following Equipment:

6. Fugitive Components (Emission Leaks from Process Components per Rule 462, 1173 and 1176), [click here](#) to select all applicable Equipment:

7. Other Processes (does not fit in any of the groups mentioned above), click [click here](#) to mark "Other Process Equipment":

☒ Other process equipment

## **Two Navigation Paths for Process**

After defining an ES, the AER Reporting Tool presents two (2) paths (navigation options) for reporting emissions. User can access a Process by:

Path #1: Define all ESs first, then go through worksheets and complete all Processes, or

Path #2: Go straight to next step to work on the process and report emissions.

**PATH #1 - Save and Return to List of Emission Sources:** clicking on this button will save the data and return user to the emission source profile where user can continue with another device prior to starting Process reporting.

### Build Reporting Structure

Emission Sources (ES) Classification

**Summary:** This section contains facility permit profile. Please make sure that every device has a specified Emission Source (ES). New emission sources can also be added.

**Instruction:** Add Devices (emissions sources) by clicking "Add New Emission Source". Edit devices by clicking "Open" under the Action Column. Add emission data by clicking "Reference" under the Process Reference column. Upload TANKS files here if applicable.

Storage Tank Emissions Batch File Import - [Click here](#) for more instructions.

## Process/Equipment Samples

Users are recommended to closely follow the examples in the next two sessions that demonstrate the flexibilities of the AER Reporting Tool in reporting emissions from two processes: P1 for fuel burning process where default emission factors are available and P2 for processing of material throughput.

## P1 – External Combustion Sample

The tool presents several sections on this screen: Process details, Throughput, Criteria Emissions, and Toxic (TAC/ODC) Emissions. Each section must be completed in sequential order and data must be saved before the start of the next section. **User must select Fuel and throughput units before reporting emissions.** Following the “Open” link will pop up the data entry screen for each section.

**Other Process Emissions Process List Overview**

Emission Factor Pop-Up window – user adds a pollutant, enters the specific emission factor with optional comments, and cites the source of emission factor. User can indicate the overall control efficiency and whether the entered value is an after-control factor. By indicating that an emission factor is a “controlled factor” by checking off the “Controlled EF value” checkbox, the user is stating that the efficiency of the control equipment is already incorporated in the emission factor. That is why selecting this option disactivates the “Overall Controlled Efficiency” box. If you are not using a “controlled factor,” do not click the “Controlled EF value” checkbox and enter the control efficiency value (in the form of a value less than 1 with decimals) in the “Overall Control Efficiency” field.

## 5. Report Process/Emissions

These worksheet pages arrange devices/process by the emission source category assigned on the Edit Emission Source page. These pages allow the user to compare the Device IDs, permitting IDs, Process IDs, status of each process (work in process or complete), fuel data, and emissions for each emission source category. New processes can be added using the Add New Process to ES button. Click on the blue Open and AER Device ID links allow the user to quickly assess the Process page, and Edit Emissions Source page, respectively.

### Additional Toxic Substances Production and Usage for Facilities Subject to CTR

**Summary:** This section contains Additional Toxic Substances Production and Usage.

**Instruction:** Add Additional Toxic Substances Production and Usage by clicking "Add Additional Toxic Substances Production and Usage" button. Edit "Additional Toxic Substances Production and Usage" by clicking "Edit" hyperlink.

#### Annual Usage and Production of Additional Toxic Substances

Facilities not subject to CTR and those submitting Abbreviated Reports are NOT required to enter data on this page.

CTR requires that if, during the data year, any additional toxic substances identified and required to be reported in Appendix B of CTR is present, used, or produced at a facility in a way that may result in airborne emissions, "best available data and methods" as defined by CTR must be used to quantify emissions.

If no "best available data and methods" exists to provide a reasonable emissions estimate, then the toxic substance and the amount used or produced at the facility during the data year must be reported instead of an emission value. Purchase records, substance inventory reconciliation, direct measurement, or other methods may be used to estimate amounts used or produced.

If a portion of the emissions associated to these additional toxic substances could be reasonably quantified using "best available data and methods," that portion still needs to be reported as emissions associated with a device or process. This page should only be used to capture the usage or production associated with the portion that could not be reasonably quantified.

These additional toxic substances usage or production captured in this section of report are not subject to fees.

Click [here](#) to go to Toxic Pollutants page

**Add Additional Toxic Substances Production and Usage**

#### List of Additional Toxic Substances Production and Usage

Search:

TAC Code	TAC Name	Annual Usage	Usage Unit	CAS Number	Source/Process

## 7. Perform Data Validation

User can validate the data any time by clicking on the “Data Validation” link on the left navigation menu, as shown below. The validation notes are categorized into tables;

- Notes in the “Errors” table indicate an error that must be fixed.
- Notes in the “Device Specific Warnings” table indicate a warning for further review of data but will not prevent the user from submitting the report.
- Clicking on the hyperlinks in the second column (column labeled “ES/Process”) will take the user to the data entry page containing the errors or anomalies.

## Data Validation

**Summary:** This section presents errors and warnings found in the report.

**Instruction:** Correct all errors (red) before continuing to report submission. All errors must be corrected before submission. Review warnings to ensure emissions are correctly and accurately reported. If any of the warnings do not apply, please disregard them as the report can be submitted with warnings.

V34		Fuel: Natural Gas - Ammonia emission factor of 18 lbs/mmcsf automatically populated by the reporting tool corresponds to equipment with Selective Non Catalytic Reduction (SNCR), for equipment with Selective Catalytic Reduction (SCR) substitute listed value by 9.1 lbs/mmcsf, and for equipment without SNCR or SCR by 3.2 lbs/mmcsf.

## 8. Review Summaries

All three types of emissions (Criteria, Toxics/TAC & ODC) and applicable fees are summarized in this section as shown in the main bars located at the center of the screen and the navigation menu on the left side of the screen, as shown below. Clicking on one of the summary links will open a new summary page showing the total emissions for an individual pollutant type (i.e., Criteria Pollutants, Toxic Pollutants, or ODC) or the total fees due.

## Summaries

**Summary:** This page provides emissions and emission fee summaries.

**Instruction:** Review all emissions and emission fees before proceeding to 9. Report Submission (see menu on left-side).

**Criteria Pollutant Summary** - Summarizes criteria pollutant emission totals by permitted and non-permitted sources. Clicking on an emission value generates a list of the devices/processes that comprises the selected emission.

**TAC/ODC Pollutants Summary** - Summarizes TAC emissions and fees by Rule 301(e)(7)(A) TAC emission fee category. Clicking on links generates additional detail about the emissions, fees, devices/processes, or Rule 301.

**Fees** - Summarizes facility-wide criteria pollutant emissions, criteria pollutant and TAC/ODC emission fee totals, semi-annual installments paid (if applicable), and surcharges (if applicable).

Criteria Pollutants Summary	OPEN
Toxic (TAC/ODC) Pollutants Summary	OPEN
Fees	OPEN

**Criteria Pollutants Summary**

Emissions from both permitted and non-permitted sources are summarized in the following screen by major categories. Total criteria pollutant emissions are listed by equipment category and expressed in tons.

Criteria pollutant emissions are presented in three tables here: permitted emissions, PERP or portable equipment registered under the CARB's Portable Equipment Registration Program, and non-permitted (excluding PERP) emissions. Only GHG and Criteria facilities under CTR need to report emissions from equipment certified under PERP. Guidelines for reporting emissions from CTR Core facilities which include GHG and Criteria facilities can be found on the AER website.

Please note that no emission fees are assessed for portable devices that are designated as PERP in the AER tool.

Fugitive Components								
Other Process Emissions								
Shutdown/ Startup/ Turnaround and Upsets								
<b>Total Non-Permitted Emissions</b>	0.00	0.00	0.00	0.02	0.00	0.00	0.01	0.00

##### PERP (CARB's Portable Equipment Registration Program) Emission Summary

	VOC (tons)	SPOG (tons)	NOx (tons)	NOx RECLAIM (tons)	SOx (tons)	SOx RECLAIM (tons)	CO (tons)	PM (tons)
External Combustion								
Internal Combustion								
Spray Coating/ Spray Booth								
Other Use of Organics								
Storage Tanks								
Fugitive Components								
Other Process Emissions								
Shutdown/ Startup/ Turnaround and Upsets								
<b>Total Emissions</b>	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

Note that NOx and SOx emissions are posted separately for sources/pollutants that are subject to RECLAIM requirements. All emission values are hyper-linked to detailed information relative to how data were entered, and emissions were calculated. If user clicks on an emission value in the table, the tool will display the processes that contributed to the final emissions value. By clicking on the link to a specific process, the user can verify for last time, the accuracy of the entered information.

## AER Toxic Fee Summary

There are five different toxic fees. The total toxic fee breakdown is shown in the image below:

Facility Base Toxic Fee: \$78.03							

## ii. CPWE Emission Fees

The Cancer-Potency Weighted Emission (CPWE) summary worksheet is shown in the image below. Total toxic emissions are listed by individual contaminant and expressed in pounds (lbs). The Cancer-Potency Weighted Emission Fee is \$10.00 per pound.

There are 66 toxic air contaminants (TACs) in TABLE IV of Rule 301 (Amended July 1, 2022) that are subject to emissions fees as shown in the screen below. Clicking on the “here” link will display detailed information of the Rule 301 (Amended July 1, 2022).

Facility ID: 999011

- Fees
9. Print Facility Report
10. Report Submission

**Table 2 - Cancer-Potency Weighted Emission Fees** [Hide Table](#)

Emissions Subject to CPWE Fee are calculated as follow  
 Annual Emissions - (minus)  
 Emissions accounted in DPM (if any are present) - (minus)  
 Emissions for all PERP devices (if any are present) = Emissions Subject to CPWE Fee

Cancer-Potency Weighted Emission (CPWE) Fees are calculated using formula:  
 CPWE Fee = TAC x CPF x MPF x \$10.00

- TAC = Emissions (pounds) of a Table IV toxic air contaminant from [here](#)
- CPF = Cancer Potency Factor for the reported toxic air contaminant
- MPF = Multi-Pathway Factor for the reported toxic air contaminant
- CPWE Fee (per pound) = Cancer-Potency Weighted Emission Fee is \$10.00 per lb

TAC Group	TAC / ODC	CAS #	Annual Threshold	Annual Emissions (lbs)	Molecular Weight Correction Factor	Emissions Subject to CPWE Fee (lbs)	Cancer Potency Factor	Multi-Pathway Factor	CPW Emissions (lbs)
1	Asbestos		0.0001						
1	Asbestos	1332214	0.0001						
2	Benzene	71432	2	18.8		0.17 <a href="#">1</a>	0.1	1	0

Total CPWE Fees:									\$36,860.00																								

Diesel particulate matter (DPM) emissions are a surrogate for individual TACs emissions reported for diesel-fueled internal combustion engines. Fees are not generated for the non-DPM TAC emissions from diesel fueled internal combustion engines. The last column “Accounted in DPM” notifies the user which TAC emissions are included under the surrogate DPM emissions (see image above). In addition, not TAC fee is assessed for portable devices that are designated as PERP in the AER tool.

### iii. Ammonia & Ozone Depleting Compounds (ODC) Fees

Ammonia and ODC emissions are calculated and summarized as below. Clicking on the blue number of devices/processes under the Devices/Processes column (furthest column to the right) for ammonia or an individual ODC will display detailed information for each device/process that contributes to the total amount of ammonia or an individual TAC emissions reported for the facility.

**Table 3 - Ammonia & Ozone Depleting Compounds (ODC) Fees**[Hide Table](#)

Please see the South Coast AQMD [Rule 301](#) for details on how this fees are calculated.

TAC Group	TAC / ODC	CAS #	Annual Theshold	Annual Emissions (lbs)	Emissions Subject to Fee (lbs)	Emmision Fee (lb/year)	Fee Due	Devices / Processes
22	ODC Fluorocarbons		1.0000000000			\$0.47		
22	Fluorocarbons (chlorinated)	1104	1.0000000000			\$0.47		
22	Trichlorofluoromethane {Freon 11}	75694	1.0000000000			\$0.47		
22	Dichlorofluoromethane {Freon 12}	75718	1.0000000000			\$0.47		
22	Trichlorotrifluoroethane {CFC-113}	76131	1.0000000000			\$0.47		
23	Methyl chloroform {1,1,1-Trichloroethane}	71556	1.0000000000			\$0.06		
32	Ammonia	7664417	200.0000000000	2,090	1,891	\$0.04	\$75.64	<a href="#">2</a>
<b>Total Ammonia and ODC Fees: \$75.64</b>								
<b>The Ammonia and ODC emission fees only apply to facilities that are subject to Rule 301(e)(1)(B)</b>								

**iv. Flat rate Device Fees**

The flat rate device fee calculations are calculated and summarized as below. Clicking the “ES Code” under the column “AER ID” will display the detailed information of the equipment. Clicking on the blue number of TACs under the “TACs” column (furthest column to the right) will display detailed information for each TAC that contributes to the total amount of TAC emissions reported for that device. The device fee for emissions reported for calendar year 2022 is \$341.89.

**Table 4 - Flat Rate Device Fees**[Hide Table](#)

For each Emissions Source subject to Device Fee facility will be charged: **\$341.89**.  
Fee will be applied to any Emission Source:

- if device emissions exceed annual threshold for any TAC emmitant
- if device not part of PERP (Portable Equipment Registration Program)

AER ID	Equipment Code/Description	Fee Excluded as PERP	Fee Excluded based on threshold	Fees Applied	TACs
<a href="#">ES3</a>	11e. Stationary I.C. Engines, 4 Stroke-Rich Burn	No	No	Yes	<a href="#">22</a>
<a href="#">ES2</a>	1c. Boiler >100 MMBTU/HR	No	Yes	No	<a href="#">10</a>
<b>Number of TAC Devices:</b>				<b>2</b>	
<b>Number of Devices Subject to Fees:</b>				<b>1</b>	
<b>Number of Devices Triggered Fees:</b>				<b>\$341.89</b>	

**v. The Long List TAC Summary (AB2588 and CTR Reporting)**

Facilities not subject to CTR, and AB2588 facilities not subject to their quadrennial emission reporting are NOT required to report long list TACs shown in the AER tool. Such facilities are only required to report emissions from TACs presented in Table IV of Rule 301.

The long list TAC Summary emissions calculations are estimated and summarized as below. Clicking the “ES Code” under the column AER ID will display the detailed information of the equipment. Clicking on the blue number of TACs under the TACs column (furthest column to

the right) will display detailed information for each TAC that contributes to the total amount of TAC emissions reported for that device.

Table 5 - Long List TAC Summary (AB2588/CTR Reporting)

Hide Table

### Annual Usage and Production of Additional Toxic Substances

Facilities not subject to CTR and those submitting Abbreviated Reports are NOT required to enter data on this page.

CTR requires that if, during the data year, any additional toxic substances identified and required to be reported in Appendix B of CTR is present, used, or produced at a facility in a way that may result in airborne emissions, “best available data and methods” as defined by CTR must be used to quantify emissions.

If no “best available data and methods” exists to provide a reasonable emissions estimate, then the toxic substance and the amount used or produced at the facility during the data year must be reported instead of an emission value. Purchase records, substance inventory reconciliation, direct measurement, or other methods may be used to estimate amounts used or produced.

If a portion of the emissions associated to these additional toxic substances could be reasonably quantified using “best available data and methods,” that portion still needs to be reported as emissions associated with a device or process. This page should only be used to capture the usage or production associated with the portion that could not be reasonably quantified.

These additional toxic substances usage or production captured in this section of report are not subject to fees.

## Total Emissions and Fees

### Prior to Reporting Year 2019

Total criteria pollutant emissions are summed up and rounded to the whole ton for fee calculation purposes. Fees for TAC/ODC are included in row #2. User is reminded to enter installments paid for both criteria and TAC/ODC (if any) if not already populated by the reporting tool. Reporting the postmark date is required for the late filers in order to calculate the late submittal surcharge (if applicable). After entering the required information, click the “Save” button to complete the data entry.

### Reporting Year 2019 and After

Total criteria pollutant emissions are summed up and rounded to the whole ton for fee calculation purposes. Sum and breakdown of TAC/ODC/Ammonia fees are included in row #2. The installment paid for both criteria and TAC/ODC/Ammonia (if any) by the facility from South Coast AQMD accounting database is also shown here. Reporting the postmark date is required for the late filers in order to calculate the late submittal surcharge (if applicable). After entering the required information, click the “Save” button to complete the data entry.

Only CTR GHG and Criteria facilities need to report emissions from equipment certified under CARB’s Portable Equipment Registration Program (PERP). Guidelines for reporting emissions from CTR Core facilities that include GHG and Criteria facilities can be found on the AER website. Therefore, AER and non-CTR GHG and Criteria facilities should not have emissions in the PERP emissions column.

## 9. Print Facility Report

The print facility report page allows users to print either the full AER PDF Report or sections of that report. To print the full AER PDF Report, the user should check the “Print Full AER PDF Report (all listed below)” check box. This will select all the individual sections. To print only sections of the AER, the user should check boxes of the desired sections. At the end of either process, the user should click on the Print Selected Pages button. A PDF version of the AER report or selected pages will appear in a pop-up box.

At the bottom of this page is the Print Excel Report section. The Download Report button generates a report that includes a record for all pollutants (criteria pollutants, TAC, ammonia, and ODC emissions) emitted by each process.

The Download TAC Report button download generates a report that includes:

- A facility information tab (FacilityInfo);
- A TAC Emissions tab, which includes a record for all TAC emissions, ammonia emissions, and ODC emissions emitted by each process;
- Summary tabs for each TAC, ammonia, and ODC emissions fee (CPWE Emission Fee, Ammonia and ODC Fees, and TAC Per Device Fees); and
- A summary tab of all TAC, ammonia, and ODC fees (TAC FEES).

## 10. Report Submission

Click on the “Report Submission” link on the left Navigation menu for data submission. The screen (below) will appear flagging any errors and warnings with suggestions for user to take necessary actions in three separate items: Data Validation for Errors and Warnings, AER Emission Summary Review. Click on hyperlinks to correct any errors (Red) and warnings (Orange), when needed. Note that the non-corrected warnings in “Orange” will not stop report submission. However, verify that the reported data with that warning is correctly entered.

10. Report Submission

## Data Validation

**Summary:** This section presents errors and warnings found in the report.

**Instruction:** Correct all errors (red) before continuing to report submission. All errors must be corrected before submission. Review warnings to ensure emissions are correctly and accurately reported. If any of the warnings do not apply, please disregard them as the report can be submitted with warnings.

## Errors

Rule	ES/Process	Description
V01	<a href="#">ES1 P1</a>	Error: This field is mandatory, but is missing. (VOC Emission Factor Data Source)

## Device Specific Warnings

Rule	ES/Process	Description
V32	<a href="#">ES1 P1</a>	Warning: If the sprayed material contain solids report PM emissions, in addition to VOC emission.

## General Report Warnings

Rule	ES/Process	Description
V34		Fuel: Natural Gas - Ammonia emission factor of 18 lbs/mmcsf automatically populated by the reporting tool corresponds to equipment with Selective Non Catalytic Reduction (SNCR), for equipment with Selective Catalytic Reduction (SCR) substitute listed value by 9.1 lbs/mmcsf, and for equipment without SNCR or SCR by 3.2 lbs/mmcsf.

After correcting all errors in red, the “Report Submission” button is enabled as shown in screen below for user to submit the data electronically. The number of errors will be zero and the number of warnings will be displaced in orange font. Also, there will be an additional warning in orange if the report was submitted after the facility report deadline. Click the link “AER Emissions Summary” to review the AER Emissions Summary before generating the report.

• The reports in the links above are not considered FINAL until the "Certify & Submit AER Report" button in Step 2 below is clicked, and the submittal verification page appears.

Cancel Generated Report in order to Modify Report Data

The user must read South Coast AQMD Certification Statement, then click the box next to “I acknowledge that I have read the South Coast AQMD Certification statement.” The user is also required to click on the box next to “I agree on the responsibility for this AER Report Submission in accordance with Certification Statement.” Once all the boxes are checked, the user will be able to click the orange button “Certify & Submit AER Report” to submit the report.

## STEP: 2. Officially Certify & Submit AER Report to South Coast AQMD

---

Here are the steps to Certify and Submit AER Report.

### South Coast AQMD Certification Statement

I acknowledge that by certifying and submitting this statement, I have read, understand, and accept the terms and conditions of this electronic certification statement.

I acknowledge that the South Coast AQMD reserves the right to audit the reported emissions (alternatively, activity level data for qualified abbreviated reporters). All records and calculations used in completing this summary are recommended to be retained for a minimum of five years.

I certify that I have been authorized by an officer of the permit holder as an individual who has knowledge and responsibility for emissions data (or activity level data for qualified abbreviated reporters) to submit and certify the accuracy of the data presented in the emissions report on behalf of the permit holder, based on best available knowledge.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this emissions report, and believe that the information is true, accurate and complete. If I certify as a qualified

☐ I acknowledge that I have read the South Coast AQMD Certification Statement.\*

☐ I agree on the responsibility for this AER Report Submission in accordance with Certification Statement.\*

- The AER report is not considered FINAL until the “Certify & Submit AER Report” button below is clicked, and the submittal verification page appears.

The user must enter their AER webtool password and the Facility PIN before clicking the orange button “Certify & Submit AER Report”.

## SCAQMD Online Payment

### Terms of Payment

#### TERMS OF PAYMENT

PLEASE READ THESE TERMS OF PAYMENT CAREFULLY.

IT CONTAINS VERY IMPORTANT INFORMATION ABOUT YOUR RIGHTS AND OBLIGATIONS, AS WELL AS LIMITATIONS AND EXCLUSIONS THAT MAY APPLY TO YOU.

#### Conditions of Payment

These Terms of Payment set forth apply between you and the South Coast Air Quality Management District ("South Coast AQMD") with respect to your payment from South Coast AQMD's website. These Terms of Payment shall apply and may not be altered, supplemented, or amended by the use of any other document.

Payments made to this Internet Site are limited to customers who are at least 18 years of age and who are residents of either the United States of America or foreign countries supporting a minimum of 128 bit encryption. South Coast AQMD will NOT accept payments through this website from parties who are underage. By submitting your payment through this website, you certify that you meet all of the requirements set forth in these Terms of Payment.

#### Credit/Debit Card/e-check Payments

Payments are limited to e-checks, American Express, Discover Card, Visa & MasterCard and are the only methods of payment that will be accepted through this website. All payments received by South Coast AQMD are subject to acceptance at South Coast AQMD's sole discretion.

#### Other Payment Methods

Please note that in addition to the website, payments can be mailed to South Coast AQMD, P.O. Box 4943, Diamond Bar, CA 91765. South Coast AQMD payments may also be made in person Tuesday through Friday, between the hours of 8:00am and 5:00pm Pacific Standard Time at 21895 Copley Drive, Diamond Bar, CA 91765.

#### Payment Date

Your payment is deemed received at the time you select the "Submit" button for a payment if we confirm the transaction and provide you with a confirmation number.

#### Transaction Receipt

A payment is not deemed made until we provide you with an online confirmation number for such payment. You can download or print a copy of the receipt page with your confirmation number for your records. In addition, we will send you an email confirmation of your payment.

#### Your Representations

In addition to the representations in the Terms of Use, you represent to us that: (i) the information you provide to us will be accurate; (ii) you have the right to authorize us to obtain payment from the account designated in your instruction; and (iii) no other person's authorization or action is needed to approve our creation and processing of the payment against your designated account.

#### Electronic Communications

In order to use our South Coast AQMD website, you will need a working connection to the Internet from a personal computer device. Your Internet browser must support the Secure Sockets Layer (SSL), 128-bit encryption protocol. Mozilla Firefox 2.X or higher and Microsoft Internet Explorer 5.X or higher will support this feature. You also will need either a printer connected to your computer to print Communications or sufficient hard drive space available to save the information. You must have your own Internet service provider (ISP), as we do not provide ISP services.

#### Refunds

All refunds will be processed through South Coast AQMD's Billing Services Department. They may be contacted at [909.392.3000](tel:909.392.3000) for further assistance.

#### Disclaimer; Limitation of Liability

In addition to the limitation of liability included in the Terms of Use, you agree that for any liability related to the payment, neither South Coast AQMD nor the County of Los Angeles is liable for any amount of damages above the aggregate dollar amount paid by you under this Terms of Payment.

#### Amendments/Termination

We reserve the right to amend (add to, delete or change) these Terms of Payment.

#### Online Agreement

These Terms of Payment, the Terms of Use, and the Privacy & Security Policy constitute the entire agreement between South Coast AQMD and you.

By clicking/pressing the "Agree" button below, you are confirming that: (1) you agree to receive Communications electronically; (2) your computer system meets the requirements set forth above; (3) you are able to access and print or store information presented at this Site; and (4) you agree to this Terms of Payment, which will be deemed to supplement the Terms of Use and Privacy & Security Policy found elsewhere at this Site.

3. TOTAL FEES DUE							\$1,597.07
4. INSTALLMENTS PAID FOR 2019 - (if any) – All Criteria Pollutants							\$0.00
5. INSTALLMENTS PAID FOR 2019 - (if any) – Toxic Air Contaminants/Ozone Depleters							\$0.00
6. BALANCE DUE (Line 3 - Line 4 - Line 5)							\$1,597.07
7. LATE PAYMENT SURCHARGE							\$0.00
8. AMOUNT DUE							\$1,597.07

## **FACTORS**

### **Common Conversion Factors**

- 1 therm = 100,000 Btu
- 1 therm = 0.0000973 mmscf based on default HHV for natural gas (1,028 Btu/scf)
- 1 therm = 0.0000952 mmscf based on default HHV for natural gas (1,050 Btu/scf)
- 1 pound = 454 grams
- 1 gallon = 3.785 liters
- 1 lb/gal = 120 grams/liter
- VOC (lbs/gal) = Weight Fraction (lbs/lb) x Density (lbs/ gal)
- Density = Specific Gravity x 8.34 lbs/gal
- 1 MW (megawatt)\* =  $10.5 \times 10^6$  Btu/hr \*\* =  $8 \times 10^3$  steam/hr
- \* Net electric production of a steam electric power plant from EPA AP42 Appendix A.
- \*\* "Btu/hr" in this equation represents thermal energy input from combustion of fuel.
- 1 BHP (Boiler Horsepower) =  $40.5 \times 10^3$  Btu/hr\* = 34.5 lb steam/hr
- \* "Btu/hr" in this equation represents thermal energy input from combustion of fuel.
- 1 bhp (Brake Horsepower) =  $2,542.5 \text{ Btu/hr}^* \div \text{Internal Combustion Engine Thermal Efficiency}^{**}$
- \* "Btu/hr" in this equation represents thermal energy input from combustion of fuel.
- \*\* When source specific data is not available: Internal Combustion Engine Thermal Efficiency = 35%.
- $^{\circ}\text{R} = (^{\circ}\text{F} + 460)$
- 1 gallon = 7.48 cubic foot
- 1 Mgal = 1,000 gallon
- 1 MMscf = 1,000,000 scf
- 1 atmosphere = 14.7 psi = 760 mm Hg = 29.92 in. Hg = 1,013.2 mbars

## **REFERENCES**

### **List of TACs and ODCs**

Table 1 provides the complete list of toxic air contaminants and ozone depleters including TAC Code, TAC family name, CAS number/TAC ID, and the name of each specific substance classified under each TAC group. The last column "Type of TAC/ODC" identifies each of the listed components as VOC or PM.

Table 1 lists the family name and the individual species within the family for the following toxic air contaminants (TACs):

- Chlorinated dioxins and dibenzofurans (TAC Code 7)
- Fluorocarbons (chlorinated and brominated) (TAC Code 22)
- PAHs (TAC Code 19)
- POMs and PAH-derivatives (TAC Codes 61, 74, and 75)

For some of these TAC families, there are options to report under a cumulative TAC ID (1080 for chlorinated dibenzofurans, 1086 for chlorinated dioxins, and 1151 for PAHs) or under individual CAS numbers. It is important when reporting emissions for these families of compounds that emissions are not double counted thus adversely affecting the facility's emissions and/or fees. In other words, emissions reported under an individual CAS number (e.g., CAS No. 86737 for fluorene) should not also be included in the cumulative TAC ID (e.g., 1151 for PAHs). However, if there are PAHs that do not have individual CAS numbers in the AER Reporting Tool, then these should be reported under the cumulative TAC ID.

Historically, metal compounds were reported under the elemental metal. For example, only the elemental hexavalent chromium emissions were reported for strontium chromate. To estimate the elemental portion of the metal, the metal compound was multiplied by the molecular weight correction factor, which is the molecular weight of the elemental metal divided by the molecular weight of the metal compound. So, the molecular weight correction factor for strontium chromate is the molecular weight of hexavalent chromium divided by the molecular weight of strontium chromate  $((51.996 \text{ lb/lb-mol})/(203.614 \text{ lb/lb-mol}) = 0.2254)$ . So, one pound of strontium chromate emissions results in 0.2254 pound of hexavalent chromium emissions.

As part of the CTR implementation CARB staff has asked that metal compound emissions required to be reported by CTR be reported as the metal compound instead of as the elemental metal. These additional metal compounds are presented in Table 3.

The molecular weight correction values are presented in Table 3 for metal compounds such as, arsenic, beryllium, hexavalent chromium, lead, and nickel. These molecular weight correction values are included in the emission fee portion of AER Reporting Tool, so users must estimate the emissions of the metal compound in the AER Reporting Tool, and the AER Reporting Tool will convert these emissions to the elemental emissions in the emission fees calculations. This methodology allows the reporting of the metal compound emissions required by CARB staff and ensures that the facility is only charged for the elemental metal emissions required by Rule 301.

If a metal compound is used at a facility that is not included as a selection in the AER Reporting Tool, for example cadmium carbonate (CAS No 513780), which is used in some fungicides and in chemical reagents. Then, the user will need to estimate the elemental metal portion of metal compound and report it under the CAS number or TAC ID (e.g., 1016 for arsenic, or 1128 for lead compounds) for the elemental metal.

The molecular weight correction for cadmium carbonate is  $((112.411)/(172.41 \text{ lb/lb-mol}) = 0.6520)$ . So, if one pounds of cadmium carbonate is used in a process, then the user should report 0.6520 pound of cadmium emitted from the process under the CAS No for elemental cadmium (CAS No. 7440439).

**Table 1: Ammonia & Ozone Depleting Compounds (ODC)**

TAC Code	Group	CAS No.	Substance	Type of TAC/ODC
32	Ammonia	7664417	Ammonia	Only TAC
22	Chlorofluorocarbons (CFCs)	1104	Fluorocarbons (chlorinated)	TAC, ODC
		75718	Dichlorodifluoromethan (Freon 12)	TAC, ODC
		75694	Trichlorofluoromethane (Freon 11)	TAC, ODC
		76131	Trichlorotrifluoroethane (Freon - 113)	TAC, ODC
23	1,1,1-trichloroethane	71556	Methyl chloroform (1,1,1-Trichloroethane)	TAC, ODC

**Table 2: Form TACS Toxic Air Contaminants and Ozone Depleters**

TAC Code	New Group	CAS No.	Substance	Type of TAC/ODC
1	Asbestos Mineral fibers (other than man-made)	1332214	Asbestos	TAC and PM
2	Benzene	71432	Benzene	TAC and VOC
3	Beryllium, including compounds	7440417	Beryllium	TAC and PM
		1304569	Beryllium oxide	
		7787566	Beryllium sulfate (tetrahydrate)	
		13510491	Beryllium sulfate	
4	Butadiene [1,3]	106990	1,3-Butadiene	TAC and VOC
5	Cadmium, including compounds	7440439	Cadmium	TAC and PM
		141004	Cadmium succinate	
		10108642	Cadmium chloride	
6	Carbon tetrachloride	56235	Carbon tetrachloride	TAC and VOC
7	Polychlorinated dibenzofurans and dioxins	1080	Dibenzofurans (Polychlorinated dibenzofurans) {PCDFs} [POM]	TAC and VOC
		1086	Chlorinated dioxins, without individual isomers reported	TAC and VOC
		1746016	2,3,7,8-Tetrachlorodibenzo-p-dioxin {TCDD} [POM]	TAC and VOC
		3268879	1,2,3,4,5,6,7,8-Octachlorodibenzo-p-dioxin [POM]	TAC and VOC
		19408743	1,2,3,7,8,9-Hexachlorodibenzo-p-dioxin [POM]	TAC and VOC

13	13765190	Calcium chromate	Chromium, hexavalent, including compounds	0.3332
14	1303000	Gallium arsenide	Arsenic, including compounds (inorganic)	0.518
14	1303282	Arsenic pentoxide	Arsenic, including compounds (inorganic)	0.6519
14	1327533	Arsenic trioxide	Arsenic, including compounds (inorganic)	0.7574
14	7778394	Arsenic acid	Arsenic, including compounds (inorganic)	0.5278
14	7778441	Calcium arsenate	Arsenic, including compounds (inorganic)	0.3766
15	301042	Lead acetate	Lead, including compounds (inorganic)	0.637
15	1335326	Lead subacetate	Lead, including compounds (inorganic)	0.7696
15	7446277	Lead phosphate	Lead, including compounds (inorganic)	0.7659
17	373024	Nickel acetate	Nickel, including compounds	0.3321
17	1271289	Nickelocene	Nickel, including compounds	0.49365
17	1313991	Nickel oxide	Nickel, including compounds	0.7859
17	3333673	Nickel carbonate	Nickel, including compounds	0.4945
17	7718549	Nickel chloride	Nickel, including compounds	0.4529
17	7786814	Nickel sulfate	Nickel, including compounds	0.3794
17	12035722	Nickel subsulfide	Nickel, including compounds	0.2443
17	12054487	Nickel hydroxide	Nickel, including compounds	0.6332
17	13138459	Nickel nitrate {Nickel (II) nitrate}	Nickel, including compounds	0.3213
17	13463393	Nickel carbonyl	Nickel, including compounds	0.3438
108	75741	Tetramethyllead	Lead, including compounds (other than inorganic)	0.775
108	78002	Tetraethyllead	Lead, including compounds (other than inorganic)	0.6407

**Table 4. Special Instructions for Reporting Select Toxic Air Contaminants**

TAC Code	Substance	Reporting Recommendations
14	Arsenic and compounds	The entire emissions of arsenic compounds included in the AER Reporting Tool must be reported. For, example if one pound of arsenic trioxide is emitted, then one pound should be reported under CAS No 1327533. However, if an arsenic compound is not included in the AER Reporting Tool, then only elemental emissions of the arsenic compound should be reported under the TAC ID 1016. To report the elemental emissions of the arsenic compound, the emissions of the arsenic compound should be multiplied by the molecular weight correction factor, which is the molecular weight of elemental arsenic divided by the molecular weight of the arsenic compound.
1	Asbestos	Be sure to consider the asbestos weight fraction in mineral fibers such as erionite, talc, etc. when calculating the asbestos emissions.
3	Beryllium Compounds	The entire emissions of beryllium compounds included in the AER Reporting Tool must be reported. For, example if one pound of beryllium oxide is emitted, then one pound should be reported under CAS No 1304569. However, if the beryllium compound is not included in the AER Reporting Tool, then only elemental emissions of the beryllium compound should be reported under CAS No 7440417. To report the elemental emissions of the beryllium compound, the emissions of the beryllium compound should be multiplied by the molecular weight correction factor, which is the molecular weight of elemental beryllium divided by the molecular weight of the beryllium compound.
5	Cadmium Compounds	The entire emissions of cadmium compounds included in the AER Reporting Tool must be reported. For, example if one pound of cadmium chloride is emitted, then one pound should be reported under CAS No 10108642. However, if the cadmium compound is not included in the AER Reporting Tool, then only elemental emissions of the cadmium compound should be reported under CAS No 7440439. To report the elemental emissions of the cadmium compound, the emissions of the cadmium compound should be multiplied by the molecular weight correction factor, which is the molecular weight of elemental cadmium divided by the molecular weight of the cadmium compound.
13	Hexavalent chromium and compounds	The entire emissions of hexavalent chromium compounds included in the AER Reporting Tool must be reported. For, example if one pound of strontium chromate is emitted, then one pound should be reported under CAS No 7789062. However, if the hexavalent chromium compound is not included in the AER Reporting Tool, then only elemental emissions of the hexavalent chromium compound should be reported under CAS No 18540299. To report the elemental emissions of the hexavalent chromium compound, the emissions of the hexavalent chromium compound should be multiplied by the molecular weight correction factor, which is the molecular weight of elemental hexavalent chromium divided by the molecular weight of the hexavalent chromium compound.
7	Chlorinated dioxins and dibenzofurans	Report emissions as either a family total or by individual species. Do not double count the same emissions in the family total and as an individual species.
22	Fluorocarbons (chlorinated and brominated)	Report emissions as either a family total or by individual species. Do not double count the same emissions in the family total and as an individual species.
15 108	Lead and compounds	The entire emissions of lead compounds included in the AER Reporting Tool must be reported. For, example if one pound of lead

<b>TAC Code</b>	<b>Substance</b>	<b>Reporting Recommendations</b>
		acetate is emitted, then one pound should be reported under CAS No 301042. However, if the lead compound is not included in the AER Reporting Tool, then only elemental emissions of the lead compound should be reported under TAC ID 1128. To report the elemental emissions of the lead compound, the emissions of the lead compound should be multiplied by the molecular weight correction factor, which is the molecular weight of elemental lead divided by the molecular weight of the lead compound.
17	Nickel	The entire emissions of nickel compounds included in the AER Reporting Tool must be reported. For, example if one pound of nickel oxide is emitted, then one pound should be reported under CAS No 1313991. However, if the nickel compound is not included in the AER Reporting Tool, then only elemental emissions of the nickel compound should be reported under CAS No 7440020. To report the elemental emissions of the nickel compound, the emissions of the nickel compound should be multiplied by the molecular weight correction factor, which is the molecular weight of elemental nickel divided by the molecular weight of the nickel compound.
19	PAHs	Report emissions as either a family total or by individual species. Do not double count the same emissions in the family total and as an individual species.
61 74 75	POMs and PAH-derivatives	Report emissions as either a family total or by individual species. Do not double count the same emissions in the family total and as an individual species.
