

10 Ten Things AQMD is Doing to Help Clean the Air

1 Eliminating dirty diesels by requiring fleets of school buses, transit buses, street sweepers, trash trucks and airport taxis to phase in clean-burning vehicles.

5 Conducting special air monitoring studies in communities with the greatest air quality concerns.

8 Continuing to develop new regulations to further reduce pollution from all sources – from dry cleaners to oil refineries to cement plants.

2 Responding to residents' air pollution complaints called in to 1-800-CUT-SMOG or made online at www.aqmd.gov/complain/reporting_aq_problems.html

1-800-CUT-SMOG

6 Providing more than \$100 million in state and local funding to help convert diesel tugboats, construction equipment and heavy-duty trucks to lower-emission and clean fuel models, and establish on-shore electric power systems to provide electricity to ships docked at area ports.

9 Helping fund research to develop zero-emission fuel cells, and hybrid technology to power cars, buses and other vehicles.

3 Conducting Town Hall meetings and establishing the Clean Air Connections to solicit residents' air quality concerns that help shape clean air policy.

4 Carrying out Environmental Justice Initiatives to ensure cleaner air for all Southland residents.

7 Co-sponsoring research that helps us understand how air pollution impacts our health, especially for children, athletes and individuals with respiratory illnesses.

10 Working with clean air agencies worldwide to be part of a comprehensive solution to air pollution problems.
