REVISIONS TO PROPOSED RULE LANGUAGE

Rule 1403 – Asbestos Emissions from Demolition/Renovation Activities

- **Latest changes since WGM #3**
 - ✓ **Definitions – section (c)**
 - ✓ **Requirements – section (d)**
 - ✓ **Sampling Protocols and Test Methods – section (h)**
- **Minor changes since WGM #3**
 - ✓ **Clarifying or corrective revisions to existing rule language**
 - **e.g. – change “as described in” to “in accordance with”**
 - ✓ **Update the CFR references**

DEFINITIONS – Subdivision (c)

Rule 1403 – Asbestos Emissions from Demolition/Renovation Activities

➤ Definitions (c)

- ✓ **(14) DEMOLITION – change “roof” to “roof support structures”**
 - **Roof Support considered a load supporting structure**
- ✓ **(22) FRIABLE ASBESTOS-CONTAINING MATERIAL – change “includes” to “may include,” but is not limited to sprayed-on or troweled-on fireproofing...**
 - **Taking into consideration that, at times, some of these materials may not be considered friable ACM**
- ✓ **(33) OWNER-OCCUPANT – changed “owner” to “homeowner”**
 - **Attempting to clarify the exemption applies only to a homeowner who actually occupies the house as a place of residence**
 - **Further clarification in the exemption that owner-occupant must reside at the property and conduct the work themselves**

REQUIREMENTS – Subdivision (d)

Rule 1403 – Asbestos Emissions from Demolition/Renovation Activities

➤ Requirements (d)

- ✓ **(d)(1)(B)(ii)(VI)(1) – For projects that do not conform to the traditional Monday through Friday work schedule, a Schedule of Work shall be included as part of the notification and updated at least 24 hours prior to any change of schedule taking effect**
- ✓ **(d)(1)(B)(ii)(VI)(2) – For projects that suffer a delay due to events outside their control after the Start Date including, but not limited to, flood, fire, or earthquake, the district shall be notified within 6 hours of the delay. The district shall be notified at least 24 hours prior to the resumption of work.**
- ✓ **(d)(1)(B)(iv)(V) – For the emergency letter, staff added “In lieu of a renovation or demolition operator signature, the person affected by the emergency shall have the letter notarized by a public notary”**

REQUIREMENTS – Subdivision (h)

Rule 1403 – Asbestos Emissions from Demolition/Renovation Activities

➤ Sampling Protocols and Test Methods (h)

- ✓ (h)(1)(E) – When composite sampling is performed for layered materials, analysis shall be performed in accordance with subparagraph (h)(2)(B)**
- ✓ (h)(2)(B) – The analysis of composite samples of layered materials including, but not limited to, wall systems (wallboard, joint compound, and joint tape) or stucco (base and scratch coat) is prohibited for the quantification of asbestos content. All separable layers shall be analyzed and reported separately for asbestos content.**

PROPOSED GUIDANCE DOCUMENTS & FAQs

Rule 1403 – Asbestos Emissions from Demolition/Renovation Activities

- **Staff to provide improvements to the Rule 1403 web pages**
 - ✓ **Guidance to be provided for some common issues, such as:**
