Requirements for Continuous Emission Monitoring

Proposed Amended Rules (PAR) 218 and 218.1
(Formerly Rulemaking for Proposed Rule 113)

Working Group Meeting #1
March 13, 2019
SCAQMD Headquarters
Diamond Bar, California

Agenda

- Background
- General Overview for RECLAIM Major Source CEMS and Non-RECLAIM CEMS
- The Scope of PAR 218/218.1
- Stakeholders’ concerns
Background

- In March 2017, the SCAQMD adopted the 2016 AQMP
  - Control measure CMB-05 requires the RECLAIM program to transition to a command-and-control structure
  - Requires a 5 ton per day NOx emission reduction to be achieved with Best Available Retrofit Control Technology (BARCT) as soon as feasible and no later than 2025
- In July 2017, Assembly Bill 617 was signed by the Governor
  - Requires expedited BARCT implementation for facilities in the state greenhouse gas cap and trade program by December 31, 2023
  - Places priority on higher polluting units

NOx RECLAIM

- Adopted in October 1993
- 258 NOx RECLAIM facilities active as of the end of compliance year 2017 (June 30, 2018)
- NOx mass emissions monitored and reported to comply with RECLAIM Trading Credit (RTC) allocation and ensure accuracy in the RTC trading
- RECLAIM MRR requirements vary depending on the source categories (i.e., Major Source, Large Source, Process Unit, and Rule 219 source)
- For NOx Major Source, CEMS is required and emission reporting is on a daily basis
- For Large Source and Process Unit,
  - Fuel meter/time meter, Source test, and tune-up may satisfy the monitoring requirement
  - Emission Reporting is on a monthly basis for Large Source and quarterly for Process Unit
### General Overview of Rule 218 and 218.1

- Applies to non-RECLAIM facilities
- Rule 218 provides general CEMS requirements on applicability, certification, modification, operation, recordkeeping, and reporting
- Rule 218.1 specifies system installation, certification tests, QAQC tests, and the standards
- Requirements for “Existing CEMS” (i.e., prior to May 14, 1999) are obsolete
- Facilities requested to improve the rule by specifying the requirements
General Approach

- Background
  - MRR requirements for NOx RECLAIM facilities are currently regulated in Regulation XX
  - MRR in Landing Rules provide temporary solution for RECLAIM CEMS
  - Rules 218 and 218.1 provide specifications for CEMS at non-RECLAIM facilities

- Staff Proposed Approach
  - Landing Rules will define applicability to install a CEMS
  - PAR 218/218.1 would harmonize the requirements for RECLAIM and non-RECLAIM CEMS
  - Other MRR requirements (fuel meter/timer, source test, tune up, etc.) specified in Landing Rules or permit conditions

The Scope of PAR 218/218.1

- Applicability
  - Any facilities with CEMS that continue to be operated, or new CEMS required by Landing Rules

- Regulated Pollutants
  - Any pollutant monitored by CEMS as required by SCAQMD Rules or permits
  - NOx is the focus at this amendment

- Monitoring
  - Emphasis on CEMS
  - Specifying CEMS general requirements and performance standards
CEMS Universe

- RECLAIM NOx CEMS (2016-2017 Data)
  - 501 devices with NOx CEMS in 84 RECLAIM facilities
- Non-RECLAIM NOx CEMS (CEMS Application Data)
  - 192 active facilities that previously submitted a CEMS application
  - Some of the CEMS may not be in operation
- CEMS universe may change when RECLAIM transitions to Landing Rules

### Comparison Between CEMS Applicability for Rule 2012 and Landing Rules

<table>
<thead>
<tr>
<th></th>
<th>Rule 2012 CEMS Applicability</th>
<th>Landing Rule CEMS Applicability</th>
<th>Changes When Transitioning to Landing Rules</th>
</tr>
</thead>
<tbody>
<tr>
<td>Industrial Boilers</td>
<td>• Heat input ≥40 MMBtu/hour but &lt;500 MMBtu/hour and annual heat input &gt;90 x 10⁹ Btu/year; or</td>
<td>• Heat input ≥40 MMBtu/hour and annual heat input &gt;200 x 10⁹ Btu/year</td>
<td>• Some CEMS in non-refinery may no longer be required when the heat input is no more than 200 x 10⁹ Btu/year</td>
</tr>
<tr>

Approach for NOx CEMS MRR
Requirements for Facilities in RECLAIM

Facilities in RECLAIM  Rule 2012 MRR

Approach for NOx CEMS MRR Requirements for Facilities that Exited RECLAIM

(1) Facility has exited RECLAIM; but
(2) Amendment to Rule 218/218.1 has not been approved

(1) Facility has exited RECLAIM; but
(2) Landing Rule requires CEMS to be reconfigured and recertified by a specific compliance date

Landing Rule MRR (Rule 2012 MRR Less Reporting)
Approach for NOx CEMS MRR Requirements for Facilities that Exited RECLAIM – cont.

(1) Facility has exited RECLAIM;
(2) Amendment to Rule 218/218.1 has been approved; and
(3) CEMS does not need to be recertified

(1) Facility has exited RECLAIM;
(2) Amendment to Rule 218/218.1 has been approved; and
(3) CEMS is ready to be recertified upon completion of all the changes to the source and CEMS

Key Concerns

EPA
- Excess emission should be reported (currently not by RECLAIM and non-Title V facilities)

Stakeholders

Monitoring:
- Should there be changes and new requirements for data availability and partial hours
- There are divided opinions on what averaging method to use in PR 113 (i.e., Rolling Hourly Average vs. fixed hourly average)
- What triggers CEMS recertification, and if CEMS recertification required for data averaging method change
- Suggest to allow off-line QAQC testing during non-operation period
- Suggest to allow 1-2 days for Ammonia Injection Grid (AIG) annual tuning without variance (the unit at tuning has to be on-line for NOx measurement)
Key Concerns– cont.

**Stakeholders**

*Recordkeeping and Reporting:*
- Will RTU and Strip Charts still be required
- What will be the changes to recordkeeping and reporting requirements
- Suggest to use Part 60 type of reporting: Report breakdown and deviation when it happens, then semiannually report summary of the deviation and emission data and tests; Provide an exemplary report form

**Other Concerns:**
- What would be the requirements for startup and shut down emissions
- Former RECLAIM facilities should be exempted from any violation involved in CEMS mass calculation before PR 113 is adopted
- Others??

---
