**Subject:** [EXTERNAL] EPA Comments for Draft ISR Rule 2306  
**Date:** Thursday, July 25, 2024 11:50:55 AM

---

Dear Zoya,

Thank you for the opportunity for EPA to comment on the draft language for South Coast AQMD Rule 2306. Our comments below are based on the draft proposed language as found on the Proposed Rule 2306 webpage for the public hearing on August 2, 2024.

1. Section (c)(17) is the definition for Locomotive Engine Certification Data. The definition references EPA locomotive certification procedures. While we understand this as a reference to the certification procedures under 40 CFR part 1033, we recommend revising this definition to include a CFR citation or other reference to clarify the applicable certification procedures.
2. The EPA recommends submitting Rule 2306 Calculation Methodology to the SIP at the same time that Rule 2306 is submitted to the SIP.

Please let me know if you have any questions.

Sincerely,

La Kenya Evans-Hopper (Ph.D)  
Rules Office, Air and Radiation Division  
Life Scientist  
U.S. EPA Region 9
