Subject: [EXTERNAL] Rail Yard Indirect Source Review Rule public comment

Clerk of the Board,

The rail yard indirect source review rule PR2306 must pass because:

1. The rule addresses pollution magnets by setting emission reduction targets for facility-wide sources of pollution such as the rail yards.
2. The rule is flexible and allows the rail yards to invest in infrastructure.
3. It includes robust reporting so you & the community can be the eyes & ears that keep the rail yards accountable.

Thank you for submitting my public comment.

Regards,

Art Quintero
