Technology Symposium on

Transitioning to **Zero-Emission** Freight Transport Technologies

Criteria pollutant and greenhouse gas emissions from freight transport related mobile sources are significant contributors to California's air quality and climate change. Meeting federal ambient air quality standards and California's climate change goals will require technology transformation on all levels. As such, innovative freight technologies development, demonstration and deployment must be accelerated over the next several years.

This symposium will include freight technology industry experts to stimulate an open and frank discussion of opportunities, challenges, and implementation timelines for promising zero- and near-zero emission freight transport technologies. The anticipated results of this Symposium may provide input for policy options and decisions.

Topics will include:

- On-Road Trucks and Yard Hostlers
- Line-Haul Freight Locomotives
- Cargo and Other On-Port Vehicles and Equipment
- Marine Vessels

Where:

South Coast
Air Quality Management
District Headquarters
21865 Copley Drive
Diamond Bar, California 91765

When:

April 10 – 11, 2013
8:30 a.m. to 4:30 p.m.

Jointly hosted by the Clean Air Technology Initiative partners, the *Transitioning to Zero-Emission Freight Transport Technologies Symposium* will be open to the public. An agenda for the symposium will be available shortly and posted at the following websites: www.aqmd.gov, www.valleyair.org, www.arb.ca.gov, and www.epa.gov.

Attendance is Free. Pre-registration is recommended.

To register, email events@aqmd.gov or call Ana Ponce at (909) 396-3008.

For more information, contact Randall Pasek at (909) 396-2251 or email rpasek@aqmd.gov.
