

Robert L. McCormick
Principal Engineer
National Renewable Energy Laboratory

Bob McCormick is Principal Engineer in the Fuels Performance Group at the National Renewable Energy Laboratory. He attended Oklahoma State University, Iowa State University, and the University of Wyoming, holds a doctorate in chemical engineering, and has worked in fuel processing, catalysis, and fuel utilization R&D for 18 years in both industrial, academic, and government environments. He joined the staff at NREL in 2001 and currently leads biodiesel utilization R&D as well as R&D on other renewable transportation fuels. Bob has been engaged in R&D on biodiesel utilization for more than 10 years.
