

# South Coast Air Quality Management District

21865 Copley Drive, Diamond Bar, CA 91765-4178  
(909) 396-2000 • [www.aqmd.gov](http://www.aqmd.gov)

## A G E N D A

### MEETING, DECEMBER 4, 2020

A meeting of the South Coast Air Quality Management District Board will be held at 9:00 AM.

Pursuant to Governor Newsom's Executive Orders N-25-20 (March 12, 2020) and N-29-20 (March 17, 2020), the Governing Board meeting will only be conducted via video conferencing and by telephone. Please follow the instructions below to join the meeting remotely.

#### **ELECTRONIC PARTICIPATION INFORMATION** (Instructions provided at bottom of the agenda)

**Join Zoom Meeting - from PC, Laptop or Phone**

**<https://scaqmd.zoom.us/j/93128605044>**

Meeting ID: **931 2860 5044** (applies to all)

Teleconference Dial In +1 669 900 6833 or +1 253 215 8782

One tap mobile +16699006833,,97364562763# or +12532158782,,93128605044#

#### **Spanish Language Only Audience (telephone)**

**Número Telefónico para la Audiencia de Habla Hispana**

Teleconference Dial In/Numero para llamar: +1 669 900 6833

One tap mobile: +16699006833,,93112584181#

**Meeting ID/Identificación de la reunión: 931 1258 4181**

**Audience will be allowed to provide public comment through telephone or Zoom connection.**

#### **PUBLIC COMMENT WILL STILL BE TAKEN**

##### **Questions About an Agenda Item**

- The name and telephone number of the appropriate staff person to call for additional information or to resolve concerns is listed for each agenda item.
- In preparation for the meeting, you are encouraged to obtain whatever clarifying information may be needed to allow the Board to move expeditiously in its deliberations.

##### **Meeting Procedures**

- The public meeting of the South Coast AQMD Governing Board begins at 9:00 a.m. The Governing Board generally will consider items in the order listed on the agenda. However, any item may be considered in any order.
- After taking action on any agenda item not requiring a public hearing, the Board may reconsider or amend the item at any time during the meeting.

All documents (i) constituting non-exempt public records, (ii) relating to an item on the agenda, and (iii) having been distributed to at least a majority of the Governing Board after the agenda is posted, are available prior to the meeting at South Coast AQMD's web page ([www.aqmd.gov](http://www.aqmd.gov)).

#### **Americans with Disabilities Act and Language Accessibility**

Disability and language-related accommodations can be requested to allow participation in the Governing Board meeting. The agenda will be made available, upon request, in appropriate alternative formats to assist persons with a disability (Gov. Code Section 54954.2(a)). In addition, other documents may be requested in alternative formats and languages. Any disability or language-related accommodation must be requested as soon as practicable. Requests will be accommodated unless providing the accommodation would result in a fundamental alteration or undue burden to the South Coast AQMD. Please contact the Clerk of the Boards Office at (909) 396-2500 from 7:00 a.m. to 5:30 p.m., Tuesday through Friday, or send the request to [cob@aqmd.gov](mailto:cob@aqmd.gov)

**A webcast of the meeting is available for viewing at:**

<http://www.aqmd.gov/home/news-events/webcast>

*Cleaning the air that we breathe...*

## **CALL TO ORDER**

- Pledge of Allegiance
- Roll Call
- Opening Comments: William A. Burke, Ed.D., Chair  
Other Board Members  
Wayne Nastri, Executive Officer

**PUBLIC COMMENT PERIOD** – (Public Comment on Non-Agenda Items, Pursuant to Government Code Section 54954.3) The public may comment on any subject within the South Coast AQMD's authority that **does not** appear on the agenda, during the Public Comment Period. Each speaker addressing non-agenda items may be limited to a total of (3) minutes.

---

Staff/Phone (909) 396-

## **CONSENT CALENDAR (Items 1 through 18)**

Note: Consent Calendar items held for discussion will be moved to Item No. 19

1. Approve Minutes of November 6, 2020 Board Meeting **Thomas/3268**
  2. Set Public Hearing January 8, 2021 to Consider Adoption of and/or Amendments to South Coast AQMD Rules and Regulations **Nastri/3131**
- Certify Final Environmental Assessment and Adopt Proposed Rule 1407.1 – Control of Toxic Air Contaminant Emissions from Chromium Alloy Melting Operations **Nakamura/3105**
- Proposed Rule 1407.1 will reduce hexavalent chromium, arsenic, cadmium, and nickel emissions from chromium alloy melting operations. Proposed Rule 1407.1 establishes point source emission limits, housekeeping requirements, building enclosure provisions, source testing requirements, and monitoring, reporting, and recordkeeping requirements. This action is to adopt the Resolution: 1) Certifying the Final Environmental Assessment for Proposed Rule 1407.1 – Control of Toxic Air Contaminant Emissions from Chromium Alloy Melting Operations; and 2) Adopting Proposed Rule 1407.1 – Control of Toxic Air Contaminant Emissions from Chromium Alloy Melting Operations. (Reviewed: Stationary Source Committee, November 20, 2020)

**Budget/Fiscal Impact**

3. Recognize Revenue and Execute Contracts for Electrification of Transport Refrigeration in Southern California Grocery Fleet **Miyasato/3249**

South Coast AQMD has been awarded up to \$2,240,721 from U.S. EPA to replace diesel transport refrigeration units (TRUs) with electrified TRUs and install supporting infrastructure with Albertsons Companies. These actions are to: 1) recognize revenue, upon receipt, of up to \$2,240,721 from the U.S. EPA FY20 Clean Diesel Funding Assistance Program into the Clean Fuels Program Fund (31) for electrification of transport refrigeration; 2) execute a contract with Albertsons Companies to replace diesel TRUs with electrified TRUs and install supporting infrastructure in an amount not to exceed \$2,170,975 from the Clean Fuels Program Fund (31); and 3) reimburse the General Fund up to \$69,746 from the Clean Fuels Program Fund (31) for administrative costs. (Reviewed: Technology Committee, November 20, 2020; Recommended for Approval)

4. Recognize Funds, Execute and Amend Agreements for Installation and Maintenance of Air Filtration Systems, and Reimburse General Fund **Miyasato/3249**

As part of the Community Air Protection Program (CAPP) incentive funds, \$6,352,650 was approved to implement school air filtration projects in AB 617 communities. CARB has also requested South Coast AQMD administer two Supplemental Environmental Projects (SEPs) to install and maintain air filtration systems at schools and residences in Environmental Justice communities. These actions are to: 1) recognize up to \$17,600 and \$9,250 from CARB for two SEPs to install and maintain air filtration systems at schools and residences, and reimburse administrative costs, into the Air Filtration Fund (75); 2) execute contracts with IQAir North America to install air filtration systems in an amount up to \$6,352,650 from the Community Air Protection SB 856 Fund (77) and up to \$17,600 and \$9,250 from the Air Filtration Fund (75); 3) execute agreements with CARB and local school districts; 4) amend contracts to purchase additional filters using unspent administrative funds; and 5) reimburse the General Fund for administrative costs up to \$1,343 for the CARB SEPs. (Reviewed: Technology Committee, November 20, 2020; Recommended for Approval)

5. Execute Contracts for Volkswagen Environmental Mitigation Trust Program – Combustion Freight and Marine Projects Category **Berry/2363**

In March 2020, the Program Announcement for the Volkswagen (VW) Environmental Mitigation Trust Program - Combustion Freight and Marine Projects category, with \$30 million in available funding, closed. The solicitation was largely undersubscribed primarily due to the lower incentive amounts, other competing programs in South Coast AQMD, and other programmatic requirements, as specified in the court-approved Consent Decrees and CARB's Beneficiary Mitigation Plan. Based on review of eligible applications, staff is recommending awards for truck replacement and marine engine repower projects. This action is to execute contracts for the VW Program – Combustion Freight and Marine Projects Category. (Reviewed: Technology Committee, November 20, 2020; Recommended for Approval)

6. **Recognize Revenue and Appropriate and Transfer Funds, Issue Solicitations and Purchase Orders and Amend Contract for Air Monitoring** **Low/2269**

South Coast AQMD is expected to receive supplemental grant funds up to \$350,000 from the U.S. Government for the Enhanced Particulate Monitoring Program and up to \$794,261 from U.S. EPA for the FY 2021 (29th Year) PAMS Program. These actions are to recognize revenue and appropriate funds when they become available in Science & Technology Advancement's FY 2020-21 and FY 2021-22 budgets for the Enhanced Particulate Monitoring Program and the PAMS Program, transfer up to \$350,000 between Major Objects in Science and Technology Advancement's FY 2020-21 Budget to realign expenditures as needed for the Enhanced Monitoring Program, issue solicitations, execute purchase orders and amend contract for equipment and services for air monitoring. (Administrative Committee, November 13, 2020; Recommended for Approval)
7. **Amend Contracts for Legislative Representation in Washington, D.C.** **Alatorre/3122**

The current contracts for legislative and regulatory representation in Washington D.C. with Kadesh & Associates, LLC, Cassidy & Associates, and Carmen Group, Inc., expire on January 14, 2021. Each of these contracts includes an option for two one-year extensions. This action is to consider approval of the second one-year extension of the existing contracts for Calendar Year 2021 with Kadesh & Associates, LLC for \$226,400; Cassidy & Associates for \$216,000; and Carmen Group, Inc. for \$222,090 as South Coast AQMD's legislative and regulatory representatives in Washington D.C., to further the agency's policy positions at the federal level. Sufficient funding is available in the Legislative, Public Affairs & Media FY 2020-21 Budget. (Reviewed: Administrative Committee; November 13, 2020, Recommended for Approval)
8. **Execute Contracts for Legislative Consulting Services Representation in Sacramento, California** **Alatorre/3122**

At the September 4, 2020 meeting, the Board approved release of an RFP to solicit proposals for legislative representation in Sacramento, California. Four separate proposals were received from California Advisors, LLC, Campbell Strategy & Advocacy, Joe A. Gonsalves & Son and Resolute. On November 13, 2020, the Administrative Committee recommended approval of the execution of contracts with California Advisors, LLC for \$142,080, Joe A. Gonsalves & Son for \$143,000 and Resolute for \$180,000 for legislative representation in Sacramento, California. (Reviewed: Administrative Committee, November 13, 2020; Recommended for Approval)

9. Establish List of Prequalified Vendors for Mailing Services **Olvera/2309**

On September 4, 2020, the Board approved release of an RFQ to establish a prequalified list for outside mailing services, including folding, inserting, sealing, removing duplicate addresses, labeling, tabbing and metering, as well as pick-up and delivery of mailing materials. This action is to establish a prequalified vendor list that will be used for mailing services for a three-year period, from January 1, 2021 to December 31, 2023, and vendors on the list will be given an opportunity to bid competitively on mailing jobs, as the need arises. (Reviewed: Administrative Committee, November 13, 2020; Recommended for Approval)

10. Amend Provisions of South Coast AQMD's Salary Resolution and Labor Contracts with Teamsters Local 911 and SC-PEA Relating to Vacation Leave Accrual **Whynot/3104**

Due to operational needs brought about by the COVID-19 pandemic, staff has been required to restrict the use of vacation leave time. As a result, a substantial number of employees will exceed the accrual limits on vacation leave balances at the end of the year and will be prohibited from accruing vacation leave hours next year. This proposal seeks approval of amendments to applicable provisions of South Coast AQMD's Salary Resolution and the bargaining unit MOUs, in order to temporarily suspend the limitations on vacation leave accrual. (No Committee Review)

11. Approve Contract Award and Modifications as Approved by MSRC **McCallon**

The Mobile Source Air Pollution Reduction Review Committee (MSRC) approved a replacement contract as part of their FYs 2014-16 Work Program. The MSRC also approved the modification of three contracts under the FYs 2016-18 Work Program. At this time the MSRC seeks Board approval of the contract award and modifications as part of the FYs 2014-16 and 2016-18 Work Programs. (Mobile Source Air Pollution Reduction Review, November 19, 2020; Recommended for Approval)

**Items 12 through 18 - Information Only/Receive and File**

12. Legislative, Public Affairs, and Media Report **Alatorre/3122**

This report highlights the October 2020 outreach activities of the Legislative, Public Affairs and Media Office, which includes: Major Events, Community Events/Public Meetings, Environmental Justice Update, Speakers Bureau/Visitor Services, Communications Center, Public Information Center, Business Assistance, Media Relations and Outreach to Business and Federal, State and Local Government. (No Committee Review)

13. Hearing Board Report **Prussack/2500**

This reports the actions taken by the Hearing Board during the period of October 1 through October 31, 2020. (No Committee Review)

14. **Civil Filings and Civil Penalties Report** **Gilchrist/3459**
- This reports the monthly penalties from October 1, 2020 through October 31, 2020, and legal actions filed by the General Counsel's Office from October 1 through October 31, 2020. An Index of South Coast AQMD Rules is attached with the penalty report. (Reviewed: Stationary Source Committee, November 20, 2020)
15. **Lead Agency Projects and Environmental Documents Received** **Nakamura/3105**
- This report provides a listing of CEQA documents received by the South Coast AQMD between October 1, 2020 and October 31, 2020, and those projects for which the South Coast AQMD is acting as lead agency pursuant to CEQA. (No Committee Review)
16. **Rule and Control Measure Forecast** **Fine/2239**
- This report highlights South Coast AQMD rulemaking activities and public hearings scheduled for 2021. (No Committee Review)
17. **Annual Audited Financial Statements for FY Ended June 30, 2020** **Jain/2804**
- This item transmits the annual audited financial statements of the South Coast AQMD. The South Coast AQMD has received an unmodified opinion (the highest obtainable) on its financial statements. (Reviewed: Administrative Committee, November 13, 2020)
18. **Status Report on Major Ongoing and Upcoming Projects for Information Management** **Moskowitz/3329**
- Information Management is responsible for data systems management services in support of all South Coast AQMD operations. This item is to provide the monthly status report on major automation contracts and planned projects. (Reviewed: Administrative Committee, November 13, 2020)
19. **Items Deferred from Consent Calendar**

## **BOARD CALENDAR**

*Note: The November meeting of the Mobile Source Committee was canceled. The next meeting of the Mobile Source Committee is scheduled for January 22, 2021.*

20. **Administrative Committee (Receive & File)** **Chair: Burke Nastri/3131**

21. Investment Oversight Committee (Receive and File) Chair: Cacciotti Jain/2804
22. Legislative Committee Chair: Mitchell Alatorre/3122

Receive and file; and take the following action as recommended:

Agenda Item	Recommendation
2021 State Legislative Goals and Objectives	Approve With Committee Revisions
2021 Federal Legislative Goals and Objectives	Approve With Committee Revisions
H.R. 8626 (Barragán) Energy Resilient Communities Act	Support With Amendments

23. Stationary Source Committee (Receive & File) Chair: Benoit Dejbakhsh/2618
24. Technology Committee (Receive & File) Chair: Buscaino Miyasato/3249
25. Mobile Source Air Pollution Reduction Review Committee (Receive & File) Board Liaison: Benoit Berry/2363
26. California Air Resources Board Monthly Report (Receive & File) Board Rep: Mitchell Thomas/2500

**Staff Presentation/Board Discussion**

27. Budget and Economic Outlook Update (*Presentation In Lieu of Board Letter*) Whynot/3104

Staff will provide an update on economic indicators and key South Coast AQMD metrics. (Reviewed: Administrative Committee, November 13, 2020)

## **PUBLIC HEARINGS**

28. Determine That Southeast Los Angeles Community Emissions Reduction Plan Is Exempt from CEQA and Adopt Community Emissions Reduction Plan **Ghosh/2582**

Assembly Bill 617 requires CARB to select communities for the preparation of Community Emissions Reduction Plans (CERPs) and air districts with a selected community to adopt the CERP within one year of selection. CARB selected the Southeast Los Angeles Community in December 2019. The Southeast Los Angeles CERP provides a blueprint for air pollution emission and exposure reductions to address the community's air quality priorities identified within the community. The CERP also includes a description of the process to develop the plan, actions to reduce emissions and exposures, an implementation schedule, and an enforcement plan. This action is to: 1) Determine that the AB 617 CERP for the Southeast Los Angeles community is exempt from the California Environmental Quality Act; and 2) Adopt the AB 617 CERP for the Southeast Los Angeles community. (Reviewed: Stationary Source Committee, November 20, 2020)

29. Determine That Eastern Coachella Valley Community Emissions Reduction Plan Is Exempt from CEQA and Adopt Community Emissions Reduction Plan **Ghosh/2582**

Assembly Bill 617 requires CARB to select communities for the preparation of Community Emissions Reduction Plans (CERPs) and air districts with a selected community to adopt the CERP within one year of selection. CARB selected the Eastern Coachella Valley Community in December 2019. The Eastern Coachella Valley CERP provides a blueprint for air pollution emission and exposure reductions to address the community's air quality priorities identified within the community. The CERP includes a description of the process to develop the plan, actions to reduce emissions and exposures, an implementation schedule, and an enforcement plan. This action is to: 1) Determine that the AB 617 CERP for the Eastern Coachella Valley community is exempt from the California Environmental Quality Act; and 2) Adopt the AB 617 CERP for the Eastern Coachella Valley community. (Reviewed: Stationary Source Committee, November 20, 2020)

30. Determine That Attainment Plan for 2006 24-hour PM2.5 Standard for South Coast Air Basin Is Exempt from CEQA and Approve Attainment Plan for 2006 24-hour PM2.5 Standard for South Coast Air Basin Rees/2856

The South Coast Air Basin (Basin) is a Serious nonattainment area for the 2006 24-hour PM2.5 National Ambient Air Quality Standard (standard) with an attainment deadline of December 31, 2019. Despite significant improvement in PM2.5 levels, the Basin failed to attain this standard by the required date based on 2017-2019 monitoring data. On September 16, 2020, U.S. EPA finalized its determination of the Basin's failure to attain the 2006 24-hour PM2.5 standard by the attainment date. Accordingly, a revision to the SIP is required to be submitted to U.S. EPA by December 31, 2020. The Attainment Plan has been developed to demonstrate expeditious attainment of the 2006 PM2.5 standard and to address other federal Clean Air Act requirements. Based on the updated emissions inventory and modeling analysis in the Plan, the Basin is expected to attain the 2006 PM2.5 standard in 2023 based on the continued implementation of existing regulations and programs. This action is to adopt the Resolution: 1) Determining that the Attainment Plan for 2006 24-hour PM2.5 Standard for the South Coast Air Basin is exempt from the requirements of the California Environmental Quality Act; and 2) Approving the Attainment Plan for 2006 24-hour PM2.5 Standard for the South Coast Air Basin, and directing staff to forward to CARB for approval and submission to U.S. EPA for inclusion in the SIP. (Reviewed: Mobile Source Committee, August 21, 2020)

31. Determine That Coachella Valley Extreme Area Plan for 1997 8-Hour Ozone Standard Is Exempt from CEQA and Approve Coachella Valley Extreme Area Plan for 1997 8-Hour Ozone Standard Rees/2856

On July 10, 2019, the Coachella Valley was reclassified from Severe-15 to Extreme nonattainment for the 1997 8-hour ozone National Ambient Air Quality Standard (standard) with an attainment date of June 15, 2024. A revision to the SIP is required to be submitted to U.S. EPA by February 14, 2021. The Coachella Valley Extreme Area Plan has been developed to demonstrate attainment of the 1997 8-hour ozone standard and to address the applicable federal Clean Air Act requirements for Extreme nonattainment areas. Based on the updated emissions inventory and modeling analysis in the Plan, the Coachella Valley is expected to attain the 1997 ozone standard in 2023 based on the continued implementation of existing regulations and programs. This action is to adopt the Resolution: 1) Determining that Coachella Valley Extreme Area Plan for 1997 8-Hour Ozone Standard is exempt from the requirements of the California Environmental Quality Act; and 2) Approving Coachella Valley Extreme Area Plan for 1997 8-Hour Ozone Standard, and directing staff to forward to CARB for approval and submission to U.S. EPA for inclusion in the SIP. (Reviewed: Mobile Source Committee, September 18, 2020)

32. Determine That Amendments to Regulation XIII - New Source Review, Regulation XX - Regional Clean Air Incentives Market and Regulation XXX - Title V Permits, Are Exempt from CEQA and Amend Regulations XIII, XX and XXX **Nakamura/3105**

Coachella Valley was recently reclassified from Severe-15 to Extreme nonattainment for the federal 1997 8-hour ozone standard, with a new attainment date of June 15, 2024. Under the federal Clean Air Act, the reclassification for Coachella Valley requires revisions to Regulations XIII - New Source Review, XX - Regional Clean Air Incentives Market and XXX - Title V Permits to reduce the Major Polluting Facility thresholds and the thresholds for federal Major Modifications for VOC and NOx which are ozone precursors. Additional amendments are proposed to remove outdated rule provisions, correct rule references, and improve rule clarity. This action is to adopt the Resolution: 1) Determining that the proposed amendments to Regulations XIII, XX and XXX, are exempt from the requirements of the California Environmental Quality Act; and 2) Amending Regulations XIII, XX and XXX. (Reviewed: Stationary Source Committee, October 16, 2020)

33. Determine That Proposed Amendments to Rule 1146 - Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters Are Exempt from CEQA; and Amend Rule 1146 **Nakamura/3105**

Rule 1146 establishes an ammonia slip limit for new and modified pollution control equipment with ammonia emissions, such as Selective Catalytic Reduction (SCR). Proposed Amended Rule 1146 will remove the ammonia slip limit, which is currently addressed under Regulation XIII - New Source Review. This action is to adopt the Resolution: 1) Determining that proposed amendments to Rule 1146 - Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters are exempt from the requirements of the California Environmental Quality Act; and 2) Amending Rule 1146 - Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters. (Reviewed: Stationary Source Committee, October 16, 2020)

#### **OTHER BUSINESS** (*Oral Report/No Written Materials*)

34. Consider Position of H.R. 7822, the "Public Health Air Quality Act of 2020" (Blunt-Rochester) (*Continued from November 6, 2020 meeting by operation of Governing Board procedures, Administrative Code §30.10*) **Alatorre/3122**

At the November 6, 2020 meeting, the Board did not approve the staff recommended position of "Support with Amendments" for H.R. 7822, the "Public Health Air Quality Act of 2020" (Blunt-Rochester) and the item was continued by operation of Governing Board procedures, Administrative Code §30.10. Staff recommends further continuing the item to the January 8, 2021 Board meeting to allow the Legislative Committee to reconsider the item. (Reviewed: Legislative Committee, October 9, 2020)

## **BOARD MEMBER TRAVEL – (No Written Material)**

Board member travel reports have been filed with the Clerk of the Boards, and copies are available upon request.

## **CLOSED SESSION - (No Written Material)**

Gilchrist/3459

### **CONFERENCE WITH LEGAL COUNSEL – EXISTING LITIGATION**

It is necessary for the Board to recess to closed session pursuant to Government Code sections 54956.9(a) and 54956.9(d)(1) to confer with its counsel regarding pending litigation which has been initiated formally and to which the SCAQMD is a party. The actions are:

- Communities for a Better Environment v. SCAQMD, Los Angeles Superior Court Case No. BS161399 (RECLAIM);
- Communities for a Better Environment v. South Coast Air Quality Management District, Los Angeles Superior Court Case No. 19STCP05239 (Tesoro II);
- People of the State of California, ex rel. SCAQMD v. Exide Technologies, Inc., Los Angeles Superior Court Case No. BC533528;
- In re: Exide Technologies, Inc., U.S. Bankruptcy Court, District of Delaware, Case No. 13-11482 (KJC) (Bankruptcy Case); Delaware District Court, Case No.: 19-00891 (Appellate Case); United States Court of Appeals, Third Circuit, Case No. 20-1858;
- In re: Exide Holdings Inc., U.S. Bankruptcy Court, District of Delaware, Case No. 20-11157 (CSS) (Bankruptcy Case);
- In the Matter of SCAQMD v. Southern California Gas Company, Aliso Canyon Storage Facility, SCAQMD Hearing Board Case No. 137-76 (Order for Abatement); People of the State of California, ex rel SCAQMD v. Southern California Gas Company, Los Angeles Superior Court Case No. BC608322; Judicial Council Coordinated Proceeding No. 4861;
- In the Matter of SCAQMD v. Torrance Refining Company, LLC, SCAQMD Hearing Board Case No. 6060-5 (Order for Abatement);
- CalPortland Company v. South Coast Air Quality Management District; Governing Board of the South Coast Air Quality Management District; and Wayne Natri, Executive Officer, and Does 1-100, San Bernardino County Superior Court, Case No. CIV DS 19258941;
- Downwinders at Risk et al. v. EPA, United States Court of Appeals, D.C. Circuit, Case No. 19-1024 (consolidated with Sierra Club, et al. v. EPA, No. 15-1465);
- SCAQMD, et al. v. Elaine L. Chao, et al., District Court for the District of Columbia, Case No. 1:19-cv-03436-KBJ;
- SCAQMD, et al. v. EPA, United States Court of Appeals, D.C. Circuit, Case No. 19-1241 (consolidated with Union of Concerned Scientists v. NHTSA, No. 19-1230);
- SCAQMD, et al. v. NHTSA, EPA, et al., United States Court of Appeals, D.C. Circuit, Filed May 28, 2020;

- Association of Irrigated Residents v. U.S. EPA, SCAQMD, SJVUAPCD, et al., United States Court of Appeals, D.C. Circuit, Case No. 19-71223; and
- SCAQMD v. City of Los Angeles, Los Angeles City Council, City of LA Harbor Dept., LA Board of Harbor Commissioners, et al., Los Angeles Superior Court, Case No. 20STCP02985.

#### **CONFERENCE WITH LEGAL COUNSEL – INITIATING LITIGATION**

It is also necessary for the Board to recess to closed session pursuant to Government Code section 54956.9(a) and 54956.9(d)(4) to consider initiation of litigation (four cases).

#### **CONFERENCE WITH LEGAL COUNSEL – ANTICIPATED LITIGATION**

Also, it is necessary for the Board to recess to closed session pursuant to Government Code section 54956.9(d)(2) to confer with its counsel because there is a significant exposure to litigation against the SCAQMD (two cases).

Letter from Steven J. Olson, O'Melveny & Myers LLP, on behalf of ExxonMobil Corporation, dated August 22, 2018.

#### **CONFERENCE WITH LABOR NEGOTIATORS**

It is also necessary to recess to closed session pursuant to Government Code Section 54957.6 to confer with labor negotiators:

- Agency Designated Representative: A. John Olvera, Deputy Executive Officer – Administrative & Human Resources;
- Employee Organization(s): Teamsters Local 911, and South Coast AQMD Professional Employees Association; and
- Unrepresented Employees: Designated Deputies and Management and Confidential employees.

#### **ADJOURNMENT**

**\*\*\*PUBLIC COMMENTS\*\*\***

Members of the public are afforded an opportunity to speak on any agenda item before consideration of that item. Persons wishing to speak may do so remotely via Zoom or telephone. To provide public comments via a Desktop/Laptop or Smartphone, click on the “Raise Hand” at the bottom of the screen, or if participating via Dial-in/Telephone Press \*9. This will signal to the host that you would like to provide a public comment and you will be added to the list.

All agendas are posted at South Coast AQMD Headquarters, 21865 Copley Drive, Diamond Bar, California, at least 72 hours in advance of the meeting. At the beginning of the agenda, an opportunity is also provided for the public to speak on any subject within the South Coast AQMD's authority. Speakers may be limited to a total of three (3) minutes for the entirety of the Consent Calendar plus Board Calendar, and three (3) minutes or less for each of the other agenda items.

Note that on items listed on the Consent Calendar and the balance of the agenda any motion, including action, can be taken (consideration is not limited to listed recommended actions). Additional matters can be added and action taken by two-thirds vote, or in the case of an emergency, by a majority vote. Matters raised under the Public Comment Period may not be acted upon at that meeting other than as provided above.

Written comments will be accepted by the Board and made part of the record. Individuals who wish to submit written or electronic comments must submit such comments to the Clerk of the Board, South Coast AQMD, 21865 Copley Drive, Diamond Bar, CA 91765-4178, (909) 396-2500, or to [cob@aqmd.gov](mailto:cob@aqmd.gov), on or before 5:00 p.m. on the Tuesday prior to the Board meeting.

Research and Technology

CNG = Compressed Natural Gas

CO = Carbon Monoxide

DOE = Department of Energy

EV = Electric Vehicle

EV/BEV = Electric Vehicle/Battery Electric Vehicle

FY = Fiscal Year

GHG = Greenhouse Gas

HRA = Health Risk Assessment

LEV = Low Emission Vehicle

LNG = Liquefied Natural Gas

MATES = Multiple Air Toxics Exposure Study

MOU = Memorandum of Understanding

MSERCs = Mobile Source Emission Reduction Credits

MSRC = Mobile Source (Air Pollution Reduction) Review  
Committee

NATTS = National Air Toxics Trends Station

NESHAPS = National Emission Standards for  
Hazardous Air Pollutants

NGV = Natural Gas Vehicle

NOx = Oxides of Nitrogen

NSPS = New Source Performance Standards

NSR = New Source Review

OEHA = Office of Environmental Health Hazard  
Assessment

PAMS = Photochemical Assessment Monitoring  
Stations

PEV = Plug-In Electric Vehicle

PHEV = Plug-In Hybrid Electric Vehicle

PM10 = Particulate Matter  $\leq$  10 microns

PM2.5 = Particulate Matter  $\leq$  2.5 microns

RECLAIM=Regional Clean Air Incentives Market

RFP = Request for Proposals

RFQ = Request for Quotations

RFQQ=Request for Qualifications and Quotations

SCAG = Southern California Association of Governments

SIP = State Implementation Plan

SOx = Oxides of Sulfur

SOON = Surplus Off-Road Opt-In for NOx

SULEV = Super Ultra Low Emission Vehicle

TCM = Transportation Control Measure

ULEV = Ultra Low Emission Vehicle

U.S. EPA = United States Environmental Protection  
Agency

VOC = Volatile Organic Compound

ZEV = Zero Emission Vehicle

## **INSTRUCTIONS FOR ELECTRONIC PARTICIPATION**

### **Instructions for Participating in a Virtual Meeting as an Attendee**

As an attendee, you will have the opportunity to virtually raise your hand and provide public comment.

Before joining the call, please silence your other communication devices such as your cell or desk phone. This will prevent any feedback or interruptions during the meeting.

#### **For language interpretation:**

Click the interpretation Globe icon at the bottom of the screen

Select the language you want to hear (either English or Spanish)

Click "Mute Original Audio" if you hear both languages at the same time.

#### **Para interpretación de idiomas:**

Haga clic en el icono de interpretación el globo terráqueo en la parte inferior de la pantalla

Seleccione el idioma que desea escuchar (inglés o español)

Haga clic en "Silenciar audio original" si escucha ambos idiomas al mismo tiempo.

**Please note:** During the meeting, all participants will be placed on Mute by the host. You will not be able to mute or unmute your lines manually.

After each agenda item, the Chairman will announce public comment.

Speakers may be limited to a total of 3 minutes for the entirety of the consent calendar plus board calendar, and three minutes or less for each of the other agenda items.

A countdown timer will be displayed on the screen for each public comment.

If interpretation is needed, more time will be allotted.

**Once you raise your hand to provide public comment, your name will be added to the speaker list. Your name will be called when it is your turn to comment. The host will then unmute your line.**

#### **Directions for Video ZOOM on a DESKTOP/LAPTOP:**

- If you would like to make a public comment, please click on the **"Raise Hand"** button on the bottom of the screen. This will signal to the host that you would like to provide a public comment and you will be added to the list.

#### **Directions for Video Zoom on a SMARTPHONE:**

- If you would like to make a public comment, please click on the **"Raise Hand"** button on the bottom of your screen.
- This will signal to the host that you would like to provide a public comment and you will be added to the list.

#### **Directions for TELEPHONE line only:**

- If you would like to make public comment, please **dial \*9** on your keypad to signal that you would like to comment.

#### **Directions for Spanish Language TELEPHONE line only:**

- The call in number is the same.
- The meeting ID number is 931-1258-4181
- If you would like to make public comment, please **dial \*9** on your keypad to signal that you would like to comment.

#### **Instrucciones para la línea de TELÉFONO en español únicamente:**

- El número de llamada es el mismo (+1 669900 6833 o +1 253215 8782).
- El número de identificación de la reunión es 931-1258-4181
- Si desea hacer un comentario público, marque \*9 en su teclado para indicar que desea comentar.

 [Back to Agenda](#)

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 1

MINUTES: Governing Board Monthly Meeting

SYNOPSIS: Attached are the Minutes of the November 6, 2020 meeting.

**RECOMMENDED ACTION:**

Approve Minutes of the November 6, 2020 Board Meeting.

Faye Thomas  
Clerk of the Boards

FT:cmw

---

**FRIDAY, NOVEMBER 6, 2020**

Notice having been duly given, the regular meeting of the South Coast Air Quality Management District Board was conducted remotely via video conferencing and telephone. Members present:

William A. Burke, Ed.D., Chairman  
Speaker of the Assembly Appointee

Council Member Ben Benoit, Vice Chairman  
Cities of Riverside County

Supervisor Lisa A. Bartlett  
County of Orange

Council Member Joe Buscaino  
City of Los Angeles

Council Member Michael A. Cacciotti  
Cities of Los Angeles County – Eastern Region

Senator Vanessa Delgado (Ret.)  
Senate Rules Committee Appointee

Gideon Kracov  
Governor's Appointee

Mayor Larry McCallon  
Cities of San Bernardino County

Council Member Judith Mitchell  
Cities of Los Angeles County – Western Region

Council Member Carlos Rodriguez  
Cities of Orange County

Supervisor Janice Rutherford  
County of San Bernardino

Members absent:

Supervisor Kathryn Barger  
County of Los Angeles

Supervisor V. Manuel Perez  
County of Riverside

**CALL TO ORDER:** Chairman Burke called the meeting to order at 9:00 a.m.

- Pledge of Allegiance: Led by Chairman Burke
- Roll Call
- Opening Comments

Council Member Cacciotti shared photos from demonstrations of electric lawn care equipment at Compton Unified School District and the City of Irwindale. He noted that newly appointed Hearing Board Alternate Micah Ali participated in the demonstration at Compton Unified. He thanked the Board and staff for their support of the program.

Council Member Mitchell commented that the City of Rolling Hills Estates has recently adopted the Green Zone program and thanked Council Member Cacciotti for his efforts promoting green lawn care equipment. She provided an update on the collaboration between CARB, the California Transportation Commission and Housing and Community Development Department, including a plan being developed through the California State Transportation agency to align programs and policies that meet the State's air quality goals to reduce greenhouse gases. She also encouraged Board members to participate in the AB 617 community meetings to see the progress being made.

### **CONSENT CALENDAR**

1. Approve Minutes of October 2, 2020 Board Meeting and October 27, 2020 Special Board Meeting
2. Set Public Hearing December 4, 2020 to Consider Adoption of and/or Amendments to South Coast AQMD Rules and Regulations
  - A. Determine That Coachella Valley Extreme Area Plan for 1997 8-Hour Ozone Standard Is Exempt from CEQA and Approve Coachella Valley Extreme Area Plan for 1997 8-Hour Ozone Standard
  - B. Determine That Attainment Plan for 2006 24-hour PM2.5 Standard for South Coast Air Basin Is Exempt from CEQA and Approve Attainment Plan for 2006 24-hour PM2.5 Standard for South Coast Air Basin

- C. Determine That Amendments to Regulation XIII - New Source Review, Regulation XX - Regional Clean Air Incentives Market and Regulation XXX - Title V Permits, Are Exempt from CEQA and Amend Regulations XIII, XX and XXX
- D. Determine That Proposed Amendments to Rule 1146 - Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters Are Exempt from CEQA; and Amend Rule 1146

**Budget/Fiscal Impact**

- 3. Reimburse CEC and Return Interest
- 4. Amend Contract to Install Solar Panels for Volvo LIGHTS Project
- 5. Recognize Revenue, Issue Program Announcement, Execute Contracts, and Redistribute Funds for Heavy-Duty Truck Projects Meeting the Proposition 1B – Goods Movement Program Requirements
- 6. Appropriate Funds, Execute and/or Amend Contracts, and Issue Solicitations and Purchase Orders for AB 617 Implementation
- 7. Issue New Solicitations and Approve Contract Modification as Approved by MSRC

**Action Item/No Fiscal Impact**

- 8. Establish Board Meeting Schedule for Calendar Year 2021

**Items 9 through 15 – Information Only/Receive and File**

- 9. Legislative, Public Affairs and Media Report
- 10. Hearing Board Report
- 11. Civil Filings and Civil Penalties Report

12. Lead Agency Projects and Environmental Documents Received

13. Report of RFPs Scheduled for Release in November

14. Rule and Control Measure Forecast

15. Status Report on Major Ongoing and Upcoming Projects for Information Management

Council Member Mitchell noted that she has no financial interests in Item Nos. 4 and 5 but is required to identify for the record that she is a Board Member of CARB, which is involved in these items.

Due to requests to speak and Board member questions on Consent Calendar Item No. 3, the vote on the Consent Calendar was deferred until after those comments were made.

16. Items Deferred from Consent Calendar

3. Reimburse CEC and Return Interest

Council Member Cacciotti inquired about the reimbursement CEC is requesting and issues with the contractors. He asked whether staff will recoup the \$70,631 from the contractor that was unable to reimburse South Coast AQMD.

Wayne Nastri, Executive Officer, responded that the CEC audit uncovered discrepancies in the burden rate of the three contractors as well as their justification for that rate. He noted that one of the contractors is a small operation that, due to financial hardship, is unable to reimburse the funds.

Dr. Matt Miyasato, Chief Technologist/Science and Technology Advancement explained that Cummins merged with Cummins Westport, resulting in a different profit loss center; however, they maintained the same indirect overhead rate and the CEC determined they were using the incorrect rate. The other issue concerns a small company who is going out of business and is unable to reimburse the funds. South Coast AQMD will reimburse the CEC on their behalf then seek to recover the funds.

Harvey Eder, Public Solar Power Coalition, expressed concerns that he could not find the Zoom information for the Board meeting on the South

Coast AQMD website and he encountered difficulties connecting to remote meetings. He commented on filing legal documents in federal court.

Vice Chairman Benoit noted that the meeting information was available on the website the Friday before the meeting.

Ranji George, a member of the public, expressed support for fuel cell technologies and battery recycling and expressed the need for additional fuel cell charging stations.

MOVED BY CACCIOTTI, SECONDED BY  
BENOIT, AGENDA ITEMS 1 THROUGH 15  
APPROVED AS RECOMMENDED,  
ADOPTING RESOLUTION 20-18 SETTING  
THE TIME AND PLACE OF GOVERNING  
BOARD REGULAR MEETINGS, BY THE  
FOLLOWING VOTE:

AYES: Bartlett, Benoit, Burke, Buscaino,  
Cacciotti, Delgado, Kracov,  
McCallon, Mitchell, Rodriguez,  
and Rutherford

NOES: None

ABSENT: Barger and Perez

Mayor McCallon commented on CARB's draft 2020 Mobile Source Strategy that is being developed in response to Senate Bill (SB) 44 and expressed concern that it falls short of what is needed for the South Coast region to meet the 2023 attainment goals. He questioned whether CARB is on track to meet its 2016 SIP commitments and inquired how staff plans to address this issue.

Mr. Nastri responded that staff submitted a comment letter to CARB regarding concerns with the 2020 draft Mobile Source Strategy to advise that it does not meet the legal requirements specified under SB 44, and is more focused on long-term attainment deadlines and not the obligations under the SIP. Staff has scheduled a meeting next week with CARB's executive staff to discuss these concerns. He noted that Council Member Mitchell has also raised these concerns to CARB's executive staff.

Chairman Burke commented that during his tenure on CARB's Board he raised the issue of changing the composition of the Board to be directly proportionate to the population it serves to ensure fair representation. He added that the next South Coast AQMD representative on CARB's Board may choose to address that issue.

Council Member Mitchell commented on her ongoing discussions and efforts with CARB staff regarding the Mobile Source Strategy and its failure to address the 2023 ozone requirements and the significant NOx emission reductions needed for the South Coast to achieve attainment. She noted her commitment to continue working with South Coast AQMD and CARB to address those issues and expressed concern with potential penalties if the ozone standards are not met.

Dr. Burke thanked Council Member Mitchell for her representation on the CARB Board and praised her work.

## **BOARD CALENDAR**

17. Administrative Committee
18. Legislative Committee
19. Mobile Source Committee
20. Stationary Source Committee
21. Technology Committee
22. Mobile Source Air Pollution Reduction Review Committee
23. California Air Resources Board Monthly Report

Mr. George expressed concerns about proposals to use Carl Moyer funds for battery electric trucks and expressed support for increased funding for hydrogen and fuel cell zero emission technology and the development of plans for battery recycling. He commended staff for having a Cal/EPA speaker at the October Technology Committee meeting and expressed appreciation for the Committee members' productive discussion during that meeting.

Supervisor Rutherford expressed her opposition to the recommended position on HR 7822 in the Legislative Committee meeting report (Item No. 18).

Supervisor Bartlett asked whether the Legislative Committee had considered taking the alternate position of oppose unless amended. She expressed concerns about supporting a bill that may not be in the best interest of South Coast AQMD and requested that staff provide background information on the bill.

Lisa Tanaka O'Malley, Senior Public Affairs Manager, explained that Congresswoman Lisa Blunt Rochester introduced HR 7822 as a discussion document to receive input from stakeholders such as South Coast AQMD, the National Association of Clean Air Agencies (NACAA), environmental organizations and industry to craft a stronger bill that can be reintroduced in the 117<sup>th</sup> Congress. Ms. Tanaka noted that there are some provisions in the bill that staff would seek amendments to protect the authority of the states and local air quality agencies. However, the Congresswoman is open to actively work with South Coast AQMD and willing to make amendments.

Council Member Mitchell noted that the bill is in the formulation stage. She expressed support for the bill and noted that the South Coast AQMD has considerable experience and resources with community scale air quality issues. It would be beneficial to share that information at the federal level and help the author fashion a bill in a way that works across the country for other states and that also aligns with what California is doing.

Supervisor Bartlett expressed concerns with legislation being proposed at the federal level and inquired if staff and/or the Legislative Committee would be engaged in the process. She emphasized the importance for the Legislative Committee, in conjunction with staff, to be involved in the process and that all stakeholders be given the opportunity to provide input.

Council Member Mitchell responded that staff would be involved in the process of helping to craft amendments to the language. The finalized version would be submitted to the Legislative Committee for review.

Supervisor Rutherford noted that she raised concerns in the Legislative Committee about supporting legislation that establishes a federal program on fence line monitoring. She noted that the funding would not accrue to South Coast AQMD and expressed the need to retain local control rather than having the federal government impose requirements.

MOVED BY CACCIOTTI, SECONDED BY MITCHELL, TO APPROVE AGENDA ITEMS 17 THROUGH 23 AS RECOMMENDED TO RECEIVE AND FILE THE COMMITTEE, MSRC AND CARB REPORTS AND APPROVE THE FOLLOWING POSITION ON LEGISLATION IN ITEM 18, BY THE FOLLOWING VOTE:

Receive and file; and take the following action as recommended:

<b>Agenda Item</b>	<b>Recommendation</b>
HR 7822 (Blunt Rochester) Public Health Air Quality Act	Support with Amendments

AYES: Bartlett (*Except HR 7822*), Benoit (*Except HR 7822*), Burke, Buscaino, Cacciotti, Delgado, Kracov, McCallon (*Except HR 7822*), Mitchell, Rodriguez (*Except HR 7822*), and Rutherford (*Except HR 7822*)

NOES: Bartlett (*HR 7822 only*), Benoit (*HR 7822 only*), McCallon (*HR 7822 only*), Rodriguez (*HR 7822 only*) and Rutherford (*HR 7822 only*)

ABSENT: Barger and Perez

Discussion ensued about the outcome of the vote. The recommendation was made to reconsider the vote then take action on Items No. 17 through 23 but bifurcate the action on HR 7822 in Item 18 for a separate vote.

MOVED BY BUSCAINO TO RECONSIDER AGENDA ITEMS 17 THROUGH 23 BUT BIFURCATE ITEM 18 TO PULL OUT THE LEGISLATIVE POSITION ON HR 7822 FOR A SEPARATE VOTE; THE MOTION WAS SECONDED BY BARTLETT AND APPROVED BY THE FOLLOWING VOTE:

AYES: Bartlett, Benoit, Burke, Buscaino, Cacciotti, Delgado, Kracov, McCallon, Mitchell, Rodriguez, and Rutherford

NOES: None

ABSENT: Barger and Perez

MOVED BY MCCALLON, SECONDED BY CACCIOTTI, AGENDA ITEMS 17 THROUGH, 19, (EXCLUDING THE LEGISLATIVE POSITION FOR HR 7822 IN ITEM 18), APPROVED AS RECOMMENDED TO RECEIVE AND FILE THE COMMITTEE, MSRC AND CARB REPORTS, BY THE FOLLOWING VOTE:

AYES: Bartlett, Benoit, Burke, Buscaino, Cacciotti, Delgado, Kracov, McCallon Mitchell, Rodriguez and Rutherford

NOES: None

ABSENT: Barger and Perez

MOVED BY MITCHELL, SECONDED BY BUSCAINO TO APPROVE THE FOLLOWING RECOMMENDATION ON HR 7822:

<b>Agenda Item</b>	<b>Recommendation</b>
HR 7822 (Blunt Rochester) Public Health Air Quality Act	Support with Amendments

THE MOTION FAILED BY THE FOLLOWING VOTE:

AYES: Burke, Buscaino, Cacciotti, Delgado, Kracov and Mitchell

NOES: Bartlett, Benoit, McCallon, Rodriguez and Rutherford

ABSENT: Barger and Perez

Bayron Gilchrist, General Counsel, noted that due to the motion failing, HR 7822 would continue to next month.

Council Member Benoit suggested that the Legislative Committee work on an alternative recommendation for HR 7822 and bring the item back to the Board. Mr. Nastri responded that staff would work with the Legislative Committee and its Chair.

**Staff Presentations/Board Discussion**

24. Budget and Economic Outlook Update (*Presentation In Lieu of Board Letter*)

Jill Whynot, Chief Operating Officer, gave the presentation on Item No. 24.

Council Member Cacciotti inquired about the company that was reported to have one third of the permits that are expiring.

Ms. Whynot clarified that there are ten companies that make up one third of the potentially expiring permits. The companies with expiring permits represent miscellaneous business types but the vast majority are smaller businesses. Staff continues to reach out to these businesses to provide information regarding the payment plan option.

Council Member Cacciotti commented on a small auto repair dealer in Los Angeles County that has experienced a significant reduction in their smog check testing operations. He noted that small businesses are hurting financially due to the pandemic.

Council Member Rodriguez thanked staff for their efforts to inform businesses about the payment plan option and inquired about the year-to-year comparison of the actual number of expired permits and the percentage change.

Ms. Whynot explained that staff started tracking the difference between potentially expired permits and actual permits that expired since the pandemic started. The database is not designed to provide year-to-year data comparing the percent change; however, staff would provide historical data on the total number of actual permits that have expired from year to date.

Chairman Burke inquired about the number of permits for dry cleaners that may expire due to the compliance deadline for Rule 1421 – Control of Perchloroethylene from Dry Cleaning Systems, to phase out the use of perchloroethylene as a cleaning solvent.

Ms. Whynot responded that there are currently approximately 120 dry cleaning businesses using perchloroethylene and the compliance deadline is December 31, 2020. Many of them are having financial difficulty due to the pandemic; however, staff has been doing extensive outreach to the dry cleaners and the Korean Dry Cleaners & Laundry Association to make them aware of the compliance deadline, assist with the transition and explain that they can go before the Hearing Board to seek a variance.

RECEIVE AND FILE; NO ACTION NECESSARY

25. 2020 Ozone Season and Wildfire Impacts (*Presentation in Lieu of Board Letter*)

Dr. Scott Epstein, Program Supervisor and Dr. Phillip Fine, DEO/Planning, Rule Development and Area Sources gave the presentation on Item No. 25.

Mayor McCallon questioned whether the Bobcat and El Dorado wildfires contributed to increases in the ozone level since both fires started in early September.

Dr. Epstein responded that several factors contributed to the high ozone values this year. The wildfires did not affect the entire ozone season, but preliminary data suggests that ozone was higher during those periods.

Council Member Rodriguez asked whether the effects from the Blue Ridge fire were included in the analysis.

Dr. Epstein responded that this analysis was compiled before the Blue Ridge fire occurred. While it may have affected ozone levels in the Orange County area on certain days, it is uncertain they would have affected the top 10 ozone days in the year.

Supervisor Bartlett noted the challenges that are inherent given the topography of the Basin and catastrophic events which further exacerbate air pollution. She asked whether additional emission reductions would be realistic and achievable.

Dr. Fine noted that the South Coast AQMD has been doing everything possible to reduce emissions and it has been a real challenge. If the South Coast fails to achieve attainment, U.S. EPA will require a new plan and set a new deadline. There is a provision in the federal Clean Air Act that also requires that when a region has failed to attain the standards by a specified deadline, a nonattainment fee be imposed on stationary sources.

Chairman Burke commented on the progress in reaching PM standards but noted the growing concerns regarding nanoparticles.

Mayor McCallon asked whether the high VOC levels are primarily due to the use of cleaning and sanitizing products during the pandemic.

Dr. Fine responded that product sales and usage information is needed to make that conclusion, but the spatial and temporal patterns this year seem to indicate that VOC levels did not drop as much as NOx.

Mayor McCallon reiterated his comment from a previous Board meeting where he suggested that the data collected during the April-June time frame would be an ideal time to check and adjust the ozone models. He also noted the westward shift of the ozone levels and record high readings in that part of the Basin.

Dr. Fine noted that it is hard to calibrate the models without the VOC emissions. He added that the University of California, Riverside has been conducting a study to evaluate meteorological factors and trends contributing to high ozone levels. They will also look at how activities during the COVID-19 pandemic have affected VOC emissions.

Senator Delgado noted the contrasting reports in the media about air quality during the pandemic and that questions regarding air quality in the region are one of the most common topics on social media. She suggested getting this information out in a format that would make it more understandable to the public.

Mr. Nastri commented on outreach efforts that staff is considering to inform the public about the various factors that have been affecting air quality this year and convey the region's air quality challenges.

Chairman Burke commented on the challenge of transmitting easily understood information to the general public and encouraged suggestions from Board members.

Council Member Buscaino inquired about fireworks activity in recent celebrations for the Dodgers and Lakers championships and the implications if fireworks emissions were excluded from the data for the entire year.

Dr. Fine responded that fireworks emissions are evaluated on a case-by-case basis. Air quality impacts from fireworks on Independence Day (July 4 & 5) are excluded in accordance with U.S. EPA's Exceptional Event Rule; however, celebrations for sporting events may not qualify for that designation.

Dr. Epstein added that there was a slight increase in emissions after the celebrations for the Dodgers World Series championship but the standards were not exceeded that day. An exceptional event demonstration may be submitted to U.S. EPA for consideration, but U.S. EPA will only consider it if the resulting emissions cause a significant exceedance or change the attainment status.

Harvey Eder commented on the effects and implications of climate change on air quality, citing the September 2020 issue of National Geographic, and expressed an urgent need to convert to solar.

Ranji George urged continued work that moves towards zero emission and away from combustion technologies.

Jessica Craven, Northeast Los Angeles (NELA) Climate Collective

Emily Spokes, NELA Climate Collective

Eleese Stemp, NELA Climate Collective

Carolina Forni, NELA Climate Collective

Commented on the poor air quality and adverse health effects; urged the

Board to address the climate crisis and be more aggressive and hold everyone to stricter standards to improve air quality; commended staff on the recent Environmental Justice Conference; and requested displaying the specific agenda item on the screen as they are being discussed and moving the Public Comment Period to the beginning of the agenda.

Chris Chavez, Coalition for Clean Air, noted the significant challenge for the South Coast region to meet the 2023 ozone standard. He expressed concerns with the South Coast AQMD's delay and ability in passing strong rules that would reduce emissions associated with warehouses, ports, and rail yards, and the need to rely on the "black box measures" to meet the 2016 AQMP emission goals. He urged stronger action from the Board to meet the clean air standards and noted that a lot of work is still needed.

Peter Herzog, NAIOP, suggested that further analysis is needed to explain the increase in ozone levels despite the significant decrease in NOx and PM. He also commented on the need to move forward with MATES V and focus on rules that are realistic and technologically feasible.

Chairman Burke requested that staff look into moving the Public Comment Period to the beginning of the agenda. He commented on the need to look at rulemaking efforts in the coming months.

RECEIVE AND FILE; NO ACTION NECESSARY

## **PUBLIC HEARING**

26. Determine That Proposed Amendments to Rule 1178 – Further Reductions of VOC Emissions from Storage Tanks at Petroleum Facilities, Are Exempt from CEQA and Amend Rule 1178

Mike Morris, Planning and Rules Manager, gave the staff presentation on Item No. 26.

The public hearing was opened, and the following individual addressed the Board on Item 26.

Mr. Eder expressed support for the phase out of fossil fuels, concerns about limiting public testimony and difficulties he experienced filing legal documents.

There being no further testimony on this item, the public hearing was closed.

MOVED BY BENOIT, SECONDED BY CACCIOTTI, AGENDA ITEM NO. 26 APPROVED AS RECOMMENDED, ADOPTING RESOLUTION NO. 20-17 DETERMINING THAT PROPOSED AMENDED RULE 1178 – FURTHER REDUCTIONS OF VOC EMISSIONS FROM STORAGE TANKS AT PETROLEUM FACILITIES IS EXEMPT FROM THE REQUIREMENTS OF CEQA AND AMENDING RULE 1178 – FURTHER REDUCTIONS OF VOC EMISSIONS FROM STORAGE TANKS AT PETROLEUM FACILITIES, BY THE FOLLOWING VOTE:

AYES: Bartlett, Benoit, Burke, Buscaino, Cacciotti, Delgado, Kracov, McCallon, Mitchell, Rodriguez, and Rutherford

NOES: None

ABSENT: Barger and Perez

**PUBLIC COMMENT PERIOD** – (Public Comment on Non-Agenda Items, Pursuant to Government Code Section 54954.3)

Mr. George expressed support for moving the Public Comment period to the beginning of the agenda and thanked the Board and staff for their efforts in addressing the concerns raised by employees and retirees about the Alameda decision.

Ian Stewart, Rail Propulsion Systems, thanked the Board and South Coast AQMD staff for their support and updated the Board on the progress of their current battery powered switcher locomotive demonstration project. He stressed the need for continued support to bring zero emission locomotives to market.

Mr. Eder commented on the history and death of the electric car and electric modes of transportation in the 1950's and expressed concern about methane gas emissions.

Jessie Parks urged the Board to support and consider a rule to regulate pollution from indirect sources. She expressed concern about the delay in an indirect source rule for warehouses and commented on the pollution from trucks and warehouses that is impacting air quality in communities throughout the region.

**CLOSED SESSION**

There was no closed session.

## **ADJOURNMENT**

There being no further business, the meeting was adjourned by Chairman Burke at 11:40 a.m.

The foregoing is a true statement of the proceedings held by the South Coast Air Quality Management District Board on November 6, 2020.

Respectfully Submitted,

Faye Thomas  
Clerk of the Boards

Date Minutes Approved: \_\_\_\_\_

---

Dr. William A. Burke, Chairman

VOC = Volatile Organic Compound

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 2

PROPOSAL: Set Public Hearing January 8, 2021 to Consider Adoption of and/or Amendments to South Coast AQMD Rules and Regulations:

Certify Final Environmental Assessment and Adopt Proposed Rule 1407.1 – Control of Toxic Air Contaminant Emissions from Chromium Alloy Melting Operations

Proposed Rule 1407.1 will reduce hexavalent chromium, arsenic, cadmium, and nickel emissions from chromium alloy melting operations. Proposed Rule 1407.1 establishes point source emission limits, housekeeping requirements, building enclosure provisions, source testing requirements, and monitoring, reporting, and recordkeeping requirements. This action is to adopt the Resolution: 1) Certifying the Final Environmental Assessment for Proposed Rule 1407.1 – Control of Toxic Air Contaminant Emissions from Chromium Alloy Melting Operations; and 2) Adopting Proposed Rule 1407.1 – Control of Toxic Air Contaminant Emissions from Chromium Alloy Melting Operations. (Reviewed: Stationary Source Committee, November 20, 2020)

The complete text of the proposed amendments, staff report and other supporting documents will be available from the South Coast AQMD's publication request line at (909) 396-2001, or from: Mr. Derrick Alatorre – Deputy Executive Officer/Public Advisor, South Coast AQMD, 21865 Copley Drive, Diamond Bar, CA 91765, (909) 396-2432, [dalatorre@aqmd.gov](mailto:dalatorre@aqmd.gov) and on the Internet ([www.aqmd.gov](http://www.aqmd.gov)) as of December 9, 2020.

RECOMMENDED ACTION:

Set Public Hearing January 8, 2021 to Adopt Rule 1407.1

Wayne Nastri  
Executive Officer

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 3

**PROPOSAL:** Recognize Revenue and Execute Contracts for Electrification of Transport Refrigeration in Southern California Grocery Fleet

**SYNOPSIS:** South Coast AQMD has been awarded up to \$2,240,721 from U.S. EPA to replace diesel transport refrigeration units (TRUs) with electrified TRUs and install supporting infrastructure with Albertsons Companies. These actions are to: 1) recognize revenue, upon receipt, of up to \$2,240,721 from the U.S. EPA FY20 Clean Diesel Funding Assistance Program into the Clean Fuels Program Fund (31) for electrification of transport refrigeration; 2) execute a contract with Albertsons Companies to replace diesel TRUs with electrified TRUs and install supporting infrastructure in an amount not to exceed \$2,170,975 from the Clean Fuels Program Fund (31); and 3) reimburse the General Fund up to \$69,746 from the Clean Fuels Program Fund (31) for administrative costs.

**COMMITTEE:** Technology, November 20, 2020; Recommend for Approval

**RECOMMENDED ACTIONS:**

1. Recognize revenue, upon receipt, of up to \$2,240,721 from the U.S. EPA FY20 Clean Diesel Funding Assistance Program into the Clean Fuels Program Fund (31) for electrification of transport refrigeration;
2. Authorize the Chairman to execute a contract with Albertsons Companies to replace diesel TRUs with electrified TRUs and install supporting infrastructure in an amount not to exceed \$2,170,975 from the Clean Fuels Fund (31); and
3. Reimburse the General Fund up to \$69,746 from Clean Fuels Program Fund (31) for administrative costs.

Wayne Nastri  
Executive Officer

## **Background**

The 2016 AQMP identifies the need for NO<sub>x</sub> reductions in meeting upcoming national ambient air quality standards. Mobile sources are major contributors to NO<sub>x</sub> emissions with adverse impact on public health in the South Coast Air Basin, particularly in EJ communities. Significant increases in NO<sub>x</sub>, PM and GHG emissions from these sources are expected due to increased demand in goods movement activities. In order to mitigate these emissions, South Coast AQMD strongly supports many pathways to accelerated deployment of zero and near zero emission technologies. The electrifying refrigerated trailers to eliminate idling with electrified parking infrastructure and facilitate zero-emission over-the-road operation are one of many ways to pursue a zero and near-zero emission technologies roadmap.

Staff submitted a proposal to the U.S. EPA for Diesel Emission Reduction Act (DERA) grants for electrification of transport refrigeration units (TRUs) in Southern California grocery fleet. In August 2020, U.S. EPA notified staff that this application had been selected for \$2,240,721 in funding.

## **Proposal**

Staff proposes a project that will a) replace up to 41 diesel TRUs and trailers with a combination of 15 all-electric TRUs and insulated trailers (refrigerated trailers) and 26 hybrid-electric standby refrigerated trailers; b) install eligible infrastructure to support the 15 all-electric refrigerated trailers; c) install idle reduction electrified parking spaces and 194 spaces to allow hybrid-electric refrigerated trailers to plug in at Albertson's project site locations. The proposed idle reduction parking spaces will supply electricity to the proposed 26 hybrid-electric TRUs on trailers, and another 194 pre-existing hybrid-electric refrigerated trailers which have never had the infrastructure to support electrified idle reduction.

Staff proposes the following actions: recognize revenue, upon receipt, of up to \$2,240,721 from the U.S. EPA FY20 Clean Diesel Funding Assistance Program into the Clean Fuels Program Fund (31) for electrification of transport refrigeration, authorize the Chairman to execute a contract with Albertsons Companies to replace diesel TRUs with electrified TRUs and install supporting infrastructure in an amount not to exceed \$2,170,975 from the Clean Fuels Program Fund (31) and reimburse the General Fund up to \$69,746 for administrative costs.

## **Sole Source Justification**

Section VIII.B.3 of the Procurement Policy and Procedure identifies four major provisions under which contracts funded in whole or in part with federal funds may be made as a sole source award. This request for sole source award is made under provision B.3.c, which states the awarding federal agency authorizes noncompetitive proposals in response to a written request from the non-Federal entity.

### **Benefits to South Coast AQMD**

Projects to support development and demonstration of hybrid and all-electric TRUs and infrastructure are included in the *Technology Advancement Office Clean Fuels Program 2020 Plan Update* under the categories of “Develop and Demonstrate Electric and Hybrid Vehicles,” and “Develop and Demonstrate Electric Charging Infrastructure.” Successful accomplishment of this project will contribute to the attainment of national ambient air quality standards in the South Coast Air Basin by eliminating PM and NOx emissions from replaced diesel TRUs and idle reduction from installation of electrified parking spaces. Communities surrounding facilities proposed under the project, which will take emissions reduction benefits from project investments, are considered disadvantaged communities.

### **Resource Impacts**

The U.S. EPA FY20 DERA Grant award of \$2,240,721 for the electrification of TRUs in Southern California grocery fleet project includes \$2,170,975 for project costs and \$69,746 for South Coast AQMD administrative costs. The proposed project budget of \$6,281,500 includes \$2,170,975 from U.S. EPA and \$4,110,525 in cost-share from Albertsons Companies.

<b>Source</b>	<b>Amount</b>	<b>Percent</b>
U.S. EPA	\$2,170,975	35%
Albertsons Companies	\$4,110,525	65%
<b>Total</b>	<b>\$6,281,500</b>	<b>100%</b>

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 4

**PROPOSAL:** Recognize Funds, Execute and Amend Agreements for Installation and Maintenance of Air Filtration Systems, and Reimburse General Fund

**SYNOPSIS:** As part of the Community Air Protection Program (CAPP) incentive funds, \$6,352,650 was approved to implement school air filtration projects in AB 617 communities. CARB has also requested South Coast AQMD administer two Supplemental Environmental Projects (SEPs) to install and maintain air filtration systems at schools and residences in Environmental Justice communities. These actions are to: 1) recognize up to \$17,600 and \$9,250 from CARB for two SEPs to install and maintain air filtration systems at schools and residences, and reimburse administrative costs, into the Air Filtration Fund (75); 2) execute contracts with IQAir North America to install air filtration systems in an amount up to \$6,352,650 from the Community Air Protection SB 856 Fund (77) and up to \$17,600 and \$9,250 from the Air Filtration Fund (75); 3) execute agreements with CARB and local school districts; 4) amend contracts to purchase additional filters using unspent administrative funds; and 5) reimburse the General Fund for administrative costs up to \$1,343 for the CARB SEPs.

**COMMITTEE:** Technology, November 20, 2020; Recommended for Approval

**RECOMMENDED ACTIONS:**

1. Recognize up to \$17,600 and \$9,250 from CARB for two Supplemental Environmental Projects (SEPs) to install and maintain air filtration systems at schools and residences, and reimburse administrative costs, into the Air Filtration Fund (75);
2. Authorize the Chairman to execute the following contracts with IQAir North America:
  - a. Up to \$6,352,650 to install air filtration systems at schools in AB 617 communities using FY 2018-19 funds (G18-MCAP-06) in the Community Air Protection SB 856 Fund (77); and
  - b. Up to \$17,600 and \$9,250 to install air filtration systems at schools and residences from the Air Filtration Fund (75).

3. Authorize the Executive Officer to execute agreements with CARB to implement SEPs for installation and maintenance of air filtration systems at schools and residences, and execute or amend agreements with local school districts;
4. Authorize the Chairman to amend contracts, as needed, to purchase additional filters using unspent administrative funds in the Air Filtration Fund (75); and
5. Reimburse the General Fund for administrative costs up to \$1,343 from the Air Filtration Fund (75) for the CARB SEPs.

Wayne Natri  
Executive Officer

MMM:NB:JI:MH

---

### **Background**

In December 2019, the Board recognized up to \$86 million in FY 2018-19 Community Air Protection Program (CAPP) incentive funds from CARB. In June 2020, based on a South Coast AQMD proposal, CARB approved \$6,352,650 of the FY 2018-19 CAPP incentive funds to install air filtration systems at schools in AB 617 communities. As a part of initial efforts to implement Community Emissions Reduction Plans (CERPs), the Community Steering Committees (CSC) worked with South Coast AQMD staff and determined criteria to prioritize schools for installing air filtration systems in each AB 617 community. This resulted in a preliminary list of schools identified for air filtration systems.

CARB has also executed consent decrees with Long Beach Container Terminal and Vortech Engineering Inc. and has requested South Coast AQMD to act as the SEP administrator to install and maintain air filtration systems in schools and residences in environmental justice (EJ) communities. CARB will execute agreements with the South Coast AQMD to implement these two SEPs.

To date, South Coast AQMD has funded the installation and maintenance of air filtration systems at 92 schools and community centers in the South Coast Air Basin. These air filtration systems have been provided and installed by IQAir North America (IQAir). IQAir was selected through two competitive bid processes in 2011 and 2013 for air filtration projects. Staff performed a comprehensive review to ensure no new technology providers have come to market. IQAir is the only qualified manufacturer of high-performance panel filters and stand-alone units meeting the performance standards identified in South Coast AQMD's 2009 air filtration pilot study. Furthermore, the University of California, Riverside College of Engineering/Center for Environmental Research and Technology conducted a national review of air filtration technologies in 2010 and verified IQAir systems had an average removal efficiency of greater than 85 percent for ultrafine PM, black carbon, and PM 2.5 and a noise level below 45 decibels for stand-alone units.

## Proposal

Staff proposes to use the \$6,352,650 allocated CAPP incentive funds, and execute a contract with IQAir, to install air filtration systems at schools prioritized by the CSC in AB 617 communities. In addition, staff proposes to execute a contract with IQAir North America to implement two CARB SEPs as listed below:

Company	SEP Type	Amount
Long Beach Container Terminal	School	\$17,600
Vortech Engineering Inc.	Residential	\$9,250

CARB, along with Long Beach Container Terminal, LAUSD, and other local school districts, will identify one school in an EJ community to receive air filtration systems through this SEP.

The CARB residential SEP funding will be used for the San Bernardino residential air filtration pilot study approved by the Board in April 2020. As a part of this pilot study, standalone air filtration units with an electricity stipend will be provided to the residents who participate in the study.

The air filtration systems at the schools in AB 617 communities are expected to be installed by February 2022 and the maintenance of these systems will continue until August 2027. For the residential air filtration project, the installation is expected to occur in December 2021 with an additional five years of maintenance which ends in December 2026.

The proposed schedules for implementing the air filtration projects using CAPP incentives and CARB SEPs funds for schools and residences are as follow:

Date	Event
<b>Schools Air Filtration (CAPP &amp; CARB SEP)</b>	
Dec. 2020	Board approval
March 2021	Anticipated execution of contracts
June 2021	School selection, site assessment
Feb. 2022	Installation at schools
Feb. 2022-2027	Maintenance (varies by schools)
Aug. 2022-2027	Post-installation, annual, and final reports
<b>Residential Air Filtration</b>	
Dec. 2020	Board approval
March 2021	Anticipated execution of contracts
March 2020- June 2021	Community selection and study design, site assessment, and execute contracts with residents
Dec. 2021	Installation at residence
Dec. 2021- 2026	Maintenance
Dec. 2021- 2026	Post installation, annual, and final reports

Staff is proposing the following actions: 1) recognize up to \$17,600 and \$9,250 from CARB for two SEPs to install and maintain air filtration systems at schools and residences, and to reimburse administrative costs of up to \$1,343 into the Air Filtration Fund (75); 2) authorize the Chairman to execute contracts with IQAir North America for up to \$6,352,650 to install air filtration systems at schools in AB 617 communities from the Community Air Protection SB 856 Fund (77), and for up to \$17,600 and \$9,250 to install air filtration systems at schools and residences from the Air Filtration Fund (75); 3) authorize the Executive Officer to execute agreements with CARB to implement SEPs to install air filtration systems at schools and residences, and execute or amend agreements with local school districts; 4) authorize the Chairman to amend contracts to purchase additional filters using unspent administrative costs; and 5) reimburse the General Fund from the Air Filtration Fund (75), for administrative costs up to \$1,343 from the monies obtained from CARB for the SEP administration.

### **Sole Source Justification**

Section VIII. B. 2 of the Procurement Policy and Procedure identifies four major provisions under which a sole source award may be justified. This request for a sole source award is made under provision B.2.c (1): The desired services are available from only the sole source based upon the proposed contractor or contractor team's unique experience and capabilities. IQAir remains the only manufacturer of high-performance panel filters and stand-alone units identified by South Coast AQMD and CARB staff that meet the performance standards required to complete the work.

### **Benefits to South Coast AQMD**

This project will reduce children's exposure to criteria and toxic pollutants and ultrafine PM. Health studies have determined that fine and ultrafine PM, including diesel PM, present the greatest air pollution health risk to sensitive receptors in EJ communities identified in the SEP agreement and CERPs.

### **Resource Impacts**

South Coast AQMD will receive up to \$26,850 from CARB to administer and implement school and residential air filtration projects in accordance with the SEPs, which will be recognized into the Air Filtration Fund (75). The new contracts with IQAir North America in the amount not to exceed \$6,352,650 and \$26,850 will be executed from the Community Air Protection Fund (77) and Air Filtration Fund (75), respectively, to install air filtration systems. The administrative costs will not exceed \$1,343 for administration of the two SEPs and will be obtained from the monies received from CARB.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 5

**PROPOSAL:** Execute Contracts for the Volkswagen Environmental Mitigation Trust Program – Combustion Freight and Marine Projects Category

**SYNOPSIS:** In March 2020, the Program Announcement for the Volkswagen (VW) Environmental Mitigation Trust Program - Combustion Freight and Marine Projects category, with \$30 million in available funding, closed. The solicitation was largely undersubscribed primarily due to the lower incentive amounts, other competing programs in South Coast AQMD, and other programmatic requirements, as specified in the court-approved Consent Decrees and CARB's Beneficiary Mitigation Plan. Based on review of eligible applications, staff is recommending awards for truck replacement and marine engine repower projects. This action is to execute contracts for the VW Program – Combustion Freight and Marine Projects Category.

**COMMITTEE:** Technology, November 20, 2020; Recommended for Approval

**RECOMMENDED ACTION:**

Authorize the Chairman to execute contracts for the replacement of on-road heavy-duty trucks as listed in Table 1A in an amount not to exceed \$3,895,238 and one contract for the repower of a marine vessel as listed in Table 1B, in an amount not to exceed \$1,000,000 from the VW Mitigation Special Revenue Fund (79).

Wayne Natri  
Executive Officer

MMM:NB:VW:PG

---

**Background**

In November 2018 and March 2020, the Board recognized revenue up to \$165 million to administer and implement two of the five project funding categories for the VW Program, including \$150 million in project funds. The two funding categories that South Coast AQMD is administering are the Combustion Freight and Marine Projects and Zero-Emission Class 8 Freight and Port Drayage Trucks, which have been allocated \$60

million and \$90 million in project funds, respectively. The other three funding categories are being administered by San Joaquin Valley APCD and Bay Area AQMD.

On December 6, 2019, the South Coast AQMD released a Program Announcement (PA) to solicit projects for the Combustion Freight and Marine Projects Category, using the first installment of \$30 million. The solicitation closed on March 4, 2020 and was largely undersubscribed primarily due to the lower incentive amounts and other programmatic requirements, as specified in partial Consent Decrees ordered by the U.S. District Court for the Northern District of California (*United States of America v. Volkswagen AG et al.*, Case No. 16-cv-295 (N.D. Cal.) ) and CARB's Beneficiary Mitigation Plan (BMP).

As a follow-up, in coordination with CARB staff, staff surveyed applicants that initiated the process for the solicitation but did not complete the applications and discussed the programmatic parameters with local fleet operators. Based on feedback received, the primary reasons for the low subscription were the lower incentive amounts relative to other competing programs, compounded by the requirements to scrap an older vehicle and inability to leverage VW Trust funds with other CARB funds. For example, HVIP, although depleted of funds, offers up to \$45,000 per NZE truck with no scrappage and Proposition 1B offers \$100,000 per truck with scrappage. The confluence of these factors discouraged many fleet operators from applying for funding under this PA. However, two larger fleets who applied were willing to move forward at a reduced funding amount relative to the maximum incentive offered by the VW program.

### **Proposal**

All applications were evaluated based on the criteria specified in the PA, including other VW program-related documents, and eligible projects were ranked based on cost effectiveness for the amount of NOx emissions reduced. The projects were also reviewed by a five-member panel consisting of one member from: South Coast AQMD, Bay Area AQMD, San Joaquin Valley APCD, CARB, and California Air Pollution Control Officers Association (CAPCOA). The review panel verified all project selection criteria were followed.

Staff is recommending the execution of contracts for truck replacement projects and one marine engine repower project from the approved rank list, as identified in Tables 1A and 1B, in an amount not to exceed \$3,895,238 and \$1,000,000, respectively, from the VW Mitigation Special Revenue Fund (79). In summary, the total recommended awards from the first solicitation of the Combustion Freight and Marine Projects Category will be \$4,895,238 as summarized in Table 1C.

**Outreach**

The PA was provided to San Joaquin Valley APCD, Bay Area AQMD, CARB and CAPCOA to assist with statewide outreach. The PA was also posted on each of the VW websites administered by the South Coast AQMD, San Joaquin Valley APCD, Bay Area AQMD and CARB. South Coast AQMD issued a press release notifying interested stakeholders of the opening of the PA for the Combustion Freight and Marine Projects category. Staff also held a public webinar to assist applicants statewide and conducted outreach on a statewide basis, including the utilization of social media and sending over 136,000 emails to subscribers.

Staff will work with other air districts, industry organizations, community groups and other stakeholders, in coordination with CARB, on revised statewide outreach for future solicitations.

**Disadvantaged and Low-Income Communities**

Consistent with the goals established within the BMP, not less than 50 percent of the funds appropriated for this category are to be expended in a manner that directly reduces air contaminants and/or associated public health risks in disadvantaged and/or low-income communities. The qualification of the projects is determined by using CalEnviroScreen version 3.0 to identify disadvantaged and low-income communities.

Staff determined that 85 percent of the projects recommended for funding in this Board action are expected to provide benefits to disadvantaged and/or low-income communities. This greatly surpasses the requirements of the program.

**Funding Distribution**

The VW Trust is a component of partial settlements with VW and is enumerated in Appendix D of the Consent Decree ordered by the U.S. District Court for the Northern District of California. In May 2018, as required by the Consent Decree, CARB approved the BMP, which includes a goal that at least 50 percent of program funds be expended on projects that will reduce NOx emissions in disadvantaged and low-income communities for the Combustion Freight and Marine Projects category.

Recommended projects in this Board letter are anticipated to reduce emissions in the following counties: Alameda, Butte, Los Angeles, Riverside, Sacramento, San Diego and other areas where the vehicles are operated.

**Benefits to South Coast AQMD**

The successful implementation of the projects selected for funding through the VW Program will reduce emissions of NOx and other criteria air pollutants, toxic air contaminants and greenhouse gases on a statewide basis, including the South Coast AQMD. The recommended projects will exceed the targets for benefits to disadvantaged and low-income communities as qualified by CalEnviroScreen version

3.0. Below are the estimated NOx emissions reduction benefits from the recommended awards:

<b>Funding Category</b>	<b>Number of Vehicles/Engines</b>	<b>Maximum Recommended Awards</b>	<b>Estimated Statewide NOx Emission Reductions (tons/year)</b>	<b>Estimated NOx Emission Reductions Within South Coast AQMD (tons/year)</b>
On-Road	66	\$3,895,238	14.5	13.0
Marine	2	\$1,000,000	10.6	0.0
<b>Total</b>	<b>68</b>	<b>\$4,895,238</b>	<b>25.1</b>	<b>13.0</b>

The NOx emission reductions that will be achieved from replacing older, high-polluting vehicles and equipment with cleaner technologies within the South Coast AQMD and statewide are intended to fully mitigate the diesel NOx emissions caused by VW's illegal actions. This program provides incentive funding to owners of heavy-duty vehicles and equipment to reduce emissions by replacing or repowering their older engines to the cleanest zero-emission or near zero-emission technologies. The projects identified in this Board letter will result in emission reductions that are surplus to existing regulations and will occur throughout the life of the projects resulting in long-term emission reduction and public health benefits.

### **Resource Impacts**

Total funding for projects under the VW Environmental Mitigation Trust Program – Combustion Freight and Marine Projects Category will not exceed \$4,980,238. Revenue up to \$165 million, which includes \$150 million in projects funds and \$15 million in Administrative Costs, was previously recognized into the VW Mitigation Special Revenue Fund (79) to administer and implement the two project funding categories being administered by the South Coast AQMD. There are sufficient funds in the VW Mitigation Special Revenue Fund (79) for this funding category, including the recommended awards in this Board letter. Reimbursement of administrative costs will not exceed \$15 million of revenue received.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 6

**PROPOSAL:** Recognize Revenue and Appropriate and Transfer Funds, Issue Solicitations and Purchase Orders and Amend Contract for Air Monitoring

**SYNOPSIS:** South Coast AQMD is expected to receive supplemental grant funds up to \$350,000 from the U.S. Government for the Enhanced Particulate Monitoring Program and up to \$794,261 from U.S. EPA for the FY 2021 (29th Year) PAMS Program. These actions are to recognize revenue and appropriate funds when they become available in Science & Technology Advancement's FY 2020-21 and FY 2021-22 budgets for the Enhanced Particulate Monitoring Program and the PAMS Program, transfer up to \$350,000 between Major Objects in Science and Technology Advancement's FY 2020-21 Budget to realign expenditures as needed for the Enhanced Monitoring Program, issue solicitations, execute purchase orders and amend contract for equipment and services for air monitoring.

**COMMITTEE:** Administrative, November 13, 2020; Recommended for Approval

**RECOMMENDED ACTIONS:**

1. Recognize revenue, upon receipt, and appropriate supplemental funds in the amount of up to \$350,000 for the U.S. Government Enhanced Particulate Monitoring Program into Science & Technology Advancement's (STA) (Org 47) FY 2020-21 Budget, Services and Supplies as set forth in Attachment 1;
2. Recognize revenue, upon receipt, and appropriate funds in the amount of \$404,261 (\$390,000 was previously included in Salaries & Employee Benefits within the FY 2020-21 Budget) for the U.S. EPA Section 105 Grant for the 29th Year PAMS Program into STA (Org 47) FYs 2020-21 and/or 2021-22 Budgets, Services and Supplies and Capital Outlays Major Objects, as set forth in Attachment 2;
3. Transfer up to \$350,000 between the Services and Supplies Major Object (Org 47), and Salaries and Employee Benefits Major Object (Org 44) in Science and Technology Advancement's FY 2020-21 Budget to realign expenditures, as needed, for the Enhanced Particulate Monitoring Program;
4. Authorize the Procurement Manager, in accordance with South Coast AQMD's Procurement Policy and Procedure, to issue "Prior Bid, Last Price" purchase orders,

or a solicitation(s), as needed, followed by a purchase order, for the equipment and services listed in Table 1, as follows:

- a. Up to two gas dilution systems in an amount not to exceed \$55,000;
  - b. Up to two replacement air conditioning units in an amount not to exceed \$25,000;
  - c. One portable gas dilution system in an amount not to exceed \$27,500;
  - d. One ozone monitor in an amount not to exceed \$15,000;
  - e. One ozone primary standard in an amount not to exceed \$19,000; and
5. Authorize the Executive Officer, to amend the existing contract with Sonoma Technology, Inc. in an amount not to exceed \$41,000 to provide additional meteorological audit technical support within the scope of the contract as described in this letter.

Wayne Nastri  
Executive Officer

MMM:JCL:RMB:AK:KD:ld

---

## **Background**

### Enhanced Particulate Monitoring Program

South Coast AQMD has been providing enhanced particulate monitoring support as part of a national monitoring program since 2003. Sample collection began in February 2003 and will continue for the foreseeable future. South Coast AQMD is expected to receive supplemental funds up to \$350,000 to extend the grant period through April 30, 2021. Since the onset of the Enhanced Particulate Monitoring Program, the U.S. Government has annually allocated funds to fully support the program.

### PAMS Program

In February 1993, U.S. EPA promulgated the PAMS regulations for areas classified as serious, severe or extreme nonattainment. These regulations require South Coast AQMD to conduct monitoring for ozone precursors with enhanced monitoring equipment at multiple sites. The PAMS Program also funds upper air and surface-based meteorological measurements at several locations. Since the onset of the PAMS Program, U.S. EPA has annually allocated Section 105 Grant funds in support of this requirement.

## **Proposal**

### Enhanced Particulate Monitoring Program (FY 2020-21)

The South Coast AQMD is expected to receive supplemental funding from the U.S. Government for the ongoing Enhanced Particulate Monitoring Program through April 30, 2021, in an amount up to \$350,000. These actions are to recognize revenue up to \$350,000 and appropriate up to \$350,000 into STA's FY 2020-21 Budget, Services & Supplies and Salaries & Employee Benefits Major Objects, as set forth in Attachment 1

and to transfer up to \$350,000 between the Services and Supplies Major Object (Org 47), and Salaries and Employee Benefits Major Object (Org 44) in Science and Technology Advancement's FY 2020-21 Budget to realign expenditures as needed.

#### PAMS Program

The estimated U.S. EPA Section 105 Grant for the 29th Year PAMS Program funding is \$794,261 based on the 28th Year PAMS Program funding levels. This action is to recognize revenue, upon receipt, and appropriate a portion of the estimated funds in the amount of \$404,261 (with the remainder of \$390,000 already included in Salaries and Employee Benefits within the FY 2020-21 Budget) into the Services and Supplies and Capital Outlays Major Objects in STA's FYs 2020-21 and/or 2021-22 Budgets, as set forth in Attachment 2. The U.S. EPA concurs with staff's proposed allocation.

#### Proposed Purchases through an RFQ Process, "Prior Bid, Last Price" or Informal Bid *Gas Dilution Systems*

U.S. EPA requires the measurement of criteria pollutants at multiple sites. Periodic calibration of the air monitors is required to meet U.S. EPA quality control criteria. Gas dilution systems are necessary to provide a known concentration of gas standard required for the calibration of air monitoring equipment. The current gas dilution systems are greater than ten years old and are in need of replacement. The approximate cost for up to two gas dilution systems is \$55,000 (see Table 1). The purchase will be made by "Prior Bid, Last Price" or through a solicitation process, as needed, followed by issuance of a purchase order.

#### *Replacement Air Conditioning Units*

U.S. EPA requires a temperature-controlled environment at air monitoring sites. Temperature must be between 20 - 30°C with a standard deviation of 2°C over a 24-hour period. Replacement of the current air conditioning units are required to meet these criteria. The current air conditioning units at the Rubidoux sites are greater than fifteen years old, run continuously and no longer meet this standard. The approximate cost for up to two replacement air conditioning units is \$25,000 (see Table 1). The purchase will be made by "Prior Bid, Last Price" or through a solicitation process, as needed, followed by issuance of a purchase order.

#### *Portable Gas Dilution System*

U.S. EPA's PAMS Program requires the measurement of ozone precursors with enhanced monitoring equipment at multiple sites. Periodic audits of air monitors are required to meet U.S. EPA quality assurance criteria. Gas dilution systems are necessary to provide a known concentration of gas standard required for auditing air monitoring equipment. The current gas dilution systems are greater than ten years old and are in need of replacement. The approximate cost for a portable gas dilution system is \$27,500 (see Table 1). The purchase will be made by "Prior Bid, Last Price" or through a solicitation process, as needed, followed by issuance of a purchase order.

### *Ozone Monitor*

U.S. EPA requires the measurement of ozone for non-attainment areas. South Coast AQMD operates a network of 28 ozone monitors to obtain data regarding public exposure to air contaminants. Periodic audits of ozone monitors are required to meet U.S. EPA quality assurance criteria. This monitor is necessary to provide a secondary standard concentration of ozone required for auditing the ambient ozone network. The approximate cost for an ozone monitor is \$15,000 (see Table 1). The purchase will be made by “Prior Bid, Last Price” or through a solicitation process, as needed, followed by issuance of a purchase order.

### *Ozone Primary Standard*

U.S. EPA requires the measurement of ozone for non-attainment areas. South Coast AQMD operates a network of 28 ozone monitors to obtain data regarding public exposure to air contaminants. Periodic audits and calibration of ozone monitors are required to meet U.S. EPA quality assurance criteria. This ozone primary standard is necessary to continue to provide a certified concentration of ozone required for audits and calibrations of the ambient ozone network. The company that produced the current ozone primary standard is no longer in business. The primary standard is more than eight years old; parts and service are no longer available. The approximate cost for an ozone primary standard is \$19,000 (see Table 1). The purchase will be made through a solicitation process, as needed, followed by issuance of a purchase order.

### Proposed Contract Amendment

#### *Technical Support for Upper Air and Monitoring Site Meteorological Network*

On October 5, 2018 the Board authorized the solicitation of bids and execution of a contract for technical support for surface and upper air meteorological measurements. A multi-year Contract was awarded to Sonoma Technology, Inc. with a provision for annual amendments to extend the term and add funds up to \$100,000, based on contractor performance and availability of funds. The second-year contract amendment was executed for \$100,000, (under the Executive Officer’s authority) beginning September 1, 2020, with funds allocated in the August 7, 2020 Board Letter in an amount not to exceed \$141,000 as appropriated from U.S. EPA Section 105 27th Year PAMS Program funding. This action authorizes a new amendment for the remaining \$41,000 in support of additional meteorological audits under the scope of the current contract.

### **Resource Impacts**

U.S. Government Grant funding will fully support the Enhanced Particulate Monitoring Program.

The U.S. EPA Section 105 Grant funding will support the operation of the PAMS Program to meet necessary objectives of the Program.

**Table 1**  
**Proposed PAMS Capital Outlay Expenditures for FYs 2020-21 and/or FY 2021-22**

<b>Description</b>	<b>Qty</b>	<b>Funding Source</b>	<b>Estimated Amount</b>	<b>Contracting Method</b>

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 7

**PROPOSAL:** Amend Contracts for Legislative Representation in Washington, D.C.

**SYNOPSIS:** The current contracts for legislative and regulatory representation in Washington D.C. with Kadesh & Associates, LLC, Cassidy & Associates, and Carmen Group Inc., expire on January 14, 2021. Each of these contracts includes an option for two one-year extensions. This action is to consider approval of the second one-year extension of the existing contracts for Calendar Year 2021 with Kadesh & Associates, LLC for \$226,400; Cassidy & Associates for \$216,000; and Carmen Group Inc. for \$222,090 as South Coast AQMD's legislative and regulatory representatives in Washington D.C., to further the agency's policy positions at the federal level. Sufficient funding is available in the Legislative, Public Affairs & Media FY 2020-21 Budget.

**COMMITTEE:** Administrative, October 9, 2020; Recommended for Approval

**RECOMMENDED ACTION:**

Authorize the Chairman to approve Contract modifications for legislative consulting services in Washington, D.C. to extend the term of the Contracts for a one-year period beginning on January 15, 2021, in the amounts of \$226,400, \$216,000, and \$222,090, with Kadesh & Associates, Cassidy & Associates, Inc., and Carmen Group, Inc., respectively.

Wayne Nastri  
Executive Officer

DJA:RAR:LTO:ar

---

**Background**

After a competitive request for proposals process in 2018, the Board selected Kadesh & Associates, LLC, Cassidy & Associates and the Carmen Group Inc., for legislative and regulatory representation in Washington, D.C. for one year beginning on January 15,

2019, with an option for up to two one-year renewals, upon satisfactory performance, at the Board's discretion. Each of the three one-year consultant contracts will expire on January 14; however, each agreement includes an option for two one-year extensions. This is the second and final one-year extension for each consultant contract.

The firms have been effective in working with the Board and staff to maintain a continued and noticeable presence to advance the Board's agenda for federal legislative and regulatory issues. They have effectively organized meetings with the Administration, Congressional Members and staff, industry, environmental and health organizations and other stakeholders. These meetings have strengthened South Coast AQMD's ability to provide information to policymakers in Washington, D.C. The consultants planned and helped facilitate an Executive Council and staff trip to Washington, D.C. in February 2020. South Coast AQMD met with the Administration, key Congressional Members and staff, industry and health organizations on the Cleaner Trucks Initiative, rollback of Corporate Average Fuel Economy Standards and the revocation of the California Waiver, as well as appropriations for the Diesel Emission Reduction Act program (DERA), Targeted Airshed Grants (TAG), Section 103/105 and other funding programs. The federal consultants also assisted in educating the South Coast AQMD Congressional Delegation and key Members of Congress on attainment issues related to the federal government doing its fair share to reduce emissions from mobile sources to improve public health for the residents of the South Coast region. This relationship building has developed stronger relationships between Members of Congress and South Coast AQMD based on air quality issues in their districts, South Coast region and the nation. Several Members of Congress have championed air quality issues and are working with South Coast AQMD in partnership.

As a result of our consultants' efforts to increase funding for TAG, South Coast AQMD was awarded \$37 million by the U.S. EPA in 2019 and 2020. South Coast AQMD also received over \$2.2 million from the DERA National Grants program. There are several legislative initiatives that South Coast AQMD consultants worked on which are pending in the 116<sup>th</sup> Congress, including:

- Inclusion of H.R. 2616, the "Clean Corridors Act of 2019" (DeSaulnier) with South Coast and Bay Area AQMD amendments in the larger, transportation and infrastructure bill known as H.R., the "Moving Forward Framework" which was approved by the full House of Representatives. Similar provisions were included in the Senate surface transportation bill. Congress is likely to extend the existing surface transportation policy which expires on September 30, 2020, for one-year, allowing the 117<sup>th</sup> Congress to act on the next major surface transportation and infrastructure bill which is highly likely to include the Clean Corridors provisions as amended.
- Work on H.R. 7073, "Special Districts Provide Critical Services Act" (Garamendi) to provide federal assistance for COVID-19 related unplanned expenses and revenue losses for special districts such as South Coast AQMD. South Coast AQMD

consultants also worked to support efforts for S. 4308 (Sinema, Cornyn, Harris) which also provides federal assistance to special districts through the CARES Act State and Local government program. South Coast AQMD continues to assist in garnering bi-partisan support for S. 4308 including Committee leadership and staff.

- Request for increased appropriations and reauthorization of DERA. The Fiscal Year 2021 House Appropriations bill for Interior included \$90 million plus an additional \$450 million under “Infrastructure Improvements.” The reauthorization of DERA is pending in multiple legislative vehicles in both the House and Senate.
- Working with several Congressional offices on legislative proposals including,
  - H.R. 7024, “Climate Smart Ports” (Barragan) included in H.R. 2, “Moving Forward Framework.” This bill may be carried forward into the 117<sup>th</sup> Congress as part of the larger surface transportation and infrastructure package.
  - H.R. 7822, the “Public Health Air Quality Act” which seeks to implement fence line monitoring, improve the national air monitoring network, increase monitoring of air toxics, and other provisions. This bill and a companion Senate bill, S. 4369 (Duckworth) are being revised and will be reintroduced in the 117<sup>th</sup> Congress.
  - H.R. 4924, the “Smoke Planning and Research Act” (Eshoo) / S. included in the larger energy package, H.R. 4447, the “Clean Economy Jobs and Innovation Act” which is expected to be heard before the end of the 116<sup>th</sup> Congress.
  - S. 1750 (Harris) and the companion bill, H.R. 3973 (Hayes), the “Clean School Bus Act” would establish a grant program for zero-emission school buses, including infrastructure and other provisions. This bill was included in H.R. 2, “Moving Forward Framework.” It is a good candidate to come back as part of the 117<sup>th</sup> Congress’ larger surface transportation and infrastructure legislation.
- Supporting the promulgation of the U.S. EPA Cleaner Trucks Initiative (CTI) rulemaking initially gained momentum which was slowed by Administration and eventually impacted by COVID-19. Other rulemaking efforts include, “Safer Affordable Fuel-Efficient Vehicles,” “Science Transparency,” “Review of NAAQS for Ozone,” and “Review of NAAQS Primary and Secondary for PM2.5 and PM10.”

The consultants have represented South Coast AQMD well and continued representation in Washington, D.C. is necessary to further the agency’s policy and funding objectives in the future. South Coast AQMD has several significant legislative and administrative issues that likely will be dealt with in the 117<sup>th</sup> Congress. Staff is strategizing with the consultants on how to best move forward policy and funding opportunities to address attainment issues and air toxics. Key legislation that may move in the 117<sup>th</sup> Congress include climate, surface transportation and infrastructure, public health and environmental justice, and additional COVID-19 recovery and relief and economic stimulus.

It is critical that South Coast AQMD be involved in policy development relating to federal air quality legislation, federal Clean Air Act implementation, subvention funding, and special grants, and that all these issues and any other related matters are closely monitored. Therefore, staff recommends continued direct representation and advocacy of South Coast AQMD's policy positions on environmental issues in Washington, D.C.

### **Proposal**

Staff recommends retaining Kadesh & Associates, LLC, Cassidy & Associates, and Carmen Group Inc., for Calendar Year 2021, given their successful efforts in 2020 and the ability to build upon those efforts in the coming year. Continuity of representation will help build on past relationships and policy initiatives to increase the successful outcomes of South Coast AQMD policy objectives going forward.

Pursuant to the original contract, the Board has discretion to exercise options for two one-year extensions. This proposal is to approve the final one-year extension for all three consulting contracts.

### **Resource Impacts**

The Legislative, Public Affairs, and Media Budget for FY 2021-2022 has sufficient funds for legislative advocacy in Washington D.C.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 8

**PROPOSAL:** Execute Contracts for Legislative Representation in Sacramento, California

**SYNOPSIS:** At the September 4, 2020 meeting, the Board approved release of an RFP to solicit proposals for legislative representation in Sacramento, California. Four separate proposals were received from California Advisors, LLC, Campbell Strategy & Advocacy, Joe A. Gonsalves & Son and Resolute. On November 13, 2020, the Administrative Committee recommended approval of the execution of contracts with: California Advisors, LLC for \$142,080, Joe A. Gonsalves & Son for \$143,000 and Resolute for \$180,000 for legislative representation in Sacramento

**COMMITTEE:** Administrative, November 13, 2020; Recommended for Approval

**RECOMMENDED ACTIONS:**

Authorize the Chairman to execute contracts with: California Advisors, LLC, Joe A. Gonsalves & Son and Resolute in a total amount not to exceed \$465,080 for legislative representation in Sacramento, California for one year, beginning in January 1, 2021. The contracts include options for up to two one-year renewals, contingent on satisfactory performance and approval of subsequent budgets, upon approval of the Governing Board.

Wayne Natri  
Executive Officer

DJA:PFC:RAR:EH

---

**Background**

The current contracts for legislative representation in Sacramento, California expire on December 31, 2020.

As a leading air quality agency in California and an innovative leader in developing emission reduction programs, South Coast AQMD is an important contributor to the policy discussions in Sacramento. It is important to ensure that South Coast AQMD's

input continues to be conveyed in a timely and meaningful manner, and that South Coast AQMD is involved in the day-to-day policy discussions in Sacramento that promote cleaner air, both through policy development and adequate funding. A legislative presence in Sacramento is critical to advancing Board policies and priorities, including the 2016 Air Quality Management Plan (AQMP) and subsequent AQMPs, and South Coast AQMD legislative goals and objectives, and to protecting South Coast AQMD's authority. Therefore, it is appropriate to continue direct legislative representation in Sacramento.

These efforts in Sacramento include providing technical information, assistance and otherwise serving as a resource to legislators and the Governor's Office regarding air quality matters; acting as a liaison between South Coast AQMD and legislators and the Governor's Office regarding the Board's policy and funding priorities; seeking funding and program support for technology advancement and emission reduction projects and incentive programs, and advocating for South Coast AQMD's positions on air quality-related legislation. These efforts also include fostering state support for South Coast AQMD's federal initiatives which have synergy at the state level.

The 2016 AQMP puts a priority on maximizing emission reductions utilizing zero emission technologies wherever cost-effective and feasible, and near-zero emission technologies in all other applications. Incentives are critically important to achieve near-term attainment goals and serve to accelerate the transition to zero and near-zero emission technologies. Incentives totaling an estimated \$11 billion to \$14 billion, or about \$1 billion per year over the next 15 years, are needed in order to achieve clean air goals. Should the region fail to meet federally mandated clean air goals, U.S. EPA could impose sanctions that are far more onerous and costly to the Basin's residents and businesses than the 2016 AQMP.

The development of South Coast AQMD's 2021 State Legislative Goals and Objectives will be contingent on the outcomes of the 2020 legislative session. However, many of the prior year's priorities are expected to continue and be built upon for the coming legislative year in Sacramento. South Coast AQMD's legislative priorities for 2021 will be presented to the Legislative Committee for review and approval, and then will move to the full Board for final approval.

At the September 4, 2020 meeting, the Board approved release of an RFP to solicit proposals for legislative representation in Sacramento, California. Four separate proposals were received from California Advisors, LLC, Campbell Strategy & Advocacy, Joe A. Gonsalves & Son and Resolute. Subsequently, on November 13, 2020, the Administrative Committee recommended approval of the execution of contracts with: California Advisors, LLC for \$142,080, Joe A. Gonsalves & Son for \$143,000 and Resolute for \$180,000, for a total amount not to exceed \$465,080.

**Outreach**

In accordance with South Coast AQMD's Procurement Policy and Procedure, a public notice advertising the RFP and inviting bids was published in the Los Angeles Times, the Orange County Register, the San Bernardino Sun, Riverside County's Press Enterprise, and the Sacramento Bee newspapers, to leverage the most cost-effective method of outreach to the entire South Coast Basin and beyond.

Additionally, thirty RFP notification letters were mailed to lobbying and public affairs firms in Sacramento and San Rafael, CA. Notice of the RFP was also e-mailed to the Black and Latino Legislative Caucuses and various minority chambers of commerce and business associations, and placed on the Internet at South Coast AQMD's website (<http://www.aqmd.gov>).

**Bid Evaluation**

Four proposals were received in response to the RFP. The proposals were evaluated by a three-member panel, including two South Coast AQMD managers, one female and one male, both Hispanic, and one outside municipal official, who was male and Hispanic. All proposals were deemed technically qualified and all proponents were interviewed by the South Coast AQMD Administrative Committee. Attachment A provides the final scores for all four firms.

**Proposal**

Staff proposes to execute contracts with: California Advisors, LLC, Joe A. Gonsalves & Son and Resolute in a total amount not to exceed \$465,080 for legislative representation in Sacramento, California, for one-year, beginning on January 1, 2021. The contracts include options for up to two one-year renewals, contingent on satisfactory performance and approval of subsequent budgets, upon approval of the Governing Board.

**Resource Impacts**

Funding for these contracts is available in the Legislative, Public Affairs & Media FY 2020-21 Budget. Funding for the two optional one-year extensions in all three contracts is contingent upon Governing Board approval of the Budget for the respective fiscal years.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 9

PROPOSAL: Establish List of Prequalified Vendors for Mailing Services

SYNOPSIS: On September 4, 2020, the Board approved release of an RFQ to establish a prequalified list for outside mailing services, including folding, inserting, sealing, removing duplicate addresses, labeling, tabbing and metering, as well as pick-up and delivery of mailing materials. This action is to establish a prequalified vendor list that will be used for mailing services for a three-year period, from January 1, 2021 to December 31, 2023, and vendors on the list will be given an opportunity to bid competitively on mailing jobs, as the need arises.

COMMITTEE: Administrative, November 13, 2020; Recommended for Approval

**RECOMMENDED ACTION:**

Approve the vendors listed in Attachment A as prequalified vendors to provide mailing services, as needed, from January 1, 2021 to December 31, 2023.

Wayne Nastri  
Executive Officer

AJO:VR

---

**Background**

On September 4, 2020, the Board approved release of RFQ #Q2021-02 to establish a list of prequalified vendors for mailing services for the next three-year period of January 1, 2021 to December 31, 2023. South Coast AQMD conducts various types of mailings and the Subscription Services unit coordinates many of these mailings, including South Coast AQMD's subscription publications. Other mailings include, but are not limited to, scheduled mailings for public workshops, rule notification, and permit fee billings. The RFQ included services such as folding, inserting, sealing, removing duplicate addresses, labeling, tabbing and metering, as well as pick-up and delivery of mailing materials.

When mailing services are needed, competitive bids are solicited from all prequalified providers listed for the respective job category. Final selection of a vendor is based on vendor ability to provide the service, as specified, and lowest cost. If a service cannot be met by any of the prequalified vendors, another vendor may be selected to provide such mailing services.

### **Outreach**

In accordance with South Coast AQMD's Procurement Policy and Procedure, a public notice advertising the RFQ and inviting bids was published in the Los Angeles Times, the Orange County Register, the San Bernardino Sun, and Riverside County's Press Enterprise newspapers to leverage the most cost-effective method of outreach to the South Coast Basin. Additionally, potential bidders may have been notified utilizing South Coast AQMD's own electronic listing of certified minority vendors. Notice of the RFQ was emailed to the Black and Latino Legislative Caucuses and various minority chambers of commerce and business associations, and placed on South Coast AQMD's website (<http://www.aqmd.gov>).

### **Bid Evaluation**

For RFQ 2021-02 to prequalify vendors to provide mailing services to South Coast AQMD, 85 copies of the RFQ were mailed out. Three proposals were received by the close of bidding at 2:00 p.m. on October 7, 2020. The three proposals evaluated received a qualifying score and Table 1 summarizes the results of the evaluation process.

The evaluation panel consisted of three South Coast AQMD employees: a Mail/Subscriptions Services Supervisor, a Print Shop Supervisor, and a Mail/Subscription Services Clerk. Of these three panel members, two are African American, one is Caucasian; all are male.

This action seeks approval of the vendors listed in Attachment A as prequalified vendors to provide mailing services, as needed, from January 1, 2021 to December 31, 2023.

Of the three proposed prequalified vendors, all were self-certified as a Small Business, one was self-certified as a Local Business, and one was self-certified as a Woman-Owned Business.

### **Resource Impacts**

Sufficient funds have been appropriated for these services in the FY 2020-21 Budget and will be requested in subsequent fiscal year budgets.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 10

**PROPOSAL:** Amend Provisions of South Coast AQMD's Salary Resolution and Labor Contracts with Teamsters Local 911 and SC-PEA Relating to Vacation Leave Accrual

**SYNOPSIS:** Due to operational needs brought about by the COVID-19 pandemic, staff has been required to restrict the use of vacation leave time. As a result, a substantial number of employees will exceed the accrual limits on vacation leave balances at the end of the year and will be prohibited from accruing vacation leave hours next year. This proposal seeks approval of amendments to applicable provisions of South Coast AQMD's Salary Resolution and the bargaining unit MOUs, in order to temporarily suspend the limitations on vacation leave accrual.

**COMMITTEE:** No Committee Review

**RECOMMENDED ACTIONS:**

1. Approve the proposed amendments to the 2018-2020 Teamsters MOU, representing the Technical-Enforcement and Office Clerical and Maintenance bargaining units, and the 2018-2020 Professional Unit MOU representing the Professional bargaining unit employees. Proposed changes to the 2018-2020 Teamsters MOU are shown in Attachment A and proposed changes to the 2018-2020 Professional Unit MOU are shown in Attachment B.
2. Approve the proposed amendments to Section 41(a) of South Coast AQMD's Salary Resolution.

Wayne Nastri  
Executive Officer

**Background**

Vacation leave accrual for employees is limited. Specifically, employees are not permitted to accrue additional vacation time if the employee's vacation leave balance exceeds 360 hours by the end of the last pay period beginning in December. Vacation accrual resumes when the employee's vacation leave balance falls to 360 hours or less. See, Article 15, Section 5, of the Teamsters MOU; Article 15, Section 6, of the Professional Unit MOU; and Section 41 of South Coast AQMD's Salary Resolution.

This year, due to the anticipated financial impacts of the COVID-19 pandemic, the Board adopted a budget with a higher than usual vacancy rate of 13 percent, as a means to reduce expenditures. Since July, staff has maintained or exceeded this vacancy rate, while continuing to meet South Coast AQMD's commitments and responsibilities in its planning, compliance, monitoring, grant and permitting programs.

**Proposal**

High priority operational and program needs, such as the Permit Backlog Reduction Action Plan and AB 617, as well as the ongoing regular functions (such as finance and information technology duties) require maximum capacity staffing resources. However, the reduced staffing required by the budget for cost-saving purposes necessitates limiting approvals for employees to take vacation time off. These circumstances make it difficult for employees with vacation leave balances at or near the threshold, often the most knowledgeable and experienced employees, to control the effects of exceeding the limits.

This proposal seeks approval of amendments to South Coast AQMD's Salary Resolution, and the Memoranda of Understanding with the represented employees. For bargaining unit members, the MOUs would be amended to allow employees whose vacation leave balances exceed 360 hours at the end of the last pay period beginning in December 2020 to continue to accrue vacation leave hours. Management has reached a tentative agreement with the representatives of the bargaining units. Similarly, for unrepresented classifications, the Salary Resolution would be amended under this proposal to allow employees whose vacation leave balances exceed 360 hours at the end of the last pay period beginning in December 2020 to continue to accrue vacation leave hours.

The 360-hour accrual limit will be reinstated and implemented for all employees at the end of the last pay period beginning in December 2021.

**Fiscal Impacts**

Sufficient funding for these amendments is available in the 2020-21 Fiscal Year budget.

Section 41 (TIME OF TAKING VACATIONS), subsection a, of this *Salary Resolution* is amended as follows:

Employees whose vacation leave balances exceed 360 hours by the end of the last pay period beginning in December 2020 may accrue additional vacation leave hours. The 360-hour accrual limit will be reinstated and implemented at the end of the last pay period beginning in December 2021.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 11

**PROPOSAL:** Approve Contract Award and Modifications as Approved by MSRC

**SYNOPSIS:** The Mobile Source Air Pollution Reduction Review Committee (MSRC) approved a replacement contract as part of their FYs 2014-16 Work Program. The MSRC also approved the modification of three contracts under the FYs 2016-18 Work Program. At this time the MSRC seeks Board approval of the contract award and modifications as part of the FYs 2014-16 and 2016-18 Work Programs.

**COMMITTEE:** Mobile Source Air Pollution Reduction Review, November 19, 2020; Recommended for Approval

**RECOMMENDED ACTIONS:**

1. Approved modified contract with the City of Beaumont, substituting the installation of three (3) Level III charging stations for the installation of two (2) Level II charging stations, as part of approval of the FYs 2016-18 Work Program, as described in this letter;
2. Approve modified contract with the City of South Gate, substituting the installation of a Level III charging station for a Level II charging station, as part of approval of the FYs 2016-18 Work Program, as described in this letter;
3. Approve a \$2,000 contract value increase and four-month term extension to existing Contract #MS18003 with Geographics, the MSRC's current website maintenance contractor, to continue operation of the site pending successor selection and contract finalization, as part of approval of the FYs 2016-18 Work Program, as described in this letter;
4. Approve a replacement contract with Los Angeles County Metropolitan Transportation Authority, in an amount not to exceed \$2,500,000, to complete an expansion of the Willowbrook/Rosa Parks Station under the Transportation Control Measure Partnership Program, as part of approval of the FYs 2014-16 Work Program, as described in this letter; and

5. Authorize the Chairman of the Board to execute the new and modified contracts under the FYs 2014-16 and 2016-18 Work Programs, as described above and in this letter.

Larry McCallon  
Chair, MSRC

MMM:NB:CR

---

### **Background**

In September 1990, Assembly Bill 2766 was signed into law (Health & Safety Code Sections 44220-44247) authorizing an annual \$4 motor vehicle registration fee to fund the implementation of programs exclusively to reduce air pollution from motor vehicles. AB 2766 provides that 30 percent of the annual \$4 vehicle registration fee subvented to the South Coast AQMD be placed into an account to be allocated pursuant to a work program developed and adopted by the MSRC and approved by the Board.

### **Proposals**

At its November 19, 2020 meeting, the MSRC considered recommendations from the MSRC Technical Advisory Committee (MSRC-TAC) and approved the following:

#### **FYs 2016-18 Local Government Partnership Program**

As part of the FYs 2016-18 Local Government Partnership Program, the MSRC approved an award of \$31,870 to the City of Beaumont for the installation of two Level II electric vehicle charging stations. To better serve the needs of their residents and staff, the City requested to substitute the installation of three (3) Level III charging stations for the originally proposed Level II stations. These modifications would result in a greater number of more powerful charging stations overall for the same MSRC investment. The MSRC considered and approved the City's requested contract modifications.

As part of the FYs 2016-18 Local Government Partnership Program, the MSRC approved an award of \$121,500 to the City of South Gate for procurement of five light-duty zero emission vehicles and the installation of three (3) Level II charging stations. To improve efficiency and offer a greater sense of security that the electric vehicles will be available for emergencies, the City requested to substitute the installation of a Level III charging station for the originally planned Level II charging station at their corporate yard. This modification would result in a more powerful charging station for the same MSRC investment. The MSRC considered and approved the City's requested modification.

#### FYs 2016-18 Design, Hosting and Maintenance of the MSRC Website

The recommendation to award a contract for long-term maintenance of the MSRC website has been delayed, and it is now anticipated that recommendation will be brought to the MSRC for consideration within the next two months. The current Contract #MS18003 with Geographics, which covers maintenance of the site, will terminate on February 20, 2021. In order to ensure uninterrupted operation of the site pending successor selection and contract finalization, a four-month extension of Contract #MS18003 was recommended. The MSRC considered and approved a \$2,000 contract value increase and four-month term extension.

#### FYs 2014-16 Transportation Control Measure Partnership Program

As part of the FYs 2014-16 Transportation Control Measure Partnership Program, the MSRC awarded the Los Angeles County Metropolitan Transportation Authority (Metro) \$2,500,000 towards the expansion of the Willowbrook/Rosa Parks Transit Station. In September, Metro requested an extension due to delays associated with removal of temporary access measures and unexpected requirements related to stormwater release. The MSRC approved the extension at their October 15, 2020 meeting, but the contract modification process was not completed prior to the contract termination date. The MSRC considered and approved a twelve-month replacement contract in the amount of \$2,500,000 as part of the FYs 2014-16 Work Program.

At this time, the MSRC requests the South Coast AQMD Board approve the contract award and modifications as part of approval of the FYs 2014-16 and 2016-18 AB 2766 Discretionary Fund Work Programs as outlined above. The MSRC also requests the Board authorize the South Coast AQMD Board Chairman to execute all agreements described in this letter.

#### **Resource Impacts**

The South Coast AQMD acts as fiscal administrator for the AB 2766 Discretionary Fund Program (Health & Safety Code Section 44243). Money received for this program is recorded in a special revenue fund (Fund 23) and the contracts specified herein will be drawn from this fund.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 12

REPORT: Legislative, Public Affairs and Media Report

SYNOPSIS: This report highlights the October 2020 outreach activities of the Legislative, Public Affairs and Media Office, which includes Major Events, Community Events/Public Meetings, Environmental Justice Update, Speakers Bureau/Visitor Services, Communications Center, Public Information Center, Business Assistance, Media Relations, and Outreach to Community Groups and Federal, State and Local Governments.

COMMITTEE: No Committee Review

RECOMMENDED ACTION:  
Receive and file.

Wayne Nastri  
Executive Officer

DJA:LTO:KH:BW:lam:ar

---

## **BACKGROUND**

This report summarizes the activities of the Legislative, Public Affairs and Media Office for October. The report includes: Major Events; Community Events/Public Meetings; Environmental Justice Update; Speakers Bureau/Visitor Services; Communications Center; Public Information Center; Business Assistance; Media Relations; and Outreach to Community Groups and Governments.

## **MAJOR EVENTS (HOSTED AND SPONSORED)**

Each year, South Coast AQMD staff engage in holding and sponsoring several major events throughout South Coast AQMD's four county areas to promote, educate, and provide important information to the public regarding reducing air pollution, protecting public health, improving air quality, and the economy.

### Environmental Justice Conference

On October 28, South Coast AQMD held its 6th Annual Environmental Justice Conference, “A New Era of Environmental Justice – Our Community Survival” on several virtual platforms. Over 750 people participated and were very active on the question and answer and chat message boards. Dr. Burke, Council Member Mitchell and Supervisor Perez presented welcome, introductory and closing remarks. The Master of Ceremonies was Jose Trinidad Castaneda, a member of our Young Leaders Advisory Council. The conference included a prerecorded welcome message by Los Angeles Mayor Eric Garcetti and an interview session with Margaret Gordon from West Oakland Environmental Indicators Project. Breakout sessions were held on AB 617 community partnerships, youth united to change the world, health professionals discussing the pandemic, legislation for environmental equity and recovery, women in the environmental justice movement, and tribal nations on the frontlines. The plenary session featured a discussion on Black Lives Matter – Race and Environmental Justice and remarks by California Attorney General Xavier Becerra.

### **COMMUNITY EVENTS/PUBLIC MEETINGS**

Each year, South Coast AQMD staff engage with thousands of residents and stakeholders, providing valuable information about the agency, incentive programs, and ways individuals can help reduce air pollution through events and meetings sponsored solely by South Coast AQMD or in partnership with others. Attendees typically receive the following information:

- Tips on reducing their exposure to smog and its health effects;
- Clean air technologies and their deployment;
- Invitations or notices of conferences, seminars, workshops, and other public events;
- South Coast AQMD incentive programs;
- Ways to participate in South Coast AQMD’s rules and policy development; and,
- Assistance in resolving air pollution-related problems.

South Coast AQMD staff attended and/or provided information and updates at the following October events and meetings:

### AB2588 Public Notification Meeting

On October 1, staff held an AB2588 public notification meeting for Phillips 66 Los Angeles Refinery located in Wilmington. Staff provided background information on the AB 2588 Toxic Hotspots program and presented information on the facilities’ Health Risk Assessment, potential impact emissions may have on public health, and what is being done to reduce emissions both now and in the future. Meeting attendees participated in a question and answer session and provided public comment.

#### Clean Air Day Webinar

On October 7, staff represented South Coast AQMD at the University of California, Riverside's Bourns College of Engineering Center for Environmental Research & Technology and the Office of Sustainability's Clean Air Day webinar. The webinar provided information on transportation in the Inland Empire, health and air quality impacts, and new technologies.

#### South Pasadena Chamber of Commerce Legislative Committee

Staff attended the Legislative Committee meeting for the South Pasadena Chamber of Commerce on October 14. Staff updated the Committee on South Coast AQMD programs and current funding opportunities including VW Mitigation Trust, Residential EV Charging Rebate, and the Commercial Lawn Equipment Incentive program. Elected officials and members of the public attended the meeting.

#### West Rancho Dominguez Emissions Investigation

A virtual briefing was held on October 14 to update staff of elected officials representing the unincorporated area of West Rancho Dominguez on the on-going emissions investigation related to hexavalent chromium. The briefing was attended by local, state and federal offices representing three elected officials.

#### Orange County Council of Governments (OCCOG)

Staff supported Council Member Carlos Rodriguez during the October 22 OCCOG Board meeting by providing information on South Coast AQMD programs. The report focused on the Commercial Lawn & Garden Equipment program, incentives for Lower Emission School Buses, Check Before You Burn, and the 6th Annual Environmental Justice Conference.

### **ENVIRONMENTAL JUSTICE UPDATE**

The following are key environmental justice-related activities in which staff participated during October. These events and meetings involve communities affected disproportionately from adverse air quality impacts.

#### The Latina Public Service Academy 2020 Training

Staff participated in a career panel hosted by the Latina Public Service Academy on October 10. The training was for high school and college students to learn about careers in public service and leadership opportunities. The panel discussed their educational journey, work responsibilities, and navigating college.

#### A Conversation with Mary Nichols Webinar

Staff participated a webinar on October 14, sponsored by the Center for Environmental Policy in partnership with the American Lung Association and the Center for Environmental Filmmaking. Mary Nichols, CARB Chair of, discussed California's air

quality progress during her 45-year career, remaining challenges, the future of air policy, health equity, environmental justice, states' roles in addressing air pollution, and climate change. Threats to public health such as extreme wildfires and COVID-19 mortality rates in communities with long-term exposure to air pollution were also discussed.

#### Planet and Power Webinar

On October 14, staff participated in a webinar organized by the California State University system. The webinar included a panel discussion focused on climate justice, equal social justice, and their intersections. The discussion was followed by a question and answer session.

#### State Environmental Justice Training Webinar

Staff participated in an October 21, State Environmental Justice Training Webinar - "Incorporating Equity in Disaster Mitigation and Climate Adaption Programs" hosted by the Florida Department of Environmental Protection, Massachusetts Executive Office on Energy and Environmental Affairs and North Carolina Department of Environmental Quality. Topics included the resiliency of disadvantaged communities dealing with the effects of climate change, mitigating recurrent flooding, tree planting, and impacts of heat waves.

#### Riverside County Health Coalition Meeting

On October 21, staff participated in the Riverside County Health Coalition general membership meeting. The meeting featured an update on the Riverside County's Community Health Improvement Plan, a community-wide initiative that aligns public and private resources to improve health in Riverside County. Other updates included a presentation on systemic racism and health inequities in Riverside County.

#### Environmental Justice Advisory Group (EJAG) Meeting

Staff hosted the quarterly EJAG meeting, on October 23. EJAG members heard presentations on AQMP activities, virtual inspections, and the Environmental Justice Community Partnership. The group also discussed proposed EJAG goals and objectives for 2021.

#### Using Citizen Science to Address Air Pollution Webinar

Staff participated in an Environmental Law Institute webinar on "Using Citizen Science to Address Air Pollution" on October 23. Topics of discussion included air monitoring technologies that are available to community scientists, what agencies can do to address issues of quality of data, and government agencies use of new technology to encourage public reporting of potential violations.

### Coachella Valley EJ Enforcement Task Force

Staff participated in the monthly Coachella Valley EJ Enforcement Task Force meeting on October 23. Representatives from the Department of Toxic Substance Control (DTSC), Comite Civico del Valle, Coachella Water Authority, Cabazon Band of Indians, Twenty-nine Palms Tribe, Mosquito Vector, California Environmental Protection Agency, University of California at Davis, and residents of the Coachella Valley attended the meeting. Attendees updated task force members about their environmental concerns such as the Salton Sea. South Coast AQMD announced upcoming November 12 and 19 AB 617 Eastern Coachella Valley Community Steering Committee meetings and the October 28 Environmental Justice Conference.

### **AB 617 UPDATE**

The following are key AB 617-related activities in which staff participated during October. These events, workshops and meetings involve AB 617 communities to support the Community Steering Committees (CSC), Community Air Monitoring Plans (CAMPs) and Community Emissions Reduction Plans (CERPs).

#### AB 617 Eastern Coachella Valley (ECV) CSC

On October 7, approximately 20 people participated in an ECV CSC meeting. Staff discussed informational handouts outlining potential actions and strategies for four of the six air quality priorities identified by the committee: the Salton Sea, pesticides, open burning and illegal dumping, and fugitive road dust. Committee members asked questions about the emissions data for fugitive dust, pesticides, and the Salton Sea. Staff answered questions on the potential monitoring and emission reduction strategies. Committee members suggested actions to collaborate with health care providers and conduct additional monitoring for emissions from the Salton Sea. Committee members expressed hesitation about choosing one air quality priority for an initial Community Emission Reduction Plan (necessary to meet the December statutory deadline) and requested another survey of the committee to rank the four priorities.

#### Southeast Los Angeles (SELA) AB 617 CSC

The SELA CSC meeting was held on October 8 with approximately 85 attending. Staff presented on the CERP and CAMP development process, timeline, and framework. Potential goals and actions for five of the six air quality priorities identified by the committee were discussed, including truck traffic and freeways, rail yards and locomotives, metal processing facilities, rendering facilities and green spaces. Staff also provided an update on the recent bankruptcy agreement between Exide and the U.S. Department of Justice.

#### AB 617 Eastern Coachella Valley (ECV) CSC

On October 14, approximately 55 people participated in an ECV CSC meeting. Staff summarized the comments from the Question and Answer Workshop on October 7 and provided the results of the air quality priority survey. Among the ECV priorities, the

Salton Sea was ranked highly by survey respondents for the ECV CERP. The Committee preference is to include all priorities in the CERP by December 2020.

#### AB 617 Incentive Strategies Meeting

Staff held an AB 617 Incentives Strategies public consultation meeting on October 15 with approximately 83 attendees. One member from each of the six South Coast AQMD AB 617 communities described their community and air pollution concerns. Staff presented an overview of incentive funds allocated to AB 617 communities before the program began (2016 to 2018) and after the state legislature enacted AB 617. Meeting attendees participated in a breakout exercise to identify and prioritize factors for evaluating future projects. Examples of the factors prioritized included technologies (e.g., near-zero and zero-emission technologies), air toxics, business size and proximity to sensitive receptors.

#### AB 617 ECV CSC

Approximately 70 people attended the ECV CSC meeting on October 22 and discussed the December 2020 CERP and CAMP development. The meeting was attended by community members, government representatives, staff from elected officials' offices, businesses, and other stakeholders.

#### Boyle Heights Neighborhood Council – Transportation and Environment Committee

On October 23, staff participated in the Boyle Heights Neighborhood Council Transportation and Environment Committee meeting. Staff presented on the AB 617 East Los Angeles, Boyle Heights, West Commerce CSC, the FIND webtool, and South Coast AQMD compliance activities.

#### **SPEAKERS BUREAU/VISITOR SERVICES**

South Coast AQMD regularly receives requests for staff to speak on air quality-related issues from a wide variety of organizations, such as trade associations, chambers of commerce, community-based groups, schools, hospitals and health-based organizations. South Coast AQMD also hosts visitors from around the world who meet with staff on a wide range of air quality issues.

#### California State Polytechnic University, Pomona

On October 9, staff virtually presented to a California State Polytechnic University, Pomona civil engineering class on air quality, South Coast AQMD, and AQMPs.

#### California State University, San Bernardino

Staff gave a presentation to a Government and Business Relations class at California State University, San Bernardino on October 14. The presentation provided an overview of South Coast AQMD and air quality issues, AB 617, and our small business assistance programs.

### Girl Scout Research Project

On October 30, staff met with a local girl scout to provide information on air quality issues and what each of us can do to help clean the air. The girl scout is researching how to create a healthy, air quality home to create a brochure that she will share with her troop, friends and family. Staff provided resources including the “Right to Breathe” and “Do One Thing” videos and links to South Coast AQMD’s Clean Air Choices programs, how to file a complaint, mobile Apps, and publications.

### **COMMUNICATION CENTER STATISTICS**

The Communication Center handles calls on South Coast AQMD’s main line, the 1-800-CUT-SMOG® line, the Spanish line, and after-hours calls to each of those lines. Total calls received in the month of October were:

Calls to South Coast AQMD’s Main Line and 1-800-CUT-SMOG® Line	2,541
Calls to South Coast AQMD’s Spanish-language Line	23
Clean Air Connections	0
Total Calls	2,564

### **PUBLIC INFORMATION CENTER STATISTICS**

The Public Information Center (PIC) handles phone calls and walk-in requests for general information. Information for the month of October is summarized below:

Calls Received by PIC Staff	0
Calls to Automated System	1,378
Total Calls	1,378

Email Advisories Sent	50,765
-----------------------	--------

### **BUSINESS ASSISTANCE**

South Coast AQMD notifies local businesses of proposed regulations so they can participate in the agency’s rule development process. South Coast AQMD also works with other agencies and governments to identify efficient, cost-effective ways to reduce air pollution and shares that information broadly. Staff provides personalized assistance to small businesses both over the telephone and via virtual on-site consultation, as summarized below for October.

- Provided permit application assistance to 280 companies; and,
- Processed 84 Air Quality Permit Checklists.

Types of businesses assisted:

Architecture Firms	Engineering Firms	Plating Facilities
Auto Body Shops	Furniture Refinishing	Restaurants
Auto Repair Centers	Facilities	Warehouses
Construction Firms	Gas Stations	
Dry Cleaners	Manufacturing Facilities	

## MEDIA RELATIONS

The Media Office handles all South Coast AQMD outreach and communications with television, radio, newspapers and all other publications, and media operations. October reports are listed below:

Major Media Interactions	129
Press Releases	19
News Carousel	3

## Major Media Topics

- **Air Monitoring and Heat Wave:** Voice of OC requested information on air quality monitors in Orange County and how the summer heat wave affected air quality in the region. Written responses were provided.
- **AB 617:** Staff participated in an interview on the AB 617 program with an independent journalist.
- **Smoke and Air Quality Impacts from Wildfires:** Staff participated in an interview with Bloomberg News on the recent wildfire smoke and its impacts on air quality.
- **Air Pollution Impacts and COVID-19:** Los Angeles Times submitted questions regarding air quality as a potential risk factor for COVID-19. A written response was sent.
- **Commercial Lawn and Garden:** Palisadian-Post submitted a web inquiry regarding commercial lawn and garden equipment. A written response was provided.
- **EVs and Clean Technology:** Staff is scheduled to participate in an interview on the Jehu Garcia podcast on November 13 to talk about the EV industry.
- **Weekend Air Quality:** Brains on Science Podcast inquired whether lower temperatures over the weekend of 10/10-10/12 would improve air quality. A written response was sent.
- **Exide Hearing:** The Los Angeles Times requested a response on the federal bankruptcy court's decision allowing Exide to abandon its facility in Vernon. A written response was provided.
- **Request for Speaker:** A California State University, Northridge professor requested a speaker from the Eastern Coachella Valley Community Steering

Committee. The AB 617 team has reached out to connect the professor with a speaker.

- **All American Asphalt:** The Daily Pilot requested a statement in response to critical comments by the City of Irvine. The reporter was provided with a written statement.
- **Planning for Air Quality:** A social media influencer inquired about planning her day with information on air quality. A written response was sent.
- **Air Quality Op-Ed:** La Opinion ran an op-ed on air quality in 2020 in Spanish on October 18.
- **Reporting Error:** KCBS/KCAL was informed their recent use of the term “advisory” was incorrect, when no official advisory had been issued. The KCBS/KCAL assignment desk confirmed language would be adjusted accordingly for future forecasts.
- **Los Angeles Air Quality:** Brains on Science Podcast inquired as to why air quality in Los Angeles had remained poor following recent wildfires, while San Francisco and Portland saw improvements. A written response was provided.
- **Warehouse ISR Working Group:** LA Progressive was referred to public records for a request on data from the October 9 warehouse indirect source rule working group presentation.
- **Ozone:** Staff participated in an interview with Los Angeles Times regarding bad air quality days and what has been driving ozone increases in 2020.
- **Health Effects of Wildfires:** Proto Magazine requested an interview on health effects data from the 2020 wildfires. The reporter was referred to the appropriate agency and sent links to peer-reviewed studies on health effects.
- **Special Governing Board Meeting:** Los Angeles Times inquired why a special Governing Board meeting was requested for October 27. A written response was sent.
- **AQI Levels:** KESQ inquired why AQI levels had reached 500+ in the Coachella Valley. A written response was provided informing the reporter about the windblown dust and ash conditions.
- **Windblown Ash:** ABC7 inquired why ash was visible in the Arcadia area. A written response was sent on the windblown dust and ash conditions.
- **Current Air Quality:** Spectrum News 1 reached out requesting a KML file for current air quality. The requested file was sent.
- **Air Quality Forecast:** Kaiser Permanente SoCal Communications asked where they could find the next day’s air quality forecast. The reporter was directed to the website and app.
- **Windblown Dust Advisory:** Los Angeles Times inquired if dust and ash advisories were a new type of advisory. Staff confirmed that dust and ash advisories had been issued before. KPCC inquired whether the dust and ash

advisory would continue. The latest advisory was provided at the time of request. Inglewood News Today inquired how to interpret advisory information. A verbal explanation was provided.

- **Emailing Lists:** A reporter from Courthouse News Service asked to be added to South Coast AQMD's emailing lists for advisories and press releases. The reporter was added to the list.
- **Wind Conditions:** The Associated Press reached out with questions regarding meteorological conditions and how wind shifts were impacting smoke transport. A written response was sent.
- **Flaring Events:** Random Lengths News reached out with questions regarding notices for planned and unplanned flare events and how to put them in context for readers. Written responses were provided.
- **Smoke Advisories for Blue Ridge and Silverado Fires:** Fifty-two pitches were sent to news outlets due to smoke advisories for the Blue Ridge and Silverado Fires.
- **Windblown Dust and Ash Advisories:** Pitches were sent to 14 news outlets containing the windblown dust and ash advisories.
- **Governing Board Decision on South L.A.:** Pitches were sent to 15 news outlets regarding the Board's Year 3 AB 617 recommendation of South Los Angeles.
- **Check Before You Burn Press Release:** Pitches were sent to 15 news outlets with the October 30 press release announcing the start of Check Before You Burn season.

#### **News Releases:**

- **South Coast AQMD Governing Board Selects South Los Angeles for AB 617 Program to Accelerate Air Pollution Reduction in Community - October 2, 2020:** Informed residents of the Board's selection of South Los Angeles for AB 617 community projects.
- **Volvo Trucks Awarded \$21.7M from U.S. EPA and South Coast AQMD to Deploy 70 Class 8 VNR Electric Zero-Emission Trucks – October 19, 2020:** Announced funding to Volvo Trucks for the deployment of electric zero-emission trucks.
- **South Coast AQMD Issues Windblown Dust Advisory for Portions of Orange, Riverside and San Bernardino Counties (English and Spanish) - October 25, 2020:** Informed residents about dust and ash conditions.
- **ROUSH CleanTech Deploys Class 6 Battery Electric Vehicle - October 26, 2020:** Shared the ROUSH CleanTech press release regarding the deployment of new battery electric vehicles.

- **South Coast AQMD Continues Windblown Dust and Ash Advisory (English and Spanish) - October 26, 2020:** Informed residents about dust and ash conditions.
- **South Coast AQMD Issues Smoke Advisory Due to Silverado Fire (English and Spanish) - October 26, 2020:** Informed residents about smoke conditions due to wildfires.
- **South Coast AQMD Issues Smoke Advisory Due to Blue Ridge Fire (English and Spanish) - October 26, 2020:** Informed residents about smoke conditions due to wildfires.
- **South Coast AQMD Continues Smoke Advisory Due to Silverado and Blue Ridge Fires (English and Spanish) - October 27-29, 2020:** Informed residents about smoke conditions due to wildfires.
- **Check Before You Burn to Improve Air Quality in the Cooler Months Ahead (English and Spanish) - October 30, 2020:** Informed residents about the beginning of Check Before You Burn season.

#### **News Carousel:**

- **Keep up with the latest news from South Coast AQMD – October 7, 2020:** A link to the October/November/December digital edition of the Advisor.
- **Funding Available for Lower Emission School Bus Program – October 14, 2020:** Program highlighted, and links provided for information.
- **Register for the Environmental Justice Conference – October 22, 2020:** A one-click link to the registration page for the virtual Environmental Justice Conference.

#### **Social Media Notable posts:**

- **AQ Forecast (10/1):** 12,920 Twitter Impressions
- **AQ Forecast (10/11):** 23,045 Twitter Impressions
- **AQ Forecast (10/12):** 21,617 Twitter Impressions
- **Chelsea Peretti interaction (10/14):** 17,055 Media Interactions (video views), 8,016 Twitter Impressions
- **AQ Forecast (10/18):** 21,411 Twitter Impressions
- **Windblown Dust Advisory (10/25):** 38,428 Twitter Impressions
- **AQ Advisory Update (10/27):** 49,375 Twitter Impressions
- **AQ Forecast (10/28):** 57,444 Twitter Impressions

## **OUTREACH TO COMMUNITY GROUPS AND FEDERAL, STATE, AND LOCAL GOVERNMENTS**

In light of COVID-19, outreach was conducted virtually in October, utilizing web based and other technologies to communicate with elected officials or staff from the following cities:

Anaheim	Hawthorne	Pasadena
Arcadia	Hermosa Beach	Paramount
Azusa	Huntington Beach	Placentia
Baldwin Park	Indian Wells	Pomona
Banning	Indio	Rancho Mirage
Beaumont	Industry	Rancho Palos Verdes
Beverly Hills	Inglewood	Redondo Beach
Big Bear Lake	Irvine	Riverside
Bradbury	Irwindale	Rolling Hills
Brea	Jurupa Valley	Rolling Hills Estates
Buena Park	La Cañada Flintridge	Rosemead
Burbank	La Habra	San Bernardino
Carson	La Puente	San Dimas
Cathedral City	La Quinta	San Fernando
Claremont	La Verne	San Gabriel
Coachella	Laguna Niguel	San Jacinto
Colton	Lawndale	San Marino
Corona	Lomita	Santa Clarita
Covina	Long Beach	Santa Monica
Culver City	Los Alamitos	Sierra Madre
Desert Hot Springs	Los Angeles	South El Monte
Diamond Bar	Malibu	South Pasadena
Duarte	Manhattan Beach	Temple City
El Monte	Mission Viejo	Torrance
El Segundo	Monrovia	Tustin
Fountain Valley	Monterey Park	West Covina
Fullerton	Murrieta	West Hollywood
Garden Grove	Norco	Wildomar
Gardena	Palm Desert	Yorba Linda
Glendale	Palm Springs	
Glendora	Palos Verdes Estates	

Communication conducted in October with elected officials and/or staff from the following state and federal offices:

- U.S. Senator Dianne Feinstein
- U.S. Senator Kamala Harris
- U.S. Representative Nanette Barragán
- U.S. Representative Alan Lowenthal
- U.S. Representative Grace Napolitano
- Senator Bob Archuleta
- Senator Steven Bradford
- Senator Steve Glazer
- Senator Susan Rubio
- Assembly Majority Leader Ian Calderon
- Assembly Member Sabrina Cervantes
- Assembly Member Laura Friedman

Staff represented South Coast AQMD in October and/or provided updates or a presentation to the following governmental agencies and business organizations:

Alhambra Chamber of Commerce  
American Lung Association  
Association of California Cities, Orange County  
Bay Area AQMD  
Building Industry Association of Southern California, Orange County  
California Contract Cities Association  
California Department of Transportation  
California Geologic Energy Management Division  
Calimesa Chamber of Commerce  
CARB  
Carson Chamber of Commerce  
Clean Cities Coachella Valley  
Coachella Valley Chamber of Commerce  
Coachella Valley Council of Governments  
Drive Electric  
DTSC  
Foothill Transit  
Fountain Valley Chamber of Commerce  
Gateway Cities Council of Governments  
Inland Valley Development Agency  
LA Metro  
League of California Cities, Los Angeles  
Long Beach Chamber of Commerce  
Long Beach Harbor Commission  
Los Angeles City Attorney, Office of Environmental Justice

Los Angeles City Fire Department  
Los Angeles County Board of Supervisors  
Los Angeles County Department of Health  
Los Angeles County Fire Department, Health Hazardous Materials Division  
Los Angeles Department of Water and Power  
Metrolink  
Mountain Transit  
Move LA  
Newport Beach Chamber of Commerce  
North Orange County Chamber of Commerce  
Omnitrans  
Ontario International Airport  
Orange County Board of Supervisors  
Orange County Business Council  
Orange County Council of Governments  
Orange County Human Relations Commission  
Orange County Transportation Authority  
Palos Verdes Peninsula Chamber of Commerce  
Pasadena Chamber of Commerce  
Riverside County Board of Supervisors  
Riverside Transit Agency  
San Bernardino County Board of Supervisors  
San Bernardino County Transportation Authority  
San Fernando Valley Council of Governments  
San Gabriel Valley City Managers' Association  
San Gabriel Valley Council of Governments  
San Gabriel Valley Public Affairs Network  
South Bay Cities Council of Governments  
South Pasadena Chamber of Commerce  
Southern California Association of Governments  
Southern California Edison  
Sunline Transit  
Sustain Southern California  
Valley Economic Alliance  
West Los Angeles Veterans Hospital  
Western Riverside Council of Governments  
Westside Cities Council of Governments

Staff represented South Coast AQMD in October and/or provided updates or a presentation to the following community and educational groups and organizations:

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 13

REPORT: Hearing Board Report

SYNOPSIS: This reports the actions taken by the Hearing Board during the period of October 1 through October 31, 2020.

COMMITTEE: No Committee Review

RECOMMENDED ACTION:  
Receive and file.

Julie Prussack  
Chairman of Hearing Board

ft

---

Two summaries are attached: **October 2020 Hearing Board Cases** and **Rules From Which Variances and Orders for Abatement Were Requested in 2020**. An index of South Coast AQMD Rules is also attached.

There was one (1) appeal filed during the period of October 1 to October 31, 2020.

## Report of October 2020 Hearing Board Cases

Case Name and Case No. (South Coast AQMD Attorney)	Rules	Reason for Petition/Hearing	South Coast AQMD Position/Hearing Board Action	Type and Length of Variance or Order	Excess Emissions
1. Altair Paramount, LLC Case No. 2914-127 (M. Reichert)	203(b) 2004(f)(1) 3002(c)(1)	SCR unexpectedly failed.	Not Opposed/Granted	EV granted commencing 10/6/20 and continuing through 10/24/20.	NOx: 7.16 lbs/day NH <sub>3</sub> : TBD by 10/30/20
2. OC Waste & Recycling, Frank R. Bowerman Landfill Case No. 5710-4 (B. Tomasovic & E. Chavez)	203(b) 404(a) 409 3002(c)(1)	Flares I-3 and I-4 unexpectedly failed source test for PM.	Not Opposed/Granted	IV granted commencing 10/7/20 and continuing for 90 days or until the SV hearing scheduled for 11/18/20, whichever comes first.	PM: 44.47 lbs/day
3. Orange County Waste & Recycling Frank R. Bowerman Landfill Case No. 5710-5 (S. Hanizavareh)	203(b) 1150.1(d)(14) 1150.1(d)(16) 1150.1(e)(1) 1150.1(e)(2) 1150.1(e)(3) 1150.1(e)(4) 1150.1(e)(7) 1150.1(f)(1)(A) 1150.1(f)(1)(B) 1150.1(f)(1)(C) 1150.1(f)(1)(E) 1150.1(f)(1)(G) 1150.1(f)(1)(L) 3002(c)(1)	Unexpected wildfire caused extensive damage to portions of the landfill, including loss of electrical power and the gas collection and control system, rendering it inoperable and in need of major repairs.	Not Opposed/Denied	Ex Parte EV denied.	N/A
4. Phillips 66 Company Case No. 4900-111 (No Appearance; Consent Calendar)	203(b) 2004(f)(1) 3002(c)(1)	During major maintenance turnaround, petitioner plans to route the gases from the Alkylation Unit to portable vapor combustion unit in lieu of flare gas recovery system.	Not Opposed/Granted	SV granted commencing on or about 3/2/21 following the notice of start-up of the VCU given to the Hearing Board pursuant to Condition No. 1 and shall continue for 18 days after start-up of the VCU, with an estimated end date of 3/20/21.	None

Case Name and Case No. (South Coast AQMD Attorney)	Rules	Reason for Petition/Hearing	South Coast AQMD Position/Hearing Board Action	Type and Length of Variance or Order	Excess Emissions
5. South Coast AQMD vs. Riverside County Department of Water Resources, Lamb Canyon Landfill Case No. 6176-1 (No Appearance; Consent Calendar)	3002(c)(1)	Respondent is operating Flare in violation of its permitted emission limits.	Stipulated/Issued	O/A issued commencing 10/8/20; the Hearing Board shall retain jurisdiction over this matter until 5/31/21.	N/A

### Acronyms

EV: Emergency Variance  
 IV: Interim Variance  
 N/A: Not Applicable  
 NH<sub>3</sub>: Ammonia  
 NOx: Oxides of Nitrogen  
 O/A: Order for Abatement  
 PM: Particulate Matter  
 SCR: Selective Catalytic Reduction  
 SV: Short Variance  
 TBD: To Be Determined  
 VCU: Vapor Combustion Unit

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 14

REPORT: Civil Filings and Civil Penalties Report

SYNOPSIS: This reports the monthly penalties from October 1, 2020 through October 31, 2020, and legal actions filed by the General Counsel's Office from October 1 through October 31, 2020. An Index of South Coast AQMD Rules is attached with the penalty report.

COMMITTEE: Stationary Source, November 20, 2020, Reviewed

RECOMMENDED ACTION:  
Receive and file this report.

Bayron T. Gilchrist  
General Counsel

BTG:ew

---

There are no Civil Filings for October 2020

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 15

REPORT: Lead Agency Projects and Environmental Documents Received

SYNOPSIS: This report provides a listing of CEQA documents received by the South Coast AQMD between October 1, 2020 and October 31, 2020, and those projects for which the South Coast AQMD is acting as lead agency pursuant to CEQA.

COMMITTEE: No Committee Review

RECOMMENDED ACTION:  
Receive and file.

Wayne Nastri  
Executive Officer

PF:SN:JW:LS:MC

---

**CEQA Document Receipt and Review Logs (Attachments A and B)** – Each month, the South Coast AQMD receives numerous CEQA documents from other public agencies on projects that could adversely affect air quality. A listing of all documents received during the reporting period of October 1, 2020 to October 31, 2020 is included in Attachment A. A list of active projects for which South Coast AQMD staff is continuing to evaluate or prepare comments for the September reporting period is included as Attachment B. A total of 70 CEQA documents were received during this reporting period and 26 comment letters were sent.

The Intergovernmental Review function, which consists of reviewing and commenting on the adequacy of the air quality analysis in CEQA documents prepared by other lead agencies, is consistent with the Board's 1997 Environmental Justice Guiding Principles and Environmental Justice Initiative #4. As required by the Environmental Justice Program Enhancements for FY 2002-03, approved by the Board in October 2002, each attachment notes proposed projects where the South Coast AQMD has been contacted regarding potential air quality-related environmental justice concerns. The South Coast AQMD has established an internal central contact to receive information on projects

with potential air quality-related environmental justice concerns. The public may contact the South Coast AQMD about projects of concern by the following means: in writing via fax, email, or standard letters; through telephone communication; and as part of oral comments at South Coast AQMD meetings or other meetings where South Coast AQMD staff is present. The attachments also identify, for each project, the dates of the public comment period and the public hearing date, if applicable. Interested parties should rely on the lead agencies themselves for definitive information regarding public comment periods and hearings as these dates are occasionally modified by the lead agency.

At the January 6, 2006 Board meeting, the Board approved the Workplan for the Chairman's Clean Port Initiatives. One action item of the Chairman's Initiatives was to prepare a monthly report describing CEQA documents for projects related to goods movement and to make full use of the process to ensure the air quality impacts of such projects are thoroughly mitigated. In response to describing goods movement, CEQA documents (Attachments A and B) are organized to group projects of interest into the following categories: goods movement projects; schools; landfills and wastewater projects; airports; general land use projects, etc. In response to the mitigation component, guidance information on mitigation measures was compiled into a series of tables relative to off-road engines; on-road engines; harbor craft; ocean-going vessels; locomotives; fugitive dust; and greenhouse gases. These mitigation measure tables are on the CEQA webpages portion of the South Coast AQMD's website at: <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/mitigation-measures-and-control-efficiencies>. Staff will continue compiling tables of mitigation measures for other emission sources.

Staff focuses on reviewing and preparing comments for projects: where the South Coast AQMD is a responsible agency; that may have significant adverse regional air quality impacts (e.g. special event centers, landfills, goods movement); that may have localized or toxic air quality impacts (e.g. warehouse and distribution centers); where environmental justice concerns have been raised; and which a lead or responsible agency has specifically requested South Coast AQMD review. If staff provided written comments to the lead agency as noted in the column "Comment Status," there is a link to the "South Coast AQMD Letter" under the Project Description. In addition, if staff testified at a hearing for the proposed project, a notation is provided under the "Comment Status." If there is no notation, then staff did not provide testimony at a hearing for the proposed project.

During the period of October 1, 2020 to October 31, 2020, the South Coast AQMD received 70 CEQA documents. Of the 86 documents listed in Attachments A and B:

- 26 comment letters were sent;
- 31 documents were reviewed, but no comments were made;
- 22 documents are currently under review;
- 0 documents did not require comments (e.g., public notices);
- 0 documents were not reviewed; and
- 7 documents were screened without additional review.

(The above statistics are from October 1, 2020 to October 31, 2020 and may not include the most recent “Comment Status” updates in Attachments A and B.)

Copies of all comment letters sent to lead agencies can be found on the South Coast AQMD’s CEQA webpage at the following internet address:

<http://www.aqmd.gov/home/regulations/ceqa/commenting-agency>.

**South Coast AQMD Lead Agency Projects (Attachment C)** – Pursuant to CEQA, the South Coast AQMD periodically acts as lead agency for stationary source permit projects. Under CEQA, the lead agency is responsible for determining the type of CEQA document to be prepared if the proposal for action is considered to be a “project” as defined by CEQA. For example, an Environmental Impact Report (EIR) is prepared when the South Coast AQMD, as lead agency, finds substantial evidence that the project may have significant adverse effects on the environment. Similarly, a Negative Declaration (ND) or Mitigated Negative Declaration (MND) may be prepared if the South Coast AQMD determines that the project will not generate significant adverse environmental impacts, or the impacts can be mitigated to less than significance. The ND and MND are written statements describing the reasons why projects will not have a significant adverse effect on the environment and, therefore, do not require the preparation of an EIR.

Attachment C to this report summarizes the active projects for which the South Coast AQMD is lead agency and is currently preparing or has prepared environmental documentation. As noted in Attachment C, the South Coast AQMD continued working on the CEQA documents for two active projects during October.

PROJECT DESCRIPTION	PROPONENT	TYPE OF DOCUMENT	STATUS	CONSULTANT
Quemetco is proposing to modify existing South Coast AQMD permits to allow the facility to recycle more batteries and to eliminate the existing daily idle time of the furnaces. The proposed project will increase the rotary feed drying furnace feed rate limit from 600 to 750 tons per day and increase the amount of total coke material allowed to be processed. In addition, the project will allow the use of petroleum coke in lieu of or in addition to calcined coke, and remove one existing emergency diesel-fueled internal combustion engine (ICE) and install two new emergency natural gas-fueled ICEs.	Quemetco	Environmental Impact Report (EIR)	A Notice of Preparation/Initial Study (NOP/IS) was released for a 56-day public review and comment period from August 31, 2018 to October 25, 2018, and 154 comment letters were received. Two CEQA scoping meetings were held on September 13, 2018 and October 11, 2018 in the community. South Coast AQMD staff is reviewing the preliminary Draft EIR and has provided comments to the consultant.	Trinity Consultants
Sunshine Canyon Landfill is proposing to modify its South Coast AQMD permits for its active landfill gas collection and control system to accommodate the increased collection of landfill gas. The proposed project will: 1) install two new low emissions flares with two additional 300-hp electric blowers; and 2) increase the landfill gas flow limit of the existing flares.	Sunshine Canyon Landfill	Subsequent Environmental Impact Report (SEIR)	The consultant provided a preliminary air quality analysis and health risk assessment (HRA) which is undergoing review by South Coast AQMD staff.	SCS Engineers

## **2021 MASTER CALENDAR**

The 2021 Master Calendar provides a list of proposed or proposed amended rules for each month, with a brief description, and a notation in the third column indicating if the rulemaking is for the 2016 AQMP, Toxics, AB 617 BARCT, or Other. Rulemaking efforts that are noted for implementation of the 2016 AQMP, Toxics, and AB617 BARCT are either statutorily required and/or are needed to address a public health concern. Projected emission reductions will be determined during rulemaking.

Staff continues to move forward with rulemaking, recognizing stakeholders' resource limitations due to COVID-19. To maintain social distancing while integrating public participation in the rulemaking process, staff is connecting with stakeholders using tele- and videoconferencing. Also, staff has increased the review time for working group materials to allow stakeholders additional time to prepare for meetings. Lastly, working group meetings have been restructured to be shorter in duration to better accommodate the tele- and video-conferencing format.

The following symbols next to the rule number indicate if the rulemaking will be a potentially significant hearing, will reduce criteria pollutants, or is part of the RECLAIM transition. Symbols have been added to indicate the following:

- \* *This rulemaking is a potentially significant hearing.*
- + *This rulemaking will reduce criteria air contaminants and assist toward attainment of ambient air quality standards.*
- # *This rulemaking is part of the transition of RECLAIM to a command-and-control regulatory structure.*

## 2021 MASTER CALENDAR

Month	Title and Description	Type of Rulemaking
<b>January</b>		
1407.1*	<b>Control of Toxic Air Contaminant Emissions from Chromium Alloy Melting Operations</b> Proposed Rule 1407.1 will establish requirements to reduce point source and fugitive toxic air contaminant emissions from chromium alloy metal melting operations. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics/ AB 617 CERP
<b>February</b>		
1150.3*+	<b>NO<sub>x</sub> Emission Reductions from Combustion Equipment at Landfills</b> Proposed Rule 1150.3 will establish NO <sub>x</sub> emission limits for combustion equipment burning biofuels to reflect Best Available Retrofit Control Technology and include monitoring, reporting, and recordkeeping requirements at landfills. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP/ AB 617 BARCT
<b>March</b>		
218*# 218.1 218.2 218.3	<b>Continuous Emission Monitoring</b> <b>Continuous Emission Monitoring Performance Specifications</b> <b>Enhanced Requirements for Continuous Emission Monitoring System</b> <b>Enhanced Requirements for Continuous Emission Monitoring System Performance Specifications</b> Proposed Amended Rules 218 and 218.1 will include existing provisions for continuous emissions monitoring systems for non-RECLAIM facilities with minor revisions. The revised provisions for Continuous Emissions Monitoring Systems (CEMS) will be included in Proposed Rules 218.2 and 218.3 for non-RECLAIM and former RECLAIM facilities. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

# Part of the transition of RECLAIM to a command-and-control regulatory structure

## 2021 MASTER CALENDAR *(Continued)*

Month	Title and Description	Type of Rulemaking
<b>March</b> (Continued)		
1109 <sup>*+ #</sup>	<b>Emissions of Oxides of Nitrogen from Boilers and Process Heaters in Petroleum Refineries</b>	AQMP/ AB 617
1109.1 <sup>*+ #</sup>	<b>Reduction of Emissions of Oxides of Nitrogen from Refinery Equipment</b> Proposed Rule 1109.1 will establish NOx emission limits to reflect Best Available Retrofit Control Technology for NOx emitting equipment at petroleum refineries and related operations, and include monitoring, reporting, and recordkeeping requirements. Rule 1109 is proposed to be rescinded. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	BARCT/ AB 617 CERP
2305 <sup>*+</sup>	<b>Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program</b> Proposed Rule 2305 will both reduce emissions and facilitate local and regional emission reductions associated with warehouses and the mobile sources attracted to warehouses. <i>Ian MacMillan 909.396.3244; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP/ AB 617 CERP
<b>April</b>		
1426 <sup>*</sup>	<b>Reduction of Toxic Air Contaminants from Metal Finishing Operations</b> Proposed amendments to Rule 1426 will establish requirements to reduce nickel, cadmium, hexavalent chromium, and other metal air toxics from plating and related operations. Proposed Amended Rule 1426 will focus on measures to minimize fugitive metal toxic air contaminant emissions. <i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics/ AB 617 CERP
<b>May</b>		
1466	<b>Control of Particulate Emissions from Soils with Toxic Air Contaminants</b> Proposed amendments to Rule 1466 will clarify existing provisions and update requirements for pre-approved monitors. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

# Part of the transition of RECLAIM to a command-and-control regulatory structure

## 2021 MASTER CALENDAR *(Continued)*

Month	Title and Description	Type of Rulemaking
May (Continued)		
1469.1*	<b>Spraying Operations Using Coatings Containing Chromium</b> Proposed Amended Rule 1469.1 will establish additional requirements to address hexavalent chromium emissions from spraying operations using chromate primers and coatings. <i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics/ AB 617 CERP
Reg. III	<b>Fees</b> This is a placeholder as staff may propose minor amendments to Regulation III as part of the annual budget process. <i>Ian MacMillan 909.396.3244; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
June		
445*	<b>Wood Burning Devices</b> Proposed Amended Rule 445 will address additional U.S. EPA requirements for Best Available Control Measures and potentially address ozone contingency measure requirements for the Coachella Valley. <i>Tracy Goss 909.396.3106; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP
1147*+ <sup>#</sup>	<b>NOx Reductions from Miscellaneous Sources</b> Proposed Amended Rule 1147 will revise NOx emission limits to reflect Best Available Retrofit Control Technology for miscellaneous combustion sources and that will apply to RECLAIM and non-RECLAIM facilities.	AQMP/ AB 617 BARCT
1100 <sup>#</sup>	<b>Implementation Schedule for NOx Facilities</b> Proposed Amended Rule 1100 will establish the implementation schedule for Rule 1147 equipment at NOx RECLAIM and former NOx RECLAIM facilities. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	
2306	<b>Emission Reductions from Indirect Sources at Railyards</b> Proposed Rule 2306 will reduce emissions from indirect sources associated with railyards. <i>Ian MacMillan 909.396.3244; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP/ AB 617 CERP

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

## 2021 MASTER CALENDAR *(Continued)*

Month	Title and Description	Type of Rulemaking
August		
1110.2*+ <sup>#</sup>	<p><b>Emissions from Gaseous- and Liquid-Fueled Engines</b>  Proposed amendments will address use of emergency standby engines at essential public services for Public Safety Power Shutoff programs. Proposed amendments may also be needed to incorporate possible comments by U.S. EPA for approval into the SIP and address monitoring provisions for new engines.  <i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	AQMP/ AB 617 BARCT
1135	<p><b>Emissions of Oxides of Nitrogen from Electricity Generating Facilities</b>  Proposed Amended Rule 1135 will revise startup, shutdown, and malfunction requirements and monitoring, reporting, and recordkeeping provisions to reflect amendments to rules regulating Continuous Emissions Monitoring Systems. Proposed amendments may also be needed to incorporate possible comments by U.S. EPA for approval into the SIP.  <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	AQMP/ AB 617 BARCT
1147.2*+ <sup>#</sup>	<p><b>NO<sub>x</sub> Reductions from Metal Melting and Heating Furnaces</b>  Proposed Rule 1147.2 will establish NO<sub>x</sub> emission limits to reflect Best Available Retrofit Control Technology for metal melting and heating furnaces and will apply to RECLAIM and non-RECLAIM facilities.</p>	AQMP/ AB 617 BARCT
1147*+ <sup>#</sup>	<p><b>NO<sub>x</sub> Reductions from Miscellaneous Sources</b>  Proposed Amended Rule 1147 will remove equipment that will be regulated under Proposed Rule 1147.2.  <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	
1470	<p><b>Requirements for Stationary Diesel-Fueled Internal Combustion and Other Compression Ignition Engines</b>  Proposed Amended Rule 1470 will address provisions for essential public services for testing engines and additional provisions, if needed, to ensure proposed amendments meet state requirements.  <i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	Toxics

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

## 2021 MASTER CALENDAR (Continued)

Month	Title and Description	Type of Rulemaking
September		
219* 461 461.1	<b>Equipment Not Requiring a Written Permit Pursuant to Regulation II</b> <b>Gasoline Transfer and Dispensing</b> <b>Mobile Refueling Gasoline Transfer and Dispensing</b> Proposed Amended Rule 219 will modify permitting requirements for mobile fueling operations. Proposed Amended 461 will remove requirements for mobile refueling operations and Proposed Rule 461.1 will establish requirements for mobile refueling operations. <i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1134	<b>Emissions of Oxides of Nitrogen from Stationary Gas Turbines</b> Proposed Amended Rule 1134 will revise startup, shutdown, and malfunction requirements and monitoring, reporting, and recordkeeping provisions to reflect amendments to rules regulating Continuous Emissions Monitoring Systems. Proposed amendments may also be needed to incorporate possible comments by U.S. EPA for approval into the SIP. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP/ AB 617 BARCT
1157.1	<b>PM 10 Emission Reductions from Concrete and Asphalt Crushing and Grinding Operations</b> Proposed Rule 1157.1 will establish requirements to minimize PM emissions from recycled concrete and asphalt crushing and grinding operations, including storage and transfer of materials. <i>Tracy Goss 909.396.3106; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
October		
1115	<b>Motor Vehicle Assembly Line Coating Operations</b> Proposed amendments will address U.S. EPA RACT requirements. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1147.1*+  1147*+ <sup>#</sup>	<b>NOx Reductions for Equipment at Aggregate Facilities</b> Proposed Rule 1147.1 will establish NOx emission limits to reflect Best Available Retrofit Control Technology for NOx equipment at aggregate facilities and will apply to RECLAIM and non-RECLAIM facilities.  <b>NOx Reductions from Miscellaneous Sources</b> Proposed Amended Rule 1147 will remove equipment that will be regulated under Proposed Rule 1147.1. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176 and Socio: Ian MacMillan 909.396.3244</i>	AQMP/ AB 617 BARCT

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

## 2021 MASTER CALENDAR (Continued)

Month	Title and Description	Type of Rulemaking
<b>October</b> (Continued)		
1445*	<b>Control of Toxic Emissions from Laser Arc Cutting</b> Proposed Rule 1445 will establish requirements to reduce metal toxic air contaminant particulate emissions from laser arc cutting. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics
Regulation XX*#	<b>RECLAIM</b> Proposed Amended Regulation XX will address the transition of RECLAIM facilities to a command and control regulatory structure. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP
<b>November</b>		
1118*	<b>Control of Emissions from Refinery Flares</b> Proposed Amended Rule 1118 will incorporate revisions to further reduce flaring at refineries, provisions for clean service flares, and facility thresholds. The AB 617 Community Emission Reduction Plan has an emission reduction target to reduce flaring by 50 percent, if feasible. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP/ AB 617 CERP
1159.1	<b>Control of NOx Emissions from Nitric Acid Units</b> Proposed Rule 1159.1 will establish requirements to reduce NOx emissions from nitric acid units that will apply to RECLAIM and non-RECLAIM facilities. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP/ AB 617 BARCT
1173	<b>Control of Volatile Organic Compound Leaks and Releases from Components at Petroleum Facilities and Chemical Plants</b> Proposed Amended Rule 1173 will further reduce emissions from petroleum and chemical plants by requiring early leak detection approaches consistent with AB 617 Community Emission Reduction Plan. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other/ AB 617 CERP
Regulation XIII*#	<b>New Source Review</b> Proposed Amended Regulation XIII will revise New Source Review provisions to address facilities that are transitioning from RECLAIM to a command-and-control regulatory structure. Staff may be proposing a new rule within Regulation XIII to address offsets for facilities that transition out of RECLAIM. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

# Part of the transition of RECLAIM to a command-and-control regulatory structure

## 2021 MASTER CALENDAR (Continued)

Month	Title and Description	Type of Rulemaking
December		
1146.2 <sup>#</sup>	<p><b>Emissions of Oxides of Nitrogen from Large Water Heaters and Small Boilers and Process Heaters</b></p> <p>Proposed Amended Rule 1146.2 will update the NO<sub>x</sub> emission limit to reflect Best Available Retrofit Control Technology.</p> <p><i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	AQMP/ AB 617 BARCT
1178	<p><b>Further Reductions of VOC Emissions from Storage Tanks at Petroleum Facilities</b></p> <p>Proposed Amended Rule 1178 will incorporate the use of more advanced early leak detection methods and improve leak detection and repair programs for storage tanks to further reduce VOC emissions. Proposed amendments will implement one of the actions in the AB 617 Community Emission Reduction Plan.</p> <p><i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	AB 617 CERP
1426.1	<p><b>Control of Hexavalent Chromium Emissions from Metal Finishing Operations</b></p> <p>Proposed Rule 1426.1 will reduce hexavalent chromium emissions from chromium tanks used in metal finishing operations that do not have a chromium electroplating or chromic acid anodizing tank.</p> <p><i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	Toxics
1435 <sup>*</sup>	<p><b>Control of Emissions from Metal Heat Treating Processes</b></p> <p>Proposed Rule 1435 will establish requirements to reduce point source and fugitive toxic air contaminants including hexavalent chromium emissions from heat treating processes. Proposed Rule 1435 will also include monitoring, reporting, and recordkeeping requirements.</p> <p><i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	Toxics/ AB 617 CERP

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

## 2021 To-Be-Determined

2021	Title and Description	Type of Rulemaking
102	<b>Definition of Terms</b> Proposed amendments may be needed to update and add definitions. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
103	<b>Definition of Geographical Areas</b> Proposed amendments are needed to update geographic areas to be consistent with state and federal references to those geographic areas. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
209	<b>Transfer and Voiding of Permits</b> Proposed amendments may be needed to clarify requirements for change of ownership and permits and the assessment of associated fees. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
219	<b>Equipment Not Requiring a Written Permit Pursuant to Regulation II</b> Proposed Amendments may be needed to address issues raised by U.S. EPA for approval in the State Implementation Plan. Proposed Amendments may also be needed to identify sources that are currently exempt from permitting. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
222	<b>Filing Requirements for Specific Emission Sources Not Requiring a Written Permit Pursuant to Regulation II</b> Proposed Amendments may be needed to require certain equipment that is currently not permitted to register the equipment to gather information and emissions data. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
223	<b>Emission Reduction Permits for Large Confined Animal Facilities</b> Proposed Amended Rule 223 will seek additional ammonia emission reductions from large confined animal facilities by lowering the applicability threshold. Proposed amendments will implement BCM-04 in the 2016 AQMP. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP
317	<b>Clean Air Act Non-Attainment Fees</b> Proposed amendments may be needed to modify CAA Section 185 fees for non-attainment. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
407 <sup>#</sup>	<b>Liquid and Gaseous Air Contaminants</b> Proposed Amended Rule 407 will update SOx emission limits to reflect Best Available Retrofit Control Technology, if needed, remove exemptions for RECLAIM facilities, and update monitoring, reporting, and recordkeeping requirements. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

### 2021 To-Be-Determined (*Continued*)

2021	Title and Description	Type of Rulemaking
410	<b>Odors from Transfer Stations and Material Recovery Facilities</b> Proposed Amended Rule 410 will clarify existing provisions. Additional provisions may be needed to address activities associated with diversion of food waste to transfer stations or material recovery facilities. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
425	<b>Odors from Cannabis Processing</b> Proposed Rule 425 will establish requirements for control of odors from cannabis processing. <i>Tracy Goss 909.396.3106; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
429	<b>Start-Up and Shutdown Exemption Provisions for Oxides of Nitrogen</b> Proposed amendments to Rule 429 may be needed to incorporate recent policy decisions by U.S. EPA regarding start-up and shutdown provisions. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
431.1 <sup>#</sup>	<b>Sulfur Content of Gaseous Fuels</b> Proposed Amended Rule 431.1 will assess exemptions, including RECLAIM, and update other provisions, if needed. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT/ AB 617 CERP
431.2 <sup>#</sup>	<b>Sulfur Content of Liquid Fuels</b> Proposed Amended Rule 431.2 will assess exemptions, including RECLAIM, and update other provisions, if needed. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT/ AB 617 CERP
431.3 <sup>#</sup>	<b>Sulfur Content of Fossil Fuels</b> Proposed Amended Rule 431.3 will assess exemptions, including RECLAIM, and update other provisions, if needed. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT/ AB 617 CERP

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

### 2021 To-Be-Determined (*Continued*)

2021	Title and Description	Type of Rulemaking
442.1 1107 1124 1136 1145 1171	<b>Usage of Solvent</b> <b>Coating of Metal Parts and Products</b> <b>Aerospace Assembly and Component Manufacturing Operations</b> <b>Wood Products Coatings</b> <b>Plastic, Rubber, Leather, and Glass Coatings</b> <b>Solvent Cleaning Operations</b> Proposed amendments will prohibit the sale, distribution, and application of materials that do not meet the VOC limits specified in Regulation XI rules and possible provisions to prohibit circumvention of VOC limits. <i>Tracy Goss 909.396.3106; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
462	<b>Organic Liquid Loading</b> Proposed Amended Rule 462 will incorporate the use of advanced techniques to detect fugitive emissions and Facility Vapor Leak. Other amendments may be needed to streamline implementation and add clarity. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
463	<b>Organic Liquid Storage</b> Proposed Amended Rule 463 will address the current test method and improve the effectiveness, enforceability, and clarity of the rule. Proposed amendments may also be needed to ensure consistency with Rule 1178. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
468 <sup>#</sup>	<b>Sulfur Recovery Units</b> Proposed Amended Rule 468 will update SO <sub>x</sub> emission limits to reflect Best Available Retrofit Control Technology, if needed, remove exemptions for RECLAIM facilities, and update monitoring, reporting, and recordkeeping requirements. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT
469 <sup>#</sup>	<b>Sulfuric Acid Units</b> Proposed Amended Rule 469 will update SO <sub>x</sub> emission limits to reflect Best Available Retrofit Control Technology, if needed, remove exemptions for RECLAIM facilities, and update monitoring, reporting, and recordkeeping requirements. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

### 2021 To-Be-Determined (*Continued*)

2021	Title and Description	Type of Rulemaking
1101 <sup>#</sup>	<b>Secondary Lead Smelters/Sulfur Oxides</b> Proposed Amended Rule 1101 will update SOx emission limits to reflect Best Available Retrofit Control Technology, if needed, remove exemptions for RECLAIM facilities, and update monitoring, reporting, and recordkeeping requirements. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT
1105 <sup>#</sup>	<b>Fluid Catalytic Cracking Units SOx</b> Proposed Amended Rule 1105 will update SOx emission limits to reflect Best Available Retrofit Control Technology, if needed, remove exemptions for RECLAIM facilities, and update monitoring, reporting, and recordkeeping requirements. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT/ AB 617 CERP
1111	<b>Reduction of NOx Emissions from Natural-Gas-Fired, Fan-Type Central Furnaces</b> Proposed amendments may be needed to address implementation issues. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP
1111.1	<b>Zero-Emission Residential Furnaces</b> Proposed Rule 1111.1 may include provisions to encourage zero emission residential furnaces that goes beyond Rule 1111 for gas-fired furnaces. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP
1113	<b>Architectural Coatings</b> Proposed amendments may be needed to clarify applicability of the rule with respect to distribution. <i>Dave DeBoer 909.396.2329; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1119 <sup>#</sup>	<b>Petroleum Coke Calcining Operations – Oxides of Sulfur</b> Proposed Amended Rule 1119 will update SOx emission limits to reflect Best Available Retrofit Control Technology, if needed, remove exemptions for RECLAIM facilities, and update monitoring, reporting, and recordkeeping requirements. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AB 617 BARCT/ AB 617 CERP
1121*	<b>Control of Nitrogen Oxides from Residential Type, Natural-Gas-Fired Water Heaters</b> Proposed amendments may be needed further reduce NOx emissions from water heaters. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

### 2021 To-Be-Determined (*Continued*)

2021	Title and Description	Type of Rulemaking
1121.1	<b>Zero Emission Residential Water Heaters</b> Proposed Rule 1121.1 may include provisions to encourage zero emission water heaters that goes beyond Rule 1121 for gas-fired water heaters. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP
1133.3	<b>Emission Reductions from Greenwaste Composting Operations</b> Proposed Amended Rule 1133.3 will seek additional VOCs and ammonia emission reductions from greenwaste and foodwaste composting. Proposed amendments will implement BCM-10 in the 2016 AQMP. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP
1138	<b>Control of Emissions from Restaurant Operations</b> Proposed Amended Rule 1138 will further reduce emissions from char boilers. <i>Tracy Goss 909.396.3106; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP
1142	<b>Marine Tank Vessel Operations</b> Proposed Amended Rule 1142 will address VOC and hydrogen sulfide emissions from marine tank vessel operations, applicability, noticing requirements, and provide clarifications. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1146	<b>Emissions of Oxides of Nitrogen from Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters</b> Proposed amendments to Rule 1146 may be needed to incorporate comments from U.S. EPA. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1146.1 <sup>#</sup>	<b>Emissions of Oxides of Nitrogen from Small Industrial, Institutional, and Commercial Boilers, Steam Generators, and Process Heaters</b> Proposed amendments to Rule 1146.1 may be needed to clarify provisions for industry-specific categories and to incorporate comments from U.S. EPA. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other

\* Potentially significant hearing

<sup>+</sup> Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

<sup>#</sup> Part of the transition of RECLAIM to a command-and-control regulatory structure

### 2021 To-Be-Determined (Continued)

2021	Title and Description	Type of Rulemaking
1148.1*	<b>Oil and Gas Production Wells</b> Proposed Amendments to Rule 1148.1 may be needed to further reduce emissions from operations, implement early leak detection, odor minimization plans, and enhanced emissions and chemical reporting from oil and drilling sites consistent with the AB 617 Community Emission Reduction Plan. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other/ AB 617 CERP
1148.2	<b>Notification and Reporting Requirements for Oil and Gas Wells and Chemical Suppliers</b> Proposed amendments to Rule 1148.2 may be needed to improve notifications of well working activities to the community and to address other issues. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other/ AB 617 CERP
1153.1	<b>Emissions of Oxides of Nitrogen from Commercial Food Ovens</b> Proposed amendments to Rule 1153.1 may be needed to establish NOx BARCT limits for the RECLAIM transition. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	AQMP/ AB 617 BARCT
1166	<b>Volatile Organic Compound Emissions from Decontamination of Soil</b> Proposed Amended Rule 1166 will update requirements, specifically concerning notifications and usage of mitigation plans (site specific versus various locations). <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1168	<b>Adhesive and Sealant Applications</b> Staff is considering possible amendments for foam insulation applications. Other amendments may also be needed. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1176	<b>VOC Emissions from Wastewater Systems</b> Proposed Amended Rule 1176 will clarify the applicability of the rule to include bulk terminals under definition of "Industrial Facilities," and streamline and clarify provisions. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other/ AB 617 CERP
1180	<b>Refinery Fenceline and Community Air Monitoring</b> Amendments to Rule 1180 may be needed to provide additional clarity and if Proposed Rule 1180.1 is adopted, provisions may be needed to provide additional clarity. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

# Part of the transition of RECLAIM to a command-and-control regulatory structure

## 2021 To-Be-Determined (*Continued*)

2021	Title and Description	Type of Rulemaking
1180.1	<b>Fenceline and Community Monitoring</b> Proposed Rule 1180.1 may establish fenceline and community monitoring requirements for non-petroleum refineries and facilities that are not currently included in Rule 1180 – Refinery Fenceline and Community Air Monitoring. <i>Michael Krause 909.396.2706; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1403*	<b>Asbestos Emissions from Demolition/Renovation Activities</b> Proposed Amended Rule 1403 will enhance implementation, improve rule enforceability, update provisions, notifications, exemptions, and align provisions with the applicable U.S. EPA National Emission Standard for Hazardous Air Pollutants (NESHAP) and other state and local requirements as necessary. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics
1404	<b>Hexavalent Chromium Emissions from Cooling Towers</b> Amendments may be needed to provide additional clarifications to use of process water that is associated with sources that have the potential to contain chromium in cooling towers. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics
1405	<b>Control of Ethylene Oxide and Chlorofluorocarbon Emissions from Sterilization or Fumigation Processes</b> Amendments may be needed to address ethylene oxide emissions from sterilization of medical equipment. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics
1415 1415.1	<b>Reduction of Refrigerant Emissions from Stationary Air Conditioning Systems, and Reduction of Refrigerant Emissions from Stationary Refrigeration Systems</b> Proposed Amended Rules 1415 and 1415.1 will align requirements with the proposed CARB Refrigerant Management Program and U.S. EPA's Significant New Alternatives Policy Rule provisions relative to prohibitions on specific hydrofluorocarbons. <i>David De Boer 909.396.2329; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
1420	<b>Emissions Standard for Lead</b> Proposed Amended Rule 1420 will update requirements to address arsenic emissions to close a regulatory gap between Rule 1420 and Rule 1407 - Control of Emissions of Arsenic, Cadmium, and Nickel from Non-Ferrous Metal Melting Operations. Other provisions may be needed to address storage and handling requirements, and revise closure requirements. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

# Part of the transition of RECLAIM to a command-and-control regulatory structure

### 2021 To-Be-Determined (*Continued*)

2021	Title and Description	Type of Rulemaking
1420.1	<p><b>Emission Standards for Lead and Other Toxic Air Contaminants from Large Lead-Acid Battery Recycling Facilities</b>  Proposed Amendments are needed to update applicable test methods and provide clarifications regarding submittal of a source-test protocol. Additional amendments may be needed to address monitoring and post closure requirements.  <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	Toxics
1420.2	<p><b>Emission Standards for Lead from Metal Melting Facilities</b>  Proposed Amended Rule 1420.2 will update requirements to address arsenic emissions to close a regulatory gap between Rule 1420 and Rule 1407 - Control of Emissions of Arsenic, Cadmium, and Nickel from Non-Ferrous Metal Melting Operations. Additional amendments may be needed to address monitoring and post closure requirements.  <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	Toxics
1421	<p><b>Control of Perchloroethylene Emissions from Dry Cleaning Systems</b>  Proposed amendments may be needed to address implementation issues.  <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	Toxics
1450*	<p><b>Control of Methylene Chloride Emissions</b>  Proposed Rule 1450 will reduce methylene chloride emissions from furniture stripping and establish monitoring, reporting, and recordkeeping requirements.  <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; and Socio: Ian MacMillan 909.396.3244</i></p>	Toxics
1455	<p><b>Control of Hexavalent Chromium Emissions from Torch Cutting and Welding</b>  Proposed Rule 1455 will establish requirements to reduce hexavalent chromium emissions from torch cutting and welding of chromium alloys.  <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	Toxics
1460	<p><b>Control of Particulate Emissions from Metal Cutting and Shredding Operations</b>  Proposed Rule 1460 will establish housekeeping and best management practices to minimize fugitive particulate emissions from metal cutting and shredding operations.  <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i></p>	Other

\* Potentially significant hearing

+ Reduce criteria air contaminants and assist toward attainment of ambient air quality standards

# Part of the transition of RECLAIM to a command-and-control regulatory structure

### 2021 To-Be-Determined (*Continued*)

2021	Title and Description	Type of Rulemaking
1466.1	<b>Control of Particulate Emissions from Demolition of Buildings and Structures with Equipment and Processes with Metal Toxic Air Contaminants</b> Proposed Rule 1466.1 would establish requirements to minimize PM emissions during the demolition of buildings that housed equipment and processes with metal toxic air contaminants and pollution control equipment. <i>TBD; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics
1469*	<b>Hexavalent Chromium Emissions from Chromium Electroplating and Chromic Acid Anodizing Operations</b> Proposed amendments to Rule 1469 may be needed to address use of chemical fume suppressants or other implementation issues. <i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics
1472	<b>Requirements for Facilities with Multiple Stationary Emergency Standby Diesel-Fueled Internal Combustion Engines</b> Proposed Amended Rule 1472 will remove provisions that are no longer applicable, update and streamline provisions to reflect the 2015 Health Risk Assessment Guidelines, and assess the need for a Compliance Plans. <i>Michael Morris 909.396.3282; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Toxics
1480	<b>Toxics Monitoring</b> Proposed amendments to Rule 1480 may be needed to remove fee provisions if they are incorporated in Regulation III. <i>Jillian Wong 909.396.3176; CEQA: Jillian Wong 909.396.3176 and Socio: Ian MacMillan 909.396.3244</i>	Toxics/ AB 617 CERP
2202*	<b>On-Road Motor Vehicle Mitigation Options</b> Proposed Amended Rule 2202 will streamline implementation for regulated entities, as well as reduce review and administration time for South Coast AQMD staff. Concepts may include program components to facilitate achieving average vehicle ridership (AVR) targets. <i>Carol Gomez 909.396.3264; CEQA: Jillian Wong 909.396.3176; Socio: Ian MacMillan 909.396.3244</i>	Other
Regulation XXIII* <sup>+</sup>	<b>Facility-Based Mobile Sources</b> Proposed rules within Regulation XXIII would reduce emissions from indirect sources (e.g., mobile sources that visit facilities). <i>Ian MacMillan 909.396.3244; CEQA: Jillian Wong 909.396.3176 Socio: Ian MacMillan 909.396.3244</i>	AQMP/ Toxics/ AB 617 CERP

**2021 To-Be-Determined (Continued)**

2021	Title and Description	Type of Rulemaking
Regulation II, III, IV, XIV, XI, XIX, XXIII, XXIV, XXX and XXXV	Various rule amendments may be needed to meet the requirements of state and federal laws, implement OEHHA's 2015 revised risk assessment guidance, changes from OEHHA to new or revised toxic air contaminants or their risk values, address variance issues, emission limits, technology-forcing emission limits, conflicts with other agency requirements, to abate a substantial endangerment to public health, additional reductions to meet SIP short-term measure commitments, to address issues raised by U.S. EPA or CARB for the SIP, compliance issues that are raised by the Hearing Board, or regulatory amendments needed as a result of the COVID-19 pandemic. The associated rule development or amendments include, but are not limited to, South Coast AQMD existing, or new rules to implement the 2012 or 2016 AQMP measures. This includes measures in the 2016 AQMP to reduce toxic air contaminants or reduce exposure to air toxics from stationary, mobile, and area sources. Rule adoption or amendments may include updates to provide consistency with CARB Statewide Air Toxic Control Measures, or U.S. EPA's National Emission Standards for Hazardous Air Pollutants. Rule adoption or amendments may be needed to implement AB 617 including but not limited to BARCT rules, Community Emission Reduction Plans prepared pursuant to AB 617, or new or amended rules to abate a public health issue identified through emissions testing or ambient monitoring.	Other/ AQMP/ Toxics/ AB 617 BARCT/ AB 617 CERP

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 17

REPORT: Annual Audited Financial Statements for FY Ended June 30, 2020

SYNOPSIS: This item transmits the annual audited financial statements of the South Coast AQMD. The South Coast AQMD has received an unmodified opinion (the highest obtainable) on its financial statements.

COMMITTEE: Administrative, November 13, 2020, Reviewed

**RECOMMENDED ACTION:**

Receive and file the South Coast AQMD's Comprehensive Annual Financial Report (CAFR) and Single Audit Reports for the FY ended June 30, 2020.

Wayne Nastri  
Executive Officer

SJ:tm

---

**Background**

The audit of the South Coast AQMD financial statements, along with the Single Audit Reports for the Fiscal Year ended June 30, 2020, have been completed by BCA Watson Rice, LLP. South Coast AQMD has received an unmodified opinion on its financial statements. An unmodified opinion is the highest obtainable, assuring interested parties that South Coast AQMD's financial statements fairly present the agency's financial position.

**Attachments**

- The Comprehensive Annual Financial Report (CAFR), which includes the Independent Auditor's Report, was previously provided to Board Members and will be available at South Coast AQMD's library or website at <http://www.aqmd.gov/home/about/finance>.
- Single Audit Reports that include Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of the Financial Statements Performed in Accordance with Government Auditing Standards, Independent Auditor's Report on Compliance with Each Major Federal Program; Report on Internal Control over Compliance; and Report on Schedule of Expenditures of Federal Awards Required by the Uniform Guidance. Copies were previously provided to Board Members and will be available at South Coast AQMD's library or website at <http://www.aqmd.gov/home/about/finance>.

South Coast Air Quality Management District  
Diamond Bar, California

# Comprehensive Annual Financial Report

Year Ended June 30, 2020

## **MISSION STATEMENT**

South Coast AQMD's mission is to clean the air and protect the health of all residents in the South Coast Air District through practical and innovative strategies.

*South Coast*

(909) 396-2000 • [www.aqmd.gov](http://www.aqmd.gov)

October 16, 2020

Chairman, Governing Board and Residents  
Of the South Coast Air Quality Management District

State law requires that local governments publish within nine months of the close of each fiscal year a complete set of audited financial statements presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. This report is published to fulfill that requirement for the fiscal year ended June 30, 2020.

This report consists of management's representations concerning the finances of the South Coast Air Quality Management District (South Coast AQMD), Diamond Bar, California. Management assumes full responsibility for the completeness and reliability of all of the information presented in this report, based upon a comprehensive framework of internal control that it has established for this purpose. Because the cost of internal control should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

South Coast AQMD's financial statements have been audited by BCA Watson Rice LLP, Certified Public Accountants. The goal of the independent audit is to provide reasonable assurance that the financial statements of South Coast AQMD for the fiscal year ended June 30, 2020 are free of material misstatements. The independent auditors concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified (clean) opinion that South Coast AQMD's financial statements for the fiscal year ended June 30, 2020 are fairly presented in conformity with accounting principles generally accepted in the United States. The independent auditor's report is located at the front of the financial section of this report.

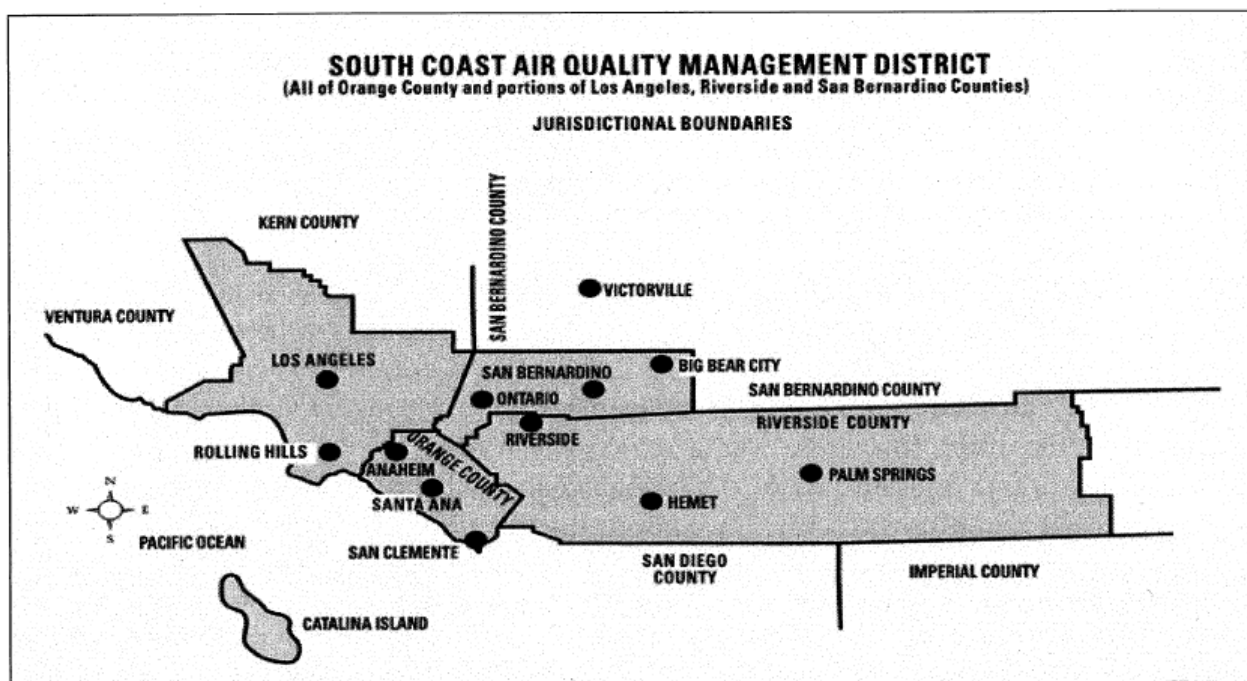

The independent audit of the financial statements of South Coast AQMD was part of a broader, federally mandated "Single Audit" designed to meet the special needs of Federal

grantor agencies. The standards governing Single Audit engagements require the independent auditor to report not only on the fair presentation of the financial statements, but also on the audited government's internal controls and compliance with special emphasis on internal controls and compliance with federal statutes, regulations, and terms and conditions involving the administration of Federal awards. These reports are available in South Coast AQMD's separately issued Single Audit Report.

Management's Discussion and Analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. MD&A complements this letter of transmittal and should be read in conjunction with it.

### ***Profile of the South Coast Air Quality Management District***

The South Coast Air Quality Management District began operation on February 1, 1977 as a regional governmental agency established by the California Legislature pursuant to the Lewis Air Quality Management Act. South Coast AQMD encompasses all of Orange County and parts of Los Angeles, San Bernardino and Riverside Counties, representing over 17 million residents. It succeeded the Southern California Air Pollution Control District and its predecessor four county air pollution control districts, of which the Los Angeles County Air Pollution Control District was the oldest in the nation, having been formed in 1947.

South Coast AQMD's Governing Board is composed of 13 members, including four members appointed by the Boards of Supervisors of the four counties in South Coast AQMD's jurisdiction, six members appointed by cities in South Coast AQMD's jurisdiction and three members appointed by the Governor, the Speaker of the State Assembly and the Rules Committee of the State Senate, respectively. The members appointed by the various Boards of Supervisors and cities consist of one member of the Board of Supervisors of Los Angeles, Orange, Riverside, and San Bernardino Counties, respectively, and a mayor or member of the city council of a city within Orange, Riverside and San Bernardino Counties. Los Angeles County cities have three representatives, one each from the western and eastern portions of the county and one member representing the City of Los Angeles. Each Board member serves a four year term. The Board appoints the agency's Executive Officer and General Counsel. The Executive Officer in turn appoints the heads of the various agency departments.

Southern California has the most serious air quality problem in the country. A combination of poor atmospheric ventilation, a capping temperature inversion, bordering mountains and sunny days act to enhance smog formation and effectively trap pollutants in the Basin. South Coast AQMD is responsible for monitoring air pollution within the Basin and for developing and administering programs to reduce air pollution levels below the health-based standards established by the state and federal governments.

South Coast AQMD provides a full range of air pollution control activities, including permitting, site inspection, air quality attainment planning, rule making, air quality monitoring and technology advancement. Government Accounting Standards Board Statement No. 61 requires that certain separate but related component units be included with South Coast AQMD for reporting purposes. This report includes the South Coast Air Quality Management District Building Corporation (Corporation) as a blended component unit. South Coast AQMD may impose its will on the component unit, including the ability to appoint, hire, reassign or dismiss management. There are also financial benefit/burden relationships between South Coast AQMD and the Corporation. For additional information, see Note 1 to the financial statements.

The annual budget serves as the foundation for South Coast AQMD's financial planning and control. The Governing Board is required to adopt an annual budget by July 1 of each fiscal year. South Coast AQMD's annual appropriated budgets are adopted for the General Fund. Budgets are adopted on a budgetary basis that includes encumbrances as expenditures. All annual appropriations lapse at fiscal year end to the extent they have not been expended or encumbered. Amendments to increase the budget must be approved by the Governing Board. Budgets for Special Revenue Funds are not adopted due to the narrow focus (advance technology demonstration projects/emission reduction projects) and limited life of many of these special revenues. Expenditures from the Special Revenue Funds require Governing Board approval and are primarily related to contractual obligations with vendors and grantees. Administrative expenditures related to managing

and accounting for Special Revenue Fund projects are appropriated within the General Fund budget.

South Coast AQMD maintains budgetary controls through both signature authority and automated budget checking. The objective of these controls is to ensure compliance with specific special revenue fund appropriations and the annual appropriated budget approved by the Governing Board. South Coast AQMD maintains an encumbrance accounting system of purchase orders and contracts at the fund level as a means of accomplishing budgetary control. Open encumbrances are reported as committed fund balance at the end of the fiscal year. Purchase orders and contracts are reviewed to ensure that funds are available and that requests are properly authorized prior to being released or executed.

The accounting principles applied in reporting budgetary expenditures differ in some respects from the generally accepted accounting principles applied in the reporting of the financial statements. Reconciliation of these differences is presented in the Required Supplementary Information section of this report.

As reflected in the statements and schedules included in the financial section of this report, South Coast AQMD continues to meet its responsibility for sound financial management.

### ***Factors Affecting Financial Condition***

South Coast AQMD is a fee-supported agency and does not receive sales or property tax support. Approximately 68% of its General Fund revenue is derived from permit evaluation fees, annual permit renewal fees, emission fees, Hearing Board fees, Area Sources, Toxic Hot Spots, penalties and settlements, interest earnings, and other revenues. The remaining 32% of its General Fund revenue is derived from federal grants, state grants, California Air Resources Board (CARB) subvention funds, and motor vehicle fees.

To meet its program commitments, despite new federal and state mandates, increased workload complexity, and ongoing cost containment efforts, South Coast AQMD continues to streamline many of its operations. Compared to the fiscal year 1991-92 General Fund budget, the fiscal year 2019-20 General Fund budget reflects funded staffing levels that are approximately 19% below the 1991-92 level. The budgeted General Fund expenditures, when adjusted for inflation, are approximately 13% less than the 1991-92 period.

Government-wide revenues during this fiscal year increased by 4.7% as compared to the prior fiscal year, primarily due to increase in the grants such as the implementation portion of the Community Air Protection Program (CAPP) and subsequent increase in revenue. General Fund revenues increased by 12.6% as compared to the prior fiscal year, primarily

due to increase in state grants such as the implementation portion of CAPP, last year of a three-year Board approved fee increase of 10.6%, increase in CPI of 3.5% and increase in unexpected large one-time penalties and settlements paid by non-compliant entities. Future changes in government-wide revenue are highly dependent on the timing of receipts and continuation of state and federal grant funding, while General Fund revenues are expected to continue to remain generally stable or decline slightly through the following fiscal year due to the impact of COVID-19 on the economy.

Government-wide expenses increased when compared to the prior fiscal year by 18.2% primarily due to expenditures related to state grants such as Carl Moyer program, incentive portion of CAPP funds and increase in Advance Technology Goods Movement funds. General Fund expenditures increased by 8.4% as compared to the prior fiscal year, due to increased employee retirement plan contributions, slight salary increases and expenditures related to grants such as the implementation portion of CAPP. Future changes in government-wide expenses are highly dependent on the timing of receipts and continuation of state and federal grant funding, while General Fund expenditures are expected to increase through the following fiscal year due to the continued increases in employee retirement plan contributions.

### ***Long-term Financial Planning***

In addressing long-term program costs, South Coast AQMD has pursued actions over the past several years including legislative changes to the employee retirement plan, labor negotiations, and the use of one-time revenues to lower its long-term retirement costs. As part of the annual budget process, South Coast AQMD prepares a five year financial plan that demonstrates the commitment to meet future financial challenges and uncertainties while continuing to protect the health of the residents within the South Coast AQMD boundaries and remaining sensitive to business. During the current fiscal year and beyond, South Coast AQMD continues to look for cost savings and operational efficiencies as a means of balancing revenues and expenditures to ensure long term financial sustainability.

### ***Relevant Financial Policies***

In recent years, South Coast AQMD's Governing Board has made several policy decisions to meet future financial challenges and uncertainties while continuing to protect the health of the residents within the South Coast AQMD boundaries and remaining sensitive to business. These policy decisions include reducing debt, negotiating reductions in the cost of pensions, and reviewing and revising fee policies. In fiscal year 2012-13, debt associated with the Headquarters building was eliminated, while additional funds were set aside in fiscal year 2013-14 to pay for outstanding debt related to pension obligation bonds. Starting fiscal year 2017-18 employer pick-up of employee retirement plan contributions was completely phased out and the entire employee contribution

portion of the pension cost is picked up by employees. This was eliminated at the direction of the Governing Board and was part of a three-year labor agreement. Over the past decade and continuing, changes and reductions in pension benefits and costs have been successfully negotiated with the employees of South Coast AQMD as a means of curbing the cost of pensions and associated liabilities.

In fiscal year 2010-11, South Coast AQMD's Governing Board approved a rule which provides that certain fees be automatically adjusted effective July 1 of each year by the California Consumer Price Index for the preceding calendar year unless the Governing Board by rule decides not to implement such fee increase for a given year, either for all fees or for a specified fee or fees. Due to the economic downturn caused by COVID-19, the Governing Board decided to not implement any fee increases related to increase in CPI for Fiscal Year 2020-21.

Additionally, the Governing Board adopted a fund balance policy for the General Fund so that an amount equal to at least 20% of General Fund revenues is maintained in the combination of Assigned and Unassigned General Fund Balance. The policy serves to mitigate current and future risks related to potential revenue shortfalls and/or unanticipated expenditures.

In March 2020, the World Health Organization declared the outbreak of a novel coronavirus (COVID-19) as a global pandemic, which continues to spread throughout the United States and around the world. As a governmental agency, South Coast AQMD is deemed to be an essential business. The Executive Officer has activated the Continuity of Operations Plan (COOP) and a large portion of the workforce is teleworking from home. South Coast AQMD is aware of changes in its business as a result of COVID-19. The extent to which the COVID-19 may impact South Coast AQMD's operating results, cash flows, and financial position will depend on future developments. The duration of any business disruption and related financial impact cannot be reasonably estimated at this time.

### ***Major Initiatives***

The mission of South Coast AQMD is to protect public health from air pollution with sensitivity to the impacts of its actions on the community, public agencies and businesses. To carry out this mission, South Coast AQMD has developed the following goals:

- I. Achieve clean air standards.
- II. Enhance public education and equitable treatment for all communities.
- III. Operate efficiently and transparently.

During fiscal year 2019-20, South Coast AQMD advanced many projects which were particularly important to achieving our mission and goals, including: emissions

reductions as specified in the 2016 Air Quality Management Plan; conduct air monitoring and implementation of community emission reduction plans for year 1 communities and conduct outreach to develop recommendations for year 2 communities; complete all Title V facilities inspections and support development of Cleaner Advanced Technology, development of enhanced emissions/ambient monitoring capabilities, increased communication between South Coast AQMD and all stakeholders, and internal business process improvement such as reducing the number of pending permit applications in the backlog.

### *Awards and Acknowledgements*

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the South Coast Air Quality Management District for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2019. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized Comprehensive Annual Financial Report, whose contents conform to program standards. The Comprehensive Annual Financial Report must satisfy both generally accepted accounting principles and applicable legal requirements. The Certificate of Achievement is valid for a period of one year only. We believe our current report continues to meet the Certificate of Achievement program requirements, and we are submitting it to GFOA to determine its eligibility for another certificate.

The preparation of our comprehensive annual financial report was made possible by the dedicated services of the accounting, financial services, and management staff of the Finance Office. These members have our sincere appreciation for the contribution made in the preparation of this report.

Recognition is also given to the Governing Board for their leadership and support and to all employees of South Coast AQMD who continue their work to accomplish South Coast AQMD's mission of protecting public health from air pollution with sensitivity to the impacts of its actions on the community and businesses.

Respectfully submitted,

Wayne Nastri

## INDEPENDENT AUDITOR'S REPORT

The Governing Board of  
South Coast Air Quality Management District

### **Report on the Basic Financial Statements**

We have audited the accompanying basic financial statements of the governmental activities, the blended component unit, each major fund, and the aggregate remaining fund information of the South Coast Air Quality Management District (South Coast AQMD), as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the South Coast AQMD's basic financial statements as listed in the table of contents.

### ***Management's Responsibility for the Financial Statements***

South Coast AQMD's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### ***Auditor's Responsibility***

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the basic financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the basic financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the basic financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the basic financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

### ***Opinions***

In our opinion the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the blended component unit, each major fund, and the aggregate remaining fund information of the South Coast AQMD, as of June 30, 2020, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

### ***Other Matters***

#### ***Required Supplementary Information***

Accounting principles generally accepted in the United States of America require that Management's Discussion and Analysis and the required supplementary information on pages 4-11 and 67-73, respectively, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### ***Other Information***

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the South Coast AQMD's basic financial statements. The introductory section, combining and individual nonmajor fund financial statements, and statistical section are presented for the purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual nonmajor fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with the auditing standards generally accepted in the United States of America. In our opinion, the combining and individual nonmajor fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

As management of the South Coast Air Quality Management District (South Coast AQMD), we offer readers of South Coast AQMD's financial statements this narrative overview and analysis of the financial activities of South Coast AQMD for fiscal year ended June 30, 2020. Please read it in conjunction with the accompanying transmittal letter, the basic financial statements, and the accompanying notes to those financial statements.

**A. Financial Highlights**

- Total assets and deferred outflows of resources of South Coast AQMD exceeded its total liabilities and deferred inflows of resources at the close of the most recent fiscal year by \$762.6 million (net position), an increase of \$70.2 million was the change in net position for the current year. The net position of \$762.6 million consisted of: \$38.5 million net investment in capital assets; \$850.5 million restricted for long-term emission-reduction projects; and a deficit of \$126.4 million unrestricted net position primarily due to a net pension liability of \$233.9 million.
- As of the close of the fiscal year, South Coast AQMD's governmental funds reported combined ending fund balances of \$935.1 million, an increase of \$77.9 million in comparison to the prior year. Of the \$935.1 million combined ending fund balances, \$84.5 million represents the fund balance of the General Fund.
- Out of the general fund balance of \$84.5 million at the end of the fiscal year, \$65,321 was nonspendable, \$12.4 million was committed, \$6.1 million was assigned and \$66.0 million was unassigned, which is 38.2% of the general fund expenditures.
- South Coast AQMD's capital assets increased by \$3.0 million from the prior year.
- South Coast AQMD's long-term debt decreased by \$2.5 million or 7.3% of the long-term debt outstanding.
- South Coast AQMD's net pension liability increased by \$15.7 million or 7.1% from the prior year.

**B. Overview of the Financial Statements**

This discussion and analysis is intended to serve as an introduction to South Coast AQMD's basic financial statements. South Coast AQMD's basic financial statements have three components: 1) Government-wide Financial Statements; 2) Fund Financial Statements; and 3) Notes to the Basic Financial Statements. This report also contains supplementary information in addition to the basic financial statements.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

In general, the purpose of financial reporting is to provide the external parties that read financial statements with information that will help them make decisions or draw conclusions about an entity. In order to address the needs of as many parties as reasonably possible, South Coast AQMD, in accordance with required reporting standards, presents government-wide financial statements and fund financial statements.

**Government-wide Financial Statements**

The focus of government-wide financial statements is on the overall financial position and activities of South Coast AQMD. These financial statements are constructed around the concept of a primary government and its component unit, excluding fiduciary funds. The financial statements of South Coast AQMD's fiduciary funds are not included in the government-wide financial statements because these funds cannot be used to finance South Coast AQMD's activities.

The government-wide financial statements are designed to provide readers with a broad overview of South Coast AQMD's finances in a manner similar to a private sector business. These financial statements include the Statement of Net Position and the Statement of Activities.

The Statement of Net Position reports all assets and deferred outflows of resources held and liabilities and deferred inflows of resources owed by South Coast AQMD using the accrual basis of accounting which is similar to the accounting method used by most private sector companies. The difference between assets and liabilities is reported as net position. Over time increases or decreases in net position serve as a useful indicator of whether South Coast AQMD's financial position is improving or deteriorating.

The Statement of Activities presents information showing how South Coast AQMD's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods such as earned but unused vacation leave.

**Fund Financial Statements**

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. South Coast AQMD, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of South Coast AQMD can be divided into two categories: governmental funds and fiduciary funds.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

**Governmental Funds**

Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on current sources and uses of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Non-financial assets such as land and building and long-term liabilities such as pension obligation bonds payable or long term liabilities that will not be paid with current assets are excluded. Such information on available spendable resources may be useful in evaluating South Coast AQMD's near-term financing requirements. The Basic Governmental Fund Statements can be found under the Fund Financial Statements section of this report.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the Government-wide Financial Statements. By doing so, readers may better understand the long-term impact of South Coast AQMD's near-term financing decisions. Information from the Governmental Funds Balance Sheet and the Governmental Funds Statement of Revenues, Expenditures and Changes in Fund Balances is used to facilitate the comparison between governmental funds and governmental activities. The reconciliation between the Governmental Funds Balance Sheet and the Government-wide Statement of Net Position can be found under the Fund Financial Statements section. The reconciliation of the total change in fund balances for all governmental funds to the change in net position can also be found under that same section.

South Coast AQMD maintains 47 individual special revenue funds, one debt service fund, one capital projects fund, and a blended component unit in addition to the General Fund. Four of the special revenue funds are considered major funds. The information for the major special revenue funds is presented separately in the Governmental Fund Balance Sheet and in the Governmental Fund Statement of Revenues, Expenditures and Changes in Fund balances. Data for the other 43 non-major special revenue funds, debt service fund, capital projects fund and blended component unit are combined into a single, aggregated presentation. Individual fund data for each of the 43 non-major governmental funds, debt service fund, capital projects fund, and blended component unit, is reported in the Other Supplementary Information section of this report.

South Coast AQMD adopts an annual appropriated budget for its General Fund. A budgetary comparison statement has been provided for the General Fund to demonstrate compliance with this budget. This is presented in the Required Supplementary Information (RSI) section of this report. Also, presented in RSI are South Coast AQMD's schedule of proportionate share of net pension liability, schedule of

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

proportionate share of net OPEB liability, and schedules of contributions for pensions and OPEB.

**Fiduciary Funds**

Fiduciary Funds represent Agency Funds and Retirement Benefit Trust Fund which are custodial in nature and do not involve measurement of results of operations. South Coast AQMD's fiduciary activities are reported in separate Statements of Fiduciary Net Position. These statements are excluded from South Coast AQMD's other financial statements because the resources of fiduciary funds, by definition, cannot be used to support South Coast AQMD's own programs. South Coast AQMD is responsible for ensuring that the assets reported in these funds are used for their intended purposes. The accounting used for fiduciary funds is much like that used for proprietary funds.

South Coast AQMD's Fiduciary Fund Financial Statements for the Agency Funds and Retirement Benefit Trust Fund are presented under the Fund Financial Statements section.

**Notes to the Basic Financial Statements**

The Notes to the Basic Financial Statements provide additional information that is essential to the reader for a full understanding of the data provided in the Government-wide and fund financial statements.

**Other Information**

In addition to the basic financial statements and accompanying notes, this report also presents a RSI section concerning the General Fund's budgetary comparison schedule and budgetary reconciliation. Also included in RSI are South Coast AQMD's schedule of proportionate share of net pension liability, schedule of proportionate share of net OPEB liability, and schedules of contributions for pensions and OPEB.

Individual fund data for each of the non-major governmental funds is included in the Other Supplementary Information section.

The Statistical section provides readers with information covering financial trends, revenue capacity, debt capacity, demographic and economic information, and operating information.

**C. Government-wide Financial Analysis**

Our analysis focuses on the net position and changes in net position of South Coast AQMD's governmental activity.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

The schedule below presents a condensed Statement of Net Position as of June 30, 2020 compared with the prior fiscal year.

**South Coast AQMD's Net Position

Restricted for:				
Restricted for long-term emission-reduction projects	850,524	785,722	850,524	785,722
Unrestricted	<u>(126,464)</u>	<u>(128,939)</u>	<u>(126,464)</u>	<u>(128,939)</u>
Total net position	\$ <u>762,575</u>	\$ <u>692,285</u>	\$ <u>762,575</u>	\$ <u>692,285</u>

As noted earlier, net position may serve over time as a useful indicator of South Coast AQMD's financial position. At the close of the most recent fiscal year, South Coast AQMD's assets exceeded liabilities by \$762.6 million.

The largest portion of South Coast AQMD's net position, \$850.5 million, represents resources that are subject to external restrictions on how they may be used. The revenue in special revenue funds is restricted to expenditures for specific purposes. Approximately \$38.5 million of South Coast AQMD's net position reflect its investment in capital assets used by South Coast AQMD (e.g. land, buildings, equipment, and vehicles) less any related debt used to acquire those assets that is still outstanding. South Coast AQMD uses these capital assets in carrying out its mission of protecting public health while being sensitive to the economic needs of local businesses. Consequently,

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

these assets are not available for future spending. Although South Coast AQMD's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources since the capital assets themselves cannot be used to liquidate these liabilities. The debt service installment schedules for the 1995 and 2004 Pension Obligation Bonds will be fully paid by fiscal years 2022 and 2024, respectively.

The remaining portion of South Coast AQMD's net position of governmental activities, a deficit of \$126.4 million, is unrestricted. The deficit is mainly due to the net pension liability. At the end of the current fiscal year, South Coast AQMD had a negative balance in the unrestricted categories of net position and positive fund balance in restricted and net investment in capital asset category.

The net position for governmental activities increased by \$70.2 million compared with the prior fiscal year. Most of the increase was due to revenues in long-term emission-reduction projects.

Program revenues increased by approximately \$15.9 million, 3.7% change from the prior year. These are largely due to an increase of approximately \$11.7 million in state grants and \$3.4 million in annual renewal fees, and offsetted by \$2.5 million decrease in interest revenue of special revenue funds. General revenue increased by \$4.8 million, compared with the prior fiscal year, which is primarily attributed to an increase in penalties and settlements.

Expenses increased by \$59.8 million largely due to a higher amount paid for fiscal year 2019-20 long-term emission reduction projects as compared to fiscal year 2018-19.

A condensed Schedule of Changes in Net Position for the fiscal year ending June 30, 2020 compared with the prior fiscal year can be found on the following page.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

**Governmental Activities**

The objective of the statement of activities is to report the full cost of providing government services for that year. The format also permits the reader to ascertain the extent to which each function is either self-financing or draws from the general funds of the government.

The Statement of Activities presents information showing how South Coast AQMD's net position changed during fiscal year 2020. All changes in net position are reported as soon as the underlying event occurs regardless of the timing of the cash flows.

The Governmental activities of South Coast AQMD are predominantly supported by fees, grants, state subvention, penalties, and settlements. The penalties and settlements are one-time revenues which are over and above the regular revenues directly related to the programs. The governmental activities of South Coast AQMD are: Advance Clean Air Technology, Ensure Compliance with Clean Air Rules, Customer Service and Business Assistance, Develop Programs to Achieve Clean Air, Develop Rules to Achieve Clean Air, Monitoring Air Quality, Timely Review of Permits, Policy Support, and Long-Term Emission Reduction Projects.

There was an increase in program revenues in the Operating Grants and Subvention Revenues Sources. The program revenues in this revenue category are made up of revenues from mostly restricted revenue derived from federal and state funds. Following are the explanations of the significant revenue variances from fiscal year 2018-19 to fiscal year 2019-20:

- **Community Air Protection Program (CAPP)** – In fiscal year 2018-19, the incentive and operating portions of CAPP were recognized \$106.2 million in Community Air Protection AB 134 Fund (Special Revenue Fund) and \$10.9 million in AB 617 (General Fund), respectively. In fiscal year 2019-20, the incentive portion of CAPP in the special revenue fund were decreased by \$21.2 million and the operating portion of CAPP in the general fund were increased by \$7.2 million.
- **VW Mitigation Fund** - Established in fiscal year 2019 to administer and implement two project funding categories identify in CARB's Beneficiary Mitigation Plan for the VW Environmental Mitigation Trust. In fiscal year 2019-20, this fund recognized the first allocation of \$7.6 million in state grant revenue.

**Business-type Activities**

The Business-type Activities section reports transactions relating to the CNG fueling station. The CNG fueling station were closed in fiscal year 2017-18. Thus, no business-type activities were reported in this financial statements.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

The following schedule presents the cost of each South Coast AQMD program as well as each program's net cost (total cost less revenues generated by the activities):

**GOVERNMENTAL ACTIVITIES**

**Net (Expense) Revenue  
(amounts expressed in thousands)**

	<b><u>FY 2019-20</u></b>	
	<b>Total Cost of</b>	<b>Net Cost of</b>
	<b>Program Activities</b>	<b>Program Activities</b>
Advance clean air technology	\$ 12,827	\$ (3,240)
Ensure compliance with clean air rule	55,168	(5,027)
Customer service and business assistance	13,032	(1,004)
Develop programs to achieve clean air	12,472	(708)
Develop rules to achieve clean air	14,131	(849)
Monitoring air quality	31,911	(1,305)
Timely review of permits	35,511	(1,708)
Policy support	1,946	(151)
Interest on long-term debt	3,463	(3,463)
Long-term emission reduction projects	206,807	69,473
Total	\$ <u>387,268</u>	\$ <u>52,018</u>

The program activities are described as follows:

- **Advance Clean Air Technology** – Identify technologies from anywhere in the world that may have application in reducing emissions from mobile and stationary sources in South Coast AQMD's jurisdiction. Promote development and assess the use of clean fuels and low-emitting technologies. Implement and administer state- and federal-funded programs for retrofitting, re-powering, or replacing diesel engines with newer and cleaner engines and projects to reduce air pollution associated with freight movement along California's trade corridors.
- **Ensure Compliance with Clean Air Rules** – Perform inspections, source tests, sample collection, the certification of Continuous Emission Monitoring Systems (CEMS), emissions audits, and respond to and resolve public complaints to ensure compliance with South Coast AQMD rules for existing major and small stationary sources of all pollutants.
- **Customer Service and Business Assistance** – Provide local government, business, and the public with access and input into the regulatory and policy processes of South Coast AQMD. Assist cities and others with AB 2766 projects. Interact with local, state and federal agencies and others to share air quality information, resolve jurisdictional questions, and implement joint programs. Implement comprehensive public information, legislative and customer service programs.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

- **Develop Programs to Achieve Clean Air** – Develop a regional Air Quality Management Plan (AQMP) to achieve federal and state ambient air quality standards and to meet all other requirements of the federal and California Clean Air Acts. Analyze air quality data and provide an estimate of pollutant emissions by source category. Develop pollutant control strategies and project future air quality using computer models and statistical analysis of alternative control scenarios.
- **Develop Rules to Achieve Clean Air** – Develop emission reduction regulations for sulfur dioxide, nitrogen dioxide, organic gases, particulate matter, toxics, and other pollutants to implement the regional AQMP, Tanner Air Toxics Process (AB 1807), National Emission Standards for Hazardous Air Pollutants (NESHAPS), and Prevention of Significant Deterioration (PSD) requirements.
- **Monitoring Air Quality** – Operate and maintain within South Coast AQMD's jurisdiction a network of air quality monitoring sites for ozone, nitrogen oxides, sulfur oxides, particulate matter, carbon monoxide and other pollutants to obtain data regarding public exposure to air contaminants. Analyze, summarize, and report air quality information generated from the monitoring sites. Prepare meteorological forecasts and models.
- **Timely Review of Permits** – Ensure timely processing of permits for new sources based on compliance with New Source Review and other applicable local, state and federal air quality rules and regulations.
- **Policy Support** – Provide support staff to the Governing Board, Board committees, and various advisory and other groups as well as ad hoc committees and Rule working groups. Monitor potential changes to state and federal legislation and budgets that may affect South Coast AQMD.
- **Interest on Long-Term Debt** – Identify the cost of borrowing on Pension Obligation Bonds to partially retire the Unfunded Actuarial Accrued Liability (UAAL) due to San Bernardino County Employees' Retirement Association (SBCERA).
- **Long-term Emission Reduction Projects** – Generate funding for long-term projects that reduce emissions in the South Coast Air Basin. Funding for special funds activities are recognized when received and projects carried out may extend over multiple fiscal years.

**D. Financial Analysis of South Coast AQMD's Funds**

As noted earlier, South Coast AQMD uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

**Governmental Funds**

The focus of South Coast AQMD's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing South Coast AQMD's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the fiscal year, South Coast AQMD's governmental funds reported combined ending fund balances of \$935.1 million, an increase of \$77.9 million in comparison with the prior year. Approximately 90.9% of these fund balances (\$850.5 million) constitutes the portion pertaining to special revenue funds. Expenditures under these funds are restricted for specific purposes. The long-term contractual commitments related to these special fund programs, such as replacement of diesel-fueled trucks, involve multiple-year spending.

- **The General Fund** is the operating fund of South Coast AQMD. At the end of the fiscal year, the total fund balance of the General Fund was \$84.5 million. The unassigned fund balance was \$66.0 million or 78.0% of the total fund balance; assigned was \$6.1 million or 7.2% of the total fund balance. The assigned amount represents South Coast AQMD's intended use of the financial resources in future periods. One measure of the General Fund's liquidity is the comparison of both assigned and unassigned fund balance to total expenditures. The assigned and unassigned fund balance represent 41.7% of total General Fund expenditures, while total fund balance represents 48.9% of the total General Fund expenditures. In the General Fund, the assigned and unassigned fund balance may serve as a useful measure of South Coast AQMD's net resources available for spending at the end of the fiscal year.

General Fund's revenues increased in fiscal year 2019-20 by \$20.3 million. This increase is primarily due to revenue increases from the state grants and penalties and settlements.

Overall, General Fund's expenditures increased in fiscal year 2019-20 by \$13.3 million primarily due to higher salaries and employment benefits expenditures as compared to prior fiscal year. This is due primarily to increased cost associated with the three year labor agreement, increased in retirement plan contribution, and adding positions.

Fund balance changes in other major governmental funds are noted below:

- **Air Quality Investment Fund** – The fund balance increased compared with the prior year by \$25.2 million due to revenues exceeding expenditures in fiscal year 2019-20. This fund recognized \$33.8 million in the other revenues. Many

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

of the contracts executed in this special revenue fund are multi-year and the projects are often long-term and expenditures can vary significantly from year to year.

- **GHG Reduction Projects Special Revenue Fund** –The fund balance decreased slightly in fiscal year 2019-20 by \$405,983 due to expenditures exceeding revenues in fiscal year 2019-20. This fund recognized \$12.3 million more state grant and offsetted by contract and special service expenditures. Many of the contracts executed in this special revenue fund are multi-year and expenditures can vary significantly from year to year.
- **Community Air Protection AB 134 Fund** – This fund was established to account for AB 617 Community Air Protection incentive funds. The fund balance increased by \$57.0 million due to revenues exceeding expenditures in fiscal year 2019-20. This fund recognized \$85.0 million in state grant revenue during the fiscal year 2019-20, and multi-year projects that are identified in approved AB 617 Community Emissions Reduction Plans were executed in this funding.
- **Carl Moyer Program (CMP) AB 923 Fund** – The fund balance decreased by \$13.9 million due to expenditures exceeding revenues in fiscal year 2019-20. Many of the contracts executed in this special revenue fund are multi-year and expenditures can vary significantly from year to year.

**E. General Fund Budgetary Highlights**

Overall, the fiscal year 2019-20 adopted budget represented a \$8.3 million (5.1%) increase in expenditures/transfers out over the fiscal year 2018-19 adopted budget. The fiscal year 2019-20 adopted budget increased due to adding 63 grant funded positions, cost increases associated with the three-year labor agreement and an increase in retirement contribution rates. On a budgetary basis, actual fiscal year 2019-20 General Fund revenues/transfers in exceeded expenditures/transfers out by \$12.2 million.

South Coast AQMD adopts an annual operating budget for the General Fund. During budget preparation, South Coast AQMD estimates its revenues using realistic but conservative methods so as to budget its expenditure appropriations and activities in a prudent manner. As a result, South Coast AQMD adopts budget amendments during the fiscal year to reflect availability of additional revenues for expansion of existing programs and any budget transfers between major accounts.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

The fiscal year 2019-20 amended budget compared to the adopted budget reflected an increase in appropriations of \$21.7 million. The changes to the budget were the result of Governing Board actions that allocated additional funding after the budget was adopted. Also, changes can be attributed to Governing Board approved use of unassigned fund balance for program needs that were unknown at the time the budget was developed.

Additional funding was appropriated during fiscal year 2019-20 from the following:

EPA - \$1,855,000 for the following programs: Photochemical Assessment Monitoring Stations (PAMS), PM 2.5 Monitoring, Science to Achieve Results (STAR) research grant for low cost air monitoring sensors, the National Air Toxics Monitoring Program, Near Road NO<sub>2</sub> and enhanced particulate monitoring programs.

State Grants - \$5,231,00 to implement the AB 617 program for community air monitoring and the development of community emission reduction plans.

Rule 1118 Mitigation Fund - \$117,000 to assist in conducting the fifth Multiple Air Toxics Exposure Study (MATES V).

Rule 1180 Special Revenue Fund – \$7,493,000 for the installation and operation of community air monitoring stations near refineries.

VW Mitigation Fund - \$447,000 to administer and implement Zero Emission Class 8 Freight and Port Drayage Truck projects. Also, to administer and implement Combustion Freight and Marine projects.

Unassigned Fund Balance - \$6,541,000 for specialized legal services, elevator upgrade and renovation, legislative representation in Sacramento, office data cable infrastructure, cafeteria and security monitoring equipment, replacement of air monitoring equipment, air filtration systems in environmental justice schools, transfers out to the Building Infrastructure and Health Effects funds, and the restoration of budget reductions that occurred during the Fiscal Year 2019-20 budget development.

For fiscal year 2019-20, actual revenues were \$7.6 million or 4.3% higher than the final budget and expenditure savings were \$15.9 million or 8.4%.

Actual revenue was higher than the final budget primarily due to Penalty and Settlement revenue being higher than anticipated. Also, State Grant revenue was

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

higher than expected due to receipt of and reimbursement of AB 617 expenditures in June 2020 that was anticipated to be received in FY 2020-21.

The expenditure savings can be primarily attributed to various fiscal measures implemented in the second half of the fiscal year due to uncertainty stemming from the COVID-19 pandemic. The fiscal measures implemented included a hiring freeze and spending reductions in Services and Supplies and Capital Outlays.

**F. Capital Assets and Debt Administration**

**Capital Assets**

South Coast AQMD's investment in capital assets is mostly for its governmental activities. The book value was \$38.5 million (net of accumulated depreciation of \$99.5 million) as of June 30, 2020. This investment in capital assets includes land, buildings, laboratory equipment, air monitoring stations, intangible assets (internally generated software) and South Coast AQMD fleet vehicles. Depreciation on capital assets is recognized in the Government-wide financial statements.

Additional information on the capital assets can be found in Note V under the Notes to the Basic Financial Statements section.

**Long-Term Debt**

At the end of the current fiscal year, South Coast AQMD had total long-term debt outstanding of \$31.9 million, including the current portion of \$5.6 million. The amount of \$15.6 million represents the Pension Obligation Bonds. The 1995 series issued in December 1995 (outstanding balance of \$917,324 million) and the 2004 series issued in June 2004 (outstanding balance of \$14.7 million) retired the Unfunded Actuarial Accrued Liability due to San Bernardino County Employees' Retirement Association as of June 30, 2004. Other long-term debt includes general liability claims and workers' compensation claims payable of \$938,163 and compensated absences of \$15.3 million.

Additional information on South Coast AQMD's long-term debt can be found in Note VII under the Notes to the Basic Financial Statements section of this report.

**G. Economic Factors and Next Year's Budget and Rates**

The fiscal year 2020-21 expenditure budget decreased by 11.3% compared to the fiscal year 2019-20 amended budget. The budget reflects a decrease of \$17.1 million in expenditures from the fiscal year 2019-20 Amended Budget and a \$2.1 million increase from the fiscal year 2019-20 Adopted Budget. The increase in expenditures from the fiscal year 2019-20 Adopted Budget can be attributed to an increase in debt

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
MANAGEMENT'S DISCUSSION AND ANALYSIS  
June 30, 2020**

service. In addition, the FY 2020-21 Adopted Budget reflect increases in expenditures for grant funded programs in the major objects of services/supplies and capital outlays.

In fiscal year 2020-21, revenues are projected to increase by approximately \$2.1 million from the fiscal year 2019-20 adopted budget. The increase in revenue can be mainly attributed additional grant funding for the AB 617 Community Air Protection Program. Nevertheless, in recent years, South Coast AQMD's revenues have not kept pace with program costs mainly due to increases in retirement rates as the result of market losses to the retirement system's investments.

Moreover, since fiscal year 1991-92, the South Coast AQMD has reduced staffing and program costs despite increased program requirements. The fiscal year 2020-21 expenditure budget is \$173.0 million and includes 946 authorized positions. Compared to fiscal year 1991-92, this reflects a reduction of 19% in authorized positions. Program costs, however, will exceed the fiscal year 1991-92 budget by \$60.0 million (approximately 53%). Using inflation-adjusted dollars, however, this year's budget request is 13% less than the budget approved in fiscal year 1991-92.

#### **H. Requests for Information**

This financial report is designed to provide a general overview of South Coast AQMD's finances for readers of the financial statements. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Finance Office, South Coast Air Quality Management District, 21865 Copley Drive, Diamond Bar, CA 91765-4182.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET  
TO THE GOVERNMENT-WIDE STATEMENT OF NET POSITION  
June 30, 2020**

Total fund balances – total governmental funds	\$ 935,061,004
--	----------------

Amounts reported for governmental activities in the Statement of Net Position are different because:

Capital assets used in governmental activities are not current financial resources and therefore are not reported in the Governmental Funds Balance Sheet. These capital assets net of accumulated depreciation are reported in the Statement of Net Position as capital assets of South Coast AQMD as a whole.	38,515,020
---	------------

Deferred outflows of resources are not current financial resources and therefore are not reported in the Governmental Fund Balance Sheet.	79,617,581
---	------------

Interest payable on long-term debt does not require current financial resources. Therefore, interest payable is not reported as a liability in Governmental Funds Balance Sheet.	(2,727,103)
--	-------------

Long-term liabilities and deferred inflows are not due and payable in the current period and accordingly are not reported as fund liabilities and deferred inflows. All liabilities and deferred inflows of resources, both current and long-term, are reported in the Statement of Net Position.

Net pension liability	(233,891,405)
Net OPEB liability	(3,627,000)
General liability	(73,000)
Workers' compensation	(865,163)
Compensated absences	(15,333,222)
Pension obligation bonds	(15,637,323)
Deferred inflows of resources related to pension and OPEB	(18,464,189)
Net position of governmental activities	\$ 762,575,200

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
RECONCILIATION OF THE GOVERNMENTAL FUNDS STATEMENT OF  
REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES TO THE  
GOVERNMENT-WIDE STATEMENT OF ACTIVITIES  
For the Year Ended June 30, 2020**

Net change in fund balances – total governmental funds	\$ 77,921,267
Amounts reported for governmental activities in the Statement of Activities are different because:	
Governmental funds report capital outlays as expenditures. However, in the Government-wide Statement of Activities and Changes in Net Position, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount of capital outlays recorded in the current period.	8,872,504
Depreciation and miscellaneous expenses on capital assets is reported in the Government-wide Statement of Activities and Changes in Net Position, but they do not require the use of current financial resources. Therefore, depreciation expense is not reported as expenditures in governmental funds.	(5,859,086)
Pension expense is reported in the Government-wide Statement of Activities and Changes in Net Position, but they do not require the use of current financial resources.	(46,281,985)
Pension contribution made by employer in current fiscal year reduce the net pension liability and do not require current resources.	33,202,615
OPEB expense is reported in the Government-wide Statement of Activities and Changes in Net Position, but they do not require the use of current financial resources.	(353,900)
OPEB contribution made by employer in current fiscal year reduce the net OPEB liability and do not require current resources.	240,984
Repayment of bond principal is an expenditure in the governmental funds. For SCAQMD as a whole, principal payments reduce the liabilities in the Government-wide Statement of Net Position and do not result in an expense in the Statement of Activities and Changes in Net Position.	3,686,640
Accrued interest expense on long-term debt is reported in the Government-wide Statement of Activities and Changes in Net Position, but it does not require the use of current financial resources. Therefore, accrued interest expense is not reported as an expenditure in governmental funds. The amount represents the change in accrued interest from the prior year.	40,728
Long-term compensated absences and general liability/workers' compensation claims are reported in the Government-wide Statement of Activities and Changes in Net Position, but they do not require the use of current financial resources. Therefore, they are not reported as expenditures in governmental funds. The following amounts represent the change from the prior year:	
Compensated absences	(1,646,843)
General and auto liability/workers' compensation claims	466,846
Change in net position of governmental activities	<u>\$ 70,289,770</u>

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**A. The Financial Reporting Entity**

The South Coast Air Quality Management District (South Coast AQMD) was established pursuant to the Lewis Air Quality Management Act on February 1, 1977, commencing at Section 40400 of the Health and Safety Code of the State of California. South Coast AQMD encompasses all of Orange County and parts of Los Angeles, San Bernardino, and Riverside Counties. South Coast AQMD operates a network of air monitoring stations, analyzes air quality data and establishes maximum emission levels for stationary, commercial, and industrial facilities that are enforced through South Coast AQMD's permit system.

As defined by generally accepted accounting principles (GAAP) in the United States of America that are established by the Governmental Accounting Standards Board (GASB), the financial reporting entity consists of the primary government and its component units, which are legally separate organizations. The financial statements of South Coast AQMD are prepared in accordance with GAAP.

The accompanying financial statements present the financial activities of South Coast AQMD (primary government) and its blended component unit, South Coast Air Quality Management District Building Corporation (Corporation), an entity for which South Coast AQMD is considered to be financially accountable. Legally separate from South Coast AQMD and as a tax-exempt entity, the Corporation is reported as a governmental fund.

The Corporation was incorporated as a nonprofit corporation under the laws of the State of California on September 21, 1978. The purpose of the Corporation is to finance the acquisition and improvement of a building complex/headquarters of South Coast AQMD. South Coast AQMD Governing Board approves the appointment of the Corporation's Board of Directors. South Coast AQMD has had significant transactions with the Corporation for the construction and improvement of South Coast AQMD's headquarters facility. It is legally separate from South Coast AQMD and a tax-exempt entity under Section 501(c)(4) of the Internal Revenue Code.

Separate financial statements for the Corporation may be obtained from South Coast AQMD's Finance Office located at 21865 Copley Drive, Diamond Bar, California 91765.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**B. Measurement Focus, Basis of Accounting, and Financial Statement Presentation**

The basic financial statements of South Coast AQMD are composed of the following:

- Government-wide financial statements
- Governmental fund financial statements
- Notes to the basic financial statements

**Government-wide Financial Statements**

The government-wide financial statements (Statement of Net Position and Statement of Activities) present summaries of governmental and business-type activities of South Coast AQMD as a whole, excluding fiduciary activities. These statements are presented using the economic resources measurement focus and the accrual basis of accounting. Accordingly, all of South Coast AQMD's assets and liabilities including capital assets and long-term liabilities are included in the accompanying Statement of Net Position. Revenues are recognized in the period in which they are earned while expenses are recognized in the period in which the liability is incurred, regardless of the timing of related cash flows.

Amounts paid to acquire capital assets are capitalized as assets in the government-wide financial statements rather than reporting them as expenditures. Proceeds of long-term debt are also recorded in the government-wide financial statements as a liability, rather than as another financing source. Amounts paid to reduce long-term indebtedness of the reporting government are reported as a reduction of the related liability, rather than as an expenditure.

The Statement of Activities demonstrates the degree to which the direct expenses of a given functional activity are offset by program revenues directly related to the functional activity. Direct expenses are those that are clearly identifiable with a specific functional activity.

The types of transactions reported as program revenues are reported in three categories: 1) fees and charges including stationary source fees from permitted facilities and mobile source fees from motor vehicle registrations; 2) operating grants and subventions that are in support of air pollution program activities; and 3) long-term emission reduction projects which include capital grants and contributions which are mostly restricted. Program expenses are subtracted from program revenues to present the net cost of each functional activity. Interest income and other miscellaneous items not properly included among program revenues are reported as general revenues.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

South Coast AQMD's functional activities are broken down into the following ten categories:

- Advance clean air technology
- Ensure compliance with clean air rules
- Customer service and business assistance
- Develop programs to achieve clean air
- Develop rules to achieve clean air
- Monitoring air quality
- Timely review of permits
- Policy support
- Interest on long-term debt, and
- Long-term emission reduction projects

When both restricted and unrestricted resources are available for use, it is South Coast AQMD's policy to use restricted resources first within the restricted activities, then use the unrestricted resources as they are needed.

Fund financial statements for the primary government's governmental and fiduciary funds are presented after the government-wide financial statements.

**Governmental Fund Financial Statements**

Governmental fund financial statements include a Balance Sheet and a Statement of Revenues, Expenditures, and Changes in Fund Balances for all major governmental funds and non-major funds aggregated. The funds designated as major funds are determined by a mathematical calculation consistent with GASB Statement No. 34.

South Coast AQMD has presented all major funds that met those qualifications. These major funds are Air Quality Investment Fund, GHG Reduction Projects Special Revenue Fund, Community Air Protection AB 134 Fund, and Carl Moyer Program (CMP) AB 923 Special Revenue Fund, in addition to the General Fund.

A reconciliation of the Fund Financial Statements to the Government-wide Financial Statements is provided to explain the differences as a result of the integrated approach of GASB Statement No. 34 reporting.

All governmental funds are accounted for on a spending or current financial resources measurement focus and the modified accrual basis of accounting. Accordingly, only current assets and current liabilities are generally included in the Balance Sheets. The Statement of Revenues, Expenditures, and Changes in Fund Balances presents increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Revenues are recognized in the accounting period in which they become

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

measurable and available to finance expenditures of the current period. They are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, South Coast AQMD considers revenues to be available if they are collected generally within 90 days after year-end to be available to finance the expenditures accrued for the reporting period. The primary revenue sources which have been treated as susceptible to accrual by South Coast AQMD are as follows: emissions flat fees, permit fees, air toxics “Hot Spots” fees, and source test/analysis fees from stationary sources; clean fuels revenues from stationary sources; federal and state grants under grants and subventions and interest under general revenues. All other revenue items are recorded when received in cash. Expenditures are recognized in the accounting period in which the related fund liability is incurred, if measurable, except for debt service expenditures, as well as expenditures related to compensated absences, which are recognized when payment is due.

Amounts expended to acquire capital assets are recorded as capital outlay expenditures in the year that resources were expended rather than recording them as fund assets. The proceeds of long-term debt are recorded as other financing sources rather than as fund liability. Amounts paid to reduce long-term indebtedness are reported as debt service expenditures.

**Fiduciary Fund Financial Statements**

Fiduciary Fund financial statements include a Statement of Fiduciary Net Position and Statement of Changes in Fiduciary Net Position. These funds represent agency funds which are custodial in nature (assets equal liabilities) and do not involve the recording of revenues and expenses or the measurement of results of operations. The reporting focus is upon net position and changes in net position. Fiduciary funds also include the Retirement Benefits Trust Fund for LACERA OPEB (see fund type in Note 1C). These funds are accounted for in the accrual basis of accounting.

**C. Fund Types and Major Funds**

As noted earlier, the funds designated as major funds are determined in accordance with GASB Statement No. 34.

South Coast AQMD reports the following major governmental funds:

General Fund – This is the primary operating fund of South Coast AQMD and is used to record transactions relating to its general business operations. It is also used to account for all revenues and expenditures that are not required to be accounted for in another fund.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

Special Revenue Funds – These funds are used to record transactions applicable to specific revenue sources that are legally restricted to expenditures for specific purposes. The following are South Coast AQMD’s major special revenue funds:

- Air Quality Investment Fund – To account for revenue from employers with 250 or more employees at a worksite who are subject to Rule 2202. This revenue is used to purchase emissions reductions credits to meet the required target. To date, \$47.9 million in projects have been awarded to purchase over 34,071 tons of emission reductions. Starting April 2017, this fund was used to process rebates for South Coast AQMD’s Residential Electric Lawn Mower Rebate Program. By the end of 2019, \$279,404 rebates were processed. As of June 30, 2020, a total of 1,608 lawn mowers were exchanged with total emission reductions of 3.02 tons and \$333,151 total fund spent.
  - RECLAIM AQIP – Established in fiscal year 2001 to separately account for the generation of NOx (Oxides of Nitrogen) credits at stationary and mobile sources for use by certain small or new RECLAIM (Regional Clean Air Incentives Market) participants. AQIP stands for Air Quality Investment Program.
  - RECLAIM and Executive Order Mitigation – Established in fiscal year 2001 to account for mitigation fee payments made by power generators in lieu of emission offsets. Proceeds are used to generate RECLAIM Trading Credits (RTCs) to offset excess emissions.
  - Rule 1121 Mitigation Fee Program – Established in fiscal year 2004 to issue program announcements for projects under the Rule 1121 Mitigation Fee Program. Under Rule 1121 - Control of Nitrogen Oxides (NOx) from Residential Type, Natural Gas Fired Water Heaters, emission mitigation fees are collected from water heater manufacturers to fund stationary and mobile source emission reduction projects targeted at offsetting NOx emission.
- Green House Gas (GHG) Reduction Projects Special Revenue Fund – Established in fiscal year 2016 to account for the projects funded by CARB’s Low Carbon Transportation Green House Gas Reduction Fund Investments.
- Community Air Protection AB 134 Fund – Established in fiscal year 2018 to recognize the first allocation of AB 617 Community Air Protection incentive funds (AB 134 revenue) from CARB. This fund will also be used to recognize additional Community Air Protection incentive funds awarded and received by CARB. These funds are intended to implement projects that are identified in approved 617 Community Emissions Reduction Plans and in other communities that are disproportionately impacted by air pollution. Requirements for expenditure of these funds will be specified in the grant agreements provided by CARB.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

- Carl Moyer Program (CMP) AB 923 Fund - Established in fiscal year 2008 to provide additional funding for the Carl Moyer Program from an adjustment to the tire fee and authorizes local air districts to increase motor vehicle registration fees by up to \$2 for programs to reduce air pollution. AB 923 has expanded the Carl Moyer incentive program to include agricultural sources of air pollution as well as buses, cars and on and off-road equipment. The program targets reductions in nitrogen oxide, hydrocarbon, and particulate matter emissions. About \$4 million per year in AB 923 funds are used to fund projects as match requirement to the Carl Moyer Program.

South Coast AQMD reports the following fiduciary fund types:

- Agency Funds - Used to account for funds due to others that are not accounted for in the other funds and acts as a temporary custodian.
  - 1) Accounting Agency Fund - Used to account for unidentified payments that require additional research before final disposition.
  - 2) 457 Plan Administration Revenue Sharing Fund - Used to account for funds that, the 457 plan administrator, transfers to South Coast AQMD as part of a revenue-sharing agreement. After applicable expenses are paid, residual funds are returned to the 457 plan administrator to be distributed among participants based on an approved formula.
- Retirement Benefit Trust Fund - Used to account for resources to be transferred to Los Angeles County Employees Retirement Association (LACERA) defined benefit Other Post Employment Benefit (OPEB) irrevocable trust. Note X contains more information about South Coast AQMD's OPEB plans.

**D. Assets, Liabilities and Deferred Outflows/Inflows of Resources, and Net Position/Fund Balance**

**1. Cash, Pooled Cash, and Investments**

Cash includes amounts to conduct daily operations of South Coast AQMD in demand deposits with the Los Angeles County Treasurer and various financial institutions. South Coast AQMD deposits virtually all of its cash with the Treasurer of the County of Los Angeles. South Coast AQMD's deposits, along with funds from other local agencies such as the county government, other school districts, and special districts, make up a pool, which the County Treasurer manages for investment purposes. Earnings from the pooled investments are allocated to participating funds based on average investments in the pool during the allocation period.

All South Coast AQMD-directed investments are to diversify South Coast AQMD's investments and are in compliance with South Coast AQMD's investment policy and

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

Los Angeles County Treasury investment guidelines. The guidelines limit specific investments to United States Agency securities. The South Coast AQMD securities portfolio is held by the County Treasurer. Interest earned on investments is recorded as revenue of the fund from which the investment was made. All South Coast AQMD investments are stated at fair value based on quoted market prices.

**2. Capital Assets and Depreciation**

Under GASB Statement No. 34, all capital assets, whether owned by governmental activities or business-type activities are recorded and depreciated in the government-wide financial statements. No long-term capital assets or depreciation are shown in the governmental funds financial statements.

Capital assets, which include land, equipment, vehicles, furniture, buildings and improvements, software and other intangible assets are reported at cost unless obtained by donation in which case the assets are recorded at the acquisition value at the date of receipt. Capital asset purchases with values of at least \$5,000 and with an expected useful life of three years or more are capitalized.

The costs of normal maintenance and repairs that do not add to the value of the capital asset or materially extend capital assets lives are not capitalized. Major improvements are capitalized and depreciated over the remaining useful lives of the related capital assets. Assets disposed of or no longer required for its existing use are removed from the records at actual or estimated cost.

Depreciation is charged as an expense against operations, and accumulated depreciation is reported on the respective balance sheet. Property, plant, equipment, vehicles and furniture of South Coast AQMD are depreciated using the straight-line method over the following useful lives:

<u>Assets</u>	<u>Years</u>
Buildings and Improvements	15-30
Equipment, vehicles and furniture	5-7
Software and Systems	3-5

**3. Inventories**

Inventories as determined by annual physical counts are valued at cost using the first-in/first-out (FIFO) method. They consist principally of office, computer, cleaning and laboratory supplies. The cost is recorded as an expense as inventory items are consumed.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**4. Compensated Absences**

Regular full-time employees accumulate earned but unused vacation time, sick leave, compensatory time, and other leave time. Certain restrictions apply with respect to the accumulation of leave time and its payment at termination. All vacation, sick leave, compensatory time, and other leave time are accrued when incurred in the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignation and retirement.

**5. Self-Insurance**

South Coast AQMD is self-insured for general, automobile, and workers' compensation liabilities (See note VIII).

**6. Long-term Obligations**

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net position. Bond premiums and discounts, are deferred and amortized over the life of the bonds using the straight-line method. Bonds payable are reported net of applicable bond premium or discount.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

**7. Deferred Outflows/Inflows of Resources**

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time.

**8. Pensions**

For purposes of measuring the net pension liability, deferred outflows of resources, deferred inflows of resources, and pension expense related to pensions, information

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

about the fiduciary net position of the San Bernardino County Employees' Retirement Association (SBCERA) and Los Angeles County Employees' Retirement Association (LACERA) and additions to/deductions from SBCERA's fiduciary net position have been determined on the same basis as they are reported by SBCERA and LACERA. For this purpose, employer and employee contributions are recognized in the period the related salaries are earned and become measurable pursuant to formal commitments, statutory or contractual requirements, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms, and investments are reported at fair value.

**9. Other Postemployment Benefits (OPEB)**

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the LACERA's plan (OPEB Plan) and additions to/deductions from the OPEB Plan's fiduciary net position have been determined on the same basis. For this purpose, benefit payments are recognized when currently due and payable in accordance with the benefit terms. Investments are reported at fair value, which are derived from quoted market prices.

**10. Net Position and Fund Balance Classifications**

Net position represents the difference between assets and deferred outflow of resources, and liabilities and deferred inflow of resources on the government-wide financial statements. Net position is classified in the following categories:

Net Investment in Capital Assets

This category groups all capital assets, including infrastructure and intangibles, into one component of net position. Accumulated depreciation and the outstanding balances of debt that are attributable to the acquisition, construction or improvement of these assets reduce this category.

Restricted Net Position

This category presents external restrictions imposed by creditors, grantors, contributors or laws or regulations of other governments and restrictions imposed by law through constitutional provisions enabling legislation.

Unrestricted Net Position

This category represents the residual net position of South Coast AQMD in excess of what can properly be classified in one of the other two categories mentioned above.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

Fund Balance Classifications

The governmental fund financial statements present fund balances based on classifications that comprise hierarchy that is based primarily on the extent to which South Coast AQMD is bound to honor constraints on the specific purposes for which amounts can be spent.

The fund balance classifications used in the governmental fund financial statements are as follows:

*Nonspendable* – amounts that cannot be spent either because they are not in spendable form or because they are legally or contractually required to be maintained intact.

*Restricted* – amounts that can be spent only for specific purposes because of constitutional provisions or enabling legislation or because of constraints that are externally imposed by creditors, grantors, contributors, or the laws or regulations of other governments.

*Committed* – amounts that can be spent only for specific purposes determined by a formal action of the government's highest level of decision-making authority. The Governing Board, as the highest level of decision-making authority, has the ability to commit fund balances through the adoption of a resolution. These committed amounts cannot be used for any other purpose unless the Governing Board removes or modifies the use through the adoption of a subsequent resolution.

*Assigned* – amounts that do not meet the criteria to be classified as restricted or committed but that are intended to be used for specific purposes. South Coast AQMD's adopted policy requires the Board to assign amounts to specific purposes.

*Unassigned* – this classification includes the residual fund balance for the General Fund. It also includes the negative residual fund balance of any other governmental fund that cannot be eliminated by offsetting assigned fund balance amounts.

When both restricted and unrestricted resources are available for use, it is South Coast AQMD's policy to use restricted resources first and then unrestricted resources as they are needed. When using unrestricted fund balance amounts, South Coast AQMD's Governing Board approved policy is to use committed amounts first, followed by assigned and then unassigned.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

The following schedule shows the details of the fund balances as of June 30, 2020:

See accompanying notes to the basic financial statements.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**E. Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the revenues and expenses during the reporting period. Actual results could differ from those estimates.

**F. Adoption of New GASB Pronouncements**

***GASB Statement No. 95, Postponement of the Effective Dates of Certain Authoritative Guidance***

GASB issued this Statement in May 2020. The objective of this Statement is to provide temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. The effective dates of certain provisions contained in the pronouncements are postponed by one year: Statement No. 83 - Certain Asset Retirement Obligations, Statement No. 84 - Fiduciary Activities, Statement No. 88 - Certain Disclosures Related to Debt, including Direct Borrowings and Direct Placements, Statement No. 89 - Accounting for Interest Cost Incurred before the End of a Construction Period, Statement No. 90 - Majority Equity Interests, Statement No. 91 - Conduit Debt Obligations, Statement No. 92 - Omnibus 2020, Statement No. 93 - Replacement of Interbank Offered Rates, Implementation Guide No. 2017-3 - Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions (and Certain Issues Related to OPEB Plan Reporting), Implementation Guide No. 2018-1 - Implementation Guidance Update 2018, Implementation Guide No. 2019-1 - Implementation Guidance Update 2019, and Implementation Guide No. 2019-2 - Fiduciary Activities. The effective dates of the following pronouncements are postponed by 18 months: Statement No. 87 - Leases, and Implementation Guide No. 2019-3 - Leases. South Coast AQMD adopted this statement in fiscal year 2020.

**II. CASH, POOLED CASH AND INVESTMENTS**

The following is a summary of the cash, pooled cash, and investments for the primary government (including fiduciary funds) at June 30, 2020:

	Primary Government
Cash on hand	\$ 590,292
Cash in bank	501,014
Pooled cash	<u>976,512,729</u>
Cash, pooled cash, and investments	<u>\$ 977,604,035</u>

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**CASH**

At June 30, 2020, the carrying amount of South Coast AQMD's bank deposits was \$501,014 and the bank balance was \$512,516. The amount covered and insured by Federal Deposit Insurance Corporation (FDIC) was up to \$250,000. The bank deposits and the bank balance exceeds FDIC by \$251,014 and \$262,516, respectively. Management believes that South Coast AQMD is not exposed to any significant credit risk related to cash in bank. Cash on hand consists of cash and checks not deposited as of June 30, 2020.

**POOLED CASH**

South Coast AQMD's pooled cash and investments are held in the Los Angeles County Pooled Surplus Investment Fund Portfolio (PSI), the Los Angeles County Specific Purpose Investment Portfolio (SPI), and the State of California Local Agency Investment Fund (LAIF). Pooled cash and investments are held in accordance with California Government Code, South Coast AQMD Investment Policy, Los Angeles County Treasurer Investment Policy and LAIF Policies, Goals, and Objectives.

**Los Angeles County Pooled Surplus Investment Fund Portfolio (PSI)**

South Coast AQMD is a voluntary participant in the Los Angeles County Pooled Surplus Investment Fund Portfolio (PSI), an external investment pool managed by the Los Angeles County Treasurer who reports on a monthly basis to its Board of Supervisors. Its Treasury Oversight Committee reviews and monitors its investment policy. The investment policy is governed by applicable California Government Code. Investments held are stated at fair value. The fair value of pooled cash is determined monthly and is based on current market prices.

**State of California Local Agency Investment Fund (LAIF)**

South Coast AQMD is a voluntary participant in the State of California Local Agency Investment Fund (LAIF), an external investment pool that is regulated by California Government Code Section 16429 under the oversight of the Treasurer of the State of California.

LAIF is part of the Pooled Money Investment Account (PMIA) and has oversight provided by the Pooled Money Investment Board (PMIB) and an in-house Investment Committee. The PMIB Board members are the State Treasurer, Director of Finance and the State Controller. Additionally, LAIF has oversight by the Local Investment Advisory Board, which consists of five members, as designated by statute. The Chairman is the State Treasurer, who appoints the other four members to two-year terms.

The fair value of South Coast AQMD's investment in this pool is reported in the accompanying financial statements at amounts based upon South Coast AQMD's pro-

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

rata share of the fair value provided by LAIF for the entire LAIF portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records of LAIF, which are recorded on an amortized cost basis.

The following table summarizes South Coast AQMD's cash and pooled cash and maturities at June 30, 2020:

	Fair Value	Investment Maturities		
		<1 Year	1-2 Years	2-3 Years
Cash:				
On hand	\$ 590,292	\$ -	\$ -	\$ -
In bank	501,014	-	-	-
Total cash	<u>1,091,306</u>	<u>-</u>	<u>-</u>	<u>-</u>
Pooled cash:				
Los Angeles County				
Pooled Surplus Investment (PSI)	936,867,544	640,911,087	295,956,457	-
Local Agency				
Investment Fund (LAIF)	<u>39,645,185</u>	<u>39,645,185</u>	<u>-</u>	<u>-</u>
Total pooled cash	<u>976,512,729</u>	<u>680,556,272</u>	<u>295,956,457</u>	<u>-</u>
Total cash and pooled cash investments	\$ <u>977,604,035</u>	\$ <u>680,556,272</u>	\$ <u>295,956,457</u>	\$ <u>-</u>

## INVESTMENTS

South Coast AQMD categorized its fair value measurement within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the assets. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 is significant unobservable inputs.

### Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment is, the greater the sensitivity of its fair value to changes in interest rates. As a means of limiting its exposure to declines in fair value, the South Coast AQMD Investment Policy limits its investment portfolio of SPI with the County of Los Angeles to maturities of less than five years at time of purchase and the weighted average maturity of the SPI portfolio may not exceed three years.

### Credit Risk

Credit risk is the risk of default or the inability of an issuer of an investment to fulfill its obligation to the holder of the investment. South Coast AQMD mitigates its credit risk in the SPI portfolio generally by following its three primary investment objectives, in order of safety, liquidity, and yield. South Coast AQMD's Investment Policy further requires only permitted investments with specific credit quality requirements.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

The Los Angeles County PSI the State of California LAIF, and the United States Treasury Securities are both unrated as to credit quality.

**Concentration of Credit Risk**

Concentration of credit risk is the risk of loss attributed to the magnitude of a investments in a single issuer. South Coast AQMD's Investment Policy mitigates concentration of credit risk through diversification requirements so that no one type of issuer or issue will have a disproportionate impact on the portfolio.

**Custodial Credit Risk**

Custodial credit risk for deposits is the risk that, in the event of the failure of a depository financial institution, South Coast AQMD will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. Custodial credit risk for investments is the risk that South Coast AQMD will not be able to recover the value of its investment securities that are in the possession of an outside party. South Coast AQMD's deposits are fully insured by the FDIC, pooled cash with the Los Angeles County PSI and the State of California LAIF are not subject to custodial credit risk.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**III. DUE FROM OTHER GOVERNMENT AGENCIES AND ACCOUNTS RECEIVABLE**

Due from other government agencies at June 30, 2020 consists of the following:

California Air Resources Board (CARB)	\$ 14,092,432
California Energy Commission (CEC)	1,084,424
Department of Energy	22,141
Department of Homeland Security (DHS)	665,362
Department of Motor Vehicles	
AB 2766, SB 1928, AB 923	16,933,208
Environmental Protection Agency (EPA)	
DERA Bus Administration	2,273,195
National Air Toxics Trend Station (NATTS)	180,137
Section 103 Community Scale Air Toxics Grant	73,629
Section 103 PM 2.5 Grant	312,523
Section 105 Air Grant	3,718,101
STAR Grant	134,109
Targeted Air Shed Grant Administration	<u>126,168</u>
Total	<u><u>\$ 39,615,429</u></u>

Accounts Receivable consists of the following at June 30, 2020:

Air Toxics "Hot Spots", Emission Fees, Permits, Annuals and Source Testing	\$ 5,906,373
Miscellaneous Receivables

**June 30, 2020**

South Coast AQMD's Governing Board approved the following:

- Transfer of \$1,000,000 from General Fund to the Infrastructure Improvement Fund to enable the implementation of critical projects and programs.
- Transfer of total \$1,480,592 from General Fund to the Health Effects Research Fund to fund a number of research projects.
- Transfer of \$45,000 from General Fund to the Air Filtration Fund as part of a settlement with the State of California Attorney General to implement a South Coast AQMD SEP.
- Transfer of \$96,631 from Air Toxics Fund to General Fund for administrative costs.
- Transfer of \$2,000,000 from Air Quality Investment Fund to the Clean Shipping Technology Demonstration Special Revenue Fund to install, test and demonstrate on one of MSC Ship management Limited Tier 2 vessels.
- Transfer of \$750,000 from the Air Quality Investment Fund to the Advanced Technology, Outreach and Education Fund to participate in the Commercial Electric Lawn and Garden Equipment Incentive and Exchange Program.
- Transfer of \$113,332 from Air Quality Investment Fund to General Fund for administrative costs.
- Transfer of \$7,977 from CARB ERC Bank Fund to General Fund for administrative costs.
- Transfer of \$56,049 from the BP ARCO Settlement Projects Fund to the General Fund for the purchase of the last 6 filter-based samplers.
- Transfer a total of \$407,542 from Rule 1118 Mitigation Fund to General Fund. The transfer included \$119,809 for administrative costs and \$287,733 to support the MATES V enhanced monitoring program.
- Transfer of \$1,179,464 from HEROS II Special Revenue Fund to General Fund for administrative costs.
- Transfer of \$2,209 from AB 1318 Mitigation Fees Fund to General Fund for administrative costs.
- Transfer of \$6,000,000 from Advanced Technology Goods Movement Fund to the Clean Fuels Program Fund for project completion.
- Transfer of \$125,917 from GHG Reduction Projects to General Fund for administrative costs.
- Transfer of \$72,485 from Air Filtration Fund to General Fund for administrative costs.
- Transfer of \$30,794 from the Community Air Protection AB 134 Fund to the General Fund for administrative costs.
- Transfer of \$5,498,165 from the Rule 1180 Special Revenue Fund to the General Fund to appropriate funds, issue solicitations and purchase orders for equipment.
- Transfer of \$3,000,000 from Carl Moyer Program AB 923 Fund to the Voucher Incentive Program Fund to continue funding truck replacement projects on a first-come, first-served basis.

**VII. LONG-TERM DEBT**

The following is a summary of long-term obligation transactions of South Coast AQMD for the year ended June 30, 2020:

	<b><u>Balance July 1, 2019</u></b>	<b><u>Addition</u></b>	<b><u>Reduction</u></b>	<b><u>Balance June 30, 2020</u></b>	<b><u>Amounts Due Within One Year</u></b>	<b><u>Amounts Due in More Than One Year</u></b>
<b>Governmental Activities:</b>						
Claims payable:						
General liability	\$ 42,500	\$ 81,914	\$ 51,414	\$ 73,000	\$ 33,000	\$ 40,000
Workers' compensation	1,362,509	2,147,306	2,644,652	865,163	233,594	631,569
Compensated absences	13,686,379	2,977,371	1,330,528	15,333,222	1,470,080	13,863,142
Pension Obligation Bonds	<u>19,323,964</u>	<u>-</u>	<u>3,686,640</u>	<u>15,637,324</u>	<u>3,840,443</u>	<u>11,796,881</u>
Total	\$ <u>34,415,352</u>	\$ <u>5,206,591</u>	\$ <u>7,713,234</u>	\$ <u>31,908,709</u>	\$ <u>5,577,117</u>	\$ <u>26,331,592</u>

In prior years, claims payable and compensated absences have been liquidated primarily by the General Fund.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**1995 Pension Obligation Bonds**

On December 1, 1995, South Coast AQMD, jointly with the County of San Bernardino, issued bonds to retire the Unfunded Actuarial Accrued Liability (UAAL) due to San Bernardino County Employees' Retirement Association (SBCERA). South Coast AQMD issued a \$34,261,896 aggregate principal amount to refund its portion of the obligation to SBCERA. The interest rates range from 5.68% to 7.72% with maturity date of August 1, 2021. The purpose of this refunding was to lower the cost to South Coast AQMD through the issuance of bonds at rates that are lower than those assessed by SBCERA and to restructure its debt service from an ascending to a level-debt-service schedule. At the time of refunding these changes were expected to result in estimated total gross debt service savings of \$20,151,420 through June 30, 2022. During the fiscal year ended June 30, 2020, \$511,640 in principal and \$2,553,360 in interest were paid on the bonds. The principal balance outstanding at June 30, 2020 amounted to \$917,324.

The annual payment requirements under the 1995 pension bond obligation are as follows:

<b><u>Year Ending</u></b>				
<b><u>June 30</u></b>		<b><u>Principal</u></b>	<b><u>Interest</u></b>	<b><u>Total</u></b>
2021	\$	475,443	\$ 2,589,557	\$ 3,065,000
2022		<u>441,881</u>	<u>2,623,119</u>	<u>3,065,000</u>
Total	\$	<u>917,324</u>	\$ <u>5,212,676</u>	\$ <u>6,130,000</u>

**Series 2004 Pension Obligation Bonds**

On June 29, 2004, South Coast AQMD issued and sold taxable pension obligation bonds to retire the Unfunded Actuarial Accrued Liability (UAAL) due to the SBCERA. At the time of issuance, it was estimated that the issuance and sale of \$47,030,000 was expected to result in estimated total gross debt service savings of \$22.4 million through August 1, 2023.

The Series 2004 Pension Obligation Bonds are payable on a parity with the 1995 Pension Obligation Bonds. South Coast AQMD may, from time to time, enter into supplemental indentures without the consent of the Bond Owners of the 1995 Bonds or Series 2004 Bonds for the purpose of providing for the issuance of additional series of Pension Obligation Bonds or to refund any other evidences of indebtedness of South Coast AQMD arising pursuant to the Retirement Law. The interest rates range from 4.75% to 5.93% with maturity date of August 1, 2023. During the fiscal year ended June 30, 2020, \$3,175,000 in principal and \$950,622 in interest were paid on the bonds. The principal balance outstanding at June 30, 2020 amounted to \$14,720,000.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

The annual payment requirements under pension bond obligation, Series 2004, are as follows:

<b>Year Ending</b>				
<b><u>June 30</u></b>		<b><u>Principal</u></b>	<b><u>Interest</u></b>	<b><u>Total</u></b>
2021	\$	3,365,000	\$ 763,549	\$ 4,128,549
2022		3,565,000	563,242	4,128,242
2023		3,780,000	348,736	4,128,736
2024		<u>4,010,000</u>	<u>118,897</u>	<u>4,128,897</u>
Total	\$	<u>14,720,000</u>	\$ <u>1,794,424</u>	\$ <u>16,514,424</u>

**Allocation of Interest Expenses**

Total interest expenses on long-term debt for the year ended June 30, 2020 amounted to \$3,463,254. These interest expenses on long-term debt are not meaningfully associated with individual functional activities. Hence, this is considered an indirect expense and should be reported in the Statement of Activities as a separate line.

**VIII. RISK MANAGEMENT**

South Coast AQMD's risk management program is responsible for purchasing insurance when prudent and cost-effective, self-insuring other exposures to loss when feasible.

South Coast AQMD carries \$200 million of all-risk property insurance, with limits of \$100 million on business interruption and \$25 million on earthquake and flood coverage. The limits of liability for general claims is \$10 million. This coverage is supplemented by excess liability policies for boilers & machinery to a limit of \$100 million, and bodily injury/property damage/public officials' errors and emissions/employment practices liability/personal injury to \$15 million. Self-insured retention levels for excess liability is \$250,000. South Coast AQMD maintains \$25 million excess workers' compensation insurance for losses over \$750,000. South Coast AQMD also maintains policies to protect against some criminal conduct and cyber-attacks.

As of June 30, 2020, \$73,000 and \$865,163, respectively, had been reserved for general liability claims and workers' compensation.

An appropriate amount has been recorded in the General Fund's financial statements to the extent that South Coast AQMD anticipates that these amounts will be paid from current resources. While the ultimate amount of losses incurred through June 30, 2020 is dependent on future development based upon information from the independent claims' administrator and others involved with the administration of the

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

programs, South Coast AQMD management believes that the aggregate accrual is adequate to cover such losses.

No significant reduction in insurance coverage occurred during the last three fiscal years. Also, during this period, no claim settlement exceeded insurance coverage.

The following represents changes in the aggregate liabilities for claims of South Coast AQMD's general liability and workers' compensation for the years ended June 30, 2019 and 2020:

	General Liability	Workers' Compensation	Totals
Claims payable, July 1, 2018	\$ 135,000	\$ 960,000	\$ 1,095,000
Current year claims and changes in estimates	22,500	3,533,743	3,556,243
Claims payments	(115,000)	(3,131,234)	(3,246,234)
Claims payable, June 30, 2019	<u>\$ 42,500</u>	<u>\$ 1,362,509</u>	<u>\$ 1,405,009</u>
Claims payable, July 1, 2019	\$ 42,500	\$ 1,362,509	\$ 1,405,009
Current year claims and changes in estimates	81,914	2,147,306	2,229,220
Claims payments	(51,414)	(2,644,652)	(2,696,066)
Claims payable, June 30, 2020	<u>\$ 73,000</u>	<u>\$ 865,163</u>	<u>\$ 938,163</u>

**IX. DEFINED BENEFIT PENSION PLANS**

**San Bernardino County Employees' Retirement Association**

**Plan description**

South Coast AQMD participates in the San Bernardino County Employees' Retirement Association (SBCERA) pension plan - a cost-sharing multiple-employer defined benefit pension plan (the Plan). SBCERA administers the Plan which provides benefits for two membership classifications, General and Safety, and those benefits are tiered based upon date of SBCERA membership. South Coast AQMD only has general membership. Generally, those who become members prior to January 1, 2013 are Tier 1 members. All other members are Tier 2. An employee who is appointed to a regular position, whose service is greater than fifty percent of the full standard of hours required are members of SBCERA, and are provided with pension benefits pursuant to Plan requirements.

The Plan operates under the provisions of the California County Employees' Retirement Law of 1937 (CERL), the California Public Employees' Pension Reform Act of 2013 (PEPRA), and the regulations, procedures and policies adopted by

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

SBCERA's Board of Retirement (Board). The Plan's authority to establish and amend the benefit terms are set by the CERL and PEPRA, and may be amended by the California state legislature and in some cases require approval by the County of San Bernardino Board of Supervisors and/or the SBCERA Board. SBCERA is a tax qualified plan under Section 401(a) of the Internal Revenue Code.

SBCERA is a legally separate entity from South Coast AQMD, not a component unit, and there is no financial interdependency with the County of San Bernardino. For these reasons, the South Coast AQMD's comprehensive annual financial report excludes the SBCERA pension plan as of June 30, 2020. SBCERA publishes its own comprehensive annual financial report that includes its financial statements and required supplementary information, that can be obtained by writing SBCERA at, 348 W. Hospitality Lane, Third Floor, San Bernardino, CA 92415-0014 or visiting the website at: [www.SBCERA.org](http://www.SBCERA.org).

**Benefits Provided**

SBCERA provides retirement, disability, death and survivor benefits. The CERL and PEPRA establish benefit terms. Retirement benefits are calculated on the basis of age, average final compensation and service credit as follows:

	<b>General – Tier 1</b>	<b>General – Tier 2</b>
<b>Final Average Compensation</b>	Highest 12 months	Highest 36 months
<b>Normal Retirement Age</b>	Age 55	Age 55
<b>Early Retirement: Years of service required and/or age eligible for</b>	Age 70 any years	Age 70 any years
	10 years age 50	5 years age 52
	30 years any age	N/A
<b>Benefit percent per year of service for normal retirement age</b>	At normal retirement age, 2% per year of final average compensation for every year of service credit	At age 67, 2.5% per year of final average compensation for every year of service credit
<b>Benefit adjustments</b>	Reduced before age 55, increased after 55 up to age 65	Reduced before age 67
<b>Final Average Compensation Limitation</b>	Internal Revenue Code section 401(a)(17)	Government Code section 7522.10

An automatic cost of living adjustment is provided to benefit recipients based on changes in the local region Consumer Price Index (CPI) up to a maximum of 2% per year. Any increase greater than 2% is banked and may be used in years where the CPI is less than 2%. There is a one-time 7% increase at retirement for members hired before August 19, 1975. The Plan also provides disability and death benefits to eligible members and their beneficiaries, respectively. For retired members, the death benefit is determined by the retirement benefit option chosen. For all other members, the beneficiary is entitled to benefits based on the members years of service or if the death was caused by employment. General members are also eligible for survivor benefits which are payable upon a member's death.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**Contributions**

Participating employers and active members are required by statute to contribute a percentage of covered salary to the Plan. This requirement is pursuant to Government Code sections 31453.5 and 31454, for participating employers and Government Code sections 31621.6, 31639.25 and 7522.30 for active members. The contribution requirements are established and may be amended by the SBCERA Board pursuant to Article 1 of the CERL, which is consistent with the Plan's actuarial funding policy. The contribution rates are adopted yearly, based on an annual actuarial valuation, conducted by an independent actuary, that considers mortality, service (including age at entry into the Plan, if applicable, and tier), and compensation experience of the members and beneficiaries, and also includes an evaluation of the Plan's assets and liabilities. Participating employers may pay a portion of the active members' contributions through negotiations and bargaining agreements.

Employee contribution rates for the fiscal year ended June 30, 2020 ranged between 9.14% and 15.53% for Tier 1 General members, 30 year General member are not required to pay any employee contribution. For Tier 2 General members, the contribution is 8.18%.

Employer contribution rates for the year ended June 30, 2020 are as follows:

	<b>Employer Contribution Rates</b>	
	<b>Tier 1 Members</b>	<b>Tier 2 Members</b>
<b>Actuarially Determined Required Contribution Percentages</b>	<b>Total</b>	<b>Total</b>
South Coast AQMD members	42.31%	38.04%

The required employer contributions and the amount paid to SBCERA by the South Coast AQMD for the year ended June 30, 2020 were \$33,202,615. The South Coast AQMD's employer contributions were equal to the required employer contributions for the year ended June 30, 2020.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**Pension Liability**

At June 30, 2020, South Coast AQMD reported a net pension liability of \$233,891,405 for its proportionate share of the SBCERA's net pension liability. The net pension liability was measured as of June 30, 2019, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2019. The SBCERA's publicly available financial report provides details on the change in the net pension liability.

The South Coast AQMD's proportion of the net pension liability was based on the South Coast AQMD's contributions received by SBCERA during the measurement period for employer payroll paid dates from July 1, 2018 through June 30, 2019, relative to the total employer contributions received from all of SBCERA's participating employers. At June 30, 2020, the South Coast AQMD's proportion was 8.625%, which was an increase of 0.012% from its proportion measured as of June 30, 2018.

**Pension Expense and Deferred Outflows/Inflows of Resources**

For the fiscal year ended June 30, 2020, the South Coast AQMD recognized pension expense of \$46,248,985 for its proportionate share of SBCERA's pension expense. At June 30, 2020, the South Coast AQMD reported its proportionate share of deferred outflows of resources and deferred inflows of resources related to pensions, from the following sources:

	<b>Deferred Outflows of Resources*</b>	<b>Deferred Inflows of Resources*</b>
Changes in proportion and differences between South Coast AQMD contributions and proportionate share of contributions	\$ 7,849,977	\$ 10,457,791
Changes in actuarial assumptions	30,546,994	-
Net difference between projected and actual earnings on pension plan investments	4,656,819	-
Differences between expected and actual experience	3,120,192	7,520,398
South Coast AQMD contributions paid to SBCERA subsequent to the measurement date	33,202,615	-
<b>Total</b>	<b>\$ 79,376,597</b>	<b>\$ 17,978,189</b>

\*See note VI for summary

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

The \$33,202,615 reported as deferred outflows of resources related to pensions resulting from South Coast AQMD's contributions made to SBCERA subsequent to the measurement date but before the reporting period ended June 30, 2020. The contribution will be recognized as a reduction of the net pension liability in the subsequent fiscal year ended June 30, 2021. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to SBCERA pensions will be recognized in pension expense as follows:

<b>Year ended June 30:</b>	
<b>2021</b>	13,503,294
<b>2022</b>	589,266
<b>2023</b>	9,442,810
<b>2024</b>	5,502,386
<b>2025</b>	(805,762)
<b>Thereafter</b>	(36,201)

**Actuarial Assumptions and Methods**

The significant actuarial assumptions and methods used to measure the total pension liability are as follows:

Actuarial valuation date	June 30, 2019
Actuarial experience study	3-year period ending June 30, 2016
Actuarial cost method	Entry age actuarial cost method
Actuarial assumptions:	
Investment rate of return <sup>(1)</sup>	7.25%
Inflation	3.00%
Projected Salary increases <sup>(2)</sup>	General: 4.5% to 14.50%
Cost of living adjustments	Contingent upon consumer price index with a 2.00% maximum
Administrative Expenses	0.70% of payroll

<sup>(1)</sup> Includes inflation at 3.00% and is net of pension investment expenses.

<sup>(2)</sup> Includes inflation at 3.00% plus real across-the-board salary increase of 0.50% plus merit and promotional increases.

The actuarial assumptions used in the June 30, 2019 valuation were based on the results of an actuarial experience study for the three year period of July 1, 2013 – June 30, 2016. Same assumptions are used in the June 30, 2019 and 2018 actuarial valuation.

For General employees, mortality rate is based on the Headcount-Weighted RP 2014 Healthy Annuitant Mortality Table set forward one year for males, projected generationally with the two-dimensional mortality MP-2016 projection scale.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**Long-term Expected Rate of Return**

The long-term expected rate of return on pension plan investments is 7.25%. SBCERA's actuary prepares an analysis of the long-term expected rate of return on a triennial basis using a building-block method in which expected future real rates of return (expected returns, net of inflation) are developed for each major asset class. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adding expected inflation and subtracting expected investment expenses and a risk margin. The target allocations (approved by the SBCERA Board) and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before deducting investment expenses, used in the derivation of the long-term expected investment rate of return assumptions are summarized in the following table:

**SBCERA's Long-Term Expected Real Rate of Return**

		As of June 30, 2019 Valuation Date	
Asset Class	Investment Classification	Target Allocation(1)	Long-Term Expected Real Rate of Return (Arithmetic)
Large Cap U.S. Equity	Domestic Common and Preferred Stock	8.00%	5.61%
Small Cap U.S. Equity	Domestic Common and Preferred Stock	2.00%	6.37%
Developed International Equity	Foreign Common and Preferred Stock	6.00%	6.96%
Emerging Market Equity	Foreign Common and Preferred Stock	6.00%	9.28%
U.S. Core Fixed Income	U.S. Government and Agency/Corporate Bonds	2.00%	1.06%
High Yield/Credit Strategies	Domestic Bonds/Foreign Bonds	13.00%	3.65%
Global Core Fixed Income	Foreign Bonds	1.00%	0.07%
Emerging Market Debt	Emerging Market Debt	6.00%	3.85%
Real Estate	Real Estate	9.00%	4.37%
International Credit	Foreign Alternatives	11.00%	6.75%
Absolute Return	Domestic Alternatives/Foreign Alternatives	13.00%	3.56%
Real Assets	Domestic Alternatives/Foreign Alternatives	5.00%	6.35%
Private Equity	Domestic Alternatives/Foreign Alternative	16.00%	8.47%
Cash & Equivalents	Short-Term Cash Investment Funds	2.00%	(0.17)%
<b>Total</b>		<b><u>100.00%</u></b>	

(1) For actuarial purposes, target allocations only change once every three years based on the triennial actuarial experience study.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**Discount Rate**

The discount rate used to measure the total pension liability was 7.25%. The projection of cash flows used to determine the discount rate assumed that employee and employer contributions will be made based on the actuarially determined rates based on the SBCERA Board's funding policy, which establishes the contractually required rate based on statute. Based on those assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

**Sensitivity Analysis**

The following table presents the South Coast AQMD's proportionate share of the net pension liability calculated using the discount rate of 7.25%, as well as what the South Coast AQMD's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.25%) or 1-percentage-point higher (8.25%) than the current rate.

**Sensitivity of Net Pension Liability to Changes in the Discount Rate**  
**As of June 30, 2020**

	<b>1% Decrease (<u>6.25%</u>)</b>	<b>Current Discount Rate (<u>7.25%</u>)</b>	<b>1% Increase (<u>8.25%</u>)</b>
South Coast AQMD's proportionate share of the net pension liability	\$363,132,883	\$233,891,405	\$127,933,967

**Pension Plan Fiduciary Net Position**

Detailed information about the SBCERA's fiduciary net position is available in a separately issued SBCERA comprehensive annual financial report. That report may be obtained on the Internet at [www.SBCERA.org](http://www.SBCERA.org); by writing to SBCERA at 348 W. Hospitality Lane, Third Floor, San Bernardino, CA 92415; or by calling (909) 885-7980 or (877) 722-3721.

**Payables to the Pension Plan**

The amount payable to SBCERA at June 30, 2020 for the legally required contribution is \$3,401,100.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**Los Angeles County Employees' Retirement Association**

**Plan Description**

South Coast AQMD participates in the Los Angeles County Employees Retirement Association Pension Plan (the plan). (LACERA operates as a cost-sharing multiple-employer defined benefit plan.) As of June 30, 2020, South Coast AQMD had no active members in this plan. For South Coast AQMD, LACERA is a closed plan which means no new members will be added to the plan. The Los Angeles County Employees' Retirement Association (LACERA) was established on January 1, 1938. It is governed by the California Constitution; the County Employees Retirement Law of 1937 (CERL); and the regulations, procedures, and policies adopted by LACERA's Board of Retirement and Board of Investments. The Los Angeles County (County) Board of Supervisors may also adopt resolutions, as permitted by CERL, which may affect the benefits of LACERA members.

**Benefits Provided**

Vesting occurs when a member accumulates five years' creditable service under contributory plans or accumulates 10 years of creditable service under the general service non-contributory plan. Benefits are based upon 12 or 36 months' average compensation, depending on the plan, as well as age at retirement and length of service as of the retirement date, according to applicable statutory formula. Vested members who terminate employment before retirement age are considered terminated vested (deferred) members. Service-connected disability benefits may be granted regardless of length of service consideration. Five years of service are required for nonservice-connected disability eligibility according to applicable statutory formula. Members of the non-contributory plan, who are covered under separate long-term disability provisions not administered by LACERA, are not eligible for disability benefits provided by LACERA.

**Contributions**

Members and employers contribute to LACERA based on rates recommended by an independent consulting actuary and adopted by the Board of Investments and the Los Angeles County Board of Supervisors. Contributory plan members are required to contribute between approximately 5 percent and 13 percent of their annual covered salary. Member and employer contributions received from the outside districts are considered part of LACERA's pension plan as a whole.

Participating employers are required to contribute the remaining amounts necessary to finance the coverage of their employees (members) through monthly or annual prefunded contributions at actuarially determined rates. Rates for the contributory plan tiers for members who entered the Plan prior to January 1, 2013 are based upon age at entry to the Plan and plan type enrollment.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**Net Pension Liability**

At June 30, 2020, the proportionate share of South Coast AQMD's Net Pension Liability was 0% and the amount payable to LACERA for the legally required contribution amount is \$0.

**Pension Expense and Deferred Outflows/Inflows of Resources**

For the fiscal year ended June 30, 2020, South Coast AQMD recognized pension expense of \$33,000 for its proportionate share of LACERA's pension expense. At June 30, 2020, South Coast AQMD reported zero balances for the proportionate share of deferred outflows of resources and deferred inflows of resources related to pensions.

**Pension Plan Fiduciary Net Position**

Detailed information about the LACERA's fiduciary net position is available in a separately issued LACERA comprehensive annual financial report. That report may be obtained on the Internet at [www.LACERA.com](http://www.LACERA.com); by writing to LACERA at 300 N. Lake Avenue, Suite 650, Pasadena, CA 91101; or by calling (626) 564-6000.

**X. OTHER POST EMPLOYMENT BENEFITS (OPEB)**

**Plan Description**

SBCERA does not provide any post-employment benefits to South Coast AQMD retirees. LACERA, however, in addition to providing pension benefits, essentially provides a comprehensive health care benefits program to its retirees that include several medical, dental, vision, and death benefits. LACERA administers the defined benefit Other Post-Employment Benefits (OPEB) on behalf of Los Angeles County and its participating agencies. South Coast AQMD is one of the participating agencies. Prior to fiscal year 2019-20, the OPEB was under a cost sharing multiple-employer structure. Starting in fiscal year 2019-20, the OPEB was changed to an agent plan structure. This is the inaugural year of the GASB 75 disclosure report under an agent plan structure.

South Coast AQMD is subject under the April 20, 1982 agreement between the Los Angeles County and LACERA (County Agreement). In April 1982, the Los Angeles County adopted an ordinance pursuant to the County Employees Retirement Law of 1937 (CERL) that provided for a retiree health insurance program and death/burial benefits for retired employees and their eligible dependents. In 1982, the Los Angeles County and LACERA entered into an agreement whereby LACERA would administer the program subject to the terms and conditions of the agreement. In 1994, the Los Angeles County amended the agreement to continue to support LACERA's retiree insurance benefits program, regardless of the status of the active member insurance. In 2018, this agreement was further updated to specify the sharing of expenses between South Coast AQMD

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

and LA County for South Coast AQMD retirees who also had LA County service credit.

LACERA is a closed plan to employees who were hired after December 31, 1979. Currently, there are 48 retirees covered by the benefit terms under the OPEB.

LACERA is a legally separate entity from South Coast AQMD, not a component unit, and there is no financial interdependency with the Los Angeles County. For these reasons, the South Coast AQMD's comprehensive annual financial report excludes the LACERA OPEB as of June 30, 2020. LACERA publishes its own comprehensive annual financial report that includes its financial statements and required supplementary information, which can be obtained by writing LACERA at 300 N. Lake, Pasadena, CA 91101 or visiting the website at: [www.LACERA.com](http://www.LACERA.com).

**Benefits Provided**

LACERA OPEB program offers members choice of medical plan as well as dental/vision plans. Medical and dental/vision are provided through third-party insurance carriers with the participant's cost for medical and dental/vision insurance varying according to the years of retirement service credit, the plan selected, and the number of persons covered. There is a one-time lump-sum \$5,000 death/burial benefit payable to the designated beneficiary upon the death of a retiree.

**Contributions**

South Coast AQMD and/or Los Angeles County and each retired employee participating in the OPEB contributes a portion of the total cost per month of the premium for the plan in which the retiree is enrolled according to the terms of the Retiree Health Care Program under the County Agreement. The portion of the premium to be paid by South Coast AQMD and/or the Los Angeles County is calculated based on the years of retirement service credit under the terms of the County Agreement, as they may change from time to time. LACERA subsidizes the retiree's cost starting at 10 years of service credit and up to a maximum of 100% for a member with 25 years of service credit with the County. LACERA, at its own discretion, may increase the premium to cover additional expenses.

**Net OPEB Liability**

The net OPEB liability was measured at \$3,627,000 as of June 30, 2020. South Coast AQMD's total OPEB liability was determined by an actuarial valuation as of the valuation date, calculated based on the discount rate and actuarial assumptions and was projected forward to the measurement date. The total OPEB liability is the same as the net OPEB liability since the fiduciary net position is zero.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**OPEB Expense and Deferred Outflows/Inflows of Resources**

For the fiscal year ended June 30, 2020, the South Coast AQMD recognized OPEB expense of \$353,900. As of June 30, 2020, South Coast AQMD's reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	<b>Deferred Outflows of Resources*</b>	<b>Deferred Inflows of Resources*</b>
Differences between projected and actual plan investment earnings	\$ -	\$ 5,000
Differences between expected and actual economic experience	-	138,000
Changes of assumptions	-	343,000
South Coast AQMD contributions paid to LACERA subsequent to the measurement date	240,984	-
Total	\$ <u>240,984</u>	\$ <u>486,000</u>

\*See note VI for summary

The \$240,984 reported as deferred outflows of resources related to OPEB resulting from South Coast AQMD's contributions made to LACERA subsequent to the measurement date but before the reporting period ended June 30, 2020. The contribution will be recognized as a reduction of the net OPEB liability in the subsequent fiscal year ended June 30, 2021. Other amounts reported as deferred inflows of resources related to OPEB will be recognized in the OPEB expense as follows:

<b>Year ended June 30:</b>	
2020	\$ (74,000)
2021	(74,000)
2022	(73,000)
2023	(72,000)
2024	(72,000)
Thereafter	(121,000)

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**Actuarial Assumptions and Methods**

The significant actuarial assumptions and methods used to measure the total OPEB's liability are as follows:

Actuarial Valuation Date	June 30, 2018
Measurement Date	June 30, 2019
Actuarial Cost Method	Entry age normal, level percent of pay
Inflation	2.75%
Salary Increases	3.25%
Investment Rate of Return	3.50%

Mortality rates were based on the RP-2014 Healthy and Disabled Annuitant mortality tables and including projection for expected future mortality improvement using the MP-2014 Ultimate Projection Scale.

**Healthcare Cost Trend Rates:**

	FY 2018 to FY 2019	FY 2019 to FY 2020	Ultimate
LACERA Medical Under 65	5.80%	6.30%	4.50%
LACERA Medical Over 65	6.00%	6.00%	4.50%
Part B Premiums	9.25%	1.85%	4.35%
Dental/Vision	0.00%	3.00%	3.70%
Weighted-average Trend	5.85%	5.42%	4.47%

The OPEB liability figures include the Excise Tax. This is based on the requirements of the Affordable Care Act (ACA) and the Consolidated Appropriations Act of 2016.

The actuarial assumptions used in the June 30, 2019 valuation were based on the results of a 2016 actuarial retirement experience study and a 2018 actuarial OPEB experience study.

**Discount Rate**

The discount rate used to measure the net OPEB liability under the agent structure was 3.50%. The discount rate was determined from the 20-year tax-exempt municipal bond yield whereas the discount rate under the cost sharing structure of 5.11% was determined from the depletion date calculation of the combined liabilities and assets from all the cost sharing employers. The beginning balance of the net OPEB liability was changed from \$3,180,000 to \$3,623,000, and the impact on the net OPEB liability due to this change was \$443,000.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**Sensitivity of the South Coast AQMD's Net OPEB Liability to Changes in the Discount Rate**

The following presents the South Coast AQMD's net OPEB liability as well as what the South Coast AQMD's net OPEB liability would be if it were calculated using a discount rate that is 1-percentage-point lower (2.50%) or 1-percentage-point higher (4.50%) than the current rate:

	<u><b>1% Decrease (2.50%)</b></u>	<u><b>Current Discount Rate (3.50%)</b></u>	<u><b>1% Increase (4.50%)</b></u>
Net OPEB liability	\$4,046,000	\$3,627,000	\$3,279,000

**Sensitivity of the South Coast AQMD's Net OPEB Liability to Changes in Healthcare Cost Trend Rates**

The following presents the South Coast AQMD's net OPEB liability, calculated using the healthcare cost trend rates as reported on the July 1, 2018 OPEB Actuarial Valuation Health Cost Trend Assumptions with Excise Tax table, as well as what the net OPEB liability would be if it were calculated using the healthcare cost trend rates that are 1-percentage-point lower or 1-percentage-point higher than the current rates:

	<u><b>1% Decrease</b></u>	<u><b>Current Healthcare Cost Trend Rates</b></u>	<u><b>1% Increase</b></u>
Net OPEB liability	\$3,283,000	\$3,627,000	\$4,033,000

**OPEB Plan Fiduciary Net Position**

Detail information about the LACERA's fiduciary net position is available in a separately issued LACERA comprehensive annual financial report. That report may be obtained on the internet at [www.LACERA.com](http://www.LACERA.com); by writing to LACERA at 300 N. Lake, Pasadena, CA 91101; or by calling (626) 564-6000.

**Payable to the OPEB Plan**

At June 30, 2020, the amount payable to LACERA for the legally required contribution is \$19,691.

**XI. DEFERRED COMPENSATION PLAN**

South Coast AQMD offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan permits them to defer a portion of their salary until future years. These funds are not available to employees until termination, retirement, death or unforeseen emergency.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

The deferred compensation plan monies are invested in various investment funds as selected by the participating employees. All amounts of compensation deferred under the plan and all income attributed to those amounts are held in trust for the exclusive benefit of plan participants and their beneficiaries.

Effective January 1, 1999, federal legislation requires the Section 457 plan assets to be placed in trust for the exclusive use of the plan participants and their beneficiaries. South Coast AQMD's deferred compensation administrator, Hartford Life Insurance Co., qualifies as the plan trustee to meet the federal requirements. In accordance with GASB Statement No. 32, South Coast AQMD no longer reports the plan assets and liabilities in its financial statements. As of June 30, 2020, investments with a fair value of \$189,214,629 are held in a trust.

**XII. HEALTH REIMBURSEMENT ARRANGEMENT PLAN**

On December 4, 2009, South Coast AQMD's Governing Board approved the establishment of a Health Reimbursement Arrangement (HRA) plan for South Coast AQMD employees. This allows active employees to save on a tax-free basis for their future post-retirement health care costs. The Hartford serves as South Coast AQMD's HRA service provider. Currently, both South Coast AQMD and the SBCERA do not offer a health reimbursement program nor post-retirement health care to help the employees afford health care in retirement.

Initially, the program was made available to non-represented employees with the understanding that it could be expanded to cover represented employees, based on their approval. In compliance with the rules establishing the HRA, each defined group covered by the plan is required to establish its own criteria on what earnings would be contributed. As of June 30, 2020, Executive Officer, General Counsel and Designated Deputies were the eligible employee classifications that were set up and approved by South Coast AQMD. Contributions are 100% vacation and sick leave payouts at termination and/or compensation payout at termination per existing leave payment policy. Eligibility shall commence upon termination of employment on account of retirement (whether through disability or service).

**XIII. COMMITMENTS**

**Guaranteed Loans**

The Air Quality Assistance Fund (AQAF) was originally established to comply with state legislation which required South Coast AQMD to allocate a portion of the funds it receives as penalties and settlements from violators of air pollution regulations and to provide financing assistance to small businesses that require financing in order to comply with South Coast AQMD requirements. This legislation was repealed on January 1, 1999. In June 2000, the Governing Board authorized staff to continue to use the funds to assist small businesses with an improved program for greater participation. Financing assistance includes

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

guaranteeing or otherwise reducing the financial risks of lenders in providing financial assistance to small businesses. The funds are not used for direct loans to small businesses.

In June 2001, South Coast AQMD entered into an agreement with the California Pollution Control Financing Authority (CPCFA) to be an “independent contributor” to the California Capital Access Program (CalCAP). South Coast AQMD transferred \$100,000 to the CPCFA to cover borrower fees on any qualified small business CalCAP loans for air quality-related equipment or processes.

In October 2007, the Governing Board authorized the transfer of \$1 million to the Dry Cleaners Financial Incentives Grant Program to supplement the existing incentive grant programs. This incentive program assists dry cleaners in making early transitions from perchloroethylene (perc) to alternative cleaning technologies. AQA’s fund balance amounted to \$1,676,976 at fiscal year ended June 30, 2020.

**Operating Leases**

Rental expense for non-cancelable operating leases was \$349,335 for the year ended June 30, 2020. Future minimum lease payments under non-cancelable operating leases of South Coast AQMD total as follows:

<b>Year Ending</b>	
<b><u>June 30</u></b>	<b><u>Amount</u></b>
2021	\$ 316,001
2022	325,719
2023	335,796
2024	345,874
2025	355,951
Thereafter	<u>459,605</u>
Total	<u><u>\$2,138,946</u></u>

The lease for the office equipment expires in December 2021 while the lease of the South Bay satellite office expires in September 2026.

**XIV. PENDING LITIGATION**

A number of other lawsuits and claims are pending against South Coast AQMD for alleged damages to persons and property and for other alleged liabilities arising out of its normal operations. South Coast AQMD’s management believes that any liability that may arise from the ultimate resolution of such legal actions will not have a material adverse impact on the financial position as of June 30, 2020.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO THE BASIC FINANCIAL STATEMENTS**  
**June 30, 2020**

**XV. UNCERTAINTIES**

In March 2020, the World Health Organization declared the outbreak of a novel coronavirus (COVID-19) as a global pandemic, which continues to spread throughout the United States and around the world. As a governmental agency, South Coast AQMD is deemed to be an essential business. Executive Officer has activated the Continuity of Operations Plan (COOP) and a large portion of the workforce are teleworking from home. South Coast AQMD is aware of changes in its business as a result of COVID-19. The extent to which the COVID-19 may impact South Coast AQMD's operating results, cash flows, and financial position will depend on future developments. The duration of any business disruption and related financial impact cannot be reasonably estimated at this time.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO REQUIRED SUPPLEMENTARY INFORMATION**  
**June 30, 2020**

**NOTE 1 – BUDGETS AND BUDGETARY ACCOUNTING**

South Coast AQMD has a comprehensive annual budget process which establishes goals and objectives and monitors expenditures associated with meeting those goals and objectives.

Up to and including the budget adoption hearing by South Coast AQMD's Governing Board, the public and the business community have several opportunities to participate in the budget process. These opportunities include: Budget Advisory Committee meetings made up of business and environmental representatives, a public consultation, a Governing Board workshop and a public hearing.

Following input from the public, Budget Advisory Committee, and Governing Board, the draft budget for fiscal year 2019-20 was prepared and subsequently adopted at the May 2019 meeting of the Governing Board. The fiscal year 2019-20 Adopted Budget and the final fee schedules became effective on July 1, 2019.

South Coast AQMD's annual budget is adopted for the General Fund at the Major Object levels of Salaries and Employee Benefits, Services and Supplies, Capital Outlays, and Building Remodeling. The Governing Board has delegated expenditure authority to the Executive Officer for all budgeted expenditures of \$75,000 or less within a major object. All appropriations to the budget and transfers between major objects must be approved by the Governing Board. Transfers within a major object are delegated to the Executive Officer. Monthly expenditure reports are issued to each Office. The Governing Board receives a General Fund Budget status report on a quarterly basis.

South Coast AQMD presents a comparison of annual budget to actual results for the General Fund. The budgeted expenditure amounts represent the adopted budget adjusted for Governing Board approved supplemental appropriations. The budgeted revenue amounts represent the adopted budget modified for Governing Board approved adjustments which were based upon new or additional revenue sources. Supplemental expenditure appropriations of \$21,683,310 and revenue adjustments of \$15,142,453 were approved by the Governing Board in fiscal year 2019-20.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO REQUIRED SUPPLEMENTARY INFORMATION**  
**June 30, 2020**

**NOTE 2 – GENERAL FUND BUDGETARY BASIS RECONCILIATION**

The General Fund Budgetary Basis under Required Supplementary Information presents comparisons of the legally adopted budget with actual data on a budgetary basis. Accounting principles applied for purposes of developing expenditures data on a budgetary basis differ from those used to present financial statements in conformity with Generally Accepted Accounting Principles (GAAP). The basis of budgeting that differs from GAAP is modified accrual basis plus encumbrances. The following is a reconciliation of differences for the fiscal year ended June 30, 2020:

Expenditures and encumbrances (budgetary basis) June 30, 2020	\$174,134,353
Add: payments on encumbrances open at July 1, 2019	6,211,229
Less: encumbrances open at June 30, 2020	<u>(7,515,270)</u>
Expenditures (GAAP basis), June 30, 2020	<u>\$172,830,312</u>

A reconciliation of revenue is not presented since budgetary practices and GAAP do not differ with respect to revenue.

**NOTE 3 – USE OF BUDGETARY FUND BALANCE**

When the fiscal year 2019-20 budget was adopted the Governing Board approved a budget that was balanced. Mid-year adjustments appropriated \$6,540,857 from Unassigned Fund Balance.

**NOTE 4 – FACTORS AFFECTING PENSION TRENDS SOUTH COAST AQMD'S PROPORTION**

As of the June 30, 2019 measurement date, South Coast AQMD's proportionate share of SBCERA's total net pension liability increased from 8.61% to 8.63%. The increase is primarily due to an increase in South Coast AQMD's staffing levels and associated SBCERA-eligible compensation ("pensionable compensation" and "compensation earnable") as compared against the net increase in total SBCERA-eligible compensation from all other SBCERA employers, resulting in an increase in proportionate share of net pension liability.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**OTHER SUPPLEMENTARY INFORMATION**  
**June 30, 2020**

**Non-major Governmental Funds**

Special Revenue Funds:

- Air Toxics Fund – Used to account for fees received from industrial toxic air emitters. These funds are spent on planning and performing health risk evaluations for the purpose of developing a toxic emissions inventory for the South Coast Air Basin.
- Advanced Technology, Outreach and Education Fund – Used to account for monies contributed by companies in lieu of paying fines for violating South Coast AQMD rules. Contributed amounts must be used to pay costs associated with South Coast AQMD-sponsored research and development in cleaner burning fuels and other advanced technologies and public outreach and education related to advanced technology and air pollution and its impacts.
- Air Quality Assistance Fund – Used to account for funds set aside for the purpose of underwriting, guaranteeing, or otherwise participating in the provision of financial assistance to small businesses as required by Section 40448.7 of the California Health and Safety Code. (This legislation was repealed by its own terms January 1, 1999). In June 2000, the Governing Board authorized staff to revise the program to increase participation of small businesses. Certain revisions, including participation in the California Capital Access Program (CalCAP) to assist small businesses, were implemented in June 2001.
- Air Quality Improvement Fund – Used to account for 40% of the revenue received by the South Coast AQMD from motor vehicle registration fees under the provisions of Sections 44243 and 44244 of the California Health and Safety Code. This money is distributed on a quarterly basis to cities and counties within the South Coast Air Basin to implement programs to reduce air pollution from motor vehicles.
- Mobile Sources Air Pollution Reduction Fund – Used to account for 30% of the revenue received by South Coast AQMD from the motor vehicle registration fees under the provisions of Sections 44243 and 44244 of the California Health and Safety Code. This money is used to provide grants to fund projects for the purpose of reducing air pollution from motor vehicles within the jurisdiction of the South Coast AQMD. Total projects to date amount to over \$451 million and over 14,250 tons of emissions reduced. This special fund was established in fiscal year 1992.
- Clean Fuels Program Fund – Established as a special revenue fund in fiscal year 2000 to account for contract activities and revenues of the Clean Fuels Program. These are activities associated with implementing Clean Fuels stationary source and mobile source research, development, demonstration and deployment projects approved by

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**OTHER SUPPLEMENTARY INFORMATION**  
**June 30, 2020**

the Governing Board. Since 1988, the Clean Fuels Program has provided funds for 1,435 projects totaling \$234.5 million.

- Carl Moyer Program Fund – Established in fiscal year 1999 to account for activities related to the administration of state funds set aside for the replacement of diesel-powered vehicles with cleaner-technology vehicles. It has funded over 7,977 vehicles totaling over \$530 million. It provides incentive funds for the replacement or repower of older diesel engines in on- and off-road vehicles such as refuse haulers, heavy duty trucks, transit and school buses, construction equipment, and marine vessels.
- Lower-Emission School Bus Fund – Established in fiscal year 2001 to administer state funds set aside in the South Coast Air Basin for the replacement and retrofit of high-emitting diesel-fueled school buses. Since 2001, \$325 million of Lower Emissions School Bus funds were spent on the replacement of school buses, and the retrofit of newer diesel buses with PM traps. In total, nearly 1600 old buses were replaced by brand new, primarily CNG school buses, and nearly 3,400 newer diesel school buses were retrofitted with PM traps.
- Zero Emission Vehicle Incentive Program – Established in fiscal year 2001 to administer the State funds set aside for the implementation of the Zero Emission Vehicle (ZEV) Incentive Program.
- AES Settlement Projects Fund – Established in fiscal year 2001 for the purpose of accounting for the one-time penalty settlement with AES Corporation for air pollution violations.
- Rule 1309.1 Priority Reserve Fund – Established in fiscal year 2001 to account for mitigation fees paid for Particulate Matter  $\leq 10$  microns (PM<sub>10</sub>) credits. Due to the state energy crisis in 2001, Rule 1309.1 was amended to allow new electric generating facilities temporary access to South Coast AQMD's Priority Reserve Account to offset their PM<sub>10</sub> emission increases provided that they meet specific criteria and pay appropriate mitigation fees.
- CARB ERC Bank Fund – Established in fiscal year 2001 to account for the proceeds from the issuance of the Emission Reduction Credits (ERCs) to natural gas turbine power plant peaker units. CARB established the ERC Bank for peaker power plants that need emission offsets to add new or expanded capacity. Proceeds from the issuance of these ERCs will fund emission reduction programs where the new or expanded facility is located.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**OTHER SUPPLEMENTARY INFORMATION**  
**June 30, 2020**

- LADWP Settlement Fund – Established in fiscal year 2001 for the purpose of accounting for the monies received from the Los Angeles Department of Water and Power as part of the settlement agreement.
- State-Emissions Mitigation Fund – Established during fiscal year 2002 to account for the funds received from California Air Resources Board (CARB) to fund CARB selected projects on emission reductions within the South Coast Air Basin. This is in response to the Governor's statewide program to mitigate excess emissions from peaker power generation units to alleviate the power crisis in California.
- Natural Gas Vehicle Partnership Fund – Established during fiscal year 2002 for creation of the Natural Gas Vehicle Partnership to facilitate the advancement of natural gas vehicle technology and deployment. The contributions received from participating members are accounted for in this fund as well as the expenditures for activities and projects selected by the Partnership.
- State Backup Generators (BUG) Program Fund – Established in fiscal year 2003 to account for the funds received from CARB's Diesel-Fueled Electrical Backup Generator Emissions Mitigation Program. This program funds emission related projects as part of an ongoing effort to expeditiously reduce public exposure to air toxics and other pollutants.
- Dry Cleaners Financial Incentives Grant Program – Established in fiscal year 2003 to provide financial incentives to dry cleaners to purchase non-toxic alternative dry cleaning equipment.
- Rule 1173 Mitigation Fee Fund – Established in fiscal year 2004 to account for Rule 1173 mitigation fee payments to be used in funding air quality projects which directly benefit the community surrounding the facility. Amendments in December 2002 to Rule 1173 for Refineries and Chemical Plants established a mitigation fee payment provision relating to the release of Volatile Organic Compound (VOC) from an atmospheric Pressure Relief Device (PRD).
- Communities for Better Environment (CBE)/Our Children's Earth (OCE) Settlement Agreement Fund – Established in FY 2004 as part of the settlement agreement to fund  $P_{M10}$  (Particulate Matter  $\leq 10$  microns) and/or  $NO_x$  (Oxides of Nitrogen) reduction projects in disproportionately impacted areas.
- BP ARCO Settlement Projects Fund – Established in fiscal year 2005 to account for the \$25 million civil penalties received in 2005 as part of the settlement with BP ARCO for air pollution violations.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**OTHER SUPPLEMENTARY INFORMATION**  
**June 30, 2020**

- Health Effects Research Fund – The Health Effects Research Fund was established in fiscal year 2008 to receive 20% of all penalty/settlement monies in excess of \$4 million recognized annually in South Coast AQMD’s General Fund beginning in fiscal year 2009, subject to annual Board approval.
- CEQA Green House Gas Mitigation Fund – This fund was established in fiscal year 2009 under Rule 2702 for Green House Gas (GHG) emission reductions. It received \$1.5 million from Chevron Products Company to offset Green House Gas emission as part of its Product Reliability and Optimization (PRO+) Project Mitigation Monitoring Plan.
- TraPac School Air Filtration Fund – This fund was established in fiscal year 2011 and received \$6,000,000 from City of Los Angeles towards installation and maintenance of air filtration systems for schools in the Wilmington area that were impacted by the expansion of the TraPac Container Terminal Project.
- Emission Reduction and Outreach Fund – This fund was established in fiscal year 2010 due to a \$1,000,000 Supplemental Environmental Project Settlement. These funds are used to enhance compliance of emission reduction policies by providing source education and consumer education.
- Rule 1118 Mitigation Fund – Established in fiscal year 2010 to account for mitigation fees from petroleum refineries that exceed sulfur dioxide emission thresholds from flares and future Rule 1118 mitigation fees and to track the projects funded through these fees.
- HEROS II Fund – Established in fiscal year 2011, this fund is used to track funds received and expenditures for South Coast AQMD’s vehicle scrap and replacement program. This voluntary program reduces emissions from high-emitting light and medium-duty vehicles in South Coast AQMD.
- EL Monte Park Project Settlement Fund – Established in fiscal year 2011 for the purpose of accounting for the monies received from Gregg Industries bankruptcy estate as part of a settlement agreement to finance the construction of park improvements in the City of El Monte.
- AB 1318 Mitigation Fees Fund – Created in fiscal year 2011 to account for revenue of \$53.3 million from a mitigation fee payment for the transfer of emission credits under AB 1318.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**OTHER SUPPLEMENTARY INFORMATION**  
**June 30, 2020**

- Voucher Incentive Program (VIP) Fund – Established in fiscal year 2012 due to transfer of funds from the Carl Moyer Multidistrict funds originally recorded in Carl Moyer Program Fund, to separately administer the On-Road Heavy-Duty Vehicle Voucher Incentive Program.
- Advanced Technology Goods Movement Fund – Established in fiscal year 2012 to administer funds received through an agreement with Port of Los Angeles and Port of Long Beach to fund projects consistent with the development and demonstration of zero emissions goods movement technologies, including the demonstration of Linear Synchronous Motor (LSM) technology to move cargo containers and the development of two discrete hybrid electric drive systems for heavy-duty vehicles.
- Rule 1470 Risk Reduction Fund – Established in fiscal year 2012 to help fund control equipment costs for public agencies, such as cities, counties, and schools, required to install control equipment on new emergency standby engines in order to comply with Rule 1470.
- Hydrogen Fueling Infrastructure Network Fund – Established in fiscal year 2014 to receive state and federal grant revenue earmarked for hydrogen infrastructure upgrades to support the expected role out of fuel cell cars in the next few years. In fiscal year 2014, the South Coast AQMD received an award for \$6.69 million from the California Energy Commission (CEC) to upgrade and refurbish existing hydrogen stations in the South Coast Air Basin. Three stations in Burbank, LAX and Torrance were funded for upgrade through this grant. Work on the Torrance station was completed in August 2017 and work on the LAX station was completed in December 2018. Construction on the Burbank station was completed in January 2019, with some remaining work for the station to transition to open retail status.
- Rule 1420.1 Special Revenue Fund – Established in fiscal year 2014 to account for monies received from Exide Technologies and Quemetco to finance the Multi-Metals continuous emission monitoring system (CEMS) and continuous Multi-Metals Ambient Air Monitoring Demonstration Programs.
- BP/South Coast AQMD Public Benefits Oversight Fund – Established to receive remaining unspent \$177,802 from the 2005 BP Settlement Agreement public benefits payments. Funds will continue to be expended through the approval of the BP/South Coast AQMD Public Benefits Oversight Committee.
- Rule 1304.1 Special Revenue Fund – Established in fiscal year 2016 to track the deposit of fees paid and the withdrawal of funds for approved projects, pursuant to Rule 1304.1 – Electrical Generating Facility Fee for Use of Offset Exemption.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**OTHER SUPPLEMENTARY INFORMATION**  
**June 30, 2020**

- ExxonMobil Settlement Projects Special Revenue Fund – Established in fiscal year 2016 for the purpose of accounting for the monies received pursuant to a settlement agreement with ExxonMobil for Supplemental Environmental Project (SEP).
- LADWP Variance Special Revenue Fund – Established in fiscal year 2017 to receive environmental fees from the Los Angeles Department of Water and Power as part of an South Coast AQMD Hearing Board variance. The variance allowed LADWP to burn diesel to 1) recommission and test the turbines, and 2) subsequently to operate them on diesel fuel, only if the natural gas supply to LADWP was curtailed by SoCal Gas.
- Air Filtration Special Revenue Fund – Established in fiscal year 2017, a Supplemental Environmental Project (SEP) agreement was executed between CARB and the Burlington Northern Santa Fe Railway Company (BANSF) to install air filtration systems at schools in an Environmental Justice community in the South Coast region.
- SoCal Gas Settlement Special Revenue Fund – Established in fiscal year 2017 to execute a contract with KORE Infrastructure Inc in an amount not to exceed \$1 million from the SoCal Gas Settlement Special Revenue Fund to cost-share the commercial field test project.
- Rule 1180 Special Revenue Fund – Established in fiscal year 2018 to account for the Rule 1180 initial and final payments for implementation of the community air monitoring stations near petroleum refineries.
- VW Mitigation Special Revenue Fund – Established in fiscal year 2019 to recognize revenue of up to \$150 million into the fund, to administer and implement two project funding categories identified in CARB’s Beneficiary Mitigation Plan for the VW Environmental Mitigation Trust. The funded projects are intended to mitigate the excess NOx emissions caused by the VW vehicles.
- Prop 1B Goods Movement Fund – Established in fiscal year 2008 to account for voter approved transportation bond dollars. A portion of these were allocated to CARB and passed through to South Coast AQMD to implement programs that reduce emissions from movement of freight or “goods” along California’s trade corridors. Over \$500 million in goods movement projects have been and are being implemented within the South Coast AQMD.
- Clean Shipping Technology Demonstration Special Revenue Fund – Established in FY 2020 for the purpose of implementing clean shipping projects.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
OTHER SUPPLEMENTARY INFORMATION  
June 30, 2020**

Capital Projects Fund

- Infrastructure Improvement Fund – Established in fiscal year 2013 to separately account for large-scale and/or multi-year infrastructure improvement projects.

Debt Service Fund – Established in 2009 to replace the terminated Guaranteed Investment Contract with the Municipal Bond Insurance Association (MBIA, Inc.) due to changes in financial markets. This is used for the defeasance of a portion of South Coast AQMD's debt service on Pension Obligation Bonds.

Component Unit – South Coast AQMD Building Corporation – Established in fiscal year 1978 for the acquisition and improvement of South Coast AQMD headquarters. The South Coast AQMD Building Corporation is a legally separate entity, but for financial statement purposes, it is shown as a blended component unit in the governmental funds.

# STATISTICAL SECTION

This part of South Coast AQMD's comprehensive annual financial report represents detailed information as a context for understanding what the information in the financial statements, note disclosure, and required supplementary information says about South Coast AQMD's overall financial health.

## **Contents**

### Financial Trends

Four schedules contain information to help the reader understand how the government's financial performance and well-being have changed over time.

### Revenue Capacity

These schedules contain information to help the reader understand the concentration of South Coast AQMD's largest emission-based fee payers.

### Debt Capacity

This schedule presents information to help the reader assess the affordability of South Coast AQMD's current levels of outstanding debt. Please see footnote under Schedule 7.

### Demographic and Economic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within which South Coast AQMD's financial activities take place.

### Operating Information

These schedules contain data to help the reader understand how the information in South Coast AQMD's financial report relates to the services South Coast AQMD provides and the activities it performs.

Source: Unless otherwise noted, the information in these schedules was derived from South Coast AQMD's comprehensive annual financial reports for the relevant year.

## Schedule 7

### Debt Capacity

#### Ratios of Outstanding Debt by Type

#### Last Ten Fiscal Years

(amounts expressed in thousands)

Fiscal Year	Governmental Activities		Total Primary Government	Percentage of Total Revenues (*)	Number of Customers	Per Customer
	Installment Sale Revenue Bonds	Pension Obligation Bonds				
2011	\$ 20,370	\$ 47,192	\$ 67,562	53.87%	28	2
2012	15,130	42,182	57,312	46.15%	28	2
2013	-	39,135	39,135	29.48%	28	1
2014	-	36,036	36,036	24.89%	27	1
2015	-	32,876	32,876	24.26%	27	1
2016	-	29,641	29,641	22.23%	27	1
2017	-	26,310	26,310	17.86%	26	1
2018	-	22,877	22,877	14.58%	27	1
2019	-	19,324	19,324	12.04%	27	1
2020	-	15,637	15,637	8.63%	26	1

The South Coast Air Quality Management District is a regional government and is not authorized to issue long-term debt (General Obligation Bonds). The Pension Obligation Bonds are refunding bonds of outstanding debt owed the San Bernardino County Employees' Retirement Association. The South Coast Air Quality Management District has no long-term debt limits.

(\*) These percentages are calculated using Total Revenues, Schedule 8.

## **Notes Associated with Financial Charts**

### **Schedule 5 - Expenditures by Major Object (General Fund Budgetary Basis)**

- The increase in both Salaries and Benefits and Capital Outlays from FY 2018-19 is due to the third year of a three-year labor agreement, and the continued implementation of revenue-offset programs such as AB617, Rule 1180, and VW Mitigation Settlement.
- The increase is due to adding 47 positions for the Community Air Protection Program (CAPP) and the costs associated with the three year labor agreement that went into effect in the third quarter of FY 2017-18. There is also an increase in Retirement Expenditure based on the contribution rates provided from the San Bernardino County Retirement Association (SBCERA).
- The increase in 2018 expenditures from 2017 is mainly due to the adding positions for the AB 617 and AB 134 programs and the costs associated with the three year labor agreement and with State Disability Insurance, employer share of unemployment insurance, Social Security and Medicare.
- The increase in 2017 expenditures from 2016 is mainly due to the hiring of some grant funded positions and the contribution rates provided from the San Bernardino County Retirement Association (SBCERA).
- The increase in 2016 expenditures from 2015 includes the costs associated with the three year labor agreement. The rents and leases for equipment also increased. In addition, the professional and special services increased due to new or additional projects for outside building consultants, community outreach, and planning and rule development activities.
- In 2015 the increase in Capital Outlays of approximately \$1.3M is mainly due to large purchases of vehicles and replacements of operational systems.
- The decrease in 2014 expenditures from 2013 is mainly due to a significant reduction in debt. As of June 2013, the 2002 Series Installment Sale Bonds were legally defeased.
- The increase in 2013 expenditures from 2012 is mainly due to the rising retirement and medical insurance costs.
- The decrease in 2012 expenditures is due to a significant reduction in Services and Supplies.
- The increase in 2011 expenditures from 2010 is mainly due to the increase in expenditures for Contract and Special Services.

### **Schedule 6 - Expenditures by Major Object (General Fund GAAP Basis)**

- The increase in both Salaries and Benefits and Capital Outlays from FY 2018-19 is due to the third year of a three-year labor agreement, and the continued implementation of revenue-offset programs such as AB617, Rule 1180, and VW Mitigation Settlement.
- The increase is due to adding 47 positions for the CAPP and the costs associated with the three year labor agreement that went into effect in the third quarter of FY 2017-18. There is also an increase in Retirement expenditure based on the contribution rates provided from the San Bernardino County Retirement Association (SBCERA).
- The increase in 2018 expenditures from 2017 is mainly due to the adding positions for the AB 617 and AB 134 programs and the costs associated with the three year labor agreement and with State Disability Insurance, employer share of unemployment insurance, Social Security and Medicare. Also, the increase in Capital Outlays reflects anticipated needs.
- The increase in 2017 expenditures from 2016 is mainly due to the hiring of some grant funded positions and the contribution rates provided from the San Bernardino County Retirement Association (SBCERA).

- The increase in 2016 expenditures from 2015 includes the costs associated with the three year labor agreement. The rents and leases for equipment also increased. In addition, the professional and special services increased due to new or additional projects for outside building consultants, community outreach, and planning and rule development activities.
- The small increase in 2015 expenditures from 2014 is mainly due to the rise in the contribution cost for retirement and purchases of vehicles.
- The decrease in 2014 expenditures from 2013 is mainly due to a significant reduction in debt. As of June 2013, the 2002 Series Installment Sale Bonds were legally defeased.
- The increase in 2013 expenditures from 2012 is mainly due to the rising retirement and medical insurance costs. In addition, Capital Outlays expenditures increased due to the large purchase of CNG vehicles and the replacement of some boilers and associated equipment.
- The decrease in 2012 expenditures is due to a significant reduction in Services and Supplies.
- The increase in 2011 expenditures from 2010 is mainly due to the increase in Contract and Special Services.

#### **Schedule 8 - Revenues by Major Source (General Fund)**

- The increase in 2020 revenue reflects annual renewal fee increases under Stationary Sources and state grant increases under Grants & Subventions. South Coast AQMD received new funding from the operation portion of CAPP.
- The increase in 2019 revenue is mainly due to the increase in State Grants related to the new funding for the implementation portion of CAPP.
- The increase in 2018 revenue reflects emission fees increase under the stationary sources and large penalties/settlements from facilities that were found not to be in compliance with South Coast AQMD rules and regulations under the General Revenue category.
- The large increase in 2017 revenue reflects large penalties/settlements from facilities that were found not to be in compliance with South Coast AQMD rules and regulations, which increased the General Revenue category.
- The decrease in 2016 revenue from 2015 is mainly due to the decrease in Penalties & Settlements in the General Revenues category.
- The large decrease in 2015 revenues is mainly due to the decrease in Penalties & Settlements for violations of permit conditions, South Coast AQMD Rules, or state law.
- Revenues increased significantly in 2014 because the South Coast AQMD received several large penalties/settlements from facilities that were found to be not in compliance with South Coast AQMD rules and regulations.
- Revenues increased significantly in 2013 because the South Coast AQMD received several large penalties/settlements from facilities that were found to be not in compliance with South Coast AQMD rules and regulations.
- The decrease in 2012 revenue is due to the decrease in Penalties & Settlements in General Revenues, and the reduction in Grants & Subventions.
- In 2011 the decrease in the Stationary Sources and Mobile Sources revenues are mainly due to the decrease in all the fee source revenues.

#### **Schedule 9 - Revenues by Fee Source (General Fund)**

- The increase in 2020 revenue is mainly due to the 3.5% CPI increase. Also included was 10.66% increase for Title V permits.

- The increase in 2019 revenue is mainly due to the 3.4% CPI increase. Also included was 4% increase on non-Title V annual operating permit renewal fees and 10.66% increase for Title V permits.
- The increase in 2018 revenue from 2017 is mainly due to the increase of emission fees. Other revenues increased because the South Coast AQMD received large penalties/settlements from facilities that were found not to be in compliance with South Coast AQMD rules and regulations, which increased the General Revenue category.
- Other revenues increased significantly in 2017 because the South Coast AQMD received large penalties/settlements from facilities that were found not to be in compliance with South Coast AQMD rules and regulations, which increased the General Revenue category.
- The decrease in 2016 revenue from 2015 is mainly due to the decrease in Penalties & Settlements in the Other Revenues category.
- The large decrease in 2015 revenues is mainly due to the decrease in Penalties & Settlements for violations of permit conditions, South Coast AQMD Rules, or state law.
- Revenues increased significantly in 2014 because the South Coast AQMD received several large penalties/settlements from facilities that were found to be not in compliance with South Coast AQMD rules and regulations.
- Other revenues increased significantly in 2013 because the South Coast AQMD received several large penalties/settlements from facilities that were found to be not in compliance with South Coast AQMD rules and regulations.
- The decrease in 2012 revenue is due to the decrease in Penalties & Settlements in General Revenues, and the reduction in Grants & Subventions.
- The decrease in 2011 revenue from 2010 is mainly due to the decreases in Mobile Source revenue and Penalties and Settlements revenue.

#### **Schedule 10 – Emission Fee Revenues**

- The increase in 2020 emission fee revenue is mainly due to the 3.5% CPI increase.
- 2019 emission fees revenue was lower than 2018 because of an emissions audit conducted and additional emission fees were collected in 2018.
- There was an increase in emission fees revenue in 2018 related to fee increase.
- There was a small decrease in emission fees revenue in 2017 due to gradually decreasing emissions.
- There was a small decrease in emission fees revenue in 2016 due to gradually decreasing emissions.
- There was a small decrease in emission fees revenue in 2015. Emission fees vary with the non-RECLAIM and RECLAIM emissions, and the flat emission fees of active facilities.
- The small increase in 2013 is due to a fee increase that was effective July 1, 2012.

## **KEY AIR QUALITY AND DEMOGRAPHIC INFORMATION REGARDING THE REGION INCLUDED IN THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**

The South Coast Air Quality Management District includes all of Orange County and parts of Los Angeles, Riverside and San Bernardino Counties. The section below provides a brief description of each county.

Measuring 4,084 square miles, ***Los Angeles County*** is one of the nation's largest counties. It is the most populated county in the state of California and contains the most populated city in the state, the City of Los Angeles. Before World War II, Los Angeles County was one of the nation's foremost agricultural producers. As agricultural production declined, the economy has evolved into diverse areas that include trade, transportation, and utilities, government, educational and health services, professional and business services, and manufacturing. Tourism and entertainment as well as international trade also play a vital role in the county's economy. The county is home to the twin seaports of Los Angeles and Long Beach, together the nation's largest, as well as the single largest fixed source of air pollution in the region. The two ports are responsible for more smog-forming nitrogen oxide emissions than 7 million cars.

***Orange County*** is the third most populated county in the state and lies south of Los Angeles County. When created in 1889, Orange County was named for its abundance of orange groves and thriving agricultural industry. Today, the largest industry employers are trade, transportation, and utilities, professional and business services, and manufacturing.

The varied topography of ***Riverside County*** is characterized by fertile river valleys to rolling plains and foothills to deserts below sea level and mountain peaks above 10,000 feet. Recent years have brought dramatic population growth to Riverside County. The population is expected to increase by 1.3 percent in 2016. Annual growth in the 2016 - 2021 period is expected to average 1.5 percent. The county's early years were linked to the agriculture industry, but commerce, construction, manufacturing, transportation, and tourism have contributed to the county's substantial growth. The County is also a major distribution center for Southern California and the Pacific Rim.

Roughly 90 percent of ***San Bernardino County*** is desert and the remaining portion consists of the San Bernardino Valley and San Bernardino Mountains. San Bernardino County and Riverside County are collectively known as the Inland Empire. San Bernardino ranks as the fifth-highest populated county in California from 2016 to 2021, population growth is expected to average 1.0 percent per year. The economy is led by services, government, retail trade, and manufacturing industries. Additionally, the county consistently ranks in the top fifteen agricultural-producing counties in the state.

All four counties within the South Coast Air Quality Management District's jurisdiction have experienced significant population growth in the last few years. The following charts illustrate air pollution, demographic, employment, and motor vehicle information relating to the South Coast Air Quality Management District region.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**Schedule 12**  
**South Coast Air Basin Smog Trend**  
**Last Ten Calendar Years**

Year	Days over 1-Hour Federal Ozone Standard	Days over 8-Hour 2015 (New) Federal Ozone Standard	District Population
2010	7	124	16,906,456
2011	16	125	16,274,797
2012	12	140	16,444,162
2013	5	119	16,538,490
2014	10	129	16,652,810
2015	10	113	16,866,350
2016	17	132	16,962,478
2017	26	145	17,063,249
2018	11	141	17,127,040
2019	10	132	17,150,993

**Notes:**

- The average number of days exceeding the federal ozone standard in the Basin decreased by 54% between the three-year period of 1976-78 and 2011-13.
- Favorable weather conditions and continued implementation of the air pollution control strategy contributed to the significant decrease in Days over the 1-Hour Ozone Standard in the recent decades.
- In 1997, the federal government implemented the 8-hour ozone National Ambient Air Quality Standard. The standard was revised in 2015 from 75 ppb to 70 ppb.

First recognized episodes of smog  
occur in Los Angeles in  
summer 1943

**1943**

**1950**

Orange County  
APCD established

**1966**

California adopts first automobile  
tailpipe emission standards in the  
nation

**1970**

Federal Clean Air Act  
enacted, establishing the  
basic U.S. program for  
controlling air pollution

**1975**

Catalytic converters  
required for most  
gasoline-powered  
vehicles

**1978**

Vapor recovery  
"boots" required  
on gas station  
nozzles

**1947**

Los Angeles County  
Air Pollution Control  
District (APCD)  
established—the first of its  
kind in the nation

**1957**

San Bernardino  
and Riverside County APCDs formed

**1968**

California Air Resources  
Board (CARB) holds its  
first meeting with Dr.  
Arie J. Haagen-Smit as  
its first chairman

**1971**

U.S. EPA adopts  
first national air  
quality standards

**1977**

California legislature  
merges air pollution  
control districts of LA,  
Orange, Riverside and  
San Bernardino counties  
forming the South Coast  
Air Quality Management  
District

**1986**

South Coast AQMD  
launches first Multiple Air  
Toxics Exposure Study  
(MATES) to understand  
air toxics health impacts.  
Additional MATES studies  
conducted in 1999, 2006,  
2013 and 2018

**MATES**

**1989**

South Coast AQMD adopts first  
Air Quality Management Plan  
to show attainment of clean air  
standards

**1998**

Carl Moyer Program  
established to reduce  
mobile source emissions

**2011**

Federal agencies and  
the State of California  
establish single time frame  
for corporate average  
fuel economy (CAFE) and  
greenhouse gas standards  
for the next generation of  
cars and light-duty trucks

**2017**

AB 617 enacted to  
develop community plans  
and implement new  
technologies addressing  
the disproportionate  
impacts of air pollution  
sources in Environmental  
Justice communities

Created a program to assess and  
reduce health risks from air toxic  
emissions under the Air Toxics  
"Hot Spots" Information and  
Assessment Act (AB 2588)

**1987**

Federal Clean Air Act  
Amendments of 1990  
enacted establishing  
new programs to  
reduce ozone, toxic  
emissions and vehicle  
emissions

**1990**

**2006**

California Global  
Warming Solutions  
Act of 2006 (AB 32)  
enacted to reduce  
greenhouse gases

**2013**

Attained the 1997  
24 hour and annual  
National Ambient Air  
Quality Standards for  
fine particulate matter  
two years ahead of  
schedule

**INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER  
FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS  
BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN  
ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS***

To the Governing Board of  
South Coast Air Quality Management District  
Diamond Bar, California

We have audited in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the governmental activities, the blended component unit, each major fund, and the aggregate remaining fund information of the South Coast Air Quality Management District (South Coast AQMD) as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise South Coast AQMD's basic financials statements, and have issued our report thereon dated October 16, 2020.

**Internal Control over Financial Reporting**

In planning and performing our audit of the financial statements, we considered South Coast AQMD's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of South Coast AQMD's internal control. Accordingly, we do not express an opinion on the effectiveness of South Coast AQMD's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

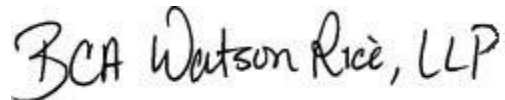

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit, we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

## **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether South Coast AQMD's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

## **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering South Coast AQMD's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

A handwritten signature in black ink that reads "BCA Watson Rice, LLP". The signature is written in a cursive, flowing style.

Torrance, California  
October 16, 2020

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR  
FEDERAL PROGRAM; REPORT ON INTERNAL CONTROL OVER COMPLIANCE;  
AND REPORT ON SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS  
REQUIRED BY THE UNIFORM GUIDANCE**

To the Governing Board of  
South Coast Air Quality Management District  
Diamond Bar, California

**Report on Compliance for Each Major Federal Program**

We have audited the South Coast Air Quality Management District's (South Coast AQMD) compliance with the types of compliance requirements described in the U.S. *Office of Management and Budget (OMB) Compliance Supplement* that could have a direct and material effect on each of South Coast AQMD's major federal programs for the year ended June 30, 2020. South Coast AQMD's major federal programs are identified in the summary of auditor's results section of the accompanying Schedule of Findings and Questioned Costs.

***Management's Responsibility***

Management is responsible for compliance with the federal statutes, regulations, and the terms and conditions of its federal award applicable to its federal programs.

***Auditor's Responsibility***

Our responsibility is to express an opinion on compliance for each of South Coast AQMD's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. Code of Federal Regulations (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about South Coast AQMD's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination on South Coast AQMD's compliance.

### ***Opinion on Each Major Federal Program***

In our opinion, South Coast AQMD's complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2020.

### **Report on Internal Control over Compliance**

Management of South Coast AQMD is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered South Coast AQMD's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program as a basis for designing auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of South Coast AQMD's internal control over compliance.

*A deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct noncompliance with a type of compliance requirement of a federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

### **Report on Schedule of Expenditures of Federal Awards Required by the Uniform Guidance**

We have audited the financial statements of the governmental activities, the blended component unit, each major fund, the aggregate remaining fund information of South Coast AQMD as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise South Coast AQMD's basic financial statements. We issued our report thereon dated October 16, 2020, which contained unmodified opinions on those financial statements. Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the basic financial statements. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by the Uniform Guidance and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the

underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Schedule of Expenditure of Federal Awards is fairly stated in all material respects in relation to the basic financial statements as a whole.

\* Major Programs

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT**  
**NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS**  
**For the Year Ended June 30, 2020**

**NOTE 1 – BASIS OF PRESENTATION**

The accompanying schedule of expenditures of federal awards (the Schedule) includes the federal award activity of the South Coast Air Quality Management District (South Coast AQMD) under programs of the federal government for the year ended June 30, 2020. The information in this Schedule is presented in accordance with the audit requirements of Title 2 U.S. Code of Federal Regulations (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of South Coast AQMD, it is not intended to and does not present the financial position, changes in net position or cash flows of the South Coast AQMD.

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

Expenditures reported in the Schedule are reported on the modified accrual basis of accounting. Such expenditures are recognized following, as applicable, either the cost principles in *OMB Circular A-87, Cost Principles for State, Local, and Indian Tribal Governments*, or the cost principles contained in the *Uniform Guidance*, wherein certain types of expenditures are not allowable or are limited as to reimbursement.

**NOTE 3– INDIRECT COST RATE**

The South Coast AQMD has elected not to use the 10% de minimis indirect cost rate allowed under the Uniform Guidance.

**NOTE 4 - SUBRECIPIENTS**

The South Coast AQMD has federal awards with subrecipients for the year ended June 30, 2020. The subrecipient expenditures from these federal awards were as follows:

Subrecipients	CFDA No.	Amount
Daimler Trucks North America, LLC	66.001	\$ 500,000
Rail Propulsion Systems	66.001	22,834
Puget Sound (Northwest Seaport Alliance)	66.039	20,000
Phoenix Motorcars	66.202	1,187,240
University of California Los Angeles	66.509	8,866
Special Services for Groups	66.509	4,949
Transportation Power	81.086	33,718
U.S. Hybrid	81.086	59,589
National Renewable Energy Laboratory	81.086	5,000
Center for Transportation and the Environment	81.086	289,706
Gas Technology Institute	81.086	71,600
Total		<u>\$2,203,502</u>

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS  
For the Year Ended June 30, 2020**

**NOTE 5– RELATIONSHIP TO COMPREHENIVE ANNUAL FINANCIAL REPORT**

Amounts reported in the accompanying Schedule agree to amounts reported within the South Coast AQMD's Comprehensive Annual Financial Report.

**NOTE 6– CONTINGENCIES**

Under the terms of federal and state grants, additional audits may be requested by the grantor agencies and certain costs may be questioned as not being appropriate expenditures under the terms of the grants. Such audits could lead to a request for reimbursement to the grantor agencies.

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
SCHEDULE OF FINDINGS AND QUESTIONED COSTS  
For the Year Ended June 30, 2020**

**SECTION I – SUMMARY OF AUDITOR’S RESULTS**

**A - Financial Statements**

- |   |               |
|---|---------------|
| 1) Type of auditor’s report issued:   | Unmodified    |
| 2) Internal control over financial reporting:                                       |               |
| a) Material weakness(es) identified?  | No            |
| b) Significant deficiency(ies) identified not considered to be material weaknesses? | None reported |
| 3) Noncompliance material to financial statements noted?                            | No            |

**B - Federal Awards**

- |   |               |
|---|---------------|
| 1) Type of auditor’s report issued on compliance for major programs:                                  | Unmodified    |
| 2) Internal control over major programs:  |               |
| a) Material weakness(es) identified?  | No            |
| b) Significant deficiency(ies) identified not considered material weakness(es)?                       | None reported |
| 3) Any audit findings disclosed that are required to be reported in accordance with 2 CFR 200.516(a)? | No            |
| 4) Identification of major programs:  |               |

<u>CFDA No.</u>	<u>Name of Federal Program</u>
66.001	Air Pollution Control Program Support
97.091	Homeland Security Biowatch Program

- |   |           |
|---|-----------|
| 5) Dollar threshold used to distinguish between Type A and Type B programs: | \$750,000 |
| 6) Auditee qualified as low-risk auditee?                                   | Yes       |

**SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT  
SCHEDULE OF FINDINGS AND QUESTIONED COSTS  
For the Year Ended June 30, 2020**

**SECTION II – FINANCIAL STATEMENT FINDINGS**

None reported.

**SECTION III – FEDERAL AWARD FINDINGS AND QUESTIONED COSTS**

None reported.

**SECTION IV – STATUS OF PRIOR YEAR FINDINGS AND QUESTIONED COSTS**

None reported.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 18

**REPORT:** Status Report on Major Ongoing and Upcoming Projects for Information Management

**SYNOPSIS:** Information Management is responsible for data systems management services in support of all South Coast AQMD operations. This item is to provide the monthly status report on major automation contracts and planned projects.

**COMMITTEE:** Administrative, November 13, 2020, Reviewed

**RECOMMENDED ACTION:**  
Receive and file.

Wayne Nastri  
Executive Officer

RMM:MAH:XC:dc

---

### **Background**

Information Management (IM) provides a wide range of information systems and services in support of all South Coast AQMD operations. IM's primary goal is to provide automated tools and systems to implement Board-approved rules and regulations, and to improve internal efficiencies. The annual Budget and Board-approved amendments to the Budget specify projects planned during the fiscal year to develop, acquire, enhance, or maintain mission-critical information systems.

In light of COVID-19 and the related budget impact, we are evaluating all of our projects and delaying non-critical projects as long as possible.

### **Summary of Report**

The attached report identifies the major projects/contracts or purchases that are ongoing or expected to be initiated within the next six months. Information provided for each project includes a brief project description and the schedule associated with known major milestones (issue RFP/RFQ, execute contract, etc.).

### **Attachment**

Information Management Status Report on Major Ongoing and Upcoming Projects During the Next Six Months

**ATTACHMENT**  
**December 4, 2020 Board Meeting**  
**Status Report on Major Ongoing and Upcoming Projects for Information Management**

<b>Project</b>	<b>Brief Description</b>	<b>Estimated Project Cost</b>	<b>Completed Actions</b>	<b>Upcoming Milestones</b>
Office 365 Implementation	Acquire and implement Office 365 for South Coast AQMD staff	\$350,000	<ul style="list-style-type: none"> <li>• Pre-assessment evaluation and planning completed</li> <li>• Board approved funding on October 5, 2018</li> <li>• Developed implementation and migration plan</li> <li>• Acquired Office 365 licenses</li> <li>• Implemented Office 365 email (Exchange) and migrated all users</li> <li>• Trained staff in Office 365 Pro Plus desktop software</li> <li>• Implemented Office 365 Pro Plus, Office Web, and OneDrive for Business</li> </ul>	<ul style="list-style-type: none"> <li>• Implement Office 365 internal website (SharePoint) and migrate existing content</li> </ul>
Permitting System Automation Phase 1	New Web application to automate the filing of permit applications with immediate processing and issuance of permits for specific application types: Dry Cleaners, Gas Stations, and Automotive Spray Booths	\$694,705	<ul style="list-style-type: none"> <li>• Automated 400A form filing, application processing, and online permit generation for Dry Cleaner, Automotive Spray Booth, and Gas Station Modules deployed to production</li> <li>• Enhanced processing of school locations with associated parcels</li> <li>• Deployed upgraded GIS Map integration and enhanced sensitive receptor identification and distance measurement work</li> <li>• Deployed new version of On Line Application Filing (OLAF) that includes Rule 212(c)(1) Implementation Guidance</li> </ul>	<ul style="list-style-type: none"> <li>• Continue Phase 1.1 project outreach support</li> </ul>
Legal Division New System Development	Develop new web-based case management system for Legal Division to replace existing system	\$500,000	<ul style="list-style-type: none"> <li>• Task order issued, evaluated and awarded</li> <li>• Project charter finalized</li> <li>• Business Process Model completed</li> <li>• User Acceptance Testing completed</li> <li>• User Training completed</li> <li>• Parallel testing completed</li> <li>• Deployed to production</li> </ul>	<ul style="list-style-type: none"> <li>• Phase II Requirements</li> </ul>

<b>Project</b>	<b>Brief Description</b>	<b>Estimated Project Cost</b>	<b>Completed Actions</b>	<b>Upcoming Milestones</b>
Permitting System Automation Phase 2	Enhanced Web application to automate filing of permit applications, Rule 222 equipment and registration for IC engines; implement electronic permit folder and workflow for internal South Coast AQMD users	\$525,000	<ul style="list-style-type: none"> <li>• Board approved initial Phase 2 funding December 2017</li> <li>• Board approved remaining Phase 2 funding October 5, 2018</li> <li>• Completed report outlining recommendations for automation of Permitting Workflow</li> <li>• Developed application submittals and form filing for first nine of 32 400-E forms</li> <li>• Completed application submittals and form filing for 23 types of equipment under Rule 222 ready for User Testing</li> <li>• Deployed to production top three most frequently used Rule 222 forms: Negative Air Machines, Small Boilers, and Charbroilers</li> <li>• Completed requirements gathering for Phase II of the project (an additional 10 400-E-XX forms)</li> </ul>	<ul style="list-style-type: none"> <li>• Complete User Testing for first nine 400-E forms</li> <li>• Complete User Acceptance Testing and Deployment to production of Emergency IC Engines Form (EICE-RE)</li> <li>• Complete User Acceptance Testing and Deployment of remaining 22 Rule 222 forms to production</li> <li>• Development of Phase II additional 10 400-E-XX forms</li> </ul>
Cybersecurity Assessment	Perform a cybersecurity risk assessment, maturity assessment, and penetration testing	\$100,000 (not included in FY 2020-21 Budget)		<ul style="list-style-type: none"> <li>• Release RFP Q1 2020</li> </ul>
South Coast AQMD Mobile Application Enhancements	Enhancement of Mobile application from SRA based map to grid map. This grid map will allow users to see AQI at a finer resolution.	\$100,000	<ul style="list-style-type: none"> <li>• Vision and scope completed</li> <li>• Project charter released</li> <li>• Task order issued, evaluated and awarded</li> <li>• Project kick off completed</li> <li>• User Interface design completed</li> <li>• Code Development completed</li> </ul>	<ul style="list-style-type: none"> <li>• User Acceptance Testing</li> <li>• Deploy Gridded Air Quality enhancement to production</li> </ul>

<b>Project</b>	<b>Brief Description</b>	<b>Estimated Project Cost</b>	<b>Completed Actions</b>	<b>Upcoming Milestones</b>
Replace Your Ride (RYP)	New Web application to allow residents to apply for incentives to purchase newer, less polluting vehicles	\$301,820	<ul style="list-style-type: none"> <li>• Phase 2 and 3 Fund Allocation, Administration, Management Reporting modules, VIN Number, Case Manager, Auto e-mail and document library updates deployed and in production</li> <li>• Implemented following modifications: Electric Vehicle Service Equipment, email templates, call center hours, additional incentive amounts, VIN Number scramble modifications and replacement option choices to allow staff to process application more efficient</li> <li>• Implemented RYP and PeopleSoft Financial integration module</li> <li>• Implemented RYP</li> </ul>	<ul style="list-style-type: none"> <li>• Provide support for RYP moratorium</li> </ul>
Flare Event Notification – Rule 1118	Develop new web-based application to comply with Rule 1118 to improve current flare notifications to the public and staff	\$100,000	<ul style="list-style-type: none"> <li>• Project charter released</li> <li>• Task order issued, evaluated and awarded</li> <li>• Refinery user training completed</li> <li>• Major incident notification deployed</li> <li>• Phase II development on administrative and reporting pages completed</li> <li>• Completed Phase II User Acceptance Testing</li> <li>• Demonstrated Phase II to EO/EC</li> <li>• Refinery staff training completed</li> <li>• Phase II deployed to production</li> </ul>	<ul style="list-style-type: none"> <li>• Provide post-production support for Phase II</li> </ul>

<b>Project</b>	<b>Brief Description</b>	<b>Estimated Project Cost</b>	<b>Completed Actions</b>	<b>Upcoming Milestones</b>
AQ-SPEC Cloud Platform	Develop a cloud-based platform to manage and visualize data collected by low-cost sensors	\$385,500	<ul style="list-style-type: none"> <li>• Project charter released</li> <li>• Task order issued, evaluated and awarded</li> <li>• Business requirements gathering completed</li> <li>• System architecture, data storage, and design data ingestion completed</li> <li>• Data transformations, calculations and averaging completed</li> <li>• Dashboards, microsites and data migration completed</li> <li>• Release 2 User Acceptance Testing completed</li> <li>• Deployment to production completed</li> </ul>	<ul style="list-style-type: none"> <li>• Support public outreach for AQ-SPEC Platform</li> </ul>
PeopleSoft Electronic Requisition	Electronic requisition for PeopleSoft Financials will allow submittal of requisitions online, tracking multiple levels of approval, electronic archival, pre-encumbrance of budget, and streamlined workflow	\$75,800	<ul style="list-style-type: none"> <li>• Project charter released</li> <li>• Task order issued, evaluated and awarded</li> <li>• Requirement gathering and system design completed</li> <li>• System setup and code development and user testing for Information Management completed</li> <li>• System setup and code development and User Acceptance Testing completed for Administrative and Human Resources completed</li> <li>• System setup for Technology Advancement Office completed</li> </ul>	<ul style="list-style-type: none"> <li>• Deployment to IM and AHR Divisions</li> <li>• TAO training and Integrated User Testing for other divisions</li> </ul>

<b>Project</b>	<b>Brief Description</b>	<b>Estimated Project Cost</b>	<b>Completed Actions</b>	<b>Upcoming Milestones</b>
VW Environmental Mitigation Action Plan Project	CARB has assigned South Coast AQMD to develop web applications for two projects: Zero-Emission Class 8 Freight and Port Drayage Truck Project and Combustion Freight and Marine Project. The database will support reporting	\$355,000	<ul style="list-style-type: none"> <li>• Draft Charter Document issued</li> <li>• Project Initiation completed</li> <li>• Task order issued</li> <li>• Deployed Phase I to production</li> <li>• Phase II to production – Messaging, Evaluation, and Administration</li> <li>• Development of evaluation module and calculation module completed</li> <li>• Phase III - ZE Class 8 Application Deployed to production</li> </ul>	<ul style="list-style-type: none"> <li>• Development of Phase III – Ranking Contracting, and Inspection</li> </ul>
Renewal of HP Server Maintenance & Support	Purchase of maintenance and support services for servers and storage devices	\$140,000		<ul style="list-style-type: none"> <li>• Request Board approval on April 2, 2021 for HP server maintenance and support</li> <li>• Execute contract April 30, 2021</li> </ul>
Renewal of OnBase Software Support	Authorize the sole source purchase of OnBase software subscription and support for one year	\$140,000		<ul style="list-style-type: none"> <li>• Request Board approval May 7, 2021</li> <li>• Execute contract July 15, 2021</li> </ul>

Project	Brief Description	Estimated Project Cost	Completed Actions	Upcoming Milestones
Source Test Tracking System	Online system to keep track of timelines and protocols and reports received. External online portal to submit source testing protocols and reports, track the review process, and provide integration to internal users	\$250,000	<ul style="list-style-type: none"> <li>• Project Charter approved</li> <li>• Project Initiation completed</li> <li>• Task Order issued</li> <li>• Project Kick-off completed</li> <li>• User requirements gathering for Source Testing and Engineering &amp; Permitting Divisions completed</li> <li>• User requirements gathering for Compliance &amp; Enforcement and Planning Divisions completed</li> <li>• Development of Full Business Process Model of the To-Be system completed</li> <li>• Development of screens mock-ups for the system completed.</li> <li>• Review proposed automation with EQUATE group completed</li> <li>• Proposal for system development approved</li> </ul>	<ul style="list-style-type: none"> <li>• Review proposed automation with Stationary Source Committee</li> <li>• Development of Sprint 1 of the Source Test Protocol and Report Tracking System</li> </ul>

Projects that have been completed within the last 12 months are shown below.	
Completed Projects	
Project	Date Completed
CLASS Database Software Licensing	October 16,2020
Flare Event Notification – Rule 1118 Phase II	October 14, 2020
Volkswagen Environmental Mitigation Administration Zero Emission Class 8	August 18, 2020
Ingres Actian X database migration	August 17, 2020
Rule 1403 Enhancement	July 1, 2020
Legal Office System	June 17, 2020
Document Conversion Services	June 30, 2020
Oracle PeopleSoft Software Support	June 5, 2020
Renewal of OnBase Software Support	May 1, 2020
Public Facing Permit Application Status Dashboard	May 1, 2020
Mobile Application Enhancement – Hourly Forecast	April 29, 2020
Renewal of HP Server Maintenance & Support	April 30, 2020
Rule 1180 Fence Line Monitoring Web Site Enhancements	April 3, 2020
Volkswagen Environmental Mitigation Administration and Communication Module	March 3, 2020
Data Cable Infrastructure Installation	February 31, 2020
Prequalify Vendor List for PCs, Network Hardware, etc.	February 7, 2020
Mobile Application Enhancements Including Spanish Language	January 23, 2020
Annual Emissions Reporting System	December 31, 2019
Rule 1180 Fence Line Monitoring Website	December 31, 2019
Online filing of Rule 222 – Negative Air Machines, Small Boilers, and Charbroilers Modules	December 13, 2019
Flare Notification System	December 12, 2019
Volkswagen Environmental Mitigation Application Filing Portal	December 7, 2019
CLASS Database Software Licensing and Support	November 30, 2019
Office 365 Suite Implementation of File Storage (OneDrive for Business)	November 22, 2019

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 20

REPORT: Administrative Committee

SYNOPSIS: The Administrative Committee held a meeting remotely, Friday, November 13, 2020. The following is a summary of the meeting.

RECOMMENDED ACTION:  
Receive and file.

Dr. William A. Burke, Chair  
Administrative Committee

nv

---

### **Committee Members**

Present: Dr. William A. Burke/Chair  
Council Member Ben Benoit/Vice Chair  
Council Member Michael Cacciotti  
Council Member Judith Mitchell  
Supervisor Janice Rutherford

Absent: None

### **Call to Order**

Chair Burke called the meeting to order at 10:00 a.m. Dr. Burke appointed Supervisor Janice Rutherford to the Administrative Committee meeting.

The following items were taken out of order.

11. **Execute Contracts for Legislative Consulting Services Representation in Sacramento, California:** Derrick Alatorre, Deputy Executive Officer/Legislative, Public Affairs and Media, reported that the current contracts for legislative representation in Sacramento, California, expire on December 31, 2020. Proposals were received from California Advisors, LLC; Campbell Strategy & Advocacy; Joe A. Gonsalves & Son; and Resolute. The consultants were interviewed by the Administrative Committee and it was recommended to keep the current three legislative contracts with California Advisors, LLC; Joe A. Gonsalves & Son; and Resolute. Mr. Nastri was given

spot authority to enter into an agreement with Campbell Strategy & Advocacy if the need arises.

Moved by Mitchell to retain the three current legislative consultant services and authorize the Executive Officer to enter into agreements with Campbell Strategy & Advocacy as needed for their particular expertise; seconded by Cacciotti, unanimously approved.

Ayes: Burke, Benoit, Cacciotti, Mitchell, Rutherford  
Noes: None  
Absent: None

12. **Amend Contracts for Legislative Representation in Washington, D.C.:**  
Mr. Alatorre reported that this is the last of the one-year extensions for the three consultants in Washington, D.C.: Kadesh & Associates, LLC; Cassidy & Associates, and Carmen Group, Inc. Council Member Mitchell recommended that the three contract extensions be renewed. The Carmen Group has been instrumental in helping get industry manufacturers, and chambers of commerce involved in legislative matters of importance to South Coast AQMD.

Moved by Mitchell; seconded by Cacciotti, unanimously approved.

Ayes: Burke, Benoit, Cacciotti, Mitchell, Rutherford  
Noes: None  
Absent: None

#### **DISCUSSION ITEMS:**

1. **Board Members' Concerns:** None to report.
2. **Chairman's Report of Approved Travel:** None to report.
3. **Report of Approved Out-of-Country Travel:** None to report.
4. **Review December 4, 2020 Governing Board Agenda:** Vice Chair Ben Benoit requested that public comment be moved to the beginning of the Board meeting which would provide the public with an opportunity to comment and not have to stay for the duration of the meeting. The Administrative Committee concurred.
5. **Approval of Compensation for Board Member Assistant(s)/Consultant(s):** Supervisor Janice Rutherford has selected Debra Mendelsohn as her Board Consultant to replace Andrew Silva, and she will continue with Mark Taylor.

Moved by Mitchell; seconded by Benoit, unanimously approved.

Ayes: Burke, Benoit, Cacciotti, Mitchell, Rutherford  
Noes: None  
Absent: None

6. **Update on South Coast AQMD Inclusion, Diversity and Equity Efforts:** Wayne Nastri, Executive Officer, reported that the open recruitment for the Inclusion, Diversity and Equity Advisory (IDEA) Officer is underway with the hope that the position will be filled in January 2021. The IDEA panel continues to meet and has provided recommendations on communication and engagement and forming subcommittees. The IDEA panel will be presenting to Executive Council and to the entire staff through a lunch and learn session in December. Council Member Mitchell commented that she thought that the Inclusion, Diversity and Equity Officer title is too lengthy and recommended the title of Diversity Officer. Mr. Nastri responded that a simpler title will be considered but each of these terms has specific meaning. Council Member Mitchell recommended that Dr. Burke and Mr. Gilchrist be involved in the selection process.
7. **Budget and Economic Outlook Update:** Jill Whynot, Chief Operating Officer, reported that the number of permit applications recently has improved but year-to-date applications are down 18%. The Port of Long Beach reported another record month on their volume, for three consecutive months.
8. **Status Report on Major Ongoing and Upcoming Projects for Information Management:** Ron Moskowitz, Chief Information Officer/Information Management reported that on November 6, a new Grant Management system was deployed for Prop 1B. The Rule 1180 Refinery monitoring system was also enhanced last week and 40,000 people are now using our mobile application. An air quality model has been incorporated into the upcoming version and a preview will be provided for all Board Members before going live.
9. **Annual Audited Financial Statement for FY Ended June 30, 2020:** Sujata Jain, Chief Financial Officer/Finance, reported that this item transmits the annual audited financial statements with an unmodified opinion (the highest opinion) on its financial statements. Helen Chu, auditor/BCA Watson Rice, provided an update on the financial statements and single audit results. There were no material weaknesses, or significant deficiencies. Board members asked about the 5-year projection and commented about expectations for economic recovery.

10. **South Coast AQMD's FY 2020-21 First Quarter Ended September 3, 2020 Budget vs. Actual (Unaudited):** Ms. Jain provided an overview of the Budget vs. Actual for the first quarter, ended on September 30, 2020, revenues, expenditures and the updated General Fund Five-year projection based on the results.

**ACTION ITEMS:**

13. **Recognize Revenue and Appropriate and Transfer Funds, Issue Solicitations and Purchase Orders and Amend Contract for Air Monitoring:** Jason Low, Assistant Deputy Executive Officer/Science and Technology Advancement reported that this item is to recognize expected revenue up to \$350,000 from the U.S. Government for the enhanced particulate monitoring program and up to \$800,000 from the U.S. EPA PAMS Program. In addition, this action is to appropriate the funds in the Science and Technology Advancement budget and transfer \$350,000 between major objects to realign expenditures for the enhanced particulate program. Lastly, this item is to issue solicitations to execute purchase orders and amend contract for air monitoring.

Moved by Cacciotti; seconded by Mitchell, unanimously approved.

Ayes: Burke, Cacciotti, Mitchell  
Noes: None  
Absent: None

14. **Establish List of Prequalified Vendors for Mailing Services:** John Olvera, Deputy Executive Officer/Administrative & Human Resources, reported that this action is to establish a prequalified vendor's list that will be used for mailing services for a three-year period. Three proposals were received and were all deemed qualified. Sufficient funds are in this year's budget and will be requested in future budgets.

Moved by Mitchell; seconded by Cacciotti, unanimously approved.

Ayes: Burke, Cacciotti, Mitchell  
Noes: None  
Absent: None

**WRITTEN REPORT:**

15. **Local Government & Small Business Assistance Advisory Group Minutes for the September 11, 2020 Meeting:** The report was acknowledged and received.

**OTHER MATTERS:**

16. **Other Business:** There was no other business.

17. **Public Comment:** There was no public comments.
18. **Next Meeting Date:** The next regular Administrative Committee meeting is scheduled for December 11, 2020 at 10:00 a.m.

**Adjournment**

The meeting adjourned at 11:34 a.m.

**Attachment**

Local Government & Small Business Assistance Advisory Group Minutes for the September 11, 2020 meeting

# South Coast Air Quality Management District

21865 Copley Drive, Diamond Bar, CA 91765-4178  
(909) 396-2000 • [www.aqmd.gov](http://www.aqmd.gov)

## LOCAL GOVERNMENT & SMALL BUSINESS ASSISTANCE ADVISORY GROUP FRIDAY, SEPTEMBER 11, 2020 MEETING MINUTES

### MEMBERS PRESENT:

Council Member Ben Benoit, LGSBA Chairman (Board Member)  
Supervisor Janice Rutherford (Board Member)  
Mayor Pro Tempore Rachelle Arizmendi, City of Sierra Madre  
Paul Avila, P.B.A. & Associates  
Geoffrey Blake, Metal Finishers of Southern California  
Todd Campbell, Clean Energy  
LaVaughn Daniel, DancoEN  
Bill LaMarr, California Small Business Alliance  
Rita Loof, RadTech International  
Eddie Marquez, Roofing Contractors Association  
David Rothbart, Los Angeles County Sanitation District

### MEMBERS ABSENT:

Supervisor V. Manuel Perez (Board Member)  
Felipe Aguirre  
John DeWitt, JE DeWitt, Inc.

### OTHERS PRESENT:

Mark Abramowitz  
Tom Gross, Board Member Consultant (*Benoit*)  
Dan McGivney, SoCal Gas  
Andrew Silva, Board Member Consultant (*Rutherford*)

### SOUTH COAST AQMD STAFF:

Jill Whynot, Chief Operating Officer  
Derrick Alatorre, Deputy Executive Officer  
Sujata Jain, Chief Financial Officer  
Julie Prussack, Hearing Board Chair  
Faye Thomas, Clerk of the Board  
Jason Aspell, Assistant Deputy Executive Officer  
Fabian Wesson, Assistant Deputy Executive Officer  
Victor Yip, Assistant Deputy Executive Officer  
Mark Henninger, Information Technology Manager  
Michael Morris, Planning & Rules Manager  
Lisa Tanaka O'Malley, Senior Public Affairs Manager

Uyen-Uyen Vo, Program Supervisor  
Anthony Tang, Information Technology Supervisor  
Van Doan, Air Quality Specialist  
Elaine-Joy Hills, Air Quality Specialist  
Paul Wright, Senior Information Technology Specialist

#### **Agenda Item #1 - Call to Order/Opening Remarks**

Supervisor Janice Rutherford called the meeting to order at 11:31 a.m.

Ms. Lisa Tanaka O'Malley provided guidelines and general instructions for participation in the remote meeting for the Local Government & Small Business Assistance Advisory Group (LGSBA) meeting via Zoom webinar and teleconference.

#### **Agenda Item #2 – Approval of June Meeting Minutes/Review of Follow-Up/Action Items**

Chair Ben Benoit called for approval of the August 14, 2020 meeting minutes. The minutes were approved unanimously.

#### **Agenda Item #3 – Review of Follow Up/Action Items**

Mr. Derrick Alatorre provided responses to the action items from the previous meeting and indicated that staff provided links to the advisory group members via email regarding past cost-effectiveness analyses and the 6<sup>th</sup> Environmental Justice Conference registration information.

#### **Agenda Item #4 – Budget and Economic Outlook Update**

Ms. Jill Whynot provided an update on economic information, revenue, expenditures, permitting activity, and fee review requests.

Mr. Bill LaMarr asked who the members of the Fee Review Committee (FRC) are. Ms. Whynot replied that the FRC is comprised of representatives from various departments, including Finance, Engineering & Permitting, Legal, Legislative, Public Affairs & Media, and Compliance & Enforcement; additional representatives are invited as needed. Mr. LaMarr asked if the FRC offers options other than payment plans. Ms. Whynot indicated that she served on the FRC in the past and most cases were related to billing errors, payment plan requests, or permit errors; therefore, there are cases in addition to payment plans. Mr. LaMarr indicated that there is a fee for reinstatement of expired permits and asked if the FRC has the authority to waive it or offer a forbearance program considering the current economic situation resulting from the coronavirus disease 2019 (COVID-19) pandemic. Ms. Whynot replied that the FRC does not have the authority to waive fees as specified in Rule 301. The annual renewal fees for small businesses such as dry cleaners, gas stations, and auto body shops are \$200-400 per year. Approximately 10% of potentially expired permits belong to small businesses and the FRC can waive the fees if there are errors caused or contributed by the South Coast Air Quality Management District (South Coast AQMD). Businesses are notified multiple times before the permits expire, including 1-2 phone calls and signature-required postal delivery, which is used to prove notification. Businesses also have the option to make fee payments using credit cards. Mr. LaMarr commended staff for assisting businesses with fee review requests.

Mr. Todd Campbell referenced slides #3-4 and commented that the port twenty-foot equivalent unit (TEU) throughput for the Ports of Los Angeles and Long Beach for July 2020 were notably high despite

the effects of COVID-19 pandemic on the economy and stated that staff should consider that aspect during indirect source rule development.

**Agenda Item #5 – Getting to Know the Hearing Board**

Chair Julie Prussack provided an overview of the South Coast AQMD’s Hearing Board.

Chair Benoit indicated that the presentation was very informative and recommended it to new Governing Board (GB) members.

Mr. LaMarr referenced slide #17 and asked for clarification on the definitions of “taking of a business” and “practical closing of a business.” Chair Prussack replied that there are two definitions specified in the California Health & Safety Code (H&SC). First, it is defined as the unreasonable taking of property, including lost profits, potential penalties for failure to conduct emissions testing, or time needed for equipment repair. Second, it is defined as the essential closing of a lawful business, which is the closing of the business resulting from variance denial. Mr. LaMarr asked if the definitions are in any written South Coast AQMD documents. Chair Prussack replied that the definitions are written in the H&SC and recited it.

Mr. David Rothbart stated hypothetically, if many wastewater treatment plants need to operate generators during power shutoff in exceedance of the maximum 200 allowable operating hours and asked if a group variance or group stipulated order for abatement are recommended. Chair Prussack replied that a group variance could be an option, which is one variance application for multiple entities; however, all entities must have in common all relevant facts needed for the six findings. In this case, the use of an individual generator is very specific; therefore, a group variance may not be the best option and an emergency or regular variance would be more appropriate. Mr. Rothbart asked if a stipulated order for abatement is a better option. Chair Prussack replied that orders for abatement are punitive and have ramifications beyond the Hearing Board and recommended seeking a variance if the violation is beyond the reasonable control of the entity. Mr. Alatorre stated that some back-up generator bills were introduced, but they did not make it out of the houses of origin; however, there were discussions regarding these bills with the water companies, California Municipal Utilities Association (CMUA), and hospitals. Mr. Alatorre suggested that staff contacts Mr. Rothbart to further discuss details of these bills, to which Mr. Rothbart agreed.

*Action item: Contact Mr. Rothbart to discuss back-up generator bills.*

Mr. Campbell commended and thanked Chair Prussack for her leadership of the Hearing Board.

**Agenda Item #6 – Overview of Amended Rule 1407: Control of Emissions of Arsenic, Cadmium, and Nickel from Non-Chromium Metal Melting Operations**

Ms. Uyen-Uyen Vo provided an overview of the amended Rule 1407 revision of emissions standards, which applies to non-chromium metal melting operations.

Ms. Rita Loof asked how many facilities are impacted by this rule. Ms. Vo replied that approximately 60 facilities are impacted by this rule; however, a majority would qualify for one of the exemptions, including housekeeping, recordkeeping, and building enclosures. Ms. Loof asked what products are manufactured by these facilities. Ms. Vo replied the products include pure ingots, art and sculptures, and parts for different industries, including oil and well and aerospace industries.

**Agenda Item #7 – Written Report**

No comments.

**Agenda Item #8 - Other Business**

Mr. LaMarr requested a presentation on the California Air Pollution Control Officers Association (CAPCOA) and its involvement in the South Coast AQMD rulemaking process. Mr. Alatorre stated that CAPCOA is an association for all air pollution control officers in California and staff will seek guidance on the presentation request from Mr. Wayne Nastri.

*Action item: Agendize a presentation on CAPCOA.*

Ms. Loof expressed support for the presentation request.

**Agenda Item #9- Public Comment**

None.

**Agenda Item #10 – Next Meeting Date**

The next regular Local Government & Small Business Assistance Advisory Group meeting is scheduled for Friday, October 9, 2020 at 11:30 a.m.

**Adjournment**

The meeting adjourned at 12:39 p.m.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 21

REPORT: Investment Oversight Committee

SYNOPSIS: The Investment Oversight Committee held a meeting remotely on Friday, November 13, 2020. The following is a summary of the meeting.

RECOMMENDED ACTION:  
Receive and file.

Michael A. Cacciotti, Chair  
Investment Oversight Committee

SJ:tm

---

**Committee Members**

Present: Council Member Michael Cacciotti, Chair  
Senator Vanessa Delgado (Retired)  
Richard Dixon  
Brent Mason  
Patrick Pearce

Absent: Dr. William A. Burke, Vice Chair

**Call to Order**

Chair Cacciotti called the meeting to order at 12:02 p.m.

**DISCUSSION ITEMS:**

1. *Quarterly Report of Investments*: The Committee reviewed the quarterly investment report that was provided to the Board. For the month of September 2020, the South Coast AQMD's weighted average yield on total investments of \$966,837,679 from all sources was 0.68%. The allocation by investment type was 96.0% in the Los Angeles County Pooled Surplus Investment Fund (PSI) and 4.0% in the State of California Local Agency Investment Fund (LAIF) and South Coast AQMD's

Special Purpose Investments (SPI). The one-year Treasury Bill rate as of September 30, 2020 was 0.12%.

2. Cash Flow Forecast: Sujata Jain, Chief Financial Officer/Deputy Executive Officer, reported on the cash flow for the current year and the projections for the next three years. South Coast AQMD Investment Policy limits its Special Purpose Investments to 75% of the minimum amount of funds available for investment during the Cash Flow Horizon. That limit, which includes all funds (General, MSRC, Clean Fuels, AB 617 Implementation, VW) is \$143.4 million. Current Special Purpose Investments are well below the maximum limit. Staff is working with the Los Angeles County Treasurer to seek investments that will yield additional interest.
3. Financial Market Update: Richard Babbe from PFM Asset Management provided information on current overall economic conditions. He presented market information which focused on the rise in COVID-19 cases and its potential negative impacts on the economy. Along with COVID-19, market volatility, a new presidential administration, and questions regarding the future makeup of Congress could cause uncertainty in future taxes, stimulus, national debt and other areas. There were a few favorable signs that some sectors such as retail and manufacturing are rebounding, however, small business revenues are still materially affected. Home sales are also up as interest rates are historically low. Unemployment has come down to about 8% from 10% at the end of the second quarter. Due to COVID-19, the stock market dropped by 34% in March but since then has rebounded and is up by 5.60% YTD. There is a long-term concern over the national debt, which is in excess of \$3 trillion, with GDP lagging.
4. Discussion of Yield by County: Ms. Jain reported on the historical yield comparison for the last 10 years. The data showed that, until 2019, LA County's yields were higher than Orange, Riverside, San Bernardino and San Diego. In August 2020, the LA County Treasurer and Tax Collector received approval to increase the weighted average maturity from 1-2 years to 1-3 years to increase yield. The committee does not recommend changing Los Angeles County as South Coast AQMD's treasurer.

**ACTION ITEM:**

5. Calendar Year 2021 Committee Meeting Dates: For calendar year 2021, quarterly Investment Oversight Committee meeting dates are as follows: Friday, February 19; Friday, May 21; Friday, August 20; and Friday, November 19.

Moved by Dixon; seconded by Senator Delgado; unanimously approved.

Meeting adjourned at 12:37 p.m.

**OTHER MATTERS:**

**6. Other Business**

There was no other business.

**7. Public Comment Period**

There were no public comments.

**8. Next Meeting Date**

The next regular meeting of the Investment Oversight Committee is scheduled for February 19, 2021 at noon.

[↑ Back to Agenda](#)

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 22

REPORT: Legislative Committee

SYNOPSIS: The Legislative Committee held a meeting remotely on Friday, November 13, 2020. The following is a summary of the meeting.

Agenda Item	Recommendation/Action
2021 State Legislative Goals and Objectives	Approve With Committee Revisions
2021 Federal Legislative Goals and Objectives	Approve With Committee Revisions
H.R. 8626 (Barragán) Energy Resilient Communities Act	Support With Amendments

**RECOMMENDED ACTION:**

Receive and file this report, and approve agenda items as specified in this letter.

Judith Mitchell, Chair  
Legislative Committee

DJA:LTO:PFC: sd:ar

**Committee Members**

Present: Council Member Judith Mitchell/Chair  
Council Member Joe Buscaino/Vice Chair  
Dr. William A. Burke  
Supervisor V. Manuel Perez  
Supervisor Janice Rutherford

Absent: Senator Vanessa Delgado (Ret.)

**Call to Order**

Chair Mitchell called the meeting to order at 9:06 a.m.

## **DISCUSSION ITEMS:**

### **1. Update on Federal Legislative Issues**

South Coast AQMD's federal legislative consultants (Carmen Group, Cassidy & Associates, and Kadesh & Associates) each provided a written report on key Washington, D.C. issues.

Gary Hoistma of Carmen Group focused on the current status of the General Elections and reported that legislative activity is at a standstill until after the Electoral College votes in December. The likely outcome will be a Biden Administration and a narrowly divided Congress. There are two run-off Senate races in Georgia that will be held in January 2021. However, regardless of the outcome of the Georgia run-off elections, there will not be a 60-vote majority within either caucus to change the Senate filibuster rule.

Amelia Jenkins of Cassidy & Associates informed the committee that the existing Continuing Resolution (CR) for Fiscal Year 2021 Appropriations will expire on December 11. Congress may either pass an Omnibus to maintain funding through 2021 or another CR which would expire after the New Year. Other bills that may move in the final weeks of this Congress include the National Defense Authorization Act, which contains a reauthorization for the Diesel Emissions Reductions Act. The internal elections for Democratic and Republican Leadership will be held next week in the House. Transition teams for the Biden Administration are active.

Supervisor Perez asked if Presidential transition activities are occurring.

Ms. Jenkins reported that the Biden Administration is identifying staff for positions, so they will be ready once the election results are certified. Further, the Biden Administration has named policy teams who are actively preparing the 100-day agenda.

Council Member Buscaino asked if names were mentioned to lead the Environmental Protection Agency (EPA) and the Department of Energy (DOE).

Ms. Jenkins responded that Mary Nichols has been brought up for EPA, as well as Heather McTeer Toney, who previously served as EPA Regional Administrator. With regard to DOE, Ernie Moniz, Steven Chu and Arun Majumdar have been mentioned. A list of potential Cabinet and agency candidates will be sent to staff to distribute to Committee members.

Mark Kadesh of Kadesh & Associates reported that two members in the South Coast AQMD Delegation are running for House Leadership positions. Congressman Tony Cardenas is running for Democratic Congressional Campaign Committee and

Congressman Pete Aguilar is running for Democratic Caucus Vice Chair . Also pending is Governor Newsom's appointment for the junior Senate seat.

Supervisor Perez commented that both Congressmen Cardenas and Aguilar would be positive for air quality issues in Leadership positions. Chair Mitchell agreed and remarked how she had served with both Members through the California League of Cities.

There was no public comment.

## **2. Update on State Legislative Issues**

South Coast AQMD's state legislative consultants (Resolute, California Advisors, LLC, and Joe A. Gonsalves & Son) each provided written reports on key issues in Sacramento.

Mr. David Quintana of Resolute commented that there will be an open state Senate seat, which was formerly held by Senator Holly Mitchell, who was elected to the Los Angeles County Board of Supervisors. A special election will be called for her vacated seat. Assembly Member Sydney Kamlager has publicly expressed interest in running for that seat. As of yet, no one else has expressed a desire to run in opposition to Assembly Member Kamlager in this Senate race.

Mr. Ross Buckley of California Advisors, LLC reported that no incumbents in the Assembly lost their re-election campaigns regardless of party affiliation. However, there will be a slight change to the makeup of the Assembly, because in the 38<sup>th</sup> Assembly District a Republican will be replacing a Democrat who vacated the seat to run for Congress. In the next legislative session, of the 80 members, there will be 60 Democrats, 19 Republicans and one No Party Preference. Democrats will retain more than a two-thirds super-majority with six members above the 54 supermajority threshold. Over a million ballots remain uncounted. The four counties with the largest remaining balance of uncounted ballots are Sacramento, Los Angeles, Riverside and San Bernardino.

Chair Mitchell asked if there is any expectation that the remaining ballots could change the outcome of any election. Mr. Buckley responded that there are still some very close races in the state Senate and in Congress.

Mr. Paul Gonsalves of Joe A. Gonsalves & Son reported on the Senate elections and ballot propositions. In the state Senate, there are currently 28 Democrats, 11 Republicans and one vacant seat. Democrats are expected to gain two seats in the Senate and two other Senate elections remain closely contested. Former Senator Josh Newman is leading the race for the 29<sup>th</sup> District Senate seat, currently held by Senator Ling Ling Chang, by 10,000 votes. Dave Min is leading the race for the 37<sup>th</sup>

District Senate seat by 12,000 votes, against incumbent Senator John Moorlach. In the 23<sup>rd</sup> District, Republican candidate Rosilicie Ochoa Bogh is leading by 16,000 votes. In the 21<sup>st</sup> District, incumbent Senator Scott Wilk is leading by 5,300 votes. There were 12 ballot propositions overall. The outcome of a handful of those propositions represented a partial rebuke of the Legislature's efforts. Proposition 15 that increased taxes on commercial properties failed, Proposition 22, the Uber/Lyft initiative, passed, and Proposition 25 to replace cash bail failed.

There was no public comment.

### **ACTION ITEMS:**

#### **3. Recommend 2021 Legislative Goals and Objectives**

Philip Crabbe and Denise Peralta Gailey, Public Affairs Managers, presented on the proposed state legislative goals and objectives for 2021. The State Legislative Goals include:

- Seeking new and increasing existing sustainable funding sources for clean air programs and priorities that: 1) protect public health; 2) eliminate air pollution; 3) address the impacts of wildfires; 4) fund air district's efforts to implement the AB 617 Program; and 5) ensure attainment of state and federal air quality standards, with a focus on incentive programs that support South Coast AQMD AQMPs;
- Working to ensure that funding meant for air districts is properly allocated;
- Protecting South Coast AQMD authority to implement clean air policies and programs; and
- Working to ensure that the state government does its fair share to reduce air pollution by providing ample funding, legislative and regulatory action and support by the Administration, to facilitate implementation of South Coast AQMD AQMPs and attainment of federal air quality standards;

Mr. Crabbe added that the proposed goals and objectives include:

- Supporting policies, programs and funding that provide relief to South Coast AQMD to address the negative impacts of COVID-19, including items relating to policy priorities and operational needs;
- Supporting legislation and funding to promote environmental justice initiatives that: reduce localized health risks from criteria pollutant and toxic air emissions, and expand access to clean air technology, especially in disadvantaged communities. This includes securing the necessary resources to implement South Coast AQMD's responsibilities created under AB 617;
- Supporting policies and funding, including those which are part of economic stimulus efforts, that promote the deployment of zero and near-zero emission infrastructure, equipment, and vehicles, to protect public health, attain federal

clean air standards, support the economy and promote job retention and creation within the South Coast;

- Supporting policies, programs and funding that: 1) reduce air quality-related public health impacts within the South Coast region caused by wildfires; and 2) reduce the number of wildfires that impact the South Coast;
- Supporting efforts directing that the Greenhouse Gas Reduction Fund provide a sustainable funding source to maximize criteria pollutant and toxic emission reduction co-benefits; promote deployment of near- zero and zero-emission vehicles and infrastructure, and address air quality-related public health impacts in the South Coast;
- Supporting energy efficiency, demand reduction, and reliable, cost effective and clean energy for the South Coast region; and
- Supporting legislative policies and administrative actions that promote job retention and creation, as well as economic growth, while working toward attainment of clean air standards

Supervisor Rutherford recommended the following changes to the proposed 2021 state legislative goals and objectives in order to clarify and better reflect key South Coast AQMD priorities and needs:

- For air quality funding, include the funding priority to ensure attainment of state and federal air quality standards and move this item to the top of the list;
- For surface transportation and goods movement, move to the top of the list;
- Make explicit reference to the need for clean trucks in the goals and objectives;
- Within state support, add a priority to work to ensure that the state government does not impose unfunded mandates on the South Coast AQMD;
- Within state support, include that the state should ensure that local air districts' have sufficient resources to fully implement responsibilities and programs created through AB 617 (C. Garcia, 2017).

**Staff recommended an “APPROVE WITH COMMITTEE REVISIONS” position on the proposed 2021 State Legislative Goals and Objectives.**

Moved by Burke; seconded by Buscaino; unanimously approved

Ayes: Burke, Buscaino, Mitchell, Perez, Rutherford

Noes: None

Abstain: None

Absent: Delgado

Lisa Tanaka O'Malley, Senior Public Affairs Manager, Legislative, Public Affairs & Media, and Ms. Gailey presented the proposed federal legislative goals and objectives for 2021. Overall, the goals and objectives focused on the federal

government's responsibility for their assigned sources of air pollution in terms of policies and funding to assist our region with attainment of standards.

Emergencies and wildfires funding were added to encompass situations where Congress may take up measures to deal with natural disasters and other urgent issues. The federal government's responsibility was updated to address ozone attainment issues in our region by 2023 and 2031 through adequate funding, policy and regulatory actions. This section also states that the South Coast Air Basin should not be subject to sanctions, fees or penalties for the failure to attain the standards due to federal sources of emissions where South Coast AQMD does not have jurisdiction.

Ms. Tanaka noted that the revisions recommended for state goals and objectives would be incorporated into the federal goals and objectives to directly address attainment issues and identify heavy-duty trucks as a funding priority. Additional updates to the federal goals and objectives include COVID-19 and an economic stimulus to seek legislative and administrative relief to assist with the impacts of unplanned expenses and loss of revenues. This paragraph identifies the pursuit of funding for economic stimulus efforts to reflect South Coast AQMD's experience for clean air and green technologies to protect public health and create jobs. Lastly, technology advancement was updated to reflect opportunities to help clean the air through the deployment of renewable energy, energy storage and microgrids.

There was no public comment.

**Staff recommended an "APPROVE" position on the 2021 Federal Legislative Goals and Objectives.**

Moved by Buscaino; seconded by Perez; unanimously approved

Ayes: Burke, Buscaino, Mitchell, Perez, Rutherford

Noes: None

Abstain: None

Absent: Delgado

There were no public comments.

**4. Recommend Position on Federal Bill:**

**H.R. 8626 (Barragán) Energy Resilient Communities Act**

Ms. Tanaka presented H.R. 8626, the "Energy Resilient Communities Act" which was authored by Representative Nanette Barragán who represents communities from the Port of Los Angeles to the Watts Towers. The bill would create a new Clean Energy Microgrid Grant program within the Department of Energy to build resilience through clean energy microgrids in communities for critical infrastructure.

This program would provide two categories of grants for technical assistance and outreach, and project development and construction.

Technical assistance and outreach grants could be used to evaluate and upgrade building codes and standards for climate resiliency and to develop an infrastructure resilience plan. Other eligible grant activities would include identification and design of prospective clean energy microgrids, assistance to address permitting and siting challenges, and community outreach and collaborative planning. This grant program would be authorized at \$50 million per year from fiscal year 2021 to 2030.

The second type of grants for resiliency could be utilized to develop and construct either a clean energy microgrid that supports critical infrastructure or a clean energy microgrid for individual homes belonging to medical baseline customers. This grant would be authorized at \$1.5 billion per year from fiscal year 2021 to 2030 with grants up to \$10 million each.

The criteria for evaluating the grant applications include the reduction of greenhouse gases and criteria air pollutants, public health, and energy cost burden for communities. Additional criteria prioritize projects based on maximizing land use, supporting small and disadvantaged businesses, and apprenticeships. The bill defines critical community infrastructure as public safety facilities, hospitals, health clinics, emergency management facilities, water systems, schools, town halls, homeless shelters, senior housing, and public or affordable housing, community non-profit facilities providing essential services, libraries, and grocery stores.

Entities eligible to apply for either grant program include a State, territory of the United States, Tribal agency, local government, an electric utility, a non-profit, or a partnership of the aforementioned entities. Ms. Tanaka noted that South Coast AQMD would seek an amendment to the bill to clarify South Coast AQMD's eligibility to apply for a grant.

For South Coast AQMD, microgrids could reduce the need for diesel powered back-up generators to support public safety, health and other important services in the aftermath of weather events and/or due to public safety power shutoffs (PSPS). South Coast AQMD has more than 10,000 permitted diesel fueled emergency back-up generators in its jurisdiction. At least 40 percent of these permitted diesel back-up generators are at least twenty-years old and diesel back-up generators located near sensitive receptors increase localized health impacts.

Another application of clean energy microgrids of interest to South Coast AQMD is not currently mentioned in H.R. 8626 relates to alternative fuel transportation infrastructure (battery electric and fuel cell technologies). The Board recently approved a project with the University of California at Irvine to develop a model for

a connected model of microgrids for zero emission transportation. Clean energy microgrids could be used to increase the resiliency and reliability of transportation infrastructure during PSPS and other events which may compromise the electric grid and impact the operation of zero emissions transportation and equipment. Additionally, microgrids could reduce emissions by increasing efficiency by shifting loads through energy storage and minimizing electricity delivery losses.

Amendments that South Coast AQMD developed include adding transportation as a criterion for evaluating grant applications; prioritizing grants for projects in an extreme or severe non-attainment region for ozone and/or PM2.5; adding zero-emissions transportation infrastructure for heavy-, medium-, and light-duty vehicles and equipment; and, per Chair Mitchell's recommendation to clarify South Coast AQMD's eligibility to apply for grants by adding "subdivision of state government."

Dr. Burke commented that back-up generators have become more prevalent. He also commented that there could be additional public safety and air quality issues related to diesel ambulances.

Mr. Wayne Nastri reported that emissions from diesel back-up generators has come to the forefront with wildfires and PSPS events occurring more often. Staff assessed that during one PSPS event, diesel back-up generators could emit more air pollution than the refineries. Microgrids could help reduce emissions, stabilize and provide reliability for communities and zero-emission transportation. South Coast AQMD is moving forward with investigations on microgrids including the University of California, Irvine study which will look at NOx emission reductions with widespread deployment of microgrids. With regard to diesel ambulances, staff will look into the issue and discuss with CARB. There are technology demonstrations and fuel cells that could potentially meet the critical functions and duty cycles of ambulances.

**Staff recommended a "SUPPORT WITH AMENDMENTS" position on this bill.**

Moved by Perez; seconded by Mitchell; unanimously approved

Ayes: Burke, Buscaino, Mitchell, Perez, Rutherford

Noes: None

Abstain: None

**To:** South Coast AQMD Legislative Committee

**From:** Carmen Group

**Date:** October 29, 2020

**Re:** Federal Update -- Executive Branch

---

**Legislative Outlook:** During October, there was no significant movement on COVID Relief, Special Districts or Energy legislation, as was to be expected with Congress and the Administration largely focused on other matters in the run-up to the November 3 elections. For example, while there was considerable public posturing on both sides about the possibilities of reaching a pre-election COVID Relief deal, closed-door negotiations between Treasury Secretary Mnuchin and Speaker Pelosi could never get past several key items in dispute, not the least of which was how to structure any new money that would be targeted to state and local governments, a topic of special interest to SCAQMD. By the end of October, both sides were saying a deal would emerge after the election during the lame duck session. But even that is very much in doubt, as post-election incentives on the matter are bound to produce different calculations among the key players.

**Zero Emission Truck Recommendations:** On October 7, CALSTART's National Zero Emission Truck Coalition (which includes South Coast AQMD) sent a letter to Congressional leadership outlining major federal legislative recommendations to incentivize fleet acquisition of zero emission trucks, to build charging and fueling infrastructure, and to prioritize related technological innovations. We participated in discussions with CALTART on these matters and made outreach to several key members of our own business coalition in preparation for post-election advocacy efforts.

**EPA Awards California DERA Grants:** As the previous federal fiscal year came to a close on October 1, the U.S. Environmental Protection Agency (EPA) announced \$11.8 million in Diesel Emission Reduction Act (DERA) grant funding in California as part of over \$50 million in FY 2020 DERA funding being awarded nationwide. This year's California grants included the following:

- South Coast Air Quality Management District received \$2.2 million to replace 41 diesel-fueled refrigerated trucks and trailers with 26 hybrid electric units and 15 all-electric units, and to install 194 electrified parking spaces for such trucks at three grocery distribution locations.
- San Joaquin Valley Air Pollution Control District received \$3.6 million and \$3.2 million for two projects respectively. One will help replace 23 older diesel trucks with 23 zero-emission electric trucks. The other will replace 85 diesel-powered agricultural tractors with new equipment having Tier 4 or cleaner engines.

**Proven Process. Proven Results.™**

901 F Street, NW Suite 600 Washington, DC 20004 T 202.785.0500 F 202.478.1734 [carmengroup.com](http://carmengroup.com)

- San Diego County Air Pollution Control District received \$2.0 million to replace one Tier 2 diesel-powered tugboat at the Port of San Diego with a new tugboat powered by a zero-emission electric propulsion system.
- California Air Resources Board received \$681,000 to help replace 6 heavy-duty school buses with all-electric alternatives throughout rural areas of California.

**EPA Appoints New Leaders, Members of Science Advisory Board:** Pursuant to a formal public process inviting nominations, the EPA Administrator in October announced the selection of a new Chair and Vice Chair of the EPA's Science Advisory Board (SAB) along with the appointment of 16 new members of the 44-member panel. Named to be Chair was Dr. John Graham, professor in the School of Public and Environmental Affairs at Indiana University who previously served as Dean of the Pardee RAND Graduate School in California. Named as Vice Chair was Dr. Barbara Beck, a principal at Gradient, and environmental and risk sciences consulting firm. She is an expert in toxicology and human health risk assessment for environmental chemicals, especially metals and air pollutants.

**EPA Proposes Cross-State Air Rule Update for 2008 Ozone NAAQS:** In October, EPA proposed revisions to the Cross-State Air Pollution Rule (CSAPR) Update to address interstate air quality impacts for the 2008 ozone air quality standards. The proposed revision would reduce summertime emissions of NOx from power plants in 12 states in the Eastern U.S. that contribute to downwind ozone problems.

**EPA Finalizes Rule on Clean Air Permitting Process:** In October, the EPA finalized a rule it said would streamline and improve the Clean Air New Source Review (NSR) permitting process. Specifically, the new rule will clarify the process for evaluating whether an NSR preconstruction permit is needed when an existing major emitting facility plans to make changes to its facility.

**EPA Announces Florida is Largest State to Meet National Air Quality Standards:** In October, the EPA announced that Florida had come into compliance with all EPA air quality standards after the Hillsborough-Polk County area became the last in the state to attain sulfur-dioxide levels. EPA Administrator Andrew Wheeler: "Of the four large states – Texas, California, New York and Florida – Florida is the only state that's in total attainment for all six air-quality pollutants."

**Maritime Administration Issues Port Infrastructure Grant to Port of Los Angeles:** The U.S. Department of Transportation's Maritime Administration announced in October the award of \$9,880,000 to the Port of Los Angeles for the SR 47-Vincent Thomas Bridge & Harbor Boulevard-Front Street Interchange Improvement, a project that will help reduce delays and accidents at the port. This was one of 18 port projects nationwide that received awards under MARAD's announcement of \$220 million in Port Infrastructure Development Program discretionary grants.

-----

**Outreach:** Relevant contacts included Republican Senate leadership offices (Majority Leader, Majority Whip and Appropriations Chair) on COVID Relief and special districts legislation. We were also in contact with multiple members of our business coalition group on zero-emission truck issues. These included the Truck & Engine Manufacturers Association, the National Automobile Dealers Association-American Truck Dealers, the Diesel Technology Forum and the U.S. Chamber of Commerce.

###

To: South Coast Air Quality Management District  
From: Cassidy & Associates  
Date: October 28, 2020  
Re: October Report

## HOUSE/SENATE

The House is not in session. Members are advised that as conversations surrounding additional coronavirus relief legislation continue, it is possible that the House will meet soon after the election to pass a relief deal with the White House and Senate.

This week the Senate voted to confirm Amy Coney Barrett as the next Supreme Court Justice after a hasty confirmation process. The vote was largely on a party-line basis, with Senator Collins being the only Republican to vote no. Barrett is the first confirmation vote since 1869 without any support from the opposing party.

With respect to appropriations, the House passed all of their appropriations bills before the August recess. The bill for Environmental Protection Agency (EPA) appropriations includes \$90 million for Diesel Emissions Reduction Act (DERA) grants, an additional \$450 million in emergency DERA grants for COVID relief, and \$57.3 million in Targeted Airshed Grants to be focused on the ten most heavily polluted areas in the country.

The Senate has not yet begun work on their appropriations bills and they do not expect to move on appropriations until after the election. Right before the Fiscal Year deadline Congress passed a Continuing Resolution (CR) to maintain funding at current levels through December 11, 2020. At that point, whether Congress passes an omnibus appropriations package or an additional CR depends on the post-election political scenario.

On October 16th the EPA announced settlements with three companies over violations of California's trucking pollution regulations. The three companies are Roadrunner Transportation Systems, Ruan Transportation Management Systems, and the Boise Cascade Company. The companies will pay \$417,000 in penalties for violating the California Air Resources Board's

federal enforceable Truck and Bus Regulation, Drayage Truck Regulation and Transport Refrigeration Unit Regulation.

Cassidy and Associates support in October:

- Continued to track provisions of interest in energy bills moving in both chambers.
  - The House passed the Clean Economy Jobs and Innovation Act in late September.
  - Due to member demands on controversial provisions, the Senate failed to pass their version of the bill. With the end of the 116<sup>th</sup> Congress quickly approaching, the Senate is out of time to pass their own stand-alone bill.
  - However, the Senate and House are negotiating a compromise package with the hope of having a bill signed into law before the end of the year.
  - This compromise package will be negotiated informally among bipartisan Committee staff in both Chambers, and by the time the text of the bill is public it will need to pass quickly and it will be too late to make changes.
  - To ensure that SCAQMD's priorities remain on the table in this informal negotiation, Cassidy is in constant contact with Republican and Democrat staff leading the negotiations and is aggressively advocating for SCAQMD via Committee staff and CA delegation.
- Strategized with SCAQMD on identifying federal funds through DERA, TAG, and other sources to assist the district with COVID related expenses.
  - Engaged in ongoing discussions with House and Senate Committee staff to include increased funding for these programs in COVID relief and appropriations legislation.
- Built support for legislation from Sens. Cornyn and Sinema to ensure "special districts" are eligible for federal funding.
  - In close contact with Sen. Sinema staffer that is leading the charge for this bill.
    - At our urging, Sen. Sinema staff contacted House and Senate leadership to voice support for the bill. It is our understanding that Sen. Sinema will make a push at the member level when negotiations heat up again after the election.

Government funding, major programs up for renewal

- Annual defense authorization and surface transportation are both in the works.
- Federal health programs, which are now set to expire Nov. 30.
- Current CR expires Dec. 11.
- Tax extenders, including for energy and alcohol, expire Dec. 31

## IMPORTANT LEGISLATIVE DATES

### ***Oct. (open ended)***

- Continuation of negotiations for new COVID-19 package
- Senate staff-level discussions on Appropriations

### ***Nov. 30 – Dec. 31***

- Temporary Assistance for Needy Families
- Community Health Centers
- Medicare Programs

## PANDEMIC RESPONSE PROGRAMS AND AUTHORITIES

### **EPA's list of approved SARS-CoV-2 surface disinfectant products passes 500**

The EPA has approved more than 500 surface disinfectant products for use against COVID-19. In early March, EPA released its initial list with 85 products and has continued to update the approved list on a weekly basis. The list can be found [here](#).

**FDA launched a new webpage at [www.fda.gov/covid19vaccines](https://www.fda.gov/covid19vaccines) to highlight new information as it becomes available**

- The FDA hosted a meeting of the Vaccines and Related Biological Products Advisory Committee on October 22, 2020. The Center for Biologics Evaluation and Research's, Vaccines and Related Biological Products Advisory Committee met to discuss the development, authorization and/or licensure of vaccines to prevent COVID-19.
- The FDA issued Guidance for [Industry on Emergency Use Authorization for COVID-19 Vaccines](#) to provide sponsors of requests for Emergency Use Authorization for COVID-19 vaccines with recommendations regarding the data and information needed to support the issuance of an EUA under section 564 of the FD&C Act (21 U.S.C. 360bbb-3) for an investigational vaccine to prevent COVID-19 for the duration of the COVID-19 public health emergency. The FDA brief can be found [here](#).

### **FDA holds weekly Virtual Town Halls on COVID diagnostics**

Every Wednesday, from 12:15 to 1:15pm ET. For more information, click [here](#).

**FDA holds bi-weekly webinars on PPE, with a new topic every two weeks**

The next webinar will be held on October 27, 2020, from 12:00 to 1:00pm ET. The webcast can be found [here](#).

**End Date/Program**

***Dec. 11, 2020***

Current CR expires

***Dec. 31, 2020***

Treasury Department business, state, & local government loan authority

Various temporary tax breaks

Emergency sick and family leave programs

Pandemic unemployment assistance

Medicare sequestration suspension

Changes to banking and accounting rules (could expire sooner if epidemic ends)

***March 27, 2025***

Special inspector General for Pandemic Recovery

***Sept. 30, 2025***

Pandemic Response Accountability Committee, Congressional Oversight Commission

## AGENCY RESOURCES

USA.gov is cataloging all U.S. government activities related to coronavirus. From actions on health and safety to travel, immigration, and transportation to education, find pertinent actions [here](#). Each Federal Agency has also established a dedicated coronavirus website, where you can find important information and guidance. They include: Health and Human Services ([HHS](#)), Centers of Medicare and Medicaid ([CMS](#)), Food and Drug Administration ([FDA](#)), Department of Education ([DoED](#)), Department of Agriculture ([USDA](#)), Small Business Administration ([SBA](#)), Department of Labor ([DOL](#)), Department of Homeland Security ([DHS](#)), Department of State ([DOS](#)), Department of Veterans Affairs ([VA](#)), Environmental Protection Agency ([EPA](#)), Department of the Interior ([DOI](#)), Department of Energy ([DOE](#)), Department of Commerce ([DOC](#)), Department of Justice ([DOJ](#)), Department of Housing and Urban Development ([HUD](#)), Department of the Treasury ([USDT](#)), Office of the Director of National Intelligence ([ODNI](#)), and U.S. Election Assistance Commission ([EAC](#)).

## IMPORTANT DATES: ELECTIONS

South Coast AQMD Report for the November 2020 Legislative Meeting covering October 2020  
Kadesh & Associates

*October:* Both the House and Senate have recessed. The Senate cleared the Amy Coney Barrett nomination elevating her to be an Associate Justice of the Supreme Court by a vote of 52-48 on October 26 and recessed until November 9. The House is not expected to return until November 16. The Senate also voted in October on two packages of COVID relief – an extension of the PPP and a “skinny” relief bill – both of which failed to proceed to as they could not garner 60 votes.

The current Continuing Resolution (CR) expires at midnight ET on December 11, 2020. At this point, we are assuming that another CR will be required to get into next year. The duration of that CR will depend largely on the outcome of the election. There has also been a lot of talk about using the CR as a vehicle for COVID relief. If this materializes, there will probably be a few short term interim CRs before the 116<sup>th</sup> Congress adjourns sine die. The Senate has still not released any of its Fiscal Year (FY) 21 appropriations bills. At this point, it is unclear when this will occur. In the last 25 years plus this is the first time the Senate hasn't produced a single bill this late in the year. The House has passed 10 of its 12 Appropriations bills. (Not passed are Homeland Security and Legislative Branch.)

There are many plans/ideas for the December lame duck session, but experience indicates that they are never as productive as hoped. That said, the National Defense Authorization Act (NDAA), Water Resources Development Act (WRDA), an energy bill, and more nominations are all likely/possible.

Negotiations on the next round of COVID/stimulus between Speaker Pelosi and Treasury Secretary Mnuchin continued until the last week of October, but finally broke down with each side blaming the other for inflexibility. Speaker Pelosi said it is still possible to get a deal on fiscal stimulus with the Trump administration after the election, but before the start of the new Congressional and White House terms in January. Speaker Pelosi listed seven major areas of disagreement in a letter to Secretary Mnuchin regarding issues on which Democrats are awaiting responses from the administration: national coronavirus testing-and-tracing program; relief for state and local governments; school safety measures; child-care funding; tax credits for working families; unemployment assistance; and workplace protections and liability issues.

**Kadesh & Associates Activity Summary-**

- COVID/stimulus legislation – funding for special districts, including an appeal to Congressional offices to be included in what may be the most significant work product of the lame duck session;
- Working with the CALSTART/National ZET Coalition/Clean Corridors Coalition at the direction of South Coast AQMD staff on shaping a viable and effective legislative proposal;
- Identifying leaders of potential administration transition teams on South Coast AQMD's issues;
- Monitoring FY21 Appropriations – DERA, Targeted Airshed Grants and Section 103/105;
- Monitoring Continuing Resolution(s);
- Monitoring prospects for: H.R. 2 – the Moving Forward Act; H.R. 4447 – Clean Economy Jobs and Innovation Act; Rep. Eshoo's smoke bill; and Rep. DeSaulnier's Clean Corridors bill.
- Look Ahead discussion and draft memo for South Coast AQMD staff

**Contacts:**

Contacts included staff and House Members throughout the CA delegation, especially Leadership and Appropriators who were targeted.

# RESOLUTE<sup>✦</sup>

## South Coast Air Quality Management District Legislative and Regulatory Update – October 29, 2020

---

### ❖ Important Dates

- Nov. 3 General Election.
- Nov. 5 CA State Assembly Democratic Caucus Meeting
- Nov. 30 Adjournment sine die at midnight (Art IV, Sec, 3(a))
- Dec. 7 2021-22 Regular Session convenes for Organizational Session at 12 noon (Art IV, Sec, 3(a))
- Jan. 1 Statutes take effect (Art IV, Sec, 8(c))

- ❖ **RESOLUTE Secures Meeting Between SCAQMD and Incoming Los Angeles City Councilman Kevin DeLeon.** Resolute Partner David Quintana coordinated a meeting between SCAQMD Executive Officer Wayne Nastri, Deputy Executive Officer Derrick Alatorre, and City Councilmember Keven DeLeon to discuss South Coast's legislative priorities. DeLeon indicated that he understood the District's agenda and would be eager to help South Coast obtain support from the City Council in the future to assist its lobbying efforts and funding requests in both Sacramento and Los Angeles.

- ❖ **CARB Reports that CA is Below 2020 Emissions Target.** On October 23, CARB released Greenhouse Gas Emissions data showing California's total 2018 greenhouse gas emissions were 425.3 million metric tons, essentially equal to the 424.5 million metric tons of greenhouse gas emissions the state produced in 2017. This is lower than the state's 1990 emissions totals but remains six million metric tons below the 2020 target.

Overall, emissions have declined: Per capita GHG emissions in California have been reduced 24% since they peaked in 2001 to 10.7 tons per person in 2018. Transportation emissions dropped 1.5 million metric tons between 2017 and 2018, the first such decline since 2013.

- ❖ **Black Employees Introduce Proposal to Address Alleged Racism at CARB.** Anonymous Black employees at the California Air Resources Board (CARB) [released an open letter and action plan](#) to address what they allege is “systemic racism and implicit bias” at the Board. The letter details alleged slights to black employees, discriminatory hiring practices, biased personnel management, and a lack of representation.

The action plan calls for, among other things, appointing at least one Black board member and two other people of color to fill upcoming vacancies on the board, closing pay gaps between white and non-white employees, removing bias in the recruitment and hiring process, and creating a Racial Equity Committee/Task Force at CARB.

These allegations and proposal follow the ongoing criticism of CARB and many environmental interest groups by Assemblymember Jim Cooper. (D-Elk Grove). Cooper has been consistent in his criticism of the Board and certain interest groups as they pursue electric vehicle mandates and other energy and climate policies that “systematically drive racial economic inequities and fuel environmental racism.” Cooper noted that the letter is “yet again another example of how out of touch CARB is with protecting, serving and advancing the well-being of communities of color.”

- ❖ **EPA Responds to Governor Newsom’s Executive Order Banning Gas Vehicles by 2035.** EPA Administrator Andrew Wheeler responded to Governor Newsom’s [Executive Order N-79-20](#), which established new state goals for the sale of zero-emission vehicles, stating that the Order may require California to request a waiver from the EPA. Wheeler also commented that the plan “raises serious questions regarding its legality and practicality.”

Wheeler continued, “California’s record of rolling blackouts – unprecedented in size and scope – coupled with recent requests to neighboring states for power begs the question of how you expect to run an electric car fleet that will come with significant increases in electricity demand, when you can’t even keep the lights on today,”

This tension comes on the heels of the EPA’s 2019 rules revoking its 2013 waiver that granted California the authority to set vehicle tailpipe emissions standards and require the sale of more zero emission vehicles. The state is challenging that decision in court.

- ❖ **CARB Demands Automakers Self-Disclose Violations of Emission Standards.** On October 14, CARB released a [letter](#) to vehicle and engine manufacturers urging them to disclose non-compliant software and other violations related to auxiliary emission control devices (AECs) by December 31, 2020. In 2015, CARB encouraged manufacturers to disclose non-compliant devices in exchange for reduced penalties and remedial measures. According to CARB, many manufacturers did not self-disclose and the Board’s subsequent “screening tests and investigations have uncovered several types of systemic violations” resulting in “multiple settlements with manufacturers for cheating on their certification documentation.”

CARB’s letter comes as it announces a new testing laboratory and techniques to investigate and identify non-compliant AECs. The Board warns manufacturers that “If you are not in compliance with CARB regulations, and you do not voluntarily disclose your violations, you may become the subject of a lengthy investigation and enforcement action.”

- ❖ **C40 Global Mayors Recovery Task Force Calls for Green Stimulus to Create \$280B in Economic Benefits.** The C40 Cities Climate Leadership Group's task force on COVID-19 recovery has [released research](#) encouraging a stimulus package to fund a 'green recovery.' The group suggests that stimulating the economy with funds invested in climate solutions could create 50 million jobs by 2025, reduce air pollution by 30%, and halve greenhouse gas emissions by 2030; however, only an estimated 3-5% of COVID-19 related stimulus spending is currently committed to the green initiative, according to the group.

The C40 Cities Climate Leadership Group is a group of 96 cities around the world and is currently chaired by Los Angeles Mayor Eric Garcetti.

South Coast AQMD Report  
California Advisors, LLC  
November 13, 2020 Legislative Committee Hearing

## **General Update**

The Legislature is starting to prepare for the upcoming session. They are still operating under the assumption that they will be physically distant and will implement many of the same rules that were put in place this past year. How long this will last is uncertain but it will be based on the Governor's actions and the availability of a vaccine. Legislators will only be allowed to have one staff member in their office unless there is adequate space for two staffers to physically distance themselves. Members have also been encouraged to continue taking meetings remotely. However, starting 2021, it is anticipated that they will attend policy hearings in person. The Legislature expects to release their calendar in the next few weeks which will set the legislative deadlines for them to operate under.

Currently, December 7<sup>th</sup> marks the first day of the new session. This day typically is ceremonially for members to be sworn into office. However, it is also the first day for members to introduce bills. Once, they have completed the swearing in ceremony the Legislature usually goes on a holiday break until January. One thing to watch for during this break is new committee assignments. There will likely be several committee chairmanships that will change and new faces will be added to each policy committee.

The general election has dominated most conversations in Sacramento over the past month. As of October 29<sup>th</sup>, over 8.4 million ballots have already been returned which accounts for 38.7% of the total registered voters in California. A deep dive into the numbers provide some interesting trends in the days leading up to the election. First, 54% of those ballots were Democrat and 22% were Republican. The state has seen Republican votes come in later than normal. Additionally, over 50% of those ballots were from the 55 and over age category. Whereas just 20% were from the age category of 18-34 year olds. The state has not seen a wave of younger voters at this point. Lastly, female voters are showing up in the early voting returns and outpacing males by almost 500,000 votes with five days to go.

Email: gonsalves@gonsalvi.com

**TO:** South Coast Air Quality Management District

**FROM:** Anthony, Jason & Paul Gonsalves

**SUBJECT:** Legislative Update – October 2020

**DATE:** Wednesday, October 28, 2020

---

On August 31, 2020, the Legislature recessed their 2019-20 Legislative session. Due to COVID-19 related challenges that necessitated unprecedented actions and a compressed legislative session, the Legislature greatly reduced the number of bills it heard in 2020 to focus on COVID-19 policy response and other priority areas. In a typical year, the Legislature sends roughly 2,000 bills to the governor for consideration. However, in 2020 the Legislature passed 428 bills (137 Senate bills and 291 Assembly bills) to the Governor for his consideration. In total, the Governor signed 372 into law and vetoed 56 bills.

Meanwhile, legislators have returned to their districts and are preparing for the November 3rd election. While California began casting most of its ballots by mail years ago, there is a lot of uncertainty about how campaigning in the era of COVID-19 will play out. As always though, the California ballot is brimming with propositions in this Presidential election year.

The following will provide you with updates of interest to the District:

### **DEL MONTE FRESH PENALTIES**

On October 7, 2020, CARB announced a settlement with Del Monte Fresh Produce N.A. Inc. for \$1,990,650, marking the largest penalty to date related to clean air violations for the state's Ocean-Going Vessel At Berth Regulation.

The goal of CARB's At-Berth Regulation is to reduce diesel emissions from ocean-going vessels. It requires anyone who owns, operates, charters, rents or leases any U.S. or foreign-flagged container, passenger or refrigerated-cargo vessel that visits a California port to meet the

operational time limits and reduce their power generation fleet-wide, as well as submit statements of compliance. The auxiliary engines covered under this regulation power the electricity and other onboard operations during a vessel's visit, which can run from less than one day to several days. Power reduction requirements have been phased in over time and fleets can accomplish this by turning off their diesel engines and connecting to grid-based shore power, or by using alternative technologies to achieve equivalent emission reductions while in port.

Through routine audits, CARB discovered that Del Monte's chartered fleet calling at the Port of Hueneme for 2015-2016 did not meet the operational time limits for at least 50% of its visits and did not reduce its auxiliary engine power generation by 50%. In addition, their 2017-2019 chartered fleet visiting the same port did not meet the operational time limits for at least 70% of its visits and did not reduce its auxiliary engine power generation by 70%.

To resolve these violations, Del Monte agreed to pay a settlement of \$1,990,650. Half of the funds will be paid to the Air Pollution Control Fund, and the remaining half will be paid to the Marine Vessel Speed Reduction Incentive Program, a supplemental environmental project located in the Santa Barbara Channel Region and the Bay Area. The project provides financial and other incentives for ocean-going vessels to reduce their speed in specified areas along the coast during peak ozone and migratory whale seasons. These reductions decrease air pollution and the mortality rate of endangered whales.

## **CALIFORNIA'S GHG LEVELS**

On October 19, 2020, the California Air Resources Board (CARB) released GHG emissions data for 2018 showing that emissions remain below 1990 levels but are effectively flat compared to 2017, while the economy grew by 4.3%. The data shows a slight increase in overall emissions from the previous year, and a slight decline in emissions from transportation, which is the state's main source of both GHGs and air pollutants.

In Executive Order N-79-20 issued September 23, 2020, Governor Newsom recognized that achieving our air quality and climate goals hinge on transforming the state's transportation sector. In that EO, the Governor called for 100% sales of zero emission light-duty vehicles by 2035. The Governor issued a second Executive Order N-82-20 on October 7, 2020 elevating the role of nature in addressing climate change by enlisting California's vast network of natural and working lands to store and remove carbon from the atmosphere and establishing a goal of conserving at least 30% of California's land and coastal waters by 2030.

The total, statewide 2018 GHG emissions were 425.3 million metric tons, compared to 424.5 million metric tons in 2017. That remains six million metric tons below the 2020 target.

Transportation emissions declined 1.5 million metric tons between 2017 and 2018, the first such decline since 2013. Per capita GHG emissions in California have dropped from a 2001 peak of 14.0 tons per person to 10.7 tons per person in 2018, a 24% decrease.

## **GOVERNOR NEWSOM'S USE OF LAND TO FIGHT CLIMATE CHANGE**

On October 7, 2020, Governor Newsom issued an executive order enlisting California's vast network of natural and working lands and urban greenspaces in the fight against climate change.

The order directs state agencies to deploy a number of strategies to store carbon in the state's natural and working lands and remove it from the atmosphere. The order also sets a first-in-the-nation goal to conserve 30% of the state's land and coastal water by 2030 to fight species loss and ecosystem destruction.

Specifically, state agencies are directed to pursue innovative actions, strategies and partnerships to maximize the full climate benefits of our natural and working land, through:

- Healthy soils management, including planting cover crops, hedgerows and compost applications;
- Wetlands restoration to protect coastal areas;
- Active forest management to reduce catastrophic risk and restore forest health; and
- Boosting green infrastructure in urban areas like trees and parks.

In advancing this executive order, California joins 38 countries to support the global effort to achieve protection for 30% of the planet by 2030. The executive order directs the California Natural Resources Agency to form a California Biodiversity Collaborative to bring together experts, leaders and communities to pursue a unified approach to protecting biodiversity and develop strategies to support the 30 by 30 goal. Through this stakeholder process, Californians will help chart the path forward to these critical conservation goals.

## **EXIDE BANKRUPTCY**

On October 16, 2020, Exide Holdings Inc. got court approval of its bankruptcy plan, allowing the battery manufacturer to sell its overseas assets and avoid paying for a full cleanup of a former recycling facility in California over the state's objections.

The plan, which was amended four times before it was approved, incorporates a global settlement Exide reached with its creditors, purchasers of the overseas assets, the U.S. Environmental Protection Agency, and ten state environmental agencies. California's was the only environmental agency that rejected the settlement agreement.

Governor Newsom called the plan approval "dangerous" and said the state would appeal it. "I am outraged that the federal bankruptcy court let Exide and its creditors off the hook today and decided that lead exposure does not pose an imminent or immediate harm to the public."

The Chapter 11 plan allows Exide to sell its European and overseas assets to a group of existing lenders in a \$559 million credit bid, preserving 5,000 jobs. The company also will wind down its involvement at former sites in the U.S. that still need environmental remediation.

After filing for bankruptcy in May, it sold its North American business operations to an affiliate of Atlas Holdings LLC for \$178.6 million. The settlement incorporated into the plan creates a \$10 million multi-state environmental trust that would manage future environmental cleanup at former Exide sites. California would receive \$2.6 million for the former battery recycling facility in Vernon, if the state signs onto the agreement.

The state has until Oct. 30 to decide whether it will participate in the trust. Exide may choose to abandon the site after that date, said Judge Christopher S. Sontchi of the U.S. Bankruptcy Court for the District of Delaware at a hearing Friday.

The California DTSC had objected to the settlement on the grounds that the company is still responsible for ongoing remediation of lead and other heavy metals at the Vernon site. If California ultimately rejects the settlement and Exide abandons the facility, California will still have access to \$26.5 million in surety bonds that Exide purchased to help maintain the Vernon site.

## **2020 LEGISLATIVE CALENDAR**

Oct. 1 - Bills enacted on or before this date take effect January 1, 2021.

Nov. 3 - General Election.

Dec. 7 - 2021-22 Regular Session convenes for Organizational Session at 12 noon.

Jan. 1, 2021 - Statutes take effect

# South Coast Air Quality Management District

21865 Copley Drive, Diamond Bar, CA 91765-4178  
(909) 396-2000 • www.aqmd.gov

## South Coast AQMD's State Legislative Goals & Objectives for 2021

*The following goals and objectives are identified to protect public health, facilitate attainment of state and federal clean air standards within the South Coast region by statutory deadlines and address other South Coast AQMD needs and policy priorities, while working with and serving as a resource to state legislators and the Governor; federal, state, and local agencies; business, environmental and community groups; and other stakeholders:*

### ***Air Quality Funding***

Increase existing and identify new funding sources that provide a sustainable revenue stream for clean air programs and priorities that: 1) ensure attainment of state and federal air quality standards; 2) protect public health; 3) eliminate unhealthy air pollution; ~~4) address impacts of wildfires;~~ 4) fund local air districts' efforts to implement Assembly Bill 617 (C. Garcia, Chapter 136, Statutes of 2017); and, 5) address impacts of wildfires. ~~5) fund local air districts' efforts to implement Assembly Bill 617 (C. Garcia, Chapter 136, Statutes of 2017); and~~ 5) ensure attainment of state and federal air quality standards, with a focus on incentive programs and research and development projects that support applicable South Coast AQMD Air Quality Management Plans (AQMPs), and create opportunities to partner with stakeholders. Ensure that funding meant for air districts' efforts is properly allocated.

### ***Surface Transportation & Goods Movement***

Support and expand policy and funding considerations that promote air quality priorities in connection with the implementation of state and federal surface transportation, infrastructure and goods movement policies and programs, especially with regard to the development and deployment of zero and near-zero emission medium- and heavy-duty trucks.

### ***South Coast AQMD Authority / Policy Implementation***

Protect and ensure adequate South Coast AQMD authority for implementation of the Board's clean air policies and programs, including those required by state and federal law and applicable South Coast AQMD AQMPs.

### ***State Support***

Work to ensure that the state government does not impose unfunded mandates on the South Coast AQMD and does its fair share to reduce air pollution within the South Coast region by providing ample funding, legislative action, regulatory action and support by the Administration to the South Coast AQMD to: 1) facilitate implementation of applicable South Coast AQMD AQMPs and attainment of federal ozone and particulate matter air quality standards by upcoming deadlines; and, 2) ensure that local air districts' have sufficient resources to fully implement their responsibilities and programs created through AB 617 (C. Garcia, 2017).

### ***COVID-19***

Support and seek legislative and administrative policies, programs, funding and actions that

## South Coast AQMD's State Legislative Goals & Objectives for 2021

provide relief to South Coast AQMD to address the negative impacts of COVID-19, including items relating to South Coast AQMD funding, policy priority and operational needs.

### ***Environmental Justice***

Support and advocate for legislative policies and funding that: 1) promote and sustain environmental justice initiatives which reduce localized health risks resulting from criteria pollutant and toxic air contaminant emissions; 2) develop and expand access to clean air technology, especially in disproportionately impacted communities; 3) enhance community participation in decision-making; and 4) provide the resources necessary to fully implement local air districts' responsibilities and programs created through AB 617 (C. Garcia, 2017).

### ***Development and Deployment of Clean Technology / Economic Stimulus***

Support and advocate for legislative and administrative policies, programs and funding, including as part of any economic stimulus efforts, that promote the development and deployment of near-zero and zero emission infrastructure, equipment and vehicle technology, especially with regard to medium- and heavy-duty trucks, to: 1) protect public health; 2) facilitate attainment of clean air standards; and/or 3) support a healthy economy and promote job retention/creation within the South Coast region.

### ***Addressing Impacts of Wildfires***

Support and advocate for legislative and administrative policies, programs and funding that: 1) reduce air quality-related public health impacts within the South Coast region caused by wildfires; and 2) reduce the number of wildfires that impact the South Coast region.

### ***Climate Change***

Seek to influence climate change policies and initiatives and facilitate their implementation consistent with Board policy. In particular, support efforts directing that the Greenhouse Gas Reduction Fund provide a sustainable funding source to maximize criteria pollutant and toxic emission reduction co-benefits, promote the development and deployment of near- zero and zero-emission vehicles, equipment and fueling/charging infrastructure, especially with regard to clean medium- and heavy-duty trucks, and address air quality and public health impacts in the South Coast region.

### ***Clean Energy***

Support legislative efforts that advance the Board's Energy Policy which promotes energy efficiency, demand reduction and reliable, cost effective and clean energy for all consumers in the District, while facilitating attainment of clean air standards and providing support for a healthy economy.

### ***Business/Jobs Climate***

Support legislative policies and/or administrative actions that promote job retention and creation as well as economic growth, while working toward attainment of clean air standards; and that support and assist the regulated community in complying with rules and regulations in the most efficient and cost-effective manner.

### ***~~Surface Transportation & Goods Movement~~***

~~Support and expand policy and funding considerations that promote air quality priorities in connection with the implementation of state and federal surface transportation, infrastructure and goods movement policies and programs.~~

# South Coast Air Quality Management District

21865 Copley Drive, Diamond Bar, CA 91765-4178  
(909) 396-2000 • [www.aqmd.gov](http://www.aqmd.gov)

## South Coast AQMD's Federal Legislative Goals & Objectives for 2021

*The following goals and objectives are identified to enable South Coast AQMD to seek rules, legislative policies, and funding levels from the federal government that will assist the South Coast Air Basin in meeting the National Ambient Air Quality Standards (NAAQS) to protect public health through practical and innovative strategies. It is critical that SCAQMD work with and serve as a resource to the Administration and agencies, Congress, business, environmental, health, community and other stakeholders.*

### ***Air Quality Funding (Authorization of Program and Policies and Appropriations of Funds)***

Seek adequate funding levels for air quality issues through existing and new opportunities to enable the South Coast Air Basin to reach attainment of NAAQS, including heavy-, medium-, and light-duty vehicles, off-road equipment, stationary sources and supportive agency functions such as monitoring, compliance and enforcement, permitting, outreach and other essential activities. Support key programs such as, but not limited to, Targeted Airshed Grants, the Diesel Emissions Reduction Act, Subvention Funds from Clean Air Act Section 103/105, Energy Efficiency & Renewable Energy grants, and other programs including emergencies such as wildfires.

### ***Federal Support -- Clean Air Act, NAAQS and State Implementation Plan (SIP)***

Work to ensure the federal government does its fair share to reduce air pollution with the South Coast region by providing funding and administrative support. Support policies, legislation and/or administrative efforts to:

- Provide federal incentive funding, policies, and require regulatory actions sufficient to, in combination with state and local actions, attain the national ambient air quality standards for ozone by 2023 and 2031 in the South Coast Air Basin, and if standards are not attained due to lack of federal actions, provide that the Basin is not punished by sanctions, fees or other penalty for failure to timely attain.
- Provide and protect state and local regulatory authority adequate for nonattainment areas to attain NAAQS for upcoming federal deadlines, and in particular, the South Coast AQMD to implement Air Quality Management Plans (AQMP) and attain federal ozone and particulate matter standards.
- Protect science-driven and health-based determinations of NAAQS, and efforts to streamline and provide flexible implementation of SIP requirements, as needed, to ensure feasibility of attainment; and,
- ~~Provide and protect state and local regulatory authority adequate for nonattainment areas to attain NAAQS for upcoming federal deadlines, and in particular, the South Coast AQMD to implement Air Quality Management Plans (AQMP) and attain federal ozone and particulate matter standards.~~
- ~~Provide federal incentive funding, policies, and require regulatory actions sufficient to, in combination with state and local actions, attain the national ambient air quality standards for~~

~~ozone by 2023 and 2031 in the South Coast Air Basin, and if standards are not attained due to lack of federal actions, provide that the Basin is not punished by sanctions, fees or other penalty for failure to timely attain.~~

### **Technology Advancement**

Expand funding opportunities, policies and federal tax incentives for advanced clean technology research, development, demonstration and deployment programs, including those related to:

- Clean vehicles (such as heavy-, medium-, and light-duty vehicles, locomotives, marine vessels, and aircraft technologies);
- Zero and near-zero emission technologies;
- Clean fuels and refueling/recharging technologies and infrastructure;
- Technologies, systems and/or processes which reduce ambient concentrations of air pollutants and/or toxic air emissions;
- Establishing programs or policies that incentivize the federal government to purchase and use advanced clean, zero and near-zero emission technologies;
- Incentivizing individuals, businesses, states, and local governments to purchase and use advanced clean, zero and near-zero emission technologies; and,
- Renewable energy and alternative energy, energy storage and microgrids and other programs, especially as related to electric and hydrogen infrastructure for transportation and emissions reductions from sources such as back-up generators.

### **COVID-19 and Economic Stimulus**

~~Seek legislative and administrative relief to assist with the impacts of COVID-19 including, but not limited to, unplanned expenses and loss of revenues. Pursue funding for economic stimulus efforts to assist South Coast AQMD meet NAAQS and to promote green technologies that mitigate and/or reduce air pollution and create jobs.~~

### **Climate Change**

~~Seek to influence climate change initiatives and facilitate their implementation at local levels, including funding, to promote co-benefits with NAAQS and air toxics reduction, consistent with the Board's policy.~~

### **Surface Transportation & Goods Movement**

Pursue the adoption of legislation and/or policies which will reduce or eliminate air quality impacts from mobile sources with an emphasis on the goods movement sector (for both medium-duty and heavy duty vehicles), as well as off-road vehicles (such as agricultural vehicles, cargo handling equipment, freight handling equipment, and construction equipment).

### **Marine Vessels**

Pursue legislative and/or administrative policies that will further reduce marine vessel emissions and will ensure, through regulatory and/or incentive-based policies that the cleanest vessels come to U.S. ports.

### **Locomotives**

Pursue efforts to reduce locomotive emissions, through regulatory and/or incentive-based policies.

### ***Reduction of Toxic Emissions***

Pursue efforts through legislative and administrative programs, to reduce toxic emissions, and the public's exposure to toxic emissions, within the South Coast region.

### ***Environmental Justice***

Support legislation which promotes environmental justice initiatives that will reduce localized health risks, develop clean air technologies that directly benefit disproportionately impacted communities, and enhance community participation in decision-making.

### ***Technology Advancement***

Expand funding opportunities, policies and federal tax incentives for advanced clean technology research, development, demonstration and deployment programs, including those related to:

- ~~— Clean vehicles (such as heavy-, medium-, and light-duty vehicles, locomotives, marine vessels, and aircraft technologies);~~
- Zero and near zero emission technologies;
- ~~— Clean vehicles (such as heavy-, medium-, and light-duty vehicles, locomotives, marine vessels, and aircraft technologies);~~
- Clean fuels and refueling/recharging technologies and infrastructure;
- Technologies, systems and/or processes which reduce ambient concentrations of air pollutants and/or toxic air emissions;
- Establishing programs or policies that incentivize the federal government to purchase and use advanced clean, zero and near zero emission technologies;
- Incentivizing individuals, businesses, states, and local governments to purchase and use advanced clean, zero and near zero emission technologies; and,
- Renewable energy and alternative energy, energy storage and microgrids and other programs, especially as related to electric and hydrogen infrastructure for transportation and emissions reductions from sources such as back-up generators.

### ***COVID-19 and Economic Stimulus***

Seek legislative and administrative relief to assist with the impacts of COVID-19 including, but not limited to, unplanned expenses and loss of revenues. Pursue funding for economic stimulus efforts to assist South Coast AQMD meet NAAQS and to promote green technologies that mitigate and/or reduce air pollution and create jobs.

### ***Climate Change***

Seek to influence climate change initiatives and facilitate their implementation at local levels, including funding, to promote co-benefits with NAAQS and air toxics reduction, consistent with the Board's policy.

### ***Business/Jobs***

Support legislation, policies or administrative actions that support and assist the regulated community to comply with rules and regulations in the most efficient and cost-effective manner that protects and encourages job retention and creation, and promotes economic growth, while working toward attainment of clean air standards.

**H.R. 8626, Barragán (CA)**  
Energy Resilient Communities Act

**Summary:** Directs the Secretary of Energy (Secretary) to carry out two grant programs (technical assistance/outreach and projects) to improve energy resilience and security of communities, prioritizing environmental justice communities.

**Background:** The Office of Representative Nanette Diaz Barragán is seeking South Coast AQMD's technical feedback on legislation that she has introduced this session to raise visibility on clean energy microgrids to power critical infrastructure in emergency situations. The Congresswoman will consider feedback gathered over the next few months and reintroduce the bill in the 117<sup>th</sup> Congress.

**Status:** 10/20/2020 – Introduced and referred to the Committee on Energy and Commerce and the Committee on Science, Space and Technology.

**Specific Provisions:** The bill would create a new Clean Energy Microgrid Grant program within the Department of Energy to build resilience in communities for critical infrastructure. The grant program would provide two categories of grants for technical assistance and outreach, and project development and construction. The cost share for these grants would be 60 percent and, in the case of projects located in environmental justice communities, 90 percent.

Entities eligible to apply for grants under the bill include a State, territory of the United States, or Tribal agency, local government, electric utility, or nonprofit organization. Partnerships among eligible entities also would be allowed to apply for grants.

The bill defines critical community infrastructure as schools, town halls, public safety facilities, hospitals, health clinics, community centers, community non-profit facilities providing essential services, libraries, grocery stores, emergency management facilities, water systems, homeless shelters, senior housing, and public or affordable housing.

The technical assistance and outreach grants would be authorized at \$50 million per year from fiscal year 2021 to 2030. An eligible entity could use a technical assistance and outreach grant to evaluate and upgrade building codes and standards for climate resiliency and to develop an infrastructure resilience plan. Other eligible grant activities would include identification and design of prospective clean energy microgrids, assistance to address permitting and siting challenges, and community outreach and collaborative planning.

The resiliency grants would be authorized at \$1.5 billion per year from fiscal year 2021 to 2030. Each grant may not exceed \$10 million. An eligible entity may use these grants to develop and construct either a clean energy microgrid that supports critical infrastructure or a clean energy microgrid for individual homes belonging to medical baseline customers. Grant applications for projects that received a Technical Assistance and Outreach Grant would be given priority.

Thereafter, resiliency projects would be evaluated on criteria including the reduction of greenhouse gases and criteria air pollutants, public health, and energy cost burden for communities. The bill also would prioritize projects that are in a community owned energy system, located within the already built environment, minimize land use impacts, involve small business or nonprofits in environmental justice communities (especially women and minority owned and operated), and promote apprenticeships. Additionally, the bill requires the Department of Energy to develop and implement an outreach program to inform eligible entities about the Clean Energy Microgrid Grant program.

Buy American and labor-related provisions of the bill require the use of American iron, steel and manufactured goods. However, the Secretary of Energy could provide a waiver of these provisions if iron, steel and manufactured goods are not sufficiently available and of satisfactory quality or, if the cost of American products would increase the project cost by more than 25 percent. The bill also includes prevailing wage requirements and labor provisions which seek to prioritize the local labor force including disadvantaged individuals.

Lastly, the Secretary of Energy would be required to report to Congress and publish online annual data on the program including the number of grants provided, total dollar amount of all grants, grant disbursements by State, project descriptions, specify environmental justice grants, employment data, greenhouse gas and criteria pollutant reduction impacts, public health benefits, and energy cost savings.

**Impacts on South Coast AQMD's Mission, Operations or Initiatives:**

The Energy Resilient Communities Act would assist in the deployment of clean energy microgrids to support critical infrastructure, especially within environmental justice communities. These microgrids could reduce the need for diesel powered back-up generators to support public safety, health and other important services in the aftermath of weather events and/or due to public safety power shutoffs (PSPS). South Coast AQMD has more than 10,000 permitted diesel fueled emergency back-up generators in its jurisdiction. At least 40 percent of these permitted diesel back-up generators are at least twenty-years old. During a PSPS, if diesel powered back-up generators that support critical services in the four-county region ran for 24-hours, the estimated NO<sub>x</sub> emissions would be higher than any one of the refineries in our basin produces in a single-year. While it is unlikely that there would simultaneous PSPS in all four counties, the duration and severity of wildfires and extreme weather events could require increased use of diesel back-up generators which could contribute significantly to air pollution in our region. Further, diesel back-up generators located near sensitive receptors increase localized health impacts. This bill could help reduce emissions from diesel back-up generators by deploying clean energy microgrids in communities to support critical services such as public safety and healthcare.

One application of clean energy microgrids of interest to South Coast AQMD that is not currently mentioned in H.R. 8626 relates to alternative fuel transportation (battery electric and fuel cell). The Board recently approved a project with the University of California at Irvine to develop a model for a connected model of microgrids for zero emission transportation. Clean energy microgrids could be used to increase the resiliency and reliability of transportation infrastructure during PSPS and

other events which may compromise the electric grid and impact the operation of zero emissions transportation and equipment. These microgrids could also reduce emissions by increasing efficiency, shift loads through energy storage and minimizing electricity delivery losses. Staff recommends working with the bill author to integrate transportation considerations into the uses of the grant funds and criteria for evaluating project awards.

Overall, H.R. 8626 could assist the region, especially within environmental justice communities, build clean energy microgrids which have benefits for air quality and public health. Staff recommend supporting the bill and working with Representative Barragán to address South Coast AQMD's interest in microgrid technology to support zero emissions technology for reintroduction in the 117<sup>th</sup> Congress.

### **Recommended Position: SUPPORT WITH AMENDMENTS**

Recommended amendments are below:

- Page 3, amend Paragraph (3) Clean Energy Microgrid Grants to include (H) proposes to support publicly accessible alternative fuel infrastructure (battery electric and fuel cell) for heavy-, medium-, and light-duty vehicles and equipment.

*This amendment would add criteria to consider grants under the “Clean Energy Microgrid” program for projects that “propose to support publicly accessible alternative fuel infrastructure (battery electric and fuel cell) for heavy-, medium- and light duty vehicles and infrastructure.*

- Page 3, amend Paragraph (c)(1) as follows:

(c) PRIORITY.—

(1) IN GENERAL.—In providing grants under the program established pursuant to subsection (a), the Secretary of Energy shall give priority to an eligible entity that proposes to use a grant to obtain technical assistance described in subsection (b)(1), provide outreach described in subsection (b)(2), or carry out a project described in subsection (b)(3), that will benefit an environmental justice community *and/or is located in an extreme or severe non-attainment region for ozone and/ or PM2.5.*

*This amendment would prioritize grants for projects in and/or in an extreme or severe non-attainment region for ozone and/ or PM2.5 for the Technical Assistance and Outreach and Clean Energy Microgrids programs.*

- Page 6, amend Paragraph (5) Critical Community Infrastructure to include (O) zero-emissions transportation infrastructure (battery electric and fuel cell) for heavy-, medium- and light-duty vehicles and equipment.

*This amendment would add “zero-emissions transportation infrastructure (battery electric and fuel cell) for heavy-, medium-, and light-duty vehicles and equipment” the definition of “critical*

*infrastructure” for the purposes of this bill. This will enable “zero emissions transportation infrastructure” to be considered as an eligible consideration under the “Technical Assistance and Outreach” program grant.*

- Page 16, amend paragraph (6)(B) to include after “government” or “political subdivision of the state”

*This amendment would add “political subdivisions of the state” such as South Coast AQMD as an eligible entity to apply for grants under the Clean Energy Microgrids program.*

.....  
(Original Signature of Member)

116TH CONGRESS  
2D SESSION

**H. R.** \_\_\_\_\_

To direct the Secretary of Energy to carry out a grant program to improve the energy resilience, energy democracy, and security of communities, prioritizing environmental justice communities, and for other purposes.

\_\_\_\_\_  
**IN THE HOUSE OF REPRESENTATIVES**

Ms. BARRAGÁN introduced the following bill; which was referred to the Committee on \_\_\_\_\_

\_\_\_\_\_  
**A BILL**

To direct the Secretary of Energy to carry out a grant program to improve the energy resilience, energy democracy, and security of communities, prioritizing environmental justice communities, and for other purposes.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Energy Resilient Com-  
5       munities Act”.

1 **SEC. 2. CLEAN ENERGY MICROGRID GRANT PROGRAM.**

2 (a) IN GENERAL.—The Secretary of Energy shall es-  
3 tablish and carry out a program to provide grants to eligi-  
4 ble entities.

5 (b) USE OF FUNDS.—An eligible entity may use a  
6 grant provided under the program established pursuant to  
7 subsection (a) to—

8 (1) obtain technical assistance to—

9 (A) upgrade building codes and standards  
10 for resiliency to climate change hazards (includ-  
11 ing wildfires, flooding, sea level rise, landslides,  
12 drought, storms, temperature extremes, and  
13 other extreme weather events);

14 (B) develop an infrastructure resilience  
15 plan to identify and overcome known climate  
16 change hazards to critical community infra-  
17 structure; or

18 (C) conduct a needs assessment of prospec-  
19 tive clean energy microgrid projects and, as ap-  
20 plicable, design prospective clean energy  
21 microgrids, including assistance to address per-  
22 mitting and siting challenges, understand and  
23 facilitate financing options, and understand the  
24 technical characteristics of clean energy  
25 microgrids;

1           (2) provide community outreach and collabo-  
2           rative planning with respect to a prospective project  
3           described in paragraph (3); or

4           (3) carry out a project to develop and con-  
5           struct—

6                   (A) a clean energy microgrid that supports  
7                   critical community infrastructure; or

8                   (B) a clean energy microgrid for residences  
9                   of medical baseline customers.

10          (c) PRIORITY.—

11           (1) IN GENERAL.—In providing grants under  
12           the program established pursuant to subsection (a),  
13           the Secretary of Energy shall give priority to an eli-  
14           gible entity that proposes to use a grant to obtain  
15           technical assistance described in subsection (b)(1),  
16           provide outreach described in subsection (b)(2), or  
17           carry out a project described in subsection (b)(3),  
18           that will benefit an environmental justice commu-  
19           nity.

20           (2) TECHNICAL ASSISTANCE AND COMMUNITY  
21           OUTREACH GRANTS.—After priority given under  
22           paragraph (1), in providing grants to obtain tech-  
23           nical assistance described in subsection (b)(1) or  
24           provide outreach described in subsection (b)(2), the  
25           Secretary of Energy shall give priority to an eligible

1       entity proposing to obtain technical assistance or  
2       provide outreach that the Secretary of Energy deter-  
3       mines will further the development of clean energy  
4       microgrids that are community-owned energy sys-  
5       tems.

6               (3) CLEAN ENERGY MICROGRID GRANTS.—After  
7       priority given under paragraph (1), in providing  
8       grants under the program established pursuant to  
9       subsection (a) for projects described in subsection  
10      (b)(3), the Secretary of Energy shall give priority to  
11      an eligible entity that—

12              (A) proposes to develop and construct a  
13              clean energy microgrid that, in comparison to  
14              other clean energy microgrids for which grants  
15              are sought under such program, will result in  
16              the greatest reduction—

- 17                      (i) of greenhouse gas emissions;  
18                      (ii) of emissions of criteria air pollut-  
19                      ants;  
20                      (iii) in public health disparities in  
21                      communities experiencing a dispropor-  
22                      tionate level of air pollution; or  
23                      (iv) in the energy cost burden for  
24                      communities;

1 (B) proposes to develop and construct a  
2 clean energy microgrid that is a community-  
3 owned energy system;

4 (C) proposes to develop and construct a  
5 clean energy microgrid that, in comparison to  
6 other clean energy microgrids for which grants  
7 are sought under such program, will provide the  
8 greatest amount of resiliency benefits to a juris-  
9 diction in which the microgrid is located;

10 (D) proposes to develop and construct a  
11 clean energy microgrid that minimizes land use  
12 impacts by—

13 (i) siting sources of clean energy with-  
14 in the already-built environment, including  
15 over rooftops and parking lots;

16 (ii) siting sources of clean energy on  
17 existing brownfield sites or contaminated  
18 sites;

19 (iii) co-locating sources of clean en-  
20 ergy on agricultural lands or over res-  
21 ervoirs; or

22 (iv) siting sources of clean energy on  
23 compatible lands;

24 (E) proposes to, in developing and con-  
25 structing a clean energy microgrid, utilize or in-

1            involve small businesses or nonprofits that pri-  
2            marily operate or are located within environ-  
3            mental justice communities, particularly those  
4            that are women-owned and operated or minor-  
5            ity-owned and operated;

6            (F) has previously received a grant to ob-  
7            tain technical assistance under such program;  
8            or

9            (G) imposes registered apprentice utiliza-  
10           tion requirements on projects, provided that  
11           such requirements comply with the apprentice  
12           to journey worker ratios established by the De-  
13           partment of Labor or the applicable State Ap-  
14           prenticeship Agency.

15        (d) EDUCATIONAL OUTREACH PROGRAM.—

16            (1) IN GENERAL.—Not later than 90 days after  
17            funds are made available to carry out this section,  
18            the Secretary of Energy shall develop and carry out  
19            an educational outreach program to inform eligible  
20            entities about the program established pursuant to  
21            subsection (a).

22            (2) CONTRACTS.—The Secretary of Energy  
23            may enter into third-party contracts to implement  
24            the educational outreach program under paragraph  
25            (1). In entering into contracts pursuant to this para-

1 graph, the Secretary shall prioritize entering into  
2 contracts with women-owned and operated or minor-  
3 ity-owned and operated entities.

4 (3) PRIORITY.—The educational outreach pro-  
5 gram under paragraph (1) shall prioritize—

6 (A) providing information on the program  
7 established pursuant to subsection (a) to eligi-  
8 ble entities that serve an environmental justice  
9 community and to environmental justice com-  
10 munities; and

11 (B) promoting public understanding of the  
12 community benefits of clean energy microgrids  
13 for critical community infrastructure.

14 (e) COST SHARE.—

15 (1) IN GENERAL.—Except as provided in para-  
16 graphs (2), the Federal share of the cost of technical  
17 assistance, outreach, or a project for which a grant  
18 is provided pursuant to the program established pur-  
19 suant to subsection (a) shall not exceed 60 percent  
20 of such cost.

21 (2) ENVIRONMENTAL JUSTICE COMMUNITY.—  
22 The Federal share of the cost of technical assistance  
23 that is obtained for, outreach that is provided to, or  
24 a project that is carried out in, an environmental  
25 justice community, and for which a grant is provided

1       pursuant to the program established pursuant to  
2       subsection (a) shall not exceed 90 percent of such  
3       cost.

4       (f) LIMITATION ON AMOUNT.—The amount of a  
5       grant provided to an eligible entity under this section to  
6       carry out a project described in subsection (b)(3) may not  
7       exceed \$10,000,000.

8       (g) USE OF AMERICAN IRON, STEEL, AND MANUFAC-  
9       TURED GOODS.—

10           (1) No funds authorized under this section shall  
11       be made available with respect to a project unless all  
12       of the iron, steel, and manufactured goods used in  
13       the project are produced in the United States.

14           (2) Paragraph (1) shall not apply in any case  
15       or category of cases in which the Secretary of En-  
16       ergy finds that—

17                   (A) applying paragraph (1) would be in-  
18       consistent with the public interest;

19                   (B) iron, steel, and the relevant manufac-  
20       tured goods are not produced in the United  
21       States in sufficient and reasonably available  
22       quantities and of a satisfactory quality; or

23                   (C) inclusion of iron, steel, and manufac-  
24       tured goods produced in the United States will

1           increase the cost of the overall project by more  
2           than 25 percent.

3           (3) If the Secretary of Energy receives a re-  
4           quest for a waiver under this subsection, the Sec-  
5           retary shall make available to the public on an infor-  
6           mal basis a copy of the request and information  
7           available to the Secretary concerning the request,  
8           and shall allow for informal public input on the re-  
9           quest for at least 15 days prior to making a finding  
10          based on the request. The Secretary shall make the  
11          request and accompanying information available by  
12          electronic means, including on the official public  
13          website of the Department of Energy.

14          (4) This subsection shall be applied in a man-  
15          ner consistent with the United States' obligations  
16          under international agreements.

17          (h) PREVAILING WAGES.—All laborers and mechan-  
18          ics employed by contractors or subcontractors in the per-  
19          formance of construction, alteration, or repair work as-  
20          sisted, in whole or in part, by a grant under this section  
21          shall be paid wages at rates not less than those prevailing  
22          on similar construction in the locality as determined by  
23          the Secretary of Labor in accordance with subchapter IV  
24          of chapter 31 of title 40, United States Code. With respect  
25          to the labor standards in this subsection, the Secretary

1 of Labor shall have the authority and functions set forth  
2 in Reorganization Plan Numbered 14 of 1950 (64 Stat.  
3 1267; 5 U.S.C. App.) and section 3145 of title 40, United  
4 States Code.

5 (i) PROJECT LABOR.—An eligible entity that uses a  
6 grant provided under this section to construct a clean en-  
7 ergy microgrid shall ensure, to the greatest extent prac-  
8 ticable, that any subgrantee of such eligible entity, and  
9 any subgrantee thereof, that carries out such construction  
10 employs at least 40 percent of laborers or mechanics for  
11 such construction that are individuals who—

12 (1) are domiciled, if the applicable construction  
13 area is—

14 (A) a major urban area, not further than  
15 15 miles from such construction area; or

16 (B) not a major urban area, not further  
17 than 50 miles from such construction area;

18 (2) are displaced and unemployed energy work-  
19 ers;

20 (3) are members of the Armed Forces serving  
21 on active duty, separated from active duty, or retired  
22 from active duty;

23 (4) have been incarcerated or served time in a  
24 juvenile or adult detention or correctional facility, or

1       been placed on probation, community supervision, or  
2       in a diversion scheme;

3           (5) have a disability;

4           (6) are homeless;

5           (7) are receiving public assistance;

6           (8) lack a general education diploma or high  
7       school diploma;

8           (9) are emancipated from the foster care sys-  
9       tem;

10          (10) reside or work in an environmental justice  
11       community; or

12          (11) are registered apprentices with fewer than  
13       15 percent of the required graduating apprentice  
14       hours in a program.

15       (j) REPORTS.—The Secretary of Energy shall submit  
16   to Congress, and make available on the public website of  
17   the Department of Energy, an annual report on the pro-  
18   gram established pursuant to subsection (a) that includes,  
19   with respect to the previous year—

20           (1) the number of grants provided;

21           (2) the total dollar amount of all grants pro-  
22       vided;

23           (3) a list of grant disbursements by State;

24           (4) for each grant provided—

1 (A) a description of the technical assist-  
2 ance obtained, outreach provided, or project  
3 carried out with grants funds; and

4 (B) whether the grant is provided to obtain  
5 technical assistance, provide outreach, or carry  
6 out a project with respect to an environmental  
7 justice community; and

8 (5) for each grant provided to carry out a clean  
9 energy microgrid project—

10 (A) employment data for such project, in-  
11 cluding the number of jobs created and what  
12 percent of laborers and mechanics hired for  
13 such project meet the criteria under subsection  
14 (i);

15 (B) the greenhouse gas and criteria air  
16 pollutant reduction impacts for such project;

17 (C) the public health benefits from such  
18 project; and

19 (D) the reduced energy cost burden from  
20 such project.

21 (k) FUNDING.—

22 (1) AUTHORIZATION OF APPROPRIATIONS.—For  
23 each of fiscal years 2021 through 2030, there is au-  
24 thorized to be appropriated—

1 (A) \$50,000,000 for grants for technical  
2 assistance described in subsection (b)(1) and  
3 outreach described in subsection (b)(2); and

4 (B) \$1,500,000,000 for grants for projects  
5 described in subsection (b)(3).

6 (2) COMMUNITY-OWNED ENERGY SYSTEMS.—

7 To the maximum extent practicable, not less than 10  
8 percent of the amount appropriated under para-  
9 graph (1)(B) for any fiscal year shall be used to pro-  
10 vide grants for projects to develop and construct  
11 clean energy microgrids that are community-owned  
12 energy systems.

13 (3) ADMINISTRATIVE EXPENSES.—

14 (A) TECHNICAL ASSISTANCE AND OUT-  
15 REACH.—The Secretary may use not more than  
16 2 percent of the amount appropriated for any  
17 fiscal year under paragraph (1)(A) for adminis-  
18 trative expenses.

19 (B) CLEAN ENERGY MICROGRID  
20 PROJECTS.—The Secretary may use not more  
21 than 2 percent of the amount appropriated for  
22 any fiscal year under paragraph (1)(B) for ad-  
23 ministrative expenses, including expenses for  
24 carrying out the educational outreach program  
25 under subsection (d).

1 (l) DEFINITIONS.—In this section:

2 (1) CLEAN ENERGY.—The term “clean energy”  
3 means electric energy generated from solar, wind,  
4 geothermal, existing hydropower, micro-hydropower,  
5 hydrokinetic, or hydrogen fuel cells.

6 (2) COMMUNITY OF COLOR.—The term “com-  
7 munity of color” means a geographically distinct  
8 area in which the population of any of the following  
9 categories of individuals is higher than the average  
10 populations of that category for the State in which  
11 the community is located:

12 (A) Black.

13 (B) African American.

14 (C) Asian.

15 (D) Pacific Islander.

16 (E) Other non-White race.

17 (F) Non-White Hispanic.

18 (G) Latino.

19 (H) Linguistically isolated.

20 (3) COMMUNITY-OWNED ENERGY SYSTEM.—

21 The term “community-owned energy system” means  
22 an energy system owned—

23 (A) by the local government where the sys-  
24 tem is located;

1 (B) by a non-profit organization that is  
2 based in the local jurisdiction where the energy  
3 system is located;

4 (C) collectively, by community members; or

5 (D) by a worker-owned or community-  
6 owned for-profit entity.

7 (4) COMPATIBLE LAND.—The term “compatible  
8 land” means land that is at least 5 miles away from  
9 existing protected areas and within 3 miles of exist-  
10 ing transmission infrastructure.

11 (5) CRITICAL COMMUNITY INFRASTRUCTURE.—  
12 The term “critical community infrastructure” means  
13 infrastructure that is necessary to providing vital  
14 community and individual functions, including—

15 (A) schools;

16 (B) town halls;

17 (C) public safety facilities;

18 (D) hospitals;

19 (E) health clinics;

20 (F) community centers;

21 (G) community non-profit facilities pro-  
22 viding essential services;

23 (H) libraries;

24 (I) grocery stores;

25 (J) emergency management facilities;

- 1 (K) water systems;
- 2 (L) homeless shelters;
- 3 (M) senior housing; and
- 4 (N) public or affordable housing.

5 (6) ELIGIBLE ENTITY.—The term “eligible enti-  
6 ty” means—

- 7 (A) a State, territory of the United States,  
8 or Tribal agency;
- 9 (B) a local government;
- 10 (C) an electric utility;
- 11 (D) a nonprofit organization; or
- 12 (E) a partnership between—
  - 13 (i) a private entity, or a nonprofit or-  
14 ganization, that owns critical community  
15 infrastructure; and
  - 16 (ii) a State, territory of the United  
17 States, Tribal agency, or local government.

18 (7) ENVIRONMENTAL JUSTICE COMMUNITY.—  
19 The term “environmental justice community” means  
20 a community with significant representation of com-  
21 munities of color, low-income communities, or Tribal  
22 and indigenous communities, that experiences, or is  
23 at risk of experiencing, higher or more adverse  
24 human health or environmental effects.

1           (8) LOW-INCOME COMMUNITY.—The term “low-  
2       income community” means any census block group  
3       in which 30 percent or more of the population are  
4       individuals with an annual household income equal  
5       to, or less than, the greater of—

6           (A) an amount equal to 80 percent of the  
7       median income of the area in which the house-  
8       hold is located, as reported by the Department  
9       of Housing and Urban Development; and

10          (B) 200 percent of the Federal poverty  
11       line.

12          (9) MAJOR URBAN AREA.—The term “major  
13       urban area” means a metropolitan statistical area  
14       within the United States with an estimated popu-  
15       lation that is greater than or equal to 1,500,000.

16          (10) MEDICAL BASELINE CUSTOMER.—The  
17       term “medical baseline customer” means a customer  
18       of an electric utility with special energy needs due  
19       to a medical condition, including energy needs for—

20           (A) a motorized wheelchair;

21           (B) a ventilator;

22           (C) a dialysis machine;

23           (D) an apnea monitor;

24           (E) an electrostatic nebulizer;

25           (F) a respirator;

1 (G) medication requiring refrigeration; and

2 (H) for a customer with a vulnerable res-  
3 piratory system, an air cleaning system.

4 (11) MICROGRID.—The term “microgrid”  
5 means an interconnected system of loads and clean  
6 energy resources (including distributed energy re-  
7 sources, energy storage, demand response tools, and  
8 other management, forecasting, and analytical tools)  
9 which—

10 (A) is appropriately sized to meet the crit-  
11 ical needs of its customers;

12 (B) is contained within a clearly defined  
13 electrical boundary and has the ability to oper-  
14 ate as a single and controllable entity;

15 (C) has the ability to—

16 (i) connect to, disconnect from, or run  
17 in parallel with the applicable grid region;  
18 or

19 (ii) be managed and isolated from the  
20 applicable grid region in order to withstand  
21 larger disturbances and maintain the sup-  
22 ply of electricity to a connected location;

23 (D) has no point of interconnection to the  
24 applicable grid region with a throughput capac-  
25 ity in excess of 20 megawatts; and

1 (E) can connect to one building or multiple  
2 interconnected buildings.

3 (12) MICRO-HYDROPOWER.—The term “micro-  
4 hydropower” means hydropower that produces no  
5 more than 100 kilowatts of electricity using the nat-  
6 ural flow of water.

7 (13) PRODUCED IN THE UNITED STATES.—The  
8 term “produced in the United States” means, in the  
9 case of iron or steel, that all manufacturing proc-  
10 esses, including the application of a coating, occur in  
11 the United States.

12 (14) REGISTERED APPRENTICE.—The term  
13 “registered apprentice” means a person in an ap-  
14 prenticeship program that is registered with, and ap-  
15 proved by, the United States Department of Labor  
16 or a State Apprenticeship Agency in accordance with  
17 parts 29 and 30 of title 29, Code of Federal Regula-  
18 tions (as in effect on January 1, 2020).

19 (15) SMALL BUSINESS.—The term “small busi-  
20 ness” has the meaning given the term “small busi-  
21 ness concern” under section 3 of the Small Business  
22 Act (15 U.S.C. 632).

23 (16) TRIBAL AND INDIGENOUS COMMUNITY.—  
24 The term “Tribal and indigenous community”  
25 means a population of people who are members of—

- 1 (A) a federally recognized Indian Tribe;
- 2 (B) a State-recognized Indian Tribe;
- 3 (C) an Alaska Native or Native Hawaiian
- 4 community or organization; or
- 5 (D) any other community of indigenous
- 6 people located in a State.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 23

REPORT: Stationary Source Committee

SYNOPSIS: The Stationary Source Committee held a meeting remotely on Friday, November 20, 2020. The following is a summary of the meeting.

RECOMMENDED ACTION:  
Receive and file.

Ben Benoit, Chair  
Stationary Source Committee

AD:cr

---

### **Committee Members**

Present: Council Member Ben Benoit (Chair)  
Senator Vanessa Delgado (Ret.)  
Board Member Gideon Kracov  
Council Member Judith Mitchell  
Supervisor Janice Rutherford

### **Call to Order**

Chair Benoit called the meeting to order at 9:32 a.m.

### **ACTION ITEM:**

- 1. Approve Financial Incentive Program to Reduce Emissions from Hexavalent Chromium Plating Facilities, Issue Program Opportunity Notices, Execute Contracts, Release Unspent Project Funds, and Reimburse General Fund**  
Dr. Jillian Wong, Planning and Rules Manager, presented an overview of staff's proposal to establish a financial incentive program for hexavalent chromium plating facilities to implement projects which will reduce hexavalent chromium emissions beyond existing regulatory requirements.

Council Member Mitchell inquired about the kind of control devices that can be used in lieu of polyfluoroalkyl substances (PFAS) chemical fume suppressants and about the potential problems with facilities switching over to a trivalent chromium plating process. Dr. Wong explained that the control device projects would involve installation of a HEPA filter system and switching from a hexavalent to a trivalent process could also be funded, however, there were industry concerns regarding the finished product using the trivalent process.

Council Member Mitchell inquired about the process of using PFAS in tanks and if a HEPA filter system is sufficient to replace PFAS in that process. Dr. Wong responded that a HEPA filter system works as a PFAS alternative by capturing emissions from the tank and routing the emissions to the HEPA filter.

Council Member Mitchell requested clarification on the project cost for small businesses and distribution of funds. Dr. Wong stated that under the proposal, which is subject to CARB approval, small businesses could receive full project funding. Susan Nakamura, Assistant Deputy Executive Officer/Planning, Rule Development, and Area Sources, clarified that funding is available for capital costs and some filter replacements, but facilities will be responsible for ongoing operating costs and source tests. Early consultations with facilities indicate concerns with ongoing operating costs.

Council Member Mitchell asked if Boyle Heights wanted to add metal plating facilities into their Community Emissions Reduction Plan (CERP). Dr. Wong responded that Boyle Heights has identified metal plating facilities as an action item in the CERP and staff plans to provide the Community Steering Committee (CSC) with updates.

Council Member Mitchell inquired about unsubscribed funds going to mobile source projects and whether it will be allocated equally among all AB 617 communities. Dr. Matt Miyasato, Deputy Executive Officer/Office of Science and Technology Advancement, responded that there is large backup list of mobile source projects which comply with AB 617 funding requirements as that program is oversubscribed.

Jerry Desmond, Metal Finishers Association, expressed support for the program and the willingness of the Association to coordinate with staff on program implementation. He also echoed concerns with switching from a hexavalent chromium to trivalent plating process adding that some product specifications such as military specifications do not allow the facilities to use the trivalent plating process.

James Simonelli, California Metals Coalition, expressed support for this incentive program and requested use of unspent funds for other hexavalent chromium emission reduction projects, if possible, before funds are used for mobile sources.

Moved by Kracov; seconded by Mitchell; unanimously approved.

Ayes: Benoit, Kracov, Mitchell, Rutherford

Noes: None

Absent: Delgado

### **INFORMATIONAL ITEMS:**

#### **2. Summary of Proposed Rule 1407.1 – Control of Toxic Air Contaminant Emissions from Chromium Alloy Melting Operations**

Michael Morris, Planning and Rules Manager, presented a summary of Proposed Rule 1407.1.

James Simonelli thanked staff for working with industry to conduct emissions testing and developing a rule that is based on science. The California Metals Coalition is working with Vanderbilt University to conduct research to determine why hexavalent chromium concentrations significantly reduce from the chromium alloy melt to the inlet of the pollution control device. Additionally, Mr. Simonelli stated that there are significant costs associated with the proposed rule and facilities have been making investments to comply.

Jason Gutierrez, Griswold Industries, thanked staff for their efforts in working with the industry to develop this rule. He expressed concern about the costs of compounding metal melting rules that will affect their industry but said they are willing to make the investment.

Council Member Mitchell, Council Member Benoit, and Board Member Kracov thanked staff for their efforts in developing this rule with industry.

#### **3. Summary of Proposed Rule 1150.3 – Emissions of Oxides of Nitrogen from Combustion Equipment at Landfills**

Board Member Kracov recused himself from this item due to his work for the California Waste & Recycling Association.

Michael Morris, Planning and Rules Manager, provided a summary on Proposed Rule 1150.3.

There were no Committee member or public comments.

*Senator Delgado joined the meeting at [10:15 a.m.]*

**4. Community Emissions Reduction Plan for Southeast Los Angeles**

Daniel Garcia, Planning and Rules Manager, presented an overview of the Southeast Los Angeles (SELA) Draft CERP which included the development timeline, background information on the community, a description of the CSC, the top air quality priorities identified by the CSC, and key actions to address each air quality priority.

Council Member Benoit thanked staff for their efforts into developing the CERP and mentioned that Board members have participated in many CSC meetings and expressed enthusiasm to see that the CERP development process was progressing.

Board Member Kracov mentioned that he and Council Member Mitchell participated in the previous SELA CSC meeting and acknowledged that there was broad support for the CERP. He thanked staff and CSC members for the time and dedication that they spent on developing the CERP. He stated that there was a broad consensus that this was a very good CERP.

Council Member Mitchell mentioned that she attended many of the SELA CSC meetings and commended staff for being excellent facilitators and for going out of their way to solicit feedback from the CSC to understand their concerns. She recommended that more Board members participate in the CSC meetings and encouraged more elected officials to become CSC members, since land-use issues are an important component to addressing many air quality problems.

Chris Chavez, Coalition for Clean Air, expressed appreciation to the staff for their efforts. He recognized and thanked Council Member Mitchell, Board Member Kracov, and Senator Delgado for their participation in many of the CSC meetings this year. Mr. Chavez mentioned that his organization, submitted comments on the SELA CERP which he distilled to four main points. First, emission reduction targets included in the CERP result in actual emission reductions. Second, South Coast AQMD to take an aggressive stand and ensure transportation electrification requirements as part of any I-710 freeway expansion plans to limit on-road diesel trucks. Third, he recommended that South Coast AQMD pursue concrete actions to study and reduce emissions and exposure to pollutants from the Exide battery recycling facility. Fourth, the CERP has an overreliance on incentives to achieve emission reductions and instead encourages South Coast AQMD to develop and strengthen rules and regulations, including the development of a strong Indirect Source Rule (ISR) for warehouses and railyards.

Board Member Kracov thanked Mr. Chavez and his organization for their efforts and participation in the AB 617 meetings and acknowledges his membership as a

CSC member in the Wilmington, Carson, West Long Beach AB 617 community. Board Member Krakov is pleased with the SELA CERP and he stated that it was incumbent upon South Coast AQMD to implement the CERP actions while acknowledging the difficulty in doing so. He is looking forward to working with all stakeholders to help realize the goals detailed in the CERP.

Council Member Mitchell recognized the importance of the Board adopting upcoming ISRs as major components of many AB 617 community' CERP implementation plans.

#### **5. Community Emissions Reduction Plan for Eastern Coachella Valley**

Daniel Garcia presented an overview of the Eastern Coachella Valley (ECV) Draft CERP which included the development timeline, background information on the community, a description of the CSC, the top air quality priorities identified by the CSC, and key actions to address each air quality priority.

Board Member Kracov acknowledged the difficulties during CERP development due to the pandemic, and recognized the time and effort of the CSC and staff, including the four charter working group meetings in July, the compressed timeline to develop the CERP, and the commitment to hold another meeting in the week of November 30. He recognized the AB 617 statutory requirement to adopt a CERP within one year of community selection (December 2020 for ECV), as well as the commitment of staff to refine the CERP actions in the first two quarters of 2021 and bring the CERP back to the Board for consideration by the second quarter of 2021. He noted that this next meeting with the CSC would help to narrow the specific list of issues that would be addressed in the first two quarters of 2021.

Maria "Conchita" Pozar, Resident of North Shore and ECV CSC member, acknowledged there were CSC discussions on air quality priorities one year ago and requested the concerns of the community be prioritized in the CERP. She emphasized that staff should listen to community input on concerns about the Salton Sea, pesticides, and fugitive road dust, including dust from off-roading activities. She also expressed concern regarding the quality of the data produced from deploying a low-cost sensor network.

Rebecca Zaragoza, Leadership Counsel for Justice and Accountability and ECV CSC member, acknowledged the contributions of the CSC, staff, and Board Member Kracov during the CERP development process. However, she asked that the Board not approve the plan and direct staff to incorporate the comments from the Joint-CSC comment letter submitted on November 13, 2020. Ms. Zaragoza felt that the process had not been community-led and was rushed, resulting in an incomplete and ineffective CERP. She stated the CSC would like to see actions to address emissions from off-roading, the Thermal Airport, the Thermal racetrack,

the freight train, and land use issues in the CERP. She also felt that the CERP should include quantifiable emission reduction strategies for all six Air Quality Priorities, actions to expand monitoring to identify toxic air contaminants and pesticides, and to improve upon the implementation timelines in the CERP. She requested that staff present a Resolution that states the CERP is incomplete and the development process is still ongoing. She stated that staff should outline the timeline for incorporating CSC comments into the CERP and there should be.

Patricia Leal-Gutierrez, Alianza Coachella Valley and ECV CSC Member, acknowledged the contributions of the CSC, staff, and Board Member Kracov during the CERP development process. She requested a resolution that states the CERP is incomplete and that development is still in progress, and to include a clear timeline and commitment to incorporate CSC comments in the first quarter 2021. An updated CERP that addresses and uplifts the community's concerns would make community members feel more comfortable and help build trust. The CERP should include emission reduction targets over time, outline the monitoring baseline and strategies, and address off-roading emissions. Lastly, she requested the CSC meet monthly in 2021.

Bea Gonzalez, Coachella Valley Unified School District and ECV CSC member, echoed the comments of the previous speakers. She also felt that the CERP is incomplete, the development process has not been community-led, and South Coast AQMD staff influenced CSC votes. She mentioned the joint-CSC comment letter and stated she was one of the CSC members who signed it. Ms. Gonzalez recognized and thanked Board Member Kracov for his participation in the CERP development process.

Ryan Sinclair, Loma Linda University and ECV CSC Member, expressed support for the previous speakers and the joint-CSC comment letter he signed. He requested that the resolution state that the CERP is incomplete and include a clear timeline for incorporating the comments and suggestions made in the letter. He acknowledged the contributions from Board Member Kracov, and the amount of work that staff put in to adapt the program to ECV.

Council Member Benoit asked Executive Officer Wayne Nastri to respond to public comments.

Mr. Nastri acknowledged the difficulties mentioned South Coast AQMD has more AB 617 communities than any other air district and suggested that the issues that have arisen in ECV are unique and may be due to the historical perspective. He also acknowledged the challenge that the virtual format had on this process and how it added to existing uncertainty and a lack of confidence. Mr. Nastri recognized the efforts of staff to listen to the community, be respectful and create a community-led

process. He cited the one-year statutory requirement for the CERP, and the added challenge when establishing the governance document took 6-7 months of this one-year period. Consequently, little time was left for CERP development. Mr. Nastri also ensured the Board and community that the intentions of staff are to continue to work with the community to improve air quality and public health. He stated that staff was revising the Draft CERP to address comments made by the CSC and would continue to work with the community to further refine the CERP actions so that another revised CERP would be brought to the Board for consideration in the second quarter of 2021.

Council Member Benoit stated that this is a community that he has been close to in his life, particularly when his late father was the Supervisor for this community. He noted that this community not only has many air quality issues, but also water quality and land use issues. He expressed his commitment to ensure that South Coast AQMD does everything we can to improve air quality. He encouraged staff to continue working with the community to address the community's requests, while understanding the statutory limitations.

Council Member Mitchell acknowledged the CSC and staff, the difficulties caused by the pandemic, and the distrust that the CSC feels towards staff. She recognized that the ECV is unique to other South Coast AQMD AB 617 communities but is similar to other AB 617 communities in the state, including areas impacted by PM10 and PM2.5. She also recognized the issue of the Salton Sea and pesticides and emphasized the importance of collaborating with land use agencies.

Council Member Mitchell asked staff what would happen if the CERP was not approved by the committee. Mr. Nastri clarified that the CERP is not approved by the South Coast AQMD Stationary Source Committee or the Board, rather it gets adopted by the South Coast Board and approved by the CARB Board. The CERP will be considered for approval by the CARB Board in 2021. He also acknowledged that the ECV community has many members with differing interests and stated that at the recent CSC meeting, a majority of the members present expressed support for the draft CERP with the inclusion of the CSC's comments.

Board Member Kracov asked if there would be a response to comments and revised CERP, which the community would have an opportunity to discuss before the Board meeting in December. Additionally, he asked about the timeline of further refining the CERP in early 2021. Mr. Nastri responded that a revised draft CERP would be released to the public on Tuesday November 24, 2020. He also stated that staff would continue to work with the CSC to establish more detailed timelines.

Senator Delgado asked if the ECV community had the same amount of time for CERP development as SELA. Mr. Nastri confirmed both communities had equal time to develop the CERP. She thanked the community in English and Spanish.

**6. Regulatory Overview of Retail Mobile Fueling Operations**

Susan Nakamura presented regulatory background information on retail mobile fueling operations and challenges as staff moves forward with rule development.

Council Member Benoit asked for the number of permits that have been issued for large mobile fueler trucks and requested confirmation that smaller mobile fueler trucks do not require permits. Ms. Nakamura responded that five permits have been issued for one business and confirmed that smaller mobile fueler trucks currently do not require a permit.

Supervisor Rutherford stated that mobile fueling would reduce traffic and overall emissions and has the potential to be a good business model that can help a lot of people. She also expressed appreciation for staff's continued efforts on rule development.

Council Member Mitchell stated that a mobile operator had contacted her about seven months ago and requested confirmation that there may be a number of mobile fuelers operating that staff is unaware of. Ms. Nakamura responded that staff is aware of non-retail companies, but it is difficult and challenging to know all the unpermitted mobile fueling companies. Staff is aware of some retail mobile fueling companies based on internet searches and newspaper articles.

Council Member Mitchell asked about the future availability of the component that is not being manufactured and what features on slide 6 are required under Rule 461. Ms. Nakamura stated that the mini jet pump is probably a year or two from being manufactured and CARB certified and explained that Rule 461 currently requires compliance with Phase I and Phase II vapor recovery. She clarified that tank surface reflectivity and insulation are part of the Phase II vapor recovery system.

Council Member Mitchell also inquired if there are any mobile fueling systems operating that are permitted and meet Phase I and Phase II requirements. Ms. Nakamura stated that there are almost 70 non-retail permitted mobile fuelers operating with the Hill-Vac system. Ms. Nakamura added that if the mini jet pump were available, we would be in a different situation.

Council Member Mitchell asked if this item was informational and if staff will continue to work on the rule and try to find a solution while the component is being manufactured. Ms. Nakamura stated that the preference would be to wait until the CARB certified equipment is available before allowing the operations, but the

operations are occurring now so South Coast AQMD needs to establish regulations in the interim. Ms. Nakamura commented that the issue is not unique to the South Coast AQMD and is being discussed at other agencies throughout the state, who are also taking an interest in our rulemaking efforts.

Bill LaMarr, California Small Business Alliance, spoke on behalf of the California Fuels and Convenience Alliance. He stated that the vast majority of their members are small business owners with many being family-owned businesses. is unsure if emissions are less or greater in the scenario where someone drives to a gas pump compared to if the gas pump drives to them. He noted that either way both vehicles are discharging fossil fuel emissions and mobile fuelers are more likely to run on diesel which would add to diesel emissions into communities. He mentioned one mobile fueling company has already received four Notices of Violation in the last few years for equipment and permit deficiencies. He requested that businesses which are competitive in the delivery and sale of the same product be held to the same, and not less, regulatory standards.

#### **7. Update of the Flare Event Notification System**

Michael Krause, Planning and Rules Manager, presented the new features recently updated in the Flare Event Notification System (FENS).

Council Member Benoit asked about the ability to add a visual of the plume on the public portal map. Mr. Krause acknowledged the availability of such technology but would need to ensure it would be compatible with the FENS platform.

Board Member Kracov asked about whether the records retrieved through FENS highlights any change in the frequency of flaring events at the refineries. Mr. Krause explained that the FENS records do not indicate an increase in flare events but help to provide insight into correlations between certain refinery activities and flaring events. In response to a request from Council Member Mitchell, staff will provide the link to the FENS portal.

### **WRITTEN REPORTS:**

#### **8. Monthly Update of Staff's Work with U.S. EPA on New Source Review Issues for the Transition of RECLAIM Facilities to a Command and Control Regulatory Program**

The report was acknowledged by the Committee.

#### **9. Notice of Violation Penalty Summary**

The report was acknowledged by the Committee.

## **OTHER MATTERS:**

### **10. Other Business**

There was no other business.

### **11. Public Comment Period**

David Rothbart, Los Angeles County Sanitation Districts, regarding Proposed Rule 1150.3 expressed appreciation for staff's efforts to work with stakeholders and for developing separate rules for biogas fueled combustion equipment.

### **12. Next Meeting Date**

The next Stationary Source Committee meeting is scheduled for Friday, January 22, 2021.

### **Adjournment**

The meeting was adjourned at 11:57 a.m.

### **Attachments**

1. Attendance Record
2. Monthly Update of Staff's Work with U.S. EPA on New Source Review Issues for the Transition of RECLAIM Facilities to a Command and Control Regulatory Program
3. Notice of Violation Penalty Summary

## **November 2020 Update on Work with U.S. EPA on New Source Review Issues for the RECLAIM Transition**

At the October 5, 2018 Board meeting, the Board directed staff to provide the Stationary Source Committee with a monthly update of staff's work with U.S. EPA regarding resolving NSR issues for the transition of facilities from RECLAIM to a command and control regulatory structure. The table below summarizes key activities since the last report.

<b>Item</b>	<b>Discussion</b>
Video Conference with CARB – October 13, 2020	<ul style="list-style-type: none"><li>• Discussed the Rule 2005 on-going RTC holding requirement</li><li>• Discussed BACT requirements for secondary pollutants</li></ul>
Video Conference with EPA – October 29, 2020	<ul style="list-style-type: none"><li>• Discussed BACT requirements for secondary pollutants</li><li>• Discussed quantification of ERCs and offsets for future generation</li></ul>
Video Conference with CARB – October 29, 2020	<ul style="list-style-type: none"><li>• Discussed quantification and surplus discount of ERCs</li></ul>
Video Conference with EPA – November 12, 2020	<ul style="list-style-type: none"><li>• Follow-up discussions regarding BACT requirements for secondary pollutants and quantification for offset generation</li></ul>

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 24

REPORT: Technology Committee

SYNOPSIS: The Technology Committee held a meeting remotely on Friday, November 20, 2020. The following is a summary of the meeting.

RECOMMENDED ACTION:  
Receive and file.

Joe Buscaino, Chair  
Technology Committee

MMM:psc

---

### **Committee Members**

Present: Council Member Joe Buscaino/Chair  
Supervisor Lisa Bartlett  
Board Member Gideon Kracov  
Mayor Larry McCallon  
Council Member Judith Mitchell  
Council Member Carlos Rodriguez

Absent: None

### **Call to Order**

Chair Buscaino called the meeting to order at 12:00 p.m.

### **ACTION ITEMS:**

#### **1. Execute Contracts for the Volkswagen Environmental Mitigation Trust Program – Combustion Freight and marine Projects Category**

In March 2020, the Program Announcement for the Volkswagen (VW) Environmental Mitigation Trust Program - Combustion Freight and Marine Projects category, with \$30 million in available funding, closed. The solicitation was largely undersubscribed primarily due to the lower incentive amounts, other competing programs in South Coast AQMD, and other programmatic

requirements, as specified in the court-approved Consent Decrees and CARB's Beneficiary Mitigation Plan. Based on review of eligible applications, staff is recommending awards for truck replacement and marine engine repower projects. This action is to execute contracts for the VW Program – Combustion Freight and Marine Projects Category.

Board Member Kracov announced he has a financial interest in Universal Waste Systems, Inc., which is materially affected by Item Number 1, and recused himself from participation in the item.

Council Member Buscaino left the meeting at 12:12 p.m. and Council Member Mitchell chaired the remainder of the meeting.

Council Member Rodriguez asked if the amount of NOx emission reductions is representative for South Coast AQMD relative to the statewide benefits. Staff explained the proportion of NOx reductions for the South Coast AQMD is consistent with historical percentages from other programs, including Moyer at 44 percent and Prop 1B at 55 percent.

Council Member Mitchell asked why the solicitation was undersubscribed and what will happen with the remaining funds. Staff explained the funding parameters in the Consent Decrees', which were finalized without any input from local air districts, are not consistent with other state incentive programs that offer higher amounts and that leveraging other state funds was not allowed. Prop 1B, for example, offers \$100,000 for a low NOx truck and the latest solicitation was recently released. Staff informed the committee of the on-going discussions with CARB staff on using a first-come, first-served approach and considering options for leveraging VW funds with other grants.

Mayor McCallon asked if the marine category was in San Diego or San Francisco. Staff confirmed the marine vessel engine repowering project is in San Diego.

Ranji George, a member of the public, commented that South Coast AQMD should set aside funds for zero emission technologies or divert the funds for near-zero trucks to natural gas school buses and that additional funds should be provided for hydrogen fuel cell vehicles.

Moved by McCallon; seconded by Bartlett; unanimously approved

Ayes: Bartlett, McCallon, Mitchell, Rodriguez

Abstain: Kracov

Noes: None

Absent: Buscaino

**2. Recognize Funds, Execute and Amend Agreements for Installation and Maintenance of Air Filtration Systems, and Reimburse General Fund**

As part of the Community Air Protection Program (CAPP) incentive funds, \$6,352,650 was approved to implement school air filtration projects in AB 617 communities. CARB has also requested South Coast AQMD administer two Supplemental Environmental Projects (SEPs) to install and maintain air filtration systems at schools and residences in Environmental Justice communities. These actions are to: 1) recognize up to \$17,600 and \$9,250 from CARB for two SEPs to install and maintain air filtration systems at schools and residences, and reimburse administrative costs, into the Air Filtration Fund (75); 2) execute contracts with IQAir North America to install air filtration systems in an amount up to \$6,352,650 from the Community Air Protection SB 856 Fund (77) and up to \$17,600 and \$9,250 from the Air Filtration Fund (75); 3) execute agreements with CARB and local school districts; 4) amend contracts to purchase additional filters using unspent administrative funds; and 5) reimburse the General Fund for administrative costs up to \$1,343 for the CARB SEPs.

Council Member Mitchell noted that she does not have a financial interest or conflict of interest but is required to identify for the record that she is a Board Member of CARB which is involved in this item.

Mayor McCallon inquired about the school selection and prioritization process and wanted to ensure equitable distribution between the three Year 1 AB 617 communities. Staff responded that the selection process was mainly by the Community Steering Committee (CSC) for each community and 10 schools will be funded in each *community*. Mayor McCallon also inquired about funding allocation to community centers. Staff informed the committee that the top 10 schools includes childcare and elementary schools, since the CSC priority was for the youngest children.

Council Member Mitchell asked staff to notify Board members in the AB 617 areas of schools anticipated to receive air filtration systems. Staff committed to providing *this information*.

Council Member Rodriguez asked about the selection process and if the school list can be revised. Staff emphasized that the school lists were prioritized by CSCs and the community ultimately decides on the plans and their implementation. *Only* the CARB Board can approve the plans developed by the CSC.

Council Member Mitchell further emphasized that the CARB Board's focus is on getting community input. The South Coast AQMD Board members can be part of the process by attending CSC meetings, but mostly the community participates in

the development of the plan and CARB and South Coast AQMD only implements the plan once it is developed.

Moved by McCallon; seconded by Rodriguez; unanimously approved.

Ayes: Bartlett, Kracov, McCallon, Mitchell, Rodriguez

Noes: None

Absent: Buscaino

**3. Recognize Revenue and Execute Contracts for Electrification of Transport Refrigeration in Southern California Grocery Fleet**

South Coast AQMD has been awarded up to \$2,240,721 from U.S. EPA to replace diesel transport refrigeration units (TRUs) with electrified TRUs and install supporting infrastructure with Albertsons Companies. These actions are to: 1) recognize revenue, upon receipt, of up to \$2,240,721 from the U.S. EPA FY20 Clean Diesel Funding Assistance Program into the Clean Fuels Program Fund (31) for electrification of transport refrigeration; 2) execute a contract with Albertsons Companies to replace diesel TRUs with electrified TRUs and install supporting infrastructure in an amount not to exceed \$2,170,975 from the Clean Fuels Program Fund (31); and 3) reimburse the General Fund up to \$69,746 from the Clean Fuels Program Fund (31) for administrative costs.

Mayor McCallon inquired about the NOx and PM emission reductions from the proposed project. Staff responded that annual emission reduction is estimated at 1.5 tons of PM2.5 and 13.5 tons of NOx per year.

Council Member Rodriguez inquired about the possibility of incorporating fuel cell technology and the role of the California Fuel Cell Partnership (CaFCP). Staff responded that the CaFCP is mostly focused on light-duty fuel cell vehicles and limited fuel cell manufacturers are looking at fuel cell powered TRUs since the market is currently small. The battery and hybrid electric powered TRUs are more cost-effective than fuel cells \, but staff will continue to explore potential fuel cells projects.

Ranji George, a member of the public, commented on the importance of fuel cell technology deployment in the trucking industry.

Moved by Bartlett; seconded by Rodriguez; unanimously approved.

Ayes: Bartlett, Kracov, McCallon, Mitchell, Rodriguez

Noes: None

Absent: Buscaino

**OTHER MATTERS:**

**4. Other Business**

There was no other business.

**5. Public Comment Period**

Ranji George, a member of the public, commented about Council Member Mitchell leaving South Coast AQMD and thanked her for her leadership.

**6. Next Meeting Date**

The next regular Technology Committee meeting is scheduled for Friday, December 18, 2020 at noon.

**Adjournment**

The meeting adjourned at 12:54 p.m.

AGENDA NO. 25

REPORT: Mobile Source Air Pollution Reduction Review Committee

SYNOPSIS: The Mobile Source Air Pollution Reduction Review Committee held a meeting remotely on Thursday, November 19, 2020. The following is a summary of the meeting.

RECOMMENDED ACTION:  
Receive and file.

Ben Benoit  
South Coast AQMD Representative  
to MSRC

MMM:NB:CR:psc

---

### **Meeting Minutes Approved**

The MSRC approved the minutes of the August 20 and September 17, 2020 meetings. The approved minutes are attached (*Attachment 1*).

### **Adoption of 2021 Meeting Schedule**

The MSRC adopted its 2021 meeting schedule (*Attachment 2*). The MSRC will continue to meet on the third Thursday of every month at 2:00 p.m. Its Technical Advisory Committee (MSRC-TAC) will continue to meet on the first Thursday of every month at 1:30 p.m., except for the months of January and December which have been moved to the second Thursday because of holiday conflicts. Both the MSRC and the MSRC-TAC will be dark in July.

### **FYs 2014-16 Work Program**

#### **Transportation Control Measure Partnership Program**

As part of the FYs 2014-16 Transportation Control Measure Partnership Program, the MSRC awarded the Los Angeles County Metropolitan Transportation Authority (Metro) \$2,500,000 towards the expansion of the Willowbrook/Rosa Parks Transit Station. In September, Metro requested an extension due to delays associated with removal of temporary access measures and unexpected requirements related to

stormwater release. The MSRC approved the extension at their October 15, 2020 meeting, but the contract modification process was not completed prior to the contract termination date. The MSRC considered and approved a twelve-month replacement contract in the amount of \$2,500,000 as part of the FYs 2014-16 Work Programs.

### **FYs 2016-18 Work Program**

#### **Design, Hosting and Maintenance of the MSRC Website**

The recommendation to award a contract for long-term maintenance of the MSRC website has been delayed, and it is now anticipated that recommendation will be brought forward for the MSRC's consideration within the next two months. The current Contract #MS18003 with Geographics, which covers maintenance of the site, will terminate on February 20, 2021. In order to assure uninterrupted operation of the site pending successor selection and contract finalization, a four-month extension of Contract #MS18003 was recommended. The MSRC considered and approved a \$2,000 contract value increase and a four-month term extension.

### **FYs 2018-21 Work Program**

#### **Last Mile Program**

The Last Mile component of the MSRC's Regional Goods Movement Program focuses on reducing emissions from transportation of goods following departure from distribution centers. SCAG proposed two phases of implementation. Phase I focuses on the procurement and commercial deployment of zero emission or near-zero emission heavy- and/or medium-duty on-road trucks with the potential for supporting infrastructure. Phase 2 would conduct robust outreach to expand Phase I projects and coordinate with both public and private sector stakeholders to deploy broader innovative technologies currently being demonstrated by leading last mile delivery companies, particularly in e-commerce use cases.

SCAG developed Program Guidelines for Phase I that include a geographic funding minimum of \$1,250,000 for each county within South Coast AQMD jurisdiction, a minimum 1:1 investment match for each project proposal, and a \$5,000,000 funding maximum per project. SCAG would next issue a Call for Projects in conformance with the Program Guidelines, review submitted proposals in conjunction with the Last Mile Subcommittee and MSRC-TAC and provide a recommended list of projects for final MSRC approval. SCAG would then oversee project implementation and provide evaluation and reports. The MSRC considered and approved SCAG's draft Program Guidelines & Call-for-Projects.

### **Contract Modification Requests**

The MSRC considered seven contract modification requests and took the following actions:

- For the County of Los Angeles, Internal Services Department, Contract ML14030, which provided \$425,000 for Bicycle Racks, Outreach & Education, a seven-month no-cost term extension;
- For the City of Yucaipa, Contract #ML16057, which provided \$380,000 to implement “Complete Streets” pedestrian access project on county line road, a one-year no-cost term extension;
- For the City of Beaumont, Contract #ML18081, which provided \$31,870 to install EV charging infrastructure, substitution of three Level III charging stations for two Level II charging stations and a two-year term extension;
- For the County of Los Angeles Department of Public Works, Contract #ML14027, which provided \$500,000 to construct new CNG stations in Canyon Country and La Puente, reduce the number of time-fill hoses to be installed at the Canyon Country location from six to four, with a corresponding \$8,000 contract value reduction;
- For the Los Angeles Department of Water and Power (LADWP), Contract #ML16022, which provided \$360,000 to purchase 12 heavy-duty natural gas vehicles, reduce the number of vehicles from 12 to 8, with a corresponding \$120,000 contract value reduction and a two-year term extension;
- For the City of South Gate, Contract #ML18146, which provided \$127,400 to purchase five light-duty ZEVs and install EV charging infrastructure, substitute the installation of a Level III charging station for the installation of a Level II charging station at their corporate yard and a three-year term extension; and
- For the City of Riverside, Contract #ML18063, which provided \$383,610 to expand existing CNG stations, substitute the installation of an additional dual-hose CNG dispenser for the installation of a separate fueling island for Police Department at the Lincoln Avenue location, and substitute the installation of two additional CNG storage spheres for the installation of a dual-hose CNG dispenser at the Acorn Street location.

### **Received and Approved Final Reports**

This month, the MSRC received and unanimously approved two final report summaries:

1. Riverside County Transportation Commission, #MS16124, which provided \$253,239.00 for extended freeway service patrols; and
2. City of San Bernardino, #MS18117, for expansion of existing CNG infrastructure.

**Contracts Administrator's Report**

The MSRC's AB 2766 Contracts Administrator provides a written status report on all open contracts from FY 2007-08 to the present. The Contracts Administrator's Report for September 24, 2020 through October 28, 2020 is attached (Attachment 3).

**Attachments**

Attachment 1 – Approved August 20 and September 17, 2020 Meeting Minutes

Attachment 2 – Adopted 2021 Meeting Schedule

Attachment 3 – September 24, 2020 through October 28, 2020 Contracts  
Administrator's Report

**MOBILE SOURCE AIR POLLUTION REDUCTION REVIEW COMMITTEE  
THURSDAY, AUGUST 20, 2020 MEETING MINUTES**

21865 Copley Drive, Diamond, Bar, CA 91765 - Conference Room CC-8

All participants attended the meeting remotely pursuant to Executive Orders N-25-20 and N-29-20

**MEMBERS PRESENT:**

(Chair) Larry McCallon, representing San Bernardino County Transportation Authority (SBCTA)  
Ben Benoit, representing South Coast AQMD  
Michael Carter (Alt.), representing California Air Resources Board (CARB)  
John Dutrey, representing Regional Rideshare Agency  
Ray Marquez (Alt.), representing Regional Rideshare Agency  
Meghan Sahli-Wells (Alt.), representing Southern California Association of Governments (SCAG)  
Tim Shaw, representing Orange County Transportation Authority (OCTA)  
Steve Veres, representing Los Angeles County Metropolitan Transportation Authority (Metro)  
Mark Yamarone (Alt.), representing Metro

**MEMBERS ABSENT:**

(Vice Chair) Brian Berkson, representing Riverside County Transportation Commission (RCTC)  
Jack Kitowski, representing CARB

**MSRC-TAC MEMBERS PRESENT:**

Steven Lee, representing Metro  
Rongsheng Luo, representing SCAG  
Kelly Lynn, representing SBCTA  
(MSRC-TAC Chair) AJ Marquez, representing Orange County Board of Supervisors  
Nicole Soto, representing Regional Rideshare Agency  
Scott Strelecki, representing SCAG  
Derek Winters, representing CARB

**OTHERS PRESENT:**

Tricia Almiron  
Rubin Aronin, Better World Group Advisors  
Debra Ashby, South Coast AQMD  
Michael Bolin  
Harvey Eder  
Lauren Dunlap  
Lane Garcia, South Coast AQMD  
Doe Girling  
Carl Hansen  
Frances Keeler  
Jack Symington  
Angela Thomas

**SOUTH COAST AQMD STAFF & CONTRACTORS**

Leah Alfaro, MSRC Contracts Assistant  
Maria Allen, Secretary  
Naveen Berry, Asst. Deputy Executive Officer  
Penny Shaw Cedillo, MSRC Administrative Liaison  
Ray Gorski, MSRC Technical Advisor-Contractor  
Daphne Hsu, Senior Deputy District Counsel  
John Kampa, Financial Analyst  
Cynthia Ravenstein, MSRC Contracts Administrator  
Paul Wright, Information Technology Specialist

**CALL TO ORDER**

- Call to Order

MSRC Chair Larry McCallon called the meeting to order at 2:02 p.m.

Roll call was taken at the start of the meeting. The following members and alternates were present: MICHAEL CARTER, JOHN DUTREY, LARRY MCCALLON, MEGHAN SAHLI-WELLS, TIM SHAW, STEVE VERES.

- Opening comments

MSRC Chair Larry McCallon introduced John Dutrey, Mayor of the City of Montclair, as a new member of the MSRC representing Regional Rideshare Agency. MSRC Member John Dutrey commented, I was a part of the MSRC back in the mid-90s, when I represented Council Member Leonard Paulitz who was a Governing Board Member and also on the MSRC. The MSRC was about 4 or 5 years old. I learned a lot from the group when I was attending both the Committee Board meetings and the MSRC-TAC meetings and am looking forward to representing Regional Rideshare as part of SBCTA. The MSRC does a lot of great things to assist in the reduction of mobile emissions and obviously we are playing a real big important part these days.

MSRC Alternate Meghan Sahli-Wells stated for the record that for Agenda Item #12, she does not have any financial interest, but is required to identify that she is a Regional Council Member for SCAG, which is involved in that item.

MSRC Member Tim Shaw stated for the record that for Agenda Items #11 and #12, he does not have any financial interest, but is required to identify that he is a City Council Member in the City of La Habra and an Alternate Regional Council Member for SCAG, which are involved in those items.

MSRC Chair Larry McCallon stated for the record that for Agenda Items #12 and #13, he does not have any financial interest, but is required to identify that he is a Governing Board Member for South Coast AQMD and Regional Council Member for SCAG, which are involved in those items.

MSRC Member John Dutrey stated for the record that for Agenda Item #12, he does not have any financial interest, but is required to identify that he is a member of the Transportation Committee for SCAG, which is involved in that item.

[MSRC Member Ben Benoit arrived at 2:08 p.m.]

MSRC Member Ben Benoit stated for the record that for Agenda Item #13, he does not have any financial interest, but is required to identify that he is a Governing Board Member for South Coast AQMD, which is involved in that item and that for Agenda Item #12, he does not have any financial interest, but is required to identify that he is on the SCAG Board, which is involved in that item.

### **CONSENT CALENDAR (Items 1 through 10)**

#### **Receive and Approve Items**

#### **Agenda Item #1 – Minutes for the January 16, 2020 MSRC Meeting**

The minutes of the January 16, 2020 MSRC meeting were distributed at the meeting.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, UNDER APPROVAL OF CONSENT CALENDAR ITEMS #1 THROUGH #10, THE MSRC APPROVED THE JANUARY 16, 2020 MSRC MEETING MINUTES.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES. MSRC MEMBER JOHN DUTREY ABSTAINED.  
NOES: NONE.

**ACTION:** Staff will include the January 16, 2020 MSRC meeting minutes in the MSRC Committee Report for the September 4, 2020 South Coast AQMD Board meeting and will place a copy on the MSRC's website.

#### **Agenda Item #2 – MSRC Contracts Administrator's Report**

The MSRC AB 2766 Contracts Administrator's Report for May 28 through July 29, 2020 was included in the agenda package.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, UNDER APPROVAL OF CONSENT CALENDAR ITEMS #1 THROUGH #10, THE MSRC UNANIMOUSLY VOTED TO RECEIVE AND FILE THE CONTRACTS ADMINISTRATOR'S REPORT FOR MAY 28 THROUGH JULY 29, 2020.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.  
NOES: NONE.

**ACTION:** Staff will include the MSRC Contracts Administrator's Report in the MSRC Committee Report for the September 4, 2020 South Coast AQMD Board meeting.

**Agenda Item #3 – Financial Report on AB 2766 Discretionary Fund**

A financial report on the AB 2766 Discretionary Fund for July 2020 was included in the agenda package.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, UNDER APPROVAL OF CONSENT CALENDAR ITEMS #1 THROUGH #10, THE MSRC UNANIMOUSLY VOTED TO RECEIVE AND FILE THE FINANCIAL REPORT FOR THE PERIOD ENDING JULY 2020.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** No further action is required.

**For Approval – As Recommended**

**Agenda Item #4 – Consider Modified Alignment and Four-Year Term Extension for the Riverside County Regional Park and Open Space District, Contract #ML14021 (\$250,000 – Bicycle Trail Improvements)**

The Park and Open Space District requests approval to return the bikeway to its originally proposed alignment because the alignment currently specified in the contract has been determined to have insurmountable conflicts in users and ownership. The County further requests a four-year term extension to allow for completion of Southern California Edison's Riverside Transmission Reliability Project (RTRP). Power lines are planned in the immediate vicinity of the trail, meaning that the trail would be subject to damage/removal should it be constructed prior to completion of the RTRP.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE A MODIFIED ALIGNMENT AND FOUR-YEAR TERM EXTENSION FOR THE RIVERSIDE COUNTY REGIONAL PARK AND OPEN SPACE DISTRICT, CONTRACT #ML14021.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** MSRC Staff will amend the above contract accordingly.

**Agenda Item #5 – Consider Six-Month Term Extension for the County of Los Angeles, Contract #ML14023 (\$230,000 – Maintenance Facility Modifications in Westchester)**

The County requests a six-month contract term extension to allow them to carry out their public outreach plan.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE A SIX-MONTH TERM EXTENSION FOR THE COUNTY OF LOS ANGELES, CONTRACT #ML14023.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** MSRC Staff will amend the above contract accordingly.

**Agenda Item #6 – Consider One-Year Term Extension for the County of Los Angeles, Contract #ML14024 (\$230,000 – Maintenance Facility Modifications in Baldwin Park)**

The County requests a one-year contract term extension due to delays with the contractor over fee negotiations, acquisition/delivery of materials due to the COVID- 19 situation, and travel restrictions to California that prevented the contractor from conducting the system start-up, testing, and training.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE A ONE-YEAR TERM EXTENSION FOR THE COUNTY OF LOS ANGELES, CONTRACT #ML1402.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** MSRC Staff will amend the above contract accordingly.

**Agenda Item #7 – Consider One-Year Term Extension for the County of Los Angeles, Contract #ML14097 (\$104,400 – Install Electric Vehicle Charging Infrastructure)**

The County requests a one-year contract term extension due to delays associated with the COVID-19 situation.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE A ONE-YEAR TERM EXTENSION FOR THE COUNTY OF LOS ANGELES, CONTRACT #ML14097.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** MSRC Staff will amend the above contract accordingly.

**Agenda Item #8 – Consider Six-Month Term Extension for the City of Rancho Cucamonga, Contract #ML16052 (\$315,576 – Install Two Class I Bikeways)**

The City requests a six-month contract term extension due to delays associated with limited staff resources.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE A SIX-MONTH TERM EXTENSION FOR THE CITY OF RANCHO CUCAMONGA, CONTRACT #ML16052.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** MSRC Staff will amend the above contract accordingly.

**Agenda Item #9 – Consider Modified Statement of Work and Three-Year Term Extension for the City of Rialto, Contract #ML16077 (\$463,216 – Implement Pedestrian Improvements and Bike Sharing)**

The City of Rialto requests to modify some of the terms of the contract to reflect advances in the market and technology now used to provide bike sharing services. The

City also requests a three-year term extension to allow them to pursue additional funding through the Clean Mobility Options Voucher Pilot Program. If successful in securing this funding, they also propose to extend the minimum operational period for the bike sharing element to five years.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE A MODIFIED STATEMENT OF WORK AND THREE-YEAR TERM EXTENSION FOR THE CITY OF RIALTO, CONTRACT #ML16077.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** MSRC Staff will amend the above contract accordingly.

**Agenda Item #10 – Consider Station Relocation and One-Year Term Extension for the Regents of the University of California (UCI), Contract #MS18175 (\$1,000,000 – Expansion of Existing Hydrogen Station)**

UCI requests to relocate the hydrogen station because the current location has been selected for a hospital. Their administration has identified a site in the vicinity with enhanced accessibility and visibility. UCI would cover the relocation costs. Due to the time necessary for relocation, UCI requests a one-year term extension.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE A STATION RELOCATION AND ONE-YEAR TERM EXTENSION FOR THE REGENTS OF THE UNIVERSITY OF CALIFORNIA (UCI), CONTRACT #MS18175.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** The station relocation will be placed on the September 4, 2020 South Coast AQMD Governing Board agenda for approval.

**ACTION CALENDAR (Item 11 through 17)****FYs 2018-21 WORK PROGRAM****Agenda Item #11 – Consider Substitution of One Dual-Port Level II and One Level III Charging Station for Two Dual-Port Level II Charging Stations for the City of La Habra, Contract #ML18143 (\$80,700 – Install Two EV Charging Stations)**

Cynthia Ravenstein, MSRC Contracts Administrator, reported this request comes from the City of La Habra. They were awarded funding from the MSRC in the amount of \$80,700 to install two publicly accessible, dual-port, Level II EV charging stations. The City is proposing instead of two Level II charging stations, each of which would have had two ports, to install one Level II station and one Level III charging station. This would actually provide one fewer charging ports, but the Level III charging station charges vehicles a lot more quickly. So, there is a strong argument that it would be equal to or better than the two Level II charging stations. The MSRC-TAC recommends approval of the request. There was some discussion that since the MSRC has seen some other requests recently which involved substituting Level III for Level II that involved proprietary technology that might not be usable by all vehicles, the MSRC-TAC wanted to be sure that there was consistency in what the MSRC was approving. The MSRC-TAC recommended that there be a contingency on this approval that the Level III charging station be of a non-proprietary technology. Basically that would mean that it would be a kind of technology that the vast majority of vehicles would either be able to use, or be able to buy a converter to use, as opposed to something like a Tesla Supercharger, which is only usable by Teslas. That is the MSRC-TAC's recommendation. This contingency was communicated to the City. They did not express any concerns with it.

MSRC Chair Larry McCallon commented, in our City we put in three Level IIIs and I have a Tesla, so I had to go buy the adapter so I could use them. Ms. Ravenstein commented, it is possible for you to get an adapter, whereas the other way around, it is not possible.

ON MOTION BY MSRC MEMBER BEN BENOIT, AND SECONDED BY MSRC MEMBER JOHN DUTREY, MSRC UNANIMOUSLY VOTED TO APPROVE WITH THE CONTINGENCY THAT MSRC FUNDS ONLY BE USED FOR NON-PROPRIETARY EVSE PROJECT COMPONENTS.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** MSRC Staff will amend the above contract accordingly.

**Agenda Item #12 – Consider Proposed Contract with Southern California Association of Governments (SCAG) to Implement Last Mile Component of MSRC Goods Movement Program**

Cynthia Ravenstein, MSRC Contracts Administrator, reported this request is following up from a proposal that came forward back in May. SCAG had proposed that they could implement the Last Mile component of the MSRC's Regional Goods Movement Program and the MSRC authorized SCAG to submit a sole source proposal to do that. But the MSRC wanted to have a more detailed scope of how the SCAG would implement that. An initial response was brought to the MSRC-TAC in June, but they still needed more definition. That went through several iterations with MSRC-TAC's Last Mile Subcommittee. The MSRC-TAC feels that it is now ready to be brought forward to you for your approval. Mr. Scott Stelecki from SCAG will present more detail.

MSRC-TAC Alternate Scott Strelecki reported, just to reiterate, we are proposing to serve as a lead for the Last Mile component. This has established a two-phased approach. Phase One is looking to implement a call for projects focusing on the purchase and commercial deployment of zero and near-zero emission heavy- or medium-duty on-road trucks as well as considering the equipment and / or infrastructure that supports those vehicles. Phase Two is looking to further expand upon this Phase One project commercial deployment and coordinate with public and private sector stakeholders to deploy broader innovative technologies which are currently being demonstrated by leading last mile delivery companies, especially as these things relate to e-commerce.

As part of the Last Mile Subcommittee we thought it would be prudent to get a sense of what we are doing to create a program approach. We focused on three core areas. We have an investment thesis, the investment impacts and investment targets. So, within the thesis we laid it out in a few different areas. One area is: the right problem at the right time. Everyone is aware there has been a rapid increase in expectations for commercial vehicle production. That goes from Class 8 trucks, delivery vans and lower level commercial, all the way down to a construction pickup truck. In the 2022, 2023, and 2024 timeframe companies are going to really look to start ramping up production. We are right at the cusp of the right time for these types of commercial deployments. With respect to the critical barriers, there is a public-private aspect here where we really want to focus on the benefits, the challenges, and the impacts from the return on investment perspective for the private players. But at the same time there are a lot of public impacts and relationships as we look at interrelationships between how you scale near-zero or zero emission vehicles, equipment, and infrastructure in relation to that. Measuring success, we are interested in how we can get further emission reductions. But at the same time, we really want to better understand how these vehicles operate in the transportation environment and all the connections between vehicles, equipment, infrastructure, etc. For investment impacts, we laid out some questions related to what we could expect for long-term potential benefits for air quality, as well as the economy, as both are important to consider. Looking at the Last Mile industry, how could cost reductions for the private

sector be achieved long-term? We are really trying to get at some of those issues for public/private and at the same time from a more transformative perspective. This program could be a leader for our region and even on a state or national level. Could we set the tone for what the future could begin to look like? Lastly, on the investment targets, these were specific things that we felt we needed to have some clear guidance on. The program approach was really meant to set the tone of what we were looking to achieve, how would we achieve that, and how could this directly feed into the statement of work. The structure of the statement of work is broken down into four tasks with the first task being the development of the program guidelines and the issuance of a call for projects, followed by screening and selection process for the projects, then getting to project implementation, and then ultimately evaluation, monitoring and reporting.

We really tried to enhance the details which were requested at the prior MSRC meeting. We have the overarching expectations where the contractor shall work directly with the MSRC's Last Mile Subcommittee, MSRC-TAC and Board, discussed developing the Program Guidelines, and ensuring there is a recommendation from the MSRC-TAC on the Guidelines before they ultimately will be approved by the MSRC Board. That all has to occur before a Call for Projects will be issued. We have laid out how we have organized the information that we have discussed to date through the Last Mile Subcommittee, adding a substantial amount of detail to better inform the decision to approve this item. We had further dialogue on how we begin to frame these program guidelines, what the important things are to consider and that need to be a part of the discussion before a recommendation. That led to the focus of geographic funding minimums within the four-county area of the South Coast Air Quality Management District, an investment match of one-to-one, as well as funding minimums and maximums. The funding minimum for small to medium-sized businesses was primarily focused on the consideration that while we have a high expectation we will receive interest from some of the larger last mile delivery companies that are operating, at the same time we wanted to ensure that there was an opportunity for small to medium-sized businesses as part of that process. At the same time, we recognize that there could be a company that could potentially meet the overall coverage of the four-county area. So, we put in a maximum per project as well. The geographic funding minimum amounts were \$1.25 million per county. The minimum funding for small and midsize business was \$3 million and the maximum per project was set at \$5 million. And again, this is out of a \$10 million total amount.

For the fleet and infrastructure components, we felt it was very important to add specification regarding the number of zero emission or near-zero vehicles that would be procured. The potential to convert additional vehicles, as well as considerations for regional fueling or charging hub depots, grid integration of that technology, etc. were also important. We also need to consider how the load could affect the peak times of the system. Other areas in that section were focused on data considerations, this ranged from the actual vehicles and infrastructure, vehicle miles traveled, emissions information, origin/destination, etc. A couple other items considered were potentially to require

procurement and purchase orders within a set time frame to ensure timeliness once projects were selected. We could move forward in a manner towards implementation and monitoring that would be beneficial for the program, as well as looking at other lead times as things could be impacted by the CEQA process, building permits etc., on the infrastructure side. For project expectations, we discussed different considerations obviously from a holistic perspective of the project, clearly designating what type of technologies would be used, what's being provided as part of the application and for the program funds, which would be supported between vehicles and equipment versus infrastructure. We would want to see any relationships between utility companies that would require letters of intent, as well as looking at further delineating project screening and selection criteria. That is something that we would have further dialogue on and develop as part of the Program Guidelines. Looking at other areas such as anticipated drive cycles of operators, routes, those are examples of more detailed things that would need to be clear as part of the proposals. As part of that development of the Program Guidelines and ultimately putting out a Call for Projects, coordination would be sought with the MSRC Last Mile Subcommittee and MSRC-TAC to review, discuss and screen the project proposals. A recommendation from the MSRC-TAC would be provided for consideration to the MSRC Board and the Board would have final approval of the selection of projects.

For project implementation, this would be where SCAG, as implementer, would enter into memorandum of understanding (MOU) agreements to establish the implementation process including targets and expectations as a direct outcome from the program guidelines. That process would involve the proposed MOU template language being provided and discussed through the Last Mile Subcommittee prior to the issuance of those MOUs to ensure consistency of expectations. Afterward, SCAG would be responsible for ensuring all project elements are implemented in accordance with MOUs, including oversight and coordination with all project stakeholders. For evaluation and reporting, we would have regular progress reports summarizing the results to date including tasks completed, any issues or challenges encountered, resolutions implemented and other progress items. We will perform an evaluation of the project implementation and as part of that both an interim and final report would be provided. As part of the interim and final reports, we would summarize actions taken to implement the plan, identify any obstacles and how solutions were generated and discuss success of each project implementation and the overall plan. We would be focusing on the emission reduction results, any replication potential across the region, opportunities for further refinement, etc. As part of that we feel it would be very valuable to have recommendations of strategies for wide-scale adoption.

Our initial draft schedule is based on the tasks as they have been laid out. We are at the August 20th MSRC Board meeting. We would expect after that for the contract to be awarded; that would occur for the South Coast AQMD in September. We could quickly after action today, continue the process of working with the Last Mile Subcommittee to get to a point of drafting the Program Guidelines and have an opportunity to bring that

back through the MSRC process in October. Then we could have a Call for Projects issued as early as November. We would later in the year look towards the screening and selection of projects with approval occurring early next year. Following on, we would be walking through the MOU process and getting towards project implementation in the spring and having that run through the summer of the following year, with all of the progress updates and interim and final reporting occurring over the course of that time towards the end of next year. I will say that we do recognize that as we get closer to some of the holiday times there could be some impacts. So we do recognize that there could be some adjustments that need to be made and we also feel this is a fairly aggressive approach right now, but we're fully well prepared to deal with any need to make adjustments.

MSRC Chair Larry McCallon commented, is it realistic to project that South Coast AQMD would issue a contract in September? Ms. Ravenstein replied, he might be referring to the award. I do not think that they would actually be able to enter into the contract in September. Mr. McCallon commented, the award of the contract to SCAG? Ms. Ravenstein replied, if the MSRC were to approve it today.

MSRC Alternate Meghan Sahli-Wells commented, as you can see SCAG has worked really closely with the MSRC Last Mile Subcommittee and the MSRC-TAC because there had been some questions and details to fill in. From the presentation you can see how much they have developed over the last couple of months. This is just a great opportunity for us to partner together to leverage our resources to really move on what all of our goals are to reduce the pollutants that are choking us in this region and that we're tasked with addressing. This is really an exciting opportunity for us to be a leader. SCAG is really eager to work with you. We wanted to especially thank the hard work of the Last Mile Subcommittee, the MSRC-TAC and MSRC staff, especially Ray and Cynthia for their feedback and collaboration on this proposal. We want to thank all of you for considering this refined and very detailed proposal and hope to get your approval today.

MSRC Member John Dutrey commented, just to clarify, the MOU with the vendors who submit proposals, that is approved by MSRC not SCAG? Final approval is the MSRC Board? Ms. Ravenstein replied, the MSRC has to approve the contract with SCAG. Then the MSRC is going to approve what the projects are. But the actual MOUs for those projects will be between SCAG and the project proponents. The individual MOUs will not be brought to the MSRC under this proposal.

Ray Gorski, MSRC Technical Advisor commented, this was a very good process. We listen to the initial comments from the MSRC. We brought it back through the committee process. There was a lot of collaborative effort over several meetings to ensure that all the stakeholders had their voices heard, but more importantly bring something to you today, which we feel has been fully vetted and has sufficient detail to hit the ground running upon your consideration and approval. It took a little longer than we had initially thought but it is one of those situations where we wanted it right as opposed to right away.

Mr. McCallon commented, I would like to echo Meghan's comments about thanking everyone involved in this process. I know it has been arduous to put together and I thank SCAG for bringing it forward. It looks to be an exciting program and I am looking forward to it. This is one area where we need a solution. The Last Mile area is something that needs to be worked on very quickly.

ON MOTION BY MSRC MEMBER BEN BENOIT, AND SECONDED BY MSRC MEMBER STEVE VERES, MSRC UNANIMOUSLY VOTED TO APPROVE A PROPOSED CONTRACT WITH SOUTHERN CALIFORNIA ASSOCIATION OF GOVERNMENTS IN AN AMOUNT NOT TO EXCEED \$10,000,000 TO IMPLEMENT THE LAST MILE COMPONENT OF MSRC GOODS MOVEMENT PROGRAM.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** This item will be considered by the South Coast AQMD Board at its meeting on September 4, 2020.

**Agenda Item #13 – Consider Reallocation of \$3,000,000 from Implementation of South Coast AQMD Market Acceleration Program to South Coast AQMD Trade Down Program**

Cynthia Ravenstein, MSRC Contracts Administrator, reported back in November the MSRC allocated \$4 million to partner with South Coast AQMD to implement a Market Acceleration Program. The focus of this program is to target trucks, trying to get early deployment of near zero emission natural gas trucks. This program had two kinds of transactions that it was trying to go after: (1) a more simple transaction where you're having somebody that's going to purchase a new near zero truck and they're going to scrap an old truck, and (2) then there is a little bit more complicated approach sometimes called a trade down approach. That would involve two different parties and three trucks. After the MSRC allocated the funding, South Coast AQMD has decided that they want to split the two parts of this program. The simpler incentive part, as coordinated by Clean Energy, would be handled by them. And then South Coast AQMD wants to handle the trade down approach and focus on the two-party transactions. They are asking, of the \$4 million that the MSRC originally allocated, to take \$3 million and reallocate it to this Trade Down Program.

Naveen Berry, Assistant Deputy Executive Officer, commented that the Trade Down Program is really focusing on having a vehicle available to the independent owner operator. What we are trying to do is set up a system similar to what we have been doing under the Voucher Incentive Program (VIP) that is focused on the small independent

owner/operators. A large fleet can afford to get a truck for \$175,000, or actually on average with the sales tax and the excise tax it's about \$180,000 per truck, and they would be incentivized up to \$100,000. We would utilize some of those funds from the South Coast AQMD grant, as well as from the MSRC cost-share, and then buy down for the small independent owner/operator the truck that they can get from the larger fleet. What we have learned is a larger fleet typically has 2014 or newer trucks in their fleet. This way an independent owner/operator can scrap a pre-2010 truck, get a 2014 truck for about \$10,000 out of pocket cost, and continue providing that independent drayage service that they have been doing for a long time. One of the reasons why the South Coast AQMD is very interested in this is that the Truck and Bus regulation is coming in and pre-2010 trucks will be completely phased out by 2023. Our goal is to try to help the independent owner/operator continue to have those trucks be available. The other aspect we are setting up is the dealers that we have been working with under VIP will actually help us coordinate between a larger fleet, that can acquire a new truck, and then have that newer used truck be available to the independent owner/operator. They are going to help us initially set up the system. Our goal is to grow that approach, not just for this trade down pilot concept but also work with CARB possibly to see if that can be incorporated into the Carl Moyer Program or to work with the Ports when their rate program is implemented to see how we can use this to accelerate that truck turnover, especially for independent owner/operators.

MSRC Alternate Michael Carter commented, how was the \$3 million versus \$1 million split determined? Mr. Berry replied, that was based on MSRC staff discussing it with our staff. But what we are doing is a million dollars for the Market Acceleration Program, which was an award that was made to Clean Energy from the South Coast AQMD a couple of years ago. That will be focusing on turning over trucks with larger fleets. But in that approach that larger fleet will actually acquire an older truck from the independent owner/operator. Then the larger fleet would have the brand-new truck, the truck with an engine certified at .02 g/bhp-hr NO<sub>x</sub> or below, as well as the 2014 truck for example. They would acquire a pre-2010 truck from an independent owner/operator. South Coast AQMD believes that a million-dollar cost share from the MSRC will help us implement that program fairly rapidly. But we also are requesting that the \$3 million dollars allocation for the Trade Down Program be available so that independent owner/operators can continue to have that benefit. So that is how that split was made.

MSRC Member John Dutrey asked, how many trucks? Mr. Berry replied that it depends on the cumulative funding. Initially we were looking at leveraging funds from the state's HVIP Program as well. Unfortunately, that is oversubscribed. We are looking at about \$135,000 total per truck that will be incentivized as a result of South Coast AQMD funds and MSRC funds.

ON MOTION BY MSRC MEMBER JOHN DUTREY, AND SECONDED  
BY MSRC MEMBER TIM SHAW, MSRC UNANIMOUSLY VOTED  
TO REALLOCATE \$3,000,000 FROM IMPLEMENTATION OF SOUTH

COAST AQMD MARKET ACCELERATION PROGRAM TO SOUTH  
COAST AQMD TRADE DOWN PROGRAM.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW,  
VERES.

NOES: NONE.

**ACTION:** This item will be considered by the South Coast AQMD Board at its  
September 4, 2020 meeting.

**Agenda Item #14 – Consider RFP for MSRC Website Hosting and Maintenance  
Services**

Cynthia Ravenstein, MSRC Contracts Administrator, reported the contract for maintaining and hosting the MSRC website is due to terminate in February. In June, the MSRC authorized the development of a RFP to solicit a firm to continue hosting and maintenance of the MSRC website. This has been prepared and is recommended for approval. It has also been reviewed by South Coast AQMD's Information Management staff. It is seeking somebody to continue hosting and maintenance and do minor modifications to the website, not looking for a major revamp at this time. There is not a set funding amount for the work but the cost that is proposed is one of the major elements of the evaluation.

MSRC Alternate Meghan Sahli-Wells commented regarding keeping the minutes updated on the website, which is kind of a parallel issue, but I wanted to make sure that we were able to do that. Especially when we have new members come on, it is always good to familiarize yourself with the votes. So just another plug for making sure that happens especially as we have this opportunity of updating.

ON MOTION BY MSRC ALTERNATE MEGHAN SAHLI-WELLS,  
AND SECONDED BY MSRC MEMBER JOHN DUTREY, MSRC  
UNANIMOUSLY VOTED TO APPROVE RFP FOR MSRC WEBSITE  
HOSTING AND MAINTENANCE SERVICES.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW,  
VERES.

NOES: NONE.

**ACTION:** This item will be considered by the South Coast AQMD Board at its meeting  
on September 4, 2020.

**Agenda Item #15 – Consider Proposed Outreach Strategy Developed as Part of Programmatic Outreach Services under Contract #MS21002**

[This item was deferred until the September Meeting].

**Agenda Item #16 – Consider Reallocation of Dodger Stadium Express Funding to Future Baseball Seasons and Modification of Major Event Center Work Program by Los Angeles County Metropolitan Transportation Authority (Metro), Contract #MS21004 (proposed) (\$2,188,899 – Clean Fuel Bus Service to Dodger Stadium)**

Cynthia Ravenstein, MSRC Contracts Administrator, reported that as part of the Major Event Center Work Program the MSRC awarded Metro \$2,188,899 to provide special bus service to Dodger Stadium for the 2020 and 2021 baseball seasons. A proposed contract was prepared to effectuate that award. The contract was being circulated through internal reviews. Then at the beginning of the COVID-19 pandemic, there was a freeze in Major League Baseball games and it finally happened that they decided to have a truncated 2020 season but to not have any fans in attendance. Without having any fans coming to the baseball stadium, it was evident that there was not any need to have bus service provided to the stadium. Preparations were underway to modify the proposed contract and have it cover only the 2021 baseball season. This information was communicated to Metro, but the contract had not yet been sent to them. As the result of receiving this information, Metro requested that any unused funds from modified baseball seasons be reallocated to future baseball seasons. They also requested that the MSRC modify the Major Event Center Program as necessary to allow that to happen. There is a provision in the Major Event Center Transportation Program Announcement that says that all the events that receive funding under that Program Announcement have to be held no later than December 31, 2021. This provision created an issue with being able to reallocate funding beyond 2021. Staff sought guidance from counsel concerning whether it would be possible for the MSRC to authorize a modification which didn't comply with that provision. It was confirmed that would not be possible for the MSRC to do that, without having some kind of a change in the program itself. Metro's request was brought before the MSRC-TAC. The MSRC-TAC is recommending that the Program Announcement be modified to extend the end date by which events could occur to December 31, 2022, to give one more year for those events to happen. This Program Announcement is still open at this time, and still accepting applications through March 30, 2021. It would be a modification of the open Program Announcement. The MSRC-TAC further recommended that the MSRC reallocate the funding for Metro from 2020 and 2021 to 2021 and 2022, in order to address the fact that this 2020 season was not something that required transportation services, and no one could have envisioned it. Those are the recommendations coming forward from the MSRC-TAC. It does not change the date by which people would submit applications, only the date that events could occur. And then specific to Metro, it would reallocate the funding so that they could use it in 2021 and 2022 instead of 2020 and 2021.

MSRC Member Tim Shaw commented, am I correct that the Dodgers were going to do quite a bit of work in the parking lot, the flow of traffic in and around the stadium? What does that possibly portend for the ridership of on this service? MSRC Member Steve Veres replied, the improvements this year were for the stadium, they actually invested quite a bit in the fan experience, including where fans would be dropped off, so they can enter directly into the stadium from the buses that that Metro had set up with MSRC. That experience was supposed to be substantially improved and they do have a proposal that is moving through Metro to do a gondola service from Union Station to the stadium. One of the concerns was that the buses were not moving fast enough through the process and they would close down the street, as the interest has grown, the fan attendance is pretty steady at about 50,000 or so game. So, they are trying all kinds of ideas to move it along. So those are interesting sort of modifications that are coming but we still have a gap from the Union Station pickup point all the way up into the into the Chavez Arena area. There is some movement and there is a future to look beyond just the buses to get folks up to the stadium using clean transportation options.

MSRC Member John Dutrey commented, I heard also the Boring Company is looking at a study to go underground from Union Station to Dodger Stadium. We are doing that at SBCTA at the Ontario Airport. Mr. Veres replied, that one has not been announced too publicly as opposed to the gondola option.

MSRC Alternate Mark Yamarone commented, we wanted to thank the staff and the MSRC-TAC for considering this. Just to clarify, we are not asking for any additional funds and all of the local match continues to be in place. From MSRC's own analysis you know how successful this program is. Both the programs that Mr. Veres mentioned are very far off in the future. This would be to get us through two successful seasons once fans are allowed back in the stadium. This is just an extension, no additional funds, and no change in our commitment to the program.

ON MOTION BY MSRC MEMBER STEVE VERES, AND SECONDED BY MSRC ALTERNATE MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE MODIFICATION OF THE MAJOR EVENT CENTER PROGRAM ANNOUNCEMENT TO EXTEND THE ALLOWABLE DATE FOR EVENTS TO DECEMBER 31, 2022, AND TO APPROVE REALLOCATION OF FUNDS AWARDED TO METRO TO THE 2021 AND 2022 BASEBALL SEASONS.

AYES: BENOIT, CARTER, DUTREY, MCCALLON, SAHLI-WELLS, SHAW, VERES.

NOES: NONE.

**ACTION:** MSRC Staff will amend the above contract and Program Announcement accordingly.

**Agenda Item #17 – Status Update on an Unsolicited Proposal Submitted to the MSRC by the Los Angeles CleanTech Incubator (LACI)**

Ray Gorski, MSRC Technical Advisor, reported that this was presented to you at your June meeting. However, it was not presented as an actionable item. MSRC staff received an unsolicited proposal from the Los Angeles CleanTech Incubator (LACI) on June 15th. We were requested, if possible, to have that proposal considered at your June 20th meeting a few days later. Due to the public noticing requirements of the Brown Act, staff was not able to agendaize that item as an action item, but we did have a brief discussion under Other Business. LACI is offering to support the MSRC's goals by providing heavy-duty electric charging infrastructure along strategic routes throughout the region, specifically looking at the critical I-710 route. This helps make feasible the use of zero-emission electric trucks which would come from the maritime Ports of Los Angeles and Long Beach and go out to distribution centers both within Los Angeles County as well as the Inland Empire. The proposal from LACI was a request for \$15 million. That would allow them to implement, on a task order basis, various infrastructure projects to support the deployment of zero emission drayage trucks. The initial task order that was included in their proposal was seeking \$2.65 million out of the total \$15 million funding request to construct 16 DC fast chargers. This would be split amongst two locations of a fleet that they had identified who was willing to partner with LACI and the MSRC in implementing the project. The fleet's name is Total Transportation Services Incorporated (TTSI). Under LACI's proposal, they offer to have these DC fast chargers installed at locations both at the Port of Los Angeles and another TTSI facility in the City of Carson.

The MSRC asked staff to take a couple of actions: (1) work directly with LACI to more fully refine the conceptual paper and proposal that they submitted for MSRC consideration, and (2) work with the technical working group and other regional stakeholders to provide guidance to both LACI and the MSRC relative to further refinement of this conceptual proposal. On July 16th, the MSRC convened a public meeting of a standing group that the MSRC has to look at these types of projects. The meeting had broad-based participation including not only members of your MSRC-TAC but also several regional stakeholders. This included the South Coast AQMD, Los Angeles County Metro because of their interest in electrification along the I-710 Corridor, SCAG because of their regional interest as the Metropolitan Planning Organization, and both maritime Ports -- Long Beach and Los Angeles, and finally we had participation by representatives from the state air regulatory and energy agencies, CARB and the California Energy Commission (CEC). Over 40 individuals participated. There was a very dynamic discussion looking at some of the details that were included in LACI's proposal. From a technical standpoint, there were no showstoppers identified. There were of course issues that based upon the deliberations would need to be addressed, but nothing that would present itself as a technical issue that would prevent those charging stations from being implemented.

During the discussions and subsequent discussions with the members of the South Coast AQMD legal team, there was a process issue identified. The MSRC works under the Procurement Policy of the South Coast AQMD because the South Coast AQMD enters into contracts on behalf of the MSRC. The Procurement Department that regulates unsolicited proposals made a determination that the proposal as submitted did not conform to the sole source justification requirements. Because of that it is recommended to not take action on the LACI proposal as it was presented. This can be contrasted to some other programs which the MSRC has authorized on a sole source basis, including one today with SCAG. Under SCAG's proposal an MSRC-approved solicitation is going to be developed. Projects that are submitted in response to that solicitation will be brought back to the MSRC for your review and subsequent approval. There is a competitive component to the work that the MSRC will be undertaking with SCAG. With the LACI proposal, it was brought to us differently in that LACI had identified at least the first fleet to participate under the \$15 million program. Within the terms of their conceptual proposal, LACI would go off and bring other potential fleets to the MSRC. That is the primary reason that there is a differentiation between the SCAG and the LACI efforts, and why due to the sole source justification requirement it is recommended that action not be taken on the LACI proposal.

That does not mean that pathways do not exist for the MSRC, LACI and other regional stakeholders to work together. There has been an awful lot of interaction, probably an unprecedented amount of interaction going on over the last couple of months between the stakeholders who are looking at electrification within the South Coast region. In September, your MSRC-TAC is going to consider a program related to a competitive opportunity in which LACI would be able to participate. But even beyond that, LACI and the MSRC have been asked to participate in a South Coast AQMD-led Regional Collaborative. Under that Regional Collaborative, money is being sought from state agencies to bolster the resources on a regional basis that can be used to move electrification forward. There are going to be opportunities for the MSRC to work with LACI. Those will conform to the procurement policies that we are subject to, both those which are sponsored by the South Coast AQMD through the Regional Collaborative as well as MSRC-sponsored potential projects that are going to be brought to your attention as soon as September. There is going to be funding available from the state in the very near term. We expect to see solicitations from CARB and CEC as soon as September offering a total of \$40 million which this region will want to go after. The South Coast AQMD-led regional team will have LACI and the MSRC as partners. Because of some of the issues where we have been confronted with given COVID-19 and its impact on the state budget, the MSRC dollars are now more important than ever in achieving these regional objectives. As was just mentioned in the preceding agenda item, some of the other funding is going away, at least in the short term. There is now greater need for the MSRC to participate as a potential funding source should this Committee make the decision to invest in these areas. We will bring those details to you beginning next month. We had a very good working relationship with LACI. As staff in refining the proposal, LACI was very amenable to making suggested modifications. We had a very strong

deliberative discussion with the regional stakeholders in a public meeting. I think a lot of important information came out of that, which further refined the proposal.

MSRC Member Steve Veres asked, you listed the two check boxes that were talking about developing a solicitation and then to be part of a regionally led effort, those are examples of next steps? I may be getting ahead of myself in terms of what you have in mind for the September presentation, but just curious because it seems to me that those could both be developed complementary to each other and along with any of the other things that you're talking about for next steps. Mr. Gorski replied, you are 100% correct. These are going to be worked in parallel. They are independent but not mutually exclusive, in that all these individual efforts--whether it be LACI's proposal to do heavy-duty electric vehicle charging infrastructure, whether it be the effort from the CARB and the CEC to do a large-scale deployment of zero emission drayage trucks, whether it be the MSRC looking to do Last Mile or Inland Ports--they are all related. All these efforts are simply components of the overall larger picture. What we are doing is bringing forth to the MSRC multiple programs that while they are themselves independent, are all interrelated and are all working toward the established regional goal, which is a zero-emission future. We are not ignoring the air quality concerns we have in the present, that is why the MSRC is also working on near-zero truck deployment. But as part of a regional effort, this is focused specifically on the future of zero-emission goods movement within the South Coast region. In September what we hope to see, if they get through the MSRC-TAC, are specific solicitation documents that we would recommend that the MSRC consider, as well as a request to have a more definitized and structured role in the collaborative effort led by the South Coast AQMD. We have to ensure that in doing one project it supports the regional effort and can potentially leverage other projects. That is what the MSRC-TAC has been fully engaged on for the last couple months including stakeholders such as Metro, Port of Los Angeles, SCAG, Port of Long Beach, LACI, and others.

MSRC Chair Larry McCallon commented, the project LACI has put forward is intriguing and obviously I hope something comes forward that we can all benefit from in the region.

PUBLIC COMMENT: Brendan O'Donnell, Charge Point, commented since there were no written materials available, is there any information on the LACI proposal itself specifically with regard to the infrastructure that was selected for the 150-kilowatt chargers? Mr. Gorski replied, the answer is yes, and with the concurrence of the MSRC we can make the written materials that we have received from LACI available to the public. Mr. McCallon commented, there is no reason that they should not be made available to the public.

MSRC Member Ben Benoit commented, the proposal has two locations, are they both publicly accessible? Or would they be accessible to the other fleets that operate in that area, so there is not just one operator that is getting use to this but multiple operators? Mr. Gorski replied, during the deliberations and discussions with LACI, we did address the

potential for future public accessibility. While initially the access would probably be only for the anchor fleet, there was definitely an offer to allow other fleets to utilize that infrastructure in the near future. I think it is one of those situations in which once it was installed, they would want to allow their own fleet to use it for a while and then based upon the results of their charging duty cycle, they would allow other fleets to utilize it when it was available. There is also the potential to have additional chargers installed at those locations, which would further the public accessibility element of the project. So, absolutely in all of our discussions we include the question as to how we can make this publicly accessible.

**ACTION:** No further action is required.

### **Agenda Item #18 – Other Business**

MSRC Member Tim Shaw commented, this is my first meeting, I have now officially been appointed by Orange County Transportation Authority to MSRC. I was an alternate for many years to Greg Winterbottom, who you all knew very well, who unfortunately passed away. I am excited to join the MSRC. I am very sad it was under this situation. MSRC Chair Larry McCallon commented, we are excited to have you and we do miss Greg.

### **PUBLIC COMMENT PERIOD**

Harvey Eder commented, this whole process sucks. It is an illegal violation of the Brown Act. There is a lot stuff going on. I wanted to put into Governor's contact on reviewing the Brown Act and all public process removing what is threatening our democracy in a depression. This vector, this virus is climate, and it is hitting us right in the face and you are ignoring it. It is melting of the Arctic a year ago and in National Geographic, your Board will not hear it. It is 19 of the last 20 warmest years on record. And what does Burke say, I was up there 30 years ago it was 98 degrees. It is 100 degrees now plus everything's melting, it is going to natural gas. You are doing what we voted out. We voted out Pickens and his garbage 12 years ago when you bring it up through private deals and this and that. It will not work and it should not work and it is going to be challenged. It is garbage, everything you are doing is garbage. You have to change it. You are not listening Biden. The plans, the Democrat needs to be changed. No methane, that is what is happening with nitrous oxide 300 times. Out of the Arctic, 12 times increase in the last 10 years, that is 144 times in 20 years. This is a crisis. You are not listening. You are depreciating this earth for some fairytale that does not exist. And you are taking away from everybody including me and mine and it will not stand.

### **ADJOURNMENT**

There being no further business, the MSRC meeting adjourned at 3:25 p.m.

**NEXT MEETING**

Thursday, September 17, 2020, at 2:00 p.m.

[Prepared by Penny Shaw Cedillo]

**MOBILE SOURCE AIR POLLUTION REDUCTION REVIEW COMMITTEE  
THURSDAY, SEPTEMBER 17, 2020 MEETING MINUTES**

21865 Copley Drive, Diamond, Bar, CA 91765 - Conference Room CC-8

**All participants attended the meeting remotely pursuant to  
Executive Orders N-25-20 and N-29-20**

**MEMBERS PRESENT:**

(Chair) Larry McCallon, representing San Bernardino County Transportation Authority (SBCTA)  
(Vice-Chair) Brian Berkson, representing Riverside County Transportation Commission (RCTC)  
Ben Benoit, representing South Coast AQMD  
Jack Kitowski, representing California Air Resources Board (CARB)  
Ray Marquez (Alt.), representing Regional Rideshare Agency  
Meghan Sahli-Wells, representing Southern California Association of Governments (SCAG)  
Tim Shaw, representing Orange County Transportation Authority (OCTA)  
Mark Yamarone (Alt.), representing Los Angeles County Metropolitan Transportation Authority (Metro)

**MEMBERS ABSENT:**

John Dutrey, representing Regional Rideshare Agency  
Steve Veres, representing Metro

**MSRC-TAC MEMBERS PRESENT:**

MSRC-TAC Vice Chair Jenny Chan, representing RCTC  
Steven Lee, representing Metro  
Rongsheng Luo, representing SCAG  
Kelly Lynn, representing SBCTA  
AJ Marquez, representing Orange County Board of Supervisors  
Nicole Soto, representing Regional Rideshare Agency  
Derek Winters, representing CARB  
Vicki White, representing South Coast AQMD

**OTHERS PRESENT:**

Mark Abramowitz  
Ruben Aronin, Better World Group  
Lauren Dunlap  
Sam Emmerson, Better World Group  
Lex Frazier  
Lane Garcia, South Coast AQMD  
Alex Houghton

**SOUTH COAST AQMD STAFF & CONTRACTORS**

Leah Alfaro, MSRC Contracts Assistant  
Penny Shaw Cedillo, MSRC Liaison  
Ray Gorski, MSRC Technical Advisor-Contractor  
Daphne Hsu, Senior Deputy District Counsel  
John Kampa, Financial Analyst  
Matt Mackenzie, MSRC Contracts Assistant  
Cynthia Ravenstein, MSRC Contracts Administrator  
Paul Wright, Information Technology Specialist

**CALL TO ORDER**

- Call to Order

MSRC Chair Larry McCallon called the meeting to order at 2:00 p.m.

Roll call was taken at the start of the meeting. The following members and alternates were present: BENOIT, BERKSON, KITOWSKI, MARQUEZ, MCCALLON, SAHLI-WELLS, SHAW, YAMARONE.

- STATUS REPORT

Cynthia Ravenstein, MSRC Contracts Administrator reported there is Charge Ready 2 Program that has been approved by the CPUC. It includes a lot of funding for putting in infrastructure at multi-unit dwellings. The proper siting of infrastructure at multi-unit dwellings was one of the topics of the MSRC's research that we did with the Luskin Center.

**CONSENT CALENDAR (Items 1 through 4)****Informational Only – Receive and Approve Items****Agenda Item #1 – Minutes for the April 16, May 21, and June 18, 2020, MSRC Meetings**

The minutes of the April 16, May 21, and June 18, 2020 MSRC meetings were included in the agenda package.

ON MOTION BY MSRC MEMBER BEN BENOIT, AND SECONDED BY MSRC MEMBER MEGHAN SAHLI-WELLS, UNDER APPROVAL OF CONSENT CALENDAR ITEMS #1 THROUGH #4, THE MSRC UNANIMOUSLY APPROVED THE APRIL 16, MAY 21, AND JUNE 18, 2020 MSRC MEETING MINUTES.

AYES: BENOIT, BERKSON, KITOWSKI, MARQUEZ, MCCALLON, SAHLI-WELLS, SHAW, YAMARONE.

NOES: NONE.

ACTION: Staff will include the April 16, May 21, and June 18, 2020 MSRC meeting minutes in the MSRC Committee Report for the November 6, 2020 South Coast AQMD Board meeting and will upload them to the MSRC's website.

**Agenda Item #2 – Summary of Final Reports by MSRC Contractors**

The MSRC received and approved two final report summaries this month, as follows:

- Penske Truck Leasing Co., L.P., Contract #MS14037, which provided \$75,000 for vehicle maintenance facility modifications; and
- City of Redondo Beach, Contract #MS18120, which provided \$275,000 to install new limited-access CNG infrastructure.

ON MOTION BY MSRC MEMBER BEN BENOIT, AND SECONDED BY MSRC MEMBER MEGHAN SAHLI-WELLS, UNDER APPROVAL OF CONSENT CALENDAR ITEMS #1 THROUGH #4, THE MSRC UNANIMOUSLY APPROVED THE FINAL REPORTS LISTED ABOVE.

AYES: BENOIT, BERKSON, KITOWSKI, MARQUEZ, MCCALLON, SAHLI-WELLS, SHAW, YAMARONE.

NOES: NONE.

**ACTION:** MSRC staff will file the final reports and release any retention on the contracts.

**Informational Only – Receive and File Items****Agenda Item #3 – MSRC Contracts Administrator's Report**

The MSRC AB 2766 Contracts Administrator's Report for July 30 through August 26, 2020 was included in the agenda package.

ON MOTION BY MSRC MEMBER BEN BENOIT, AND SECONDED BY MSRC MEMBER MEGHAN SAHLI-WELLS, UNDER APPROVAL OF CONSENT CALENDAR ITEMS #1 THROUGH #4, THE MSRC UNANIMOUSLY VOTED TO RECEIVE AND FILE THE CONTRACTS ADMINISTRATOR'S REPORT FOR JULY 30 THROUGH AUGUST 26, 2020.

AYES: BENOIT, BERKSON, KITOWSKI, MARQUEZ, MCCALLON, SAHLI-WELLS, SHAW, YAMARONE.

NOES: NONE.

**ACTION:** Staff will include the MSRC Contracts Administrator's Report in the MSRC Committee Report for the November 6, 2020 South Coast AQMD Board meeting.

**Agenda Item #4 – Financial Report on AB 2766 Discretionary Fund**

A financial report on the AB 2766 Discretionary Fund for August 2020 was included in the agenda package.

ON MOTION BY MSRC MEMBER BEN BENOIT, AND SECONDED BY MSRC MEMBER MEGHAN SAHLI-WELLS, UNDER APPROVAL OF CONSENT CALENDAR ITEMS #1 THROUGH #4, THE MSRC UNANIMOUSLY VOTED TO RECEIVE AND FILE THE FINANCIAL REPORT FOR THE PERIOD ENDING AUGUST 2020.

AYES: BENOIT, BERKSON, KITOWSKI, MARQUEZ, MCCALLON, SAHLI-WELLS, SHAW, YAMARONE.

NOES: NONE.

**ACTION:** No further action is required.

**For Approval – As Recommended****Agenda Item #5 – Adopt Proclamation Celebrating California Clean Air Day**

Rubin Aronin, Better World Group Advisors, reported we are excited to have drafted a proclamation for the MSRC to officially celebrate California Clean Air Day, which will be on October 7<sup>th</sup>. We also took the opportunity to recognize that the MSRC is in its 30<sup>th</sup> year of investing nearly \$500 million of funding into our region over the past three decades. With your adoption of the proclamation it will be able to help spread the word about Clean Air Day through the website, eNews and social media properties that we help manage for the MSRC. I would urge all of you to independently share the information about [cleanairstay.org](http://cleanairstay.org). in a way that public and private sector entities can help spread the word and help have individual corporate and public efforts that will make our air healthier and safer.

MSRC Member Meghan Sahli-Wells commented, our city just did a resolution celebrating Clean Air Day. I am hoping and encouraging everybody else with either their councils or agencies to do the same, especially right now.

ON MOTION BY MSRC MEMBER MEGHAN SAHLI-WELLS, AND SECONDED BY MSRC MEMBER BEN BENOIT, MSRC UNANIMOUSLY VOTED TO APPROVE THE ADOPTION OF A PROCLAMATION CELEBRATING CALIFORNIA CLEAN AIR DAY

AYES: BENOIT, BERKSON, KITOWSKI, MARQUEZ, MCCALLON, SAHLI-WELLS, SHAW, YAMARONE.

NOES: NONE.

**ACTION:** No further action is required.

### **FYs 2018-21 WORK PROGRAM**

#### **Agenda Item #6 – Consider Proposed Outreach Strategy Developed as Part of Programmatic Outreach Services under Contract #MS21002**

Rubin Aronin, Better World Group Advisors, reported the Better World Group has been pleased to serve as the MSRCs outreach coordinator and policy advisor since 2004. At the beginning of each contract period, we create a strategic document to give us a road map for new activities and to reconsider and re-evaluate the ongoing activities that we do on behalf of the MSRC to spread the message of the good work that the MSRC does to stakeholders and to be a support network to policymakers and stakeholders as well. Our work has involved both stakeholder media outreach as well as some deep dive policy analysis work at the state and regional level. We had the unique challenge of developing a new communication strategy around the goods movement focus. We also have layered and considered the world that we are in, both a health crisis, the continued climate and wildfire crisis that has come to the fore, as well as the prominence of racial justice issues in this year. We presented the outline and initial report to the MSRC-TAC subcommittee who gave some helpful advice and direction.

Top goals that haven't changed too much include increasing the profile of the MSRC and its programs to all of our key stakeholder constituencies throughout the region, as well as with policymakers statewide to strengthen the relationships with other funding partners, so that the MSRC's investments can be leveraged further and new opportunities can be discovered. Other goals are to increase the quality, quantity and diversity of applicants and project investments when there are work programs to be promoting, and to provide communication support capacity to project partners and to ensure that the role that the MSRC and Clean Transportation Funding has played is included prominently in announcements and opportunities. And then as we have been doing since last year, we have the goal to assist with the strategic direction and analysis for the goods movement focus of the current work. Our target audiences are current and prospective project partners. We are broadening and thinking through where goods movement opportunities are and broadening our stakeholders as a result. State, regional, and local policy makers, Clean Transportation stakeholders, as well as impacted frontline communities that are currently or would potentially benefit from MSRC investment or collaborative investment opportunities are also targets. The MSRC-TAC Subcommittee encouraged us to create a more robust group of community-based organizations based on work that we do with many other clients and partners. We have robust and growing relationships with environmental justice and other community organizations, and they encouraged us to ensure that we are reaching out and communicating effectively to those audiences.

We have developed and optimized for any particular message that we're delivering, but some top-line key messaging is that we want to make sure the MSRC is known for playing a critical role in funding investments that move the region towards cleaner air. This includes the information that clean air is important to protecting public health, and of course, that is even more paramount in our current health and climate and fire crisis. We want to really lean into our 30<sup>th</sup> year and celebrating the track record, history, and leadership the MSRC and all of you have contributed through the investments that the MSRC has been making into our region, highlighting the critical role of the public funding that the MSRC has at a time when other funding sources are seeing diminished investment opportunities. We also want to make sure that we are helping the MSRC explore and pursue bold innovative programs that can have substantial and long-lasting impact on air quality. So, we continue to shine a light on previous investments, as well as future opportunities. In the goods movement frame, we really want to take advantage of the economic and health benefits that those investments will bring about. Lastly, we continue to hear that the MSRC is one of the most effective funders for having a simple and streamlined and accessible approach for all of its funding opportunities. With regards to our outreach and promotion, one of the core day-to-day elements that my colleague Sam Emerson leads, and our new communications strategist Lys Mendez will help with, is providing current project partners with assistance. We can do soup to nuts in helping with a press event, or we can just ensure that they got a solid press release with a quote from someone from the MSRC. And we want to make sure that they fulfill their requirement for promoting Clean Transportation Funding and have an effective outreach strategy for the community and for the media as well. An idea was to update the public outreach requirement flyer to include the idea that we want to look into more digital opportunities to promote the MSRC's role and the funding opportunity. We will continue to promote the MSRC through news, reports, releases, and targeted reporter outreach. In fact, just today we collaborated with SCAG to announce the new \$10 million program that you all approved at your last meeting. This is more for reporter education and outreach, but we wanted to establish the partnership with SCAG. For example, Tony Barboza at the LA Times already got back to me saying thanks so much for the heads up, let me know when the program is ready to roll so that we can seed interest from local reporters to get coverage when that program is ready to solicit partnerships. We will also continue our work of updating the website with news of the month and populating and growing the constituency and of social media followers on Facebook and Twitter.

You all should be receiving the quarterly e-Newsletter, the Clean Air Roadmap. There will be another one coming to your inbox next week. That is where we can share recent successes of project partners, as well as announcements of new members and other critical related issues. In the old pre-COVID days, we were happy to offer additional staff capacity to represent the MSRC at physical events. Now that is done in more of a virtual fashion, but we offer some opportunities both promotionally or to be a representative at appropriate meetings or events that the MSRC should be at. With regards to our targeted outreach, we are looking to expand our community-based organization (CBO) outreach list, and perhaps even consider with staff and the MSRC, whether there is an opportunity

for special briefings with CBOs. Perhaps these could be much as we used to do workshops every other year for new project solicitations. This could be an opportunity to build some connective tissue with CBOs and the MSRC's Goods Movement program as it develops. Then we will continue to develop, review, and assist with all of the necessary tools of creating and distributing information about current and new MSRC-funded projects and helping to prep and do media engagement or prep for speaking engagement opportunities. We are pleased to provide almost every month a good snapshot of the legislative and regulatory advancements relevant to the MSRC world. We appreciate any feedback that you all might have, but we are glad that that's a useful tool in the real-time deliberations that you have to know where other state agencies and activities could impact our space. With regards to new activities, we are excited to begin developing some collateral for the website and other places around the new Work Program and Goods Movement announcements as that comes to pass. We will look at revisiting and refreshing a digital MSRC brochure, if it is of interest to you or the MSRC-TAC members to have background at a glance that is not already on the website. We provide information on conferences, meetings, and other opportunities for the MSRC to have a presence that could be useful with regards to current or future project investments. We are ready to provide additional capacity to staff.

The document that you have is truly a living document and of course no one could know what the next month, let alone the next three years will look like as both your Work Program and the environment in which we operate continue to evolve. We will update the document. We will be providing quarterly updates of activities to the MSRC-TAC around our communications and outreach efforts. We would love your input and feedback on how we can ensure that funding allies, prospective project partners, and your professional networks know about the important role that the MSRC plays in the ecosystem of clean transportation funding here in Southern California.

MSRC Member Jack Kitowski commented, you mentioned increasing the quality, quantity and diversity of applications and investments. That is an area that we at CARB have been focusing on a lot especially over the last couple of years. It takes a lot of effort, a lot of work, especially in these times. We found the best way is to actually go out to communities and talk to people and that is completely out of the question now. It certainly is a worthwhile area and more attention should be paid to that, but I am interested if you could probe just a step deeper of how you do this, how are you trying to get the smallest of fleets in the disadvantaged communities and all of those aware and involved especially in these times? Mr. Aronin replied, we are inventing and learning as we all are in this time and age. Every outreach effort or strategy is developed once there is a Work Program. So, taking the SCAG collaborative project as an example, for the Last Mile piece of it, once there is some more definition on that program, that will help us create the universe of target ideal applicant pools for us to be able to then work with the various inroads to those communities and applicants that we want to reach. I loved the summer workshops that we did years ago because it was outside of the immediacy of you have get a proposal in the pipeline. We could just kind of solicit blue sky ideas and out of

that we got a robust list of both policymakers and some community stakeholders that we stayed in touch with. And every time there was a new RFP out, we were like, hey make sure you see this. Given that we have been in this pause, as the Goods Movement Program has been in process of being developed, we are at the front edge of wanting to begin to engage with the community organizations that we work with. With regards to the fleets' side of it, we have not even gotten into that side of the equation. And we would love to pick your brain, and those of your colleagues at CARB, but we will be working with all of the MSRC's traditional stakeholders. Whether it is constituencies, like GNA that does a lot of work on this through ACT Expo, both nationally but also with a lot of local partners, to look under every relationship that we have. I think that is what it is, it is about leaning on the relationship networks and asking them for five or ten key targets to broaden it. I am especially excited because this is a heavy-duty program that we are looking at now, to have a relevant reason to go to some of the CBOs. Some of them are really wanting to see outcome projects and build partnerships with some of the networks that they have. Mr. Kitowski commented, I know it is a lot of work and it sounds like you recognize it. I certainly feel it is worthwhile and encourage you to keep that up. Mr. Aronin replied, I think there is no more important role that we can play. I appreciate the visibility we can get out of the Dodgers Express or any other opportunity to wave the flag and raise visibility of the MSRC. The real reason the Better World Group can be helpful is making sure that your funding goes to the highest possible outcomes and that folks know that it is available.

MSRC Member Meghan Sahli-Wells commented, not every city is very well resourced, especially now. And so, I just wonder if we have scanned through different cities and agencies and seen which ones have not been able to get grants and have not been served? Culver City has been very proactive and it's very successful frankly and getting a lot of these grants, but I know that a lot of the cities who might need it even more than us, just simply don't have the staff resources and capacity to apply and be competitive in these grants. Through SCAG we do a lot of technical assistance and try to do a lot of handholding, but I am just wondering if we've ever kind of made the comparison and see which cities and agencies are missing from these grants? And which ones maybe that will help us reach out to them and see what is the missing link and how can we make sure that they and their constituents are being served as well, equitably? Mr. Aronin responded, my colleague Sam Emmerson would be able to talk about what we've done with the Local Government Match Program in the past, where we've done a real intentional effort to reach out to cities that hadn't been responding because that was like guaranteed money on the table. I also want to say that past is not necessarily prologue and we would want to especially target cities or other public agencies that would be eligible right for the new pots of dollars that the MSRC is allocating. So, I don't think that it's trying to capture every underrepresented city or community that may or may not have capacity, because we're going to have more targeted investment strategies that we've had in the past. Sam Emmerson, Better World Group, commented, in the last round of the Local Government Partnership Program, MSRC staff did an analysis of those that took advantage of the funding, those that did not take advantage of the funding, and then those who were just

not responsive. We do have some data that is recent. Cynthia Ravenstein, MSRC Contracts Administrator, commented, about 75% of the eligible participants did end up participating in that program and we made exhaustive efforts to reach out. It was not for lack of knowledge certainly. As the Better World Group alluded to, MSRC is typically among the very easiest application processes that are out there. I cannot speak for all of them, but I would say for the majority, if they did not apply, it was that they really just did not feel like what was being funded was something that they were interested in. There may be a few exceptions there, in that case, we just pulled out all the stops and tried to get everybody to come to the table.

ON MOTION BY MSRC MEMBER TIM SHAW, AND SECONDED BY MSRC MEMBER MEGHAN SAHLI-WELLS, MSRC UNANIMOUSLY VOTED TO APPROVE THE PROPOSED OUTREACH STRATEGY DEVELOPED BY THE BETTER WORLD GROUP AS PART OF PROGRAMMATIC OUTREACH SERVICES PERFORMED UNDER CONTRACT #MS21002.

AYES: BENOIT, BERKSON, KITOWSKI, MARQUEZ, MCCALLON, SAHLI-WELLS, SHAW, YAMARONE.

NOES: NONE.

**ACTION:** No further action is required.

**Agenda Item #7 – Receive Update on MSRC’s Regional Goods Movement Program and Consider Recommendations Concerning Pre-Proposals Submitted in Response to Program Opportunity Notice for Warehouse & Distribution Facilities in Riverside & San Bernardino Counties (Inland Ports PON)**

Ray Gorski, MSRC Technical Advisor, reported that the South Coast AQMD has provided authorization for me to discuss that we anticipate that within the next month or so that the South Coast District will approach the MSRC and request your participation in a regional partnership to secure substantial funding from the state air regulatory agencies: CARB and the California Energy Commission (CEC).

The MSRC’s Goods Movement Program originally emphasized four subcategories. One was Near-Zero and Zero Emission Trucks, which was really targeting the smaller owner/operators and trying to provide them with incentives to allow them to get rid of their diesel trucks and get into, at a minimum, a near-zero emission truck. Currently to date, the MSRC has approved two programs under this subcategory. These are both partnership programs with the South Coast AQMD and both of these programs leverage additional monies that are made available by local, state and federal agencies including the South Coast AQMD, CARB and money that comes from the federal government under the DERA Program, so the funding is well leveraged. Both programs emphasize the independent owner/operators, per instruction that had been provided to the MSRC-

TAC and staff while this was being formulated. To date the MSRC has invested \$4 million in the Market Acceleration Program, a collaborative effort between the South Coast AQMD and Clean Energy. Then there is the Voucher Incentive Program Plus Up which is a \$5 million MSRC investment. This is particularly targeting the smaller owner/operator, someone who owns one truck, to provide them necessary capital to upgrade to a cleaner truck. These programs have both recently been launched, so at this point in time we do not have a lot of results to report. We are working closely with the South Coast AQMD to monitor progress in both of these programs. It is our intention to bring back to the MSRC, no later than your January 2021 meeting, a report on exactly what the uptake of these two programs has been. If it is going along very well, we will be happy to report that. However, if we believe there needs to be a mid-course correction, we will also work with your MSRC-TAC and provide guidance as to opportunities or options to make the program work even better.

The second subcategory is the Last Mile Goods Movement element. This is being implemented through a partnership with SCAG, and it has two specific allocations. The first allocation of \$10 million was approved by the MSRC last month and that is targeting near-term quantifiable air quality benefits which will be derived through mostly technology advancement--that is, transitioning the Last Mile vehicles into zero and near-zero emission technology. There will also, however, be a Phase II \$5 million allocation which is pending approval. This will look at more innovative strategies. The focus was to ensure that this investment of up to \$15 million was going to yield cost-effective tangible air quality benefits. So that is why there is a phased approach with Phase I to really get the vehicles on the road as soon as possible. Once we have achieved that, Phase II is going to look at the next layer and see what innovative strategies can be implemented that can be applied to the Last Mile component of Goods Movement. We are hopeful that some of the folks that participated in Phase I will be willing to partner with the MSRC in Phase II to attempt some of these more innovative strategies. We are in the contract formation stage with SCAG at this time. SCAG is in the process of completing their program guideline documentation. All of this will be brought back to the MSRC on a regular basis for your review and approval.

The Inland Ports subcategory has a funding allocation of \$20 million. Late last year, the MSRC did release a Program Opportunity Notice (PON) which resulted in 11 excellent responses. However, we are starting to see the potential ramifications of COVID-19. There is going to be a recommendation to take the next step through the issuance of specific Requests for Proposals (RFPs).

The Maritime Ports, the last subcategory of the MSRC's Goods Movement work, is directly tied to the South Coast AQMD-led regional effort.

Coming back to the Inland ports, this is targeting specifically the warehouse distribution, logistics, and intermodal facilities which are out in San Bernardino and Riverside counties. This is where at least half of the containerized goods that come in through the

maritime ports end up. There was a \$20 million funding allocation for the PON. The MSRC-TAC went through a very diligent review of all the projects submitted in response to the PON, however, they noted that the situation had changed substantially over the last couple of months. We still have a lot of enthusiasm for this but there have been some substantive changes which are going to influence the next step in the process.

The MSRC does retain the authorization to act on any of those PON responses should you choose to, however through the MSRC-TAC evaluation process, it was noted that the majority of the proposals that were received seek funding to implement zero and near-zero emission container drayage between the Maritime Ports and the Inland Ports--the warehouse distribution centers. It was felt by the members of the evaluation subcommittee that to differentiate between those multiple programs or projects, which were really asking to do pretty much the same thing, it would be very helpful to allow us to do a better more thorough analysis if we had additional detail, especially as it pertains to costs. The reason is that many of these proposals that were received had offered as their co-funding money through the state air regulatory agencies, which right now has a high degree of uncertainty. The PON responses were provided right around the March timeframe, and we were just going into the COVID situation. Funding which would have been available any other year now has been called into question--specifically money such as the HVIP funding, which would offer a substantial buydown increment for the near-zero and zero emission trucks which would implement these projects. That money we are hopeful will be back, but at this point in time, we cannot rely upon it. For that reason, instead of relying upon the information that was received under the PON, we are recommending that the MSRC move forward with an RFP. This RFP would allow the respondents to the PON either to reaffirm their original commitment to the MSRC, or if necessary and probably likely, they could alter their proposals to reflect today's fiscal environment. The subcommittee doing the evaluation wanted to recognize that the MSRC's original intent for the Inland Ports was to have those emission reductions, to the extent feasible, occur within San Bernardino/Riverside counties. They are therefore recommending a second RFP be developed, which would seek proposals for zero and near-zero emission cargo handling equipment and supporting infrastructure, which would be deployed directly at the warehouses, the logistics centers, and intermodal facilities located in Riverside and San Bernardino counties. There is a desire to ensure that emission reductions occur within the region where the containerized goods end up. Should the MSRC choose to authorize the development of these RFPs, it is the intent of your MSRC-TAC to have these back to you next month for your review and potential approval.

With respect to the last element of your Goods Movement Work Program, the South Coast District is developing and leading a regional partnership to secure funding from CARB and the CEC. CARB and the CEC will soon release an RFP that is going to offer approximately \$40 million to conduct a large-scale demonstration of zero emission drayage trucks. This is probably going to be the largest demonstration which has ever taken place for zero emission trucks anywhere. CARB is going to focus on the trucks,

CEC on the infrastructure. South Coast AQMD is bringing together a team to lead the region to secure this funding. To date the partners which are going to work with the South Coast AQMD and bring resources to the table include the Ports of Long Beach, Los Angeles and Port Hueneme because some of these goods are going to be transferred through Ventura. The team also has Los Angeles Metro, SCAG, the Gateway Cities Council of Governments, LACI, and Caltrans. This team is not only focusing on the \$40 million that will initially come from the CARB and CEC, this team is put together for the long haul to secure funding from whatever source will be made available and to work collaboratively to bring the South Coast AQMD to the extent feasible into zero-emission goods movement as soon as possible. The MSRC is going to be asked formally, probably as soon as October, to join this team and to make a co-funding contribution to leverage the state agency funding as well as the participating stakeholder contributions that will be brought to the table. There is no action required today. This was simply laying the groundwork for an action. The South Coast AQMD did not approach the MSRC at the last minute. The MSRC through staff and the MSRC-TAC has had a seat at the table now for about a half a year, always being invited to strategy meetings discussions.

ON MOTION BY MSRC MEMBER BEN BENOIT, AND SECONDED BY MSRC VICE CHAIR BRIAN BERKSON, MSRC UNANIMOUSLY VOTED TO APPROVE THE DEVELOPMENT OF ONE REQUEST FOR PROPOSALS (RFP) FOR ON-ROAD PROJECTS AND A SECOND RFP FOR OFF-ROAD PROJECTS, CONSISTENT WITH THE PROVISIONS OF THE ORIGINAL PON.

AYES: BENOIT, BERKSON, KITOWSKI, MARQUEZ, MCCALLON, SAHLI-WELLS, SHAW, YAMARONE.

NOES: NONE.

MSRC Chair Larry McCallon asked since LACI is included, does that take care of their thing that they brought forward to us separately? Mr. Gorski replied, right now the work that these stakeholders are doing is to identify roles and responsibilities. It has already been discussed that LACI has an interest and the ability to support the development of infrastructure and we are going to take that to the next step. We will keep the MSRC informed. Right now, the good news is that the MSRC, LACI, the South Coast AQMD and all the other partners are working collaboratively. Once we define the final roles and responsibilities, there will be knowledge as to what LACI's role will be and any potential direct involvement with the MSRC.

**ACTION:** The MSRC-TAC will develop the draft RFPs and bring them back to the MSRC for consideration.

**Agenda Item #8 – Other Business**

MSRC Member Meghan Sahli-Wells introduced her alternate, Council Member Jed Leano from the City of Claremont and the alternate for representing SCAG. MSRC Alternate Jed Leano commented, thank you to the committee members for the opportunity to join today. I understand that SCAG is very adequately represented by our principal delegate, but I wanted to, for the first several meetings at least, be in attendance to get a feel for the issues and the flow of these items and I look forward to working with all of you. MSRC Member Meghan Sahli-Wells commented that she is terming out of office in December and will be leaving this position as well.

MSRC Chair Larry McCallon announced the retirement of MSRC Member Jack Kitowski, stated that the MSRC is sorry to lose him, that he will be missed and was a valuable member. MSRC Member Jack Kitowski commented, how great it has been to work with Larry McCallon as the Chair and the MSRC staff. This is a very worthwhile activity that we are engaged in here and lots of exciting things are happening and I sort of regret that just now as the zero emission technologies are really taking off. We have now got more than 100 models on the heavy-duty sector, that I am not going to see the fruition come through this Committee.

MSRC Member Meghan Sahli-Wells commented, another issue that I wanted to raise especially with this Committee in particular given the mobile source pollution reduction mission, is that now during COVID with all of our online meetings we are experiencing a rapid reduction in emissions. Diamond Bar is very far. I in fact never attended meetings there because I did not want to cause the emissions by going there. I would go to the remote location that I could access by Metro. It necessitated a change of the Brown Act in order to allow us to meet remotely. As we are putting our full efforts into ensuring that we are closing the digital divide and making sure that there's ample access including by telephone, which is what we are doing right now under these COVID conditions, I would like to ask staff and the committee to maybe consider drafting a letter to the Governor, to the effect that we might consider an alternative, kind of a more permanent change to the Brown Act that would allow us to have public access and compliance but without creating the emissions from the commutes. MSRC Chair Larry McCallon asked, would such a letter be appropriate going to the Governor or the legislature since they make the law? Ms. Sahli-Wells commented, I would leave that to staff to figure that out. MSRC Member Ben Benoit commented, I would be happy to ask we add that to the agenda for the next meeting and I will second that motion or thought. I believe that South Coast AQMD might make the same opportunity or at least some conscious effort to open up the Brown Act and to take a look at it. Everyone else in the corporate world is doing the same thing with all their boards and policies. I strongly feel just like you do that there's lots of good reasons for those members that want to work from home or can't make it to the meeting or for the members of the public that don't want to create those emissions or physically can't get to the meetings. I think regularly of my sister Sarah, who is in a wheelchair and cannot get down to the City of San Bernardino City Council meetings but

would love to attend and do that remotely. There's opportunity there and I will be pushing for that as well at the South AQMD side.

### **PUBLIC COMMENT PERIOD**

Public comments were allowed during the discussion of each agenda item. No comments were made on non-agenda items.

### **ADJOURNMENT**

There being no further business, the MSRC meeting adjourned at 3:00 p.m.

### **NEXT MEETING**

Thursday, October 15, 2020, at 2:00 p.m.

## 2021 MEETING SCHEDULE

### TAC Meeting Dates

Thursday, January 14  
(second Thursday)

Thursday, February 4

Thursday, March 4

Thursday, April 1

Thursday, May 6

Thursday, June 3

Thursday, August 5

Thursday, September 2

Thursday, October 7

Thursday, November 4

Thursday, December 9  
(second Thursday)

### MSRC Meeting Dates

Thursday, January 21

Thursday, February 18

Thursday, March 18

Thursday, April 15

Thursday, May 20

Thursday, June 17

Thursday, August 19

Thursday, September 16

Thursday, October 21

Thursday, November 18

Thursday, December 16

All regularly scheduled MSRC-TAC meetings are held on the first Thursday of every month at 1:30 p.m. in Conference Room CC8, unless otherwise noted. All regularly scheduled MSRC meetings are held on the third Thursday of every month at 2:00 p.m. in Board Conference Room CC8, unless otherwise noted.

Meeting agendas can be viewed on the MSRC's website at <http://www.cleantransportationfunding.org>.

#### MSRC Agenda Item No. 4

**DATE:** November 19, 2020

**FROM:** Cynthia Ravenstein

**SUBJECT:** AB 2766 Contracts Administrator's Report

**SYNOPSIS:** This report covers key issues addressed by MSRC staff, status of open contracts, and administrative scope changes from September 24 to October 28, 2020.

**RECOMMENDATION:** Receive and file report

**WORK PROGRAM IMPACT:** None

#### **Contract Execution Status**

##### **2016-18 Work Program**

On July 8, 2016, the SCAQMD Governing Board approved an award under the Event Center Transportation Program. This contract is executed.

On October 7, 2016, the SCAQMD Governing Board approved three awards under the Event Center Transportation Program and one award for a Regional Active Transportation Partnership Program. These contracts are executed.

On January 6, 2017, the SCAQMD Governing Board approved an award for development, hosting and maintenance of a new MSRC website. This contract is executed.

On April 7, 2017, the SCAQMD Governing Board approved an award under the Event Center Transportation Program. This contract is executed.

On June 2, 2017, the SCAQMD Governing Board approved an award under the Event Center Transportation Program. This contract is executed.

On July 7, 2017, the SCAQMD Governing Board approved an award under the Event Center Transportation Program. This contract is executed.

On September 1, 2017, the SCAQMD Governing Board approved one award under the Event Center Transportation Program and one award under the Natural Gas Infrastructure Program. These contracts are executed.

On October 6, 2017, the SCAQMD Governing Board approved two awards under the Event Center Transportation Program and one award under the Natural Gas Infrastructure Program. These contracts are executed.

On December 1, 2017, the SCAQMD Governing Board approved sole source awards for a Hydrogen Infrastructure Partnership Program, for a Southern California Future Communities Partnership Program, and for electric vehicle charging infrastructure planning analysis. These contracts are executed. The MSRC has replaced the award to the California Energy Commission with a Program Opportunity Notice for the Hydrogen Infrastructure Partnership Program.

On February 2, 2018, the SCAQMD Governing Board approved one award under the Event Center Transportation Program, two awards under the Natural Gas Infrastructure Program, four awards under the Local Government Partnership Program, and two awards under the County Transportation Commission Partnership Program. These contracts are executed.

On March 2, 2018, the SCAQMD Governing Board approved one award under the Major Event Center Transportation Program, two awards under the Natural Gas Infrastructure Program, and one award under the Local Government Partnership Program. These contracts are executed.

On April 6, 2018, the SCAQMD Governing Board approved one award under the Natural Gas Infrastructure Program and eight awards under the Local Government Partnership Program. These contracts are executed.

On May 4, 2018, the SCAQMD Governing Board approved twenty-seven awards under the Local Government Partnership Program and one award under the County Transportation Commission Partnership Program. These contracts are executed.

On June 1, 2018, the SCAQMD Governing Board approved six awards under the Local Government Partnership Program, one award under the Natural Gas Infrastructure Program, and one award under the County Transportation Commission Partnership Program. These contracts are executed.

On July 6, 2018, the SCAQMD Governing Board approved nine awards under the Local Government Partnership Program. These contracts are executed.

On September 7, 2018, the SCAQMD Governing Board approved nineteen awards under the Local Government Partnership Program, three awards under the County Transportation Commission Partnership Program, one award under the Major Event Center Transportation Program, and twenty awards under the Natural Gas Infrastructure Program. These contracts are with the prospective contractor for signature, with the South Coast AQMD Board Chair for signature, or executed.

On October 5, 2018, the SCAQMD Governing Board approved forty-eight awards under the Local Government Partnership Program and one award under the Hydrogen Infrastructure Program. These contracts are with the prospective contractor for signature or executed.

On November 2, 2018, the SCAQMD Governing Board approved two awards under the Local Government Partnership Program. These contracts are executed.

### **2018-21 Work Program**

On April 5, 2019, the SCAQMD Governing Board approved an award under the Major Event Center Transportation Program. This contract is executed.

On September 6, 2019, the SCAQMD Governing Board approved an award under the Major Event Center Transportation Program. This contract is executed.

On December 6, 2019, the SCAQMD Governing Board approved an award under the Major Event Center Transportation Program. This contract is undergoing internal review.

### **Work Program Status**

Contract Status Reports for work program years with open and/or pending contracts are attached.

#### ***FY 2010-11 Work Program Contracts***

One contract from this work program year is open; and 7 are in “Open/Complete” status.

#### ***FY 2010-11 Invoices Paid***

No invoices were paid during this period.

#### ***FY 2011-12 Work Program Contracts***

6 contracts from this work program year are open, and 13 are in “Open/Complete” status.

#### ***FY 2011-12 Invoices Paid***

No invoices were paid during this period.

#### ***FYs 2012-14 Work Program Contracts***

16 contracts from this work program year are open, and 31 are in “Open/Complete” status. One contract closed during this period: Arcadia Unified School District, Contract #MS14052 – Expand CNG Station.

#### ***FYs 2012-14 Invoices Paid***

One invoice in the amount of \$490,000.00 was paid during this period.

#### ***FYs 2014-16 Work Program Contracts***

39 contracts from this work program year are open, and 31 are in “Open/Complete” status. One contract closed during this period: City of Riverside, Contract #ML16034 – Implement “Complete Streets” Pedestrian Project.

#### ***FYs 2014-16 Invoices Paid***

One invoice in the amount of \$20,304.52 was paid during this period.

#### ***FYs 2016-18 Work Program Contracts***

115 contracts from this work program year are open, and 31 are in “Open/Complete” status. One contract moved into “Open/Complete” status during this period: City of Redondo Beach, Contract #MS18120 – Install New Limited Access CNG Infrastructure.

14 invoices totaling \$1,014,260,06 were paid during this period.

***FYs 2018-21 Work Program Contracts***

3 contracts from this work program year are open.

No invoices were paid during this period.

***Administrative Scope Changes***

One administrative scope change was initiated during the period from September 24 to October 28, 2020:

- City of South El Monte, Contract #ML18084 (Install EV Charging Stations) – One-year term extension

***Attachments***

- FY 2007-08 through FYs 2018-21 (except FY 2009-10) Contract Status Reports

## AB2766 Discretionary Fund Program Invoices

September 24 to October 28, 2020

Contract Admin.	MSRC Chair	MSRC Liaison	Finance	Contract #	Contractor	Invoice #	Amount

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 26

REPORT: California Air Resources Board Monthly Meeting

SYNOPSIS: The California Air Resources Board held a meeting on November 19, 2020. The following is a summary of the meeting.

RECOMMENDED ACTION:  
Receive and file.

Judith Mitchell, Member  
South Coast AQMD Governing Board

FT

---

The California Air Resources Board (CARB or Board) held a meeting remotely on November 19, 2020 via a web-based videoconferencing service. Key items presented are summarized below.

### **DISCUSSION ITEMS**

#### **20-12-7: Public Meeting to Consider a Proposed Portola PM2.5 Plan Contingency Measure State Implementation Plan Submittal**

The Board adopted the Portola PM2.5 Plan Contingency Measure State Implementation Plan (Contingency SIP). The Contingency SIP was developed in response to U.S. EPA's deferment of action on the contingency measure element of the Portola PM2.5 Attainment Plan submitted to U.S. EPA on February 28, 2017. To address U.S. EPA's concerns leading to the deferment, this Contingency SIP includes a contingency measure specifying new actions the District and City of Portola will take to reduce particulate matter pollution from residential wood heating if contingency measures are triggered. The Contingency SIP will be submitted to U.S. EPA for inclusion in the California SIP.

**20-12-1: Public Meeting to Consider Proposed San Diego 8-Hour Ozone Plan State Implementation Plan Submittal**

The Board adopted the *2020 Plan for Attaining the National Ambient Air Quality Standards for Ozone in San Diego County* (Plan) developed by the San Diego County Air Pollution Control District (District). The Plan addresses two federal 8-hour ozone standards, the 75 parts per billion (ppb) and the 70 ppb standards, and represents the next building block in planning efforts to meet increasingly health-protective air quality standards. CARB staff has reviewed the Plan and has concluded that the Plan demonstrates attainment of the ozone standards and meets the applicable Clean Air Act requirements. The Plan will be submitted to U.S. EPA as a revision to the California SIP.

**20-12-2/ Public Hearing to Consider Amendments to the Emission Inventory  
20-12-3: Criteria and Guidelines Report for the Air Toxics “Hot Spots”  
Program and the Regulation for the Reporting of Criteria Air  
Pollutants and Toxic Air Contaminants**

The Board adopted amendments to the Emission Inventory Criteria and Guidelines Report for the Air Toxics “Hot Spots” Program (EICG) and the Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants (CTR). The EICG and CTR are two related regulations that strengthen emission inventory reporting requirements for facilities in California. The EICG amendments reflect significant advances in the understanding of the toxic health risk posed by many chemicals, for example, the latest scientific evidence showing that early-life exposures to air toxics contribute to increased risk in developing cancer or other adverse health effects. These amendments expand the list of chemicals that must be reported, extend applicability to additional industrial and commercial sectors, require additional source testing, modify reporting requirements for diesel engines, and strengthen provisions recognizing health and risk assessment methods.

The CTR requires the owners or operators of specified facilities to report emissions of criteria air pollutants and toxic air contaminants on an annual basis. The CTR amendments would expand the applicability requirements to increase the number and types of facilities subject to annual emissions data reporting. The Board approved 15-day changes to the amendments to streamline reporting and ensure a successful launch of the comprehensive reporting requirements. The amendments to EICG and CTR will provide a better understanding of community toxic exposures, enhanced public access to information on toxic pollutant emissions, and reduced impacts on public health by ensuring that many new and emerging chemicals of concern are reported.

**20-12-4: Public Meeting to Hear an Update on Indoor Air Quality: Successes, Continuing Concerns, and Challenges**

The Board heard an update on indoor air quality (IAQ) and CARB programs to reduce indoor air pollution and passed a resolution supporting the CARB IAQ Program and directing CARB staff to update the IAQ guidelines to align with the latest scientific evidence on exposure to indoor pollutants. CARB staff discussed health concerns from indoor pollution and ongoing CARB programs to reduce emissions from specific indoor sources such as composite wood furniture. In addition, CARB staff discussed future areas of research including indoor emissions from gas appliances, the benefits of building electrification, and inequity for people living in disadvantaged communities that are disproportionately exposed to elevated levels of indoor air pollution.

**20-12-5: Public Meeting to Hear an Informational Update on California's Greenhouse Gas Goals and Deep Decarbonization**

The Board heard an information update with key findings for achieving statewide carbon neutrality by 2045 based on modeling, public engagement, and ongoing interagency collaboration. California achieved the Assembly Bill 32 goal of reaching 1990 levels of greenhouse gas emissions (GHG) by 2020, four years ahead of schedule, and is following the path established through the 2017 Scoping Plan update to achieve a reduction of 40 percent below 1990 levels by 2030, pursuant to Senate Bill 32. In early 2019, in response to Board direction, CARB staff began a two-year public process on exploring potential paths to carbon neutrality, commissioned economy-wide modeling to explore technological options to achieve deep decarbonization, and engaged with other State agencies on complimentary efforts to reduce emissions in the energy and transportation sectors by 2045. These efforts show that achieving carbon neutrality will require rapid transformation in the supply and use of energy and increased reliance on our natural and working lands as carbon sinks, in addition to other carbon dioxide removal technologies. During this public process, it became clear that the next decade is critical for the rapid transformation in clean fuels and technology to achieve the 2045 goal and avoid the worst impacts of climate change. These findings will serve as a starting point for developing the 2022 Scoping Plan, which will begin in early 2021.

**20-12-6: Public Meeting to Hear the 2020 Legislative Update**

The Board heard an update on California air quality legislation from the CARB Office of Legislative Affairs. CARB staff discussed air quality and climate change legislation for the second year of the 2019-2020 Legislative Session. Staff analyzed 96 bills that addressed an array of topics, including carbon neutrality, impacts of wildfire smoke, public safety power shutoffs, and the “Jobs and Economic Improvement through the Environmental Leadership Act.” The legislative update also highlighted the effects of COVID-19 on the 2020 legislative year. The legislative priorities during the COVID-19

pandemic have included COVID-19 Pandemic Relief, Wildfires/Wildfire Prevention, Homelessness, Affordable Housing and the effects on the California Budget.

CARB November 19, 2020 Meeting Agenda

## PUBLIC MEETING AGENDA

**Thursday,  
November 19, 2020**

In accordance with Governor Newsom's Executive Orders [N-29-20](#) and [N-33-20](#) as well as recommendations from the California Department of Public Health, the November 19, 2020, Board Meeting will not have a physical location to attend in person. This will be a remote-only meeting.

The Board Meeting will be conducted remotely via a web-based videoconferencing service called Zoom. Members of the public who wish to comment verbally can register for the webinar.

[Register for the Webinar](#) – for those who wish to comment verbally at the hearing.

Alternatively, during the Board Meeting, members of the public can offer verbal comments by calling in via telephone. Members of the public do not have to register beforehand if they call in using the number below.

Phone Number: (669) 900-6833  
Webinar ID: 857 4740 2272

To only watch the Board Meeting and not provide verbal comments, please view the webcast. The webcast is the same video stream offered by CARB during normal Board Meetings. If you do not wish to provide verbal comments, we strongly recommend watching the webcast as this will free up space on the webinar for those who are providing verbal comments.

[Webcast](#) – for those who only plan to observe the hearing.

[How to Participate in the Remote Board Meeting](#)

**Thursday  
November 19, 2020  
9:00 a.m.**

### **DISCUSSION ITEMS:**

**Note:** The following agenda items may be heard in a different order at the Board meeting.

#### **Agenda Item #**

#### **20-12-7: Public Meeting to Consider a Proposed Portola PM2.5 Plan Contingency Measure State Implementation Plan Submittal**

*The California Air Resources Board (CARB or Board) will consider staff's written report of a revision to the Portola PM2.5 Attainment Plan to include contingency measures for attaining air quality standards for fine particulate matters (PM2.5) required under the Clean Air Act. This revision to the State Implementation Plan (SIP) specifies requirements the Northern Sierra Air Quality Management District and City of Portola must implement as a contingency if the area fails to attain or meet reasonable further progress towards attaining the PM2.5 standards. These requirements will reduce PM2.5 emissions while the District develops additional requirements to attain the standards.*

[More Information](#)

[Board Item Materials](#)

[Written Comments](#)

**20-12-1: Public Meeting to Consider Proposed San Diego 8-Hour Ozone Plan State Implementation Plan Submittal**

*The Board will consider approval of staff's written report reviewing the 2020 Plan for Attaining the National Ambient Air Quality Standards for Ozone in San Diego County (Plan). The Plan addresses both the 70 ppb and 75 ppb 8-hour ozone standards. If approved, the California Air Resources Board will submit the Plan to the United States Environmental Protection Agency as a revision to California's State Implementation Plan.*

[More Information](#)   [Board Item Materials](#)   [Written Comments](#)

**20-12-2: Public Hearing to Consider Amendments to the Emission Inventory Criteria and Guidelines Report for the Air Toxics "Hot Spots" Program**

*The Board will consider proposed amendments to the Emission Inventory Criteria and Guidelines Report for the Air Toxics "Hot Spots" Program. The program aims to protect public health by collecting emission data, identifying facilities having the potential for localized impacts, ascertaining the health risks, and requiring that owners of significant-risk facilities reduce their risks below the level of significance. The proposed amendments outlined in staff's written report will support multiple CARB and air district program needs and provide a supporting framework for a comprehensive and uniform statewide system for reporting toxic air contaminants. This proposal will provide a better understanding of stationary source toxic emissions, an enhancement of public access to information on toxic pollutant emissions, and a reduction of impacts on public health by ensuring that many new and emerging chemicals of concern are reported.*

[More Information](#)   [Presentation](#)   [Board Item Materials](#)   [Written Comments](#)

**20-12-3: Public Hearing to Consider Amendments to the Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants**

*The Board will consider proposed amendments to the Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants. The regulation requires the owners or operators of specified facilities to report emissions of criteria air pollutants and toxic air contaminants on an annual basis. The proposed amendments outlined in staff's written report will increase the number and types of facilities that are subject to the reporting requirements and will harmonize reporting requirements with other emissions reporting programs. The additional emissions data that will be collected under the proposed amendments is needed to evaluate the impacts of stationary source emissions, and to implement the directives of multiple legislative directives, including AB 197, AB 617, and AB 2588.*

[More Information](#)   [Presentation](#)   [Board Item Materials](#)   [Written Comments](#)

**20-12-4: Public Meeting to Hear an Update on Indoor Air Quality: Successes, Continuing Concerns, and Challenges**

*The Board will hear a verbal update on indoor air quality concerns, current CARB indoor air programs and emerging challenges. The update will include discussion of health concerns from gas appliances and benefits of building electrification. Staff will present how current and proposed strategies can improve public health and help the state achieve its climate change and air quality goals.*

**OPPORTUNITY FOR MEMBERS OF THE BOARD TO COMMENT ON MATTERS OF INTEREST**

*Board members may identify matters they would like to have noticed for consideration at future meetings and comment on topics of interest; no formal action on these topics will be taken without further notice.*

**OPEN SESSION TO PROVIDE AN OPPORTUNITY FOR MEMBERS OF THE PUBLIC TO ADDRESS THE BOARD ON SUBJECT MATTERS WITHIN THE JURISDICTION OF THE BOARD**

*Although no formal Board action may be taken, the Board is allowing an opportunity to interested members of the public to address the Board on items of interest that are within the Board's jurisdiction, but that do not specifically appear on the agenda. Each person will be allowed a maximum of three minutes to ensure that everyone has a chance to speak. The public will also have an opportunity to [submit written comments](#) for open session the morning of the Board Meeting.*

**[Submit Comments Electronically the Day of the Board Meeting](#)****[View Submitted Comments](#)**

**PLEASE NOTE:** PowerPoint presentations to be displayed during public comment at the Board meeting must be electronically submitted via email to the Clerks' Office at [cotb@arb.ca.gov](mailto:cotb@arb.ca.gov) no later than noon on the business day prior to the scheduled Board meeting.

**IF YOU HAVE ANY QUESTIONS, PLEASE CONTACT THE CLERKS' OFFICE:**

**1001 I Street, 23<sup>rd</sup> Floor, Sacramento, California 95814**

**[cotb@arb.ca.gov](mailto:cotb@arb.ca.gov) or (916) 322-5594**

**CARB Homepage: [www.arb.ca.gov](http://www.arb.ca.gov)**

**SPECIAL ACCOMMODATION REQUEST**

Consistent with California Government Code section 7296.2, special accommodation or language needs may be provided for any of the following:

- An interpreter to be available at the hearing;
- Documents made available in an alternate format or another language;
- A disability-related reasonable accommodation.

To request these special accommodations or language needs, please contact the Clerks' Office at [cotb@arb.ca.gov](mailto:cotb@arb.ca.gov) or at (916) 322-5594 as soon as possible, but no later than 7 business days before the scheduled Board hearing. TTY/TDD/Speech to Speech users may dial 711 for the California Relay Service.

Consecuente con la sección 7296.2 del Código de Gobierno de California, una acomodación especial o necesidades lingüísticas pueden ser suministradas para cualquiera de los siguientes:

- Un intérprete que esté disponible en la audiencia
- Documentos disponibles en un formato alterno u otro idioma
- Una acomodación razonable relacionados con una incapacidad

Para solicitar estas comodidades especiales o necesidades de otro idioma, por favor contacte la oficina del Consejo al (916) 322-5594 o por correo electronico al [cotb@arb.ca.gov](mailto:cotb@arb.ca.gov) lo más pronto posible, pero no menos de 7 días de trabajo antes del día programado para la audiencia del Consejo. TTY/TDD/Personas que necesiten este servicio pueden marcar el 711 para el Servicio de Retransmisión de Mensajes de California.

BOARD MEETING DATE: December 4, 2020

AGENDA NO. 28

**PROPOSAL:** Determine that the Southeast Los Angeles Community Emissions Reduction Plan is Exempt from CEQA and Adopt the Community Emissions Reduction Plan

**SYNOPSIS:** Assembly Bill 617 requires CARB to select communities for the preparation of Community Emissions Reduction Plans (CERPs) and air districts with a selected community to adopt the CERP within one year of selection. CARB selected the Southeast Los Angeles Community in December 2019. The Southeast Los Angeles CERP provides a blueprint for air pollution emission and exposure reductions to address air quality concerns prioritized by the Community Steering Committee. The CERP describes the process to develop the plan, actions to reduce emissions and exposures, an implementation schedule, and an enforcement plan. This action is to: 1) Determine that the AB 617 CERP for the Southeast Los Angeles community is exempt from the California Environmental Quality Act; and 2) Adopt the AB 617 CERP for the Southeast Los Angeles community.

**COMMITTEE:** Stationary Source, November 20, 2020, Reviewed

**RECOMMENDED ACTIONS:**

1. Determine that the Community Emissions Reduction Plan for the Southeast Los Angeles community is exempt from the requirements of the California Environmental Quality Act; and
2. Adopt the AB 617 Community Emissions Reduction Plan for the Southeast Los Angeles community.

Wayne Nastri  
Executive Officer

## Background

California law known as Assembly Bill (AB) 617 established new requirements for improving air quality in disadvantaged communities in California. AB 617 requires a statewide strategy with focused actions for communities heavily impacted by air pollution. These actions include developing community air monitoring plans (CAMPs) and community emissions reduction plans (CERPs) to reduce emissions of toxic air contaminants (TACs) and criteria pollutants.

In 2018, the California Air Resources Board (CARB) adopted the Community Air Protection Blueprint (Blueprint) as the statewide strategy to guide the development (e.g., public process), content, and implementation of CAMPs and CERPs. An overview of the process to develop these documents as described in the CARB Blueprint is provided in Figure 1 – Overview of Community Emissions Reduction Program Process.

Figure 11: *Overview of Community Emissions Reduction Program Process*

On December 5, 2019, CARB selected two Year 2 communities within the South Coast Air Basin to prepare a CAMP and CERP. The two communities selected by CARB are: 1) Southeast Los Angeles; and 2) Eastern Coachella Valley. The AB 617 statute directs air districts to adopt CERPs within one year of the CARB’s selection.

## Public Process

### *Community Steering Committees, Technical Advisory Group and Public Outreach*

Beginning January 2020, staff implemented a community-focused process to develop a draft CERP that addresses the air quality priorities for Southeast Los Angeles (SELA). The cornerstone of this process was the formation of a Community Steering Committee (CSC). The SELA CSC is made up of active residents, community organizations, local business owners or workers, local agencies and elected officials. The CSC provided their input and guidance based on their community knowledge and expertise, and this feedback was instrumental in developing the CERP. CSC members also conducted their own community-level outreach to additional members within the community who may not have been able to attend our meetings. Since January 2020, a total of nine CSC meetings were held virtually or in the community, and approximately 80 – 100 people attended each meeting.

The AB 617 Technical Advisory Group (TAG) was established in 2019 to provide a forum to discuss technical details related to source attribution, air monitoring and other technical analysis needed to develop the CAMPs and CERPs. The TAG met in July and October of 2020 to discuss the methodologies used for developing emissions inventories for the SELA and Eastern Coachella Valley AB 617 communities.

In addition to the CSC and TAG meetings, staff held community workshops, a CSC question and answer session and over 40 individual meetings with residents and other community stakeholders to enhance community participation and input in the development of the CERP. Staff also created a community webpage to post updates and information about the development of the CAMPs and CERPs.

### **Proposal**

Staff recommends adopting the CERP for the SELA community. Through the CSC and public participation in the community meetings (e.g., CSC meetings and workshops), the SELA community identified their air quality priorities based on local sources of air pollution. The CSC worked with staff to develop a set of emissions and exposure reductions goals. Each goal is based on a set of actions, with associated metrics and timelines to be implemented by South Coast AQMD in collaboration with other government agencies and entities. Some actions would be conducted within the timeframes specified in the plan, while other activities such as rules would continue to apply and be enforced beyond the implementation period of the plan (i.e., beyond the first quarter 2026). The estimated SELA CERP emission reductions targets by 2025 and 2030 are 155 tons per year (tpy) and 297 tpy of oxides of nitrogen (NO<sub>x</sub>), and 1 tpy and 3.5 tpy diesel particulate matter (DPM), respectively. Furthermore, other emission reduction actions in the CERP will provide additional emission reductions that cannot be quantified at this time.

The SELA CERP is tailored to address the air quality priorities identified by this community. The air quality priorities and actions to address them are summarized below.

#### *Air Quality Priorities*

The SELA CSC identified five air quality priorities driven by air pollution from stationary sources and mobile sources and one air quality priority to help reduce exposure to air pollution in the community. The six air quality priorities include trucks and freeways, railyards and locomotives, metal processing facilities, rendering facilities, general industrial facilities and increasing green spaces.

The air quality priorities that focus on trucks and freeways and railyards and locomotives are driven by the community's concerns about local air quality impacts resulting from the movement of goods along the 710 Freeway and Alameda Corridor. Mobile sources are the overwhelming source of diesel particulate matter in SELA,

which is the predominant contributor to air toxics cancer risk. The major diesel sources in these communities are heavy-heavy duty trucks, medium-heavy duty trucks, off-road diesel equipment and trains. Notable actions in the draft CERP for these air quality priorities include: providing incentive funds for independent truck owners and operators and local fleets, prioritizing zero-emission trucks where commercially available (e.g., Class 6 or below); and pursuing the replacement of diesel-fueled equipment at railyards with lowest emissions technology available, and adopting a Rail Indirect Source Rule to address, amongst other things, testing and maintenance emissions near residences.

The SELA community also identified stationary sources as top air quality priorities including metal processing facilities, rendering facilities and general industrial facilities. Notable actions in the draft CERP for these air quality priorities include: initiating the rule development process to address housekeeping and best management practices at metal recycling plants to reduce fugitive emissions; conducting air monitoring for VOCs and odorous compounds near each rendering facility and in the community to better characterize the emissions and to make the data available to the public; and work with CSC to identify industrial facilities of concern in SELA community and identify potential emission and exposure reduction measures, if necessary.

Lastly, the SELA community also identified increasing green space as a priority to help reduce exposure to air pollution and increase quality of life. Notable actions for this exposure reduction action include collaboration with regional and local agencies, and non-profit organizations to support urban greening funding opportunities.

## **Key Issues**

### *Emission Reduction Targets*

Some CSC members commented that the CERP lacks robust emission reductions for the metals processing air quality priority, and strongly emphasized the importance of including emission reductions targets of at least 50 percent by 2025, and at least 75 percent by 2030 in SELA. Establishing emission reduction targets for metal processing is challenging as there are a wide variety of toxic air contaminants that vary for the different metal processing activities. Generally, emission sources from metal toxic air contaminants are categorized into two types of sources, point and fugitive. Point sources are emissions that come from a specific unit or process that can or are directed through a collection device and to a stack. Fugitive emissions are those sources that generally cannot be directed through collection device or stack. In order to estimate fugitive emission reductions, staff would need to establish a baseline of current emissions, which is generally not available and will require substantial additional technical assessments. Additionally, there is no mechanism to specifically measure fugitive emissions. Many of the metal particulate rules are based on using a filtration system that is designed to achieve a specific control efficiency or focusing on an emission rate that will result in a specific health risk estimate. Other metrics such as adoption or amendments to rules that

establish point and fugitive point source control requirements may be a better indicator that these sources are being addressed.

Ambient monitoring has shown that measures, such as housekeeping and best management practices, can minimize the accumulation of metal particulate and minimize fugitive emissions contributing to ambient levels. The CERP includes actions which specifically commits to work with the CSC to assess metal processing facilities in SELA and identify and implement strategies to address the findings. Furthermore, the CERP includes an action for the metals processing air quality priority to initiate rule development process to address housekeeping and best management practices at metal recycling plants to reduce fugitive emissions, which is a top priority for the SELA CSC. This action is expected to result in fugitive dust emission reductions from metal processing facilities, but reductions cannot be quantified at this time. Although staff cannot quantify these point and fugitive emissions, staff has consistently been incorporating key measures into rules to reduce and minimize impacts to neighboring communities. The CSC has expressed the goal of eliminating all exposure to toxic metals in this community, and the CERP includes actions to eliminate such exposures to the maximum extent feasible.

#### *Land-Use Requirements*

Some CSC members requested that the Final CERP include land-use requirements and collaboration with land-use agencies. For example, CSC members asked for a health-protective setback (at least 2500 ft or more) for new metals processing facilities, a zero-emissions corridor for the Interstate 710 (I-710) freeway, and identification of sites where local communities have access to land for community gardens.

Land uses and the laws (e.g., local ordinances) that govern them are determined by local municipalities. AB 617 does not expand South Coast AQMD's authority to govern land uses; however, staff recognizes the importance of collaboration with municipalities to address emissions related to specific industrial and commercial uses. Therefore, the Draft CERP includes six actions that focus on collaboration and outreach to local land-use and resource agencies. The actions are listed below.

- Chapter 5b - Truck Traffic and Freeways, Action J states, “encourage the designation of clean truck lanes on the I-710 Freeway.”
- Chapter 5b - Truck Traffic and Freeways, Action K states, “Encourage the deployment of zero-emission trucks in the Southeast Los Angeles community where commercially available (e.g., Class 6 or below).”
- Chapter 5c – Rendering Facilities, Action C includes a commitment to “collaborate with local land-use agencies and L.A. County Green Zones Program to identify proposed new rendering facility projects in the Southeast Los Angeles

Community and identify applicable South Coast AQMD rule that apply to the facilities.”

- Chapter 5d – Green Spaces, Action A, is modified to read “collaborate with land-use, state and local agencies (e.g., Public Works, Parks and Recreation), and non-profit organizations, and the CSC to develop a list a low-VOC and drought tolerant trees.”
- Chapter 5e – Metal Processing Facilities, Action G, “Make referrals to the appropriate agencies when issues are found during inspections that fall outside of South Coast AQMD’s jurisdiction (e.g., Water Board, DTSC, Cal-OSHA, local land-use agencies, and Public Health departments).”
- Chapter 5e – General Industrial, Action H, commits to pursuing “collaborations with local land-use agencies to provide outreach information to metal processing facilities on requirements for South Coast AQMD permits.”

**California Environmental Quality Act** Pursuant to the California Environmental Quality Act (CEQA) Guidelines Sections 15002(k) and 15061, the proposed project is exempt from CEQA pursuant to CEQA Guidelines Sections 15061(b)(3), 15262, 15301, 15303, 15306, 15308, 15309, and 15321. Further, there is no substantial evidence indicating that any of the exceptions in CEQA Guidelines Section 15300.2 apply to the proposed project. A Notice of Exemption has been prepared pursuant to CEQA Guidelines Section 15062 and is included as Attachment C to this Board letter. If the proposed project is approved, the Notice of Exemption will be electronically filed with the State Clearinghouse of the Governor’s Office of Planning and Research to be posted on their CEQAnet Web Portal which may be accessed via the following weblink: <https://ceqanet.opr.ca.gov/search/recent>. In addition, the Notice of Exemption will be electronically posted on the South Coast AQMD’s webpage which can be accessed by via the following weblink: <http://www.aqmd.gov/nav/about/public-notices/ceqa-notices/notices-of-exemption/noe---year-2020>. The electronic filing and posting of the Notice of Exemption is being implemented in accordance with Governor Newsom’s Executive Orders N-54-20 and N-80-20 issued on April 22, 2020 and September 23, 2020, respectively, for the State of Emergency in California as a result of the threat of COVID-19.

**Implementation Plan/Schedule**

Implementation of the SELA CERP takes place over approximately five years, beginning in the first quarter of 2021. CARB staff will begin reviewing and evaluating the SELA CERP after adoption by the Governing Board. CARB staff is expected to hold at least one virtual public workshop before CARB's consideration for approval of the CERP. CARB will schedule a public hearing in 2021 to approve the CERP.

**Benefits to South Coast AQMD**

Implementation of the SELA CERP will help advance the agency's mission to clean the air at a community scale, especially in the most impacted and disadvantaged communities within South Coast AQMD's jurisdiction. The SELA CAMP and CERP will continue to serve as a statewide model for AB 617 Year 3 implementation and beyond. The estimated SELA CERP emission reductions targets by 2025 and 2030 are 155 tpy and 297 tpy NO<sub>x</sub>, and 1 tpy and 3.5 tpy DPM, respectively. Additionally, emissions reductions achieved through the CERP will provide emission reduction benefits toward achieving state and national ambient air quality standards.

**Resource Impacts**

South Coast AQMD received \$21.8 million to support implementation of AB 617 for the upcoming year of this program for all AB 617 communities in our jurisdiction. In addition, Community Air Protection incentive funds will be used toward implementing incentive projects that are located in environmental justice communities. In 2020, South Coast AQMD received \$69,824,849 in total grant funding through the Community Air Protection funds, which include up to 6.25% for administrative costs. This funding covers all AB 617 communities in the South Coast. Staff continues to work with the California state legislature to secure sustained funding for AB 617 statewide.

Implementation costs for future years are dependent on the number of communities that are selected, and the amount of funding allocated by the legislature to support AB 617 implementation by the local air districts.

# EXECUTIVE SUMMARY

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Summary of Response to Comments

The CSC, South Coast AQMD staff, and CARB closely collaborated to develop the Southeast Los Angeles CERP. Development of the CERP occurred over a year-long process that included 9 CSC meetings, 2 Technical Advisory meetings, an AB 617 Incentives Strategies meeting, and over 40 individual or small group meetings. South Coast AQMD staff received approximately 80 comments from businesses, government agencies, community residents, environmental organizations and other entities for the CERP. The table below summarizes each comment and identifies if the commenter's request is included (●) or not included (◆) in the CERP. The table also provides a brief staff response that explains where requests that are included in the CERP can be found or why the request was not included.

#	Comment <sup>1</sup>	Commenter(s)	Included = ● <u>Not</u> Included = ◆	Staff Response
<b>General Questions or Concerns on the CERP</b>				
1	CERP should include actions prioritizing small businesses for incentives and assistance with navigating South Coast AQMD rule and permit requirements.	Edith Moreno (SoCalGas)	●	<p>The comment is addressed in the actions for the Trucks and Freeways air quality priority. Table 1, Action D commits South Coast AQMD staff to outreach to small businesses (e.g., independent truck owners and operators) and local fleets for incentive funds, prioritizing zero emission trucks where commercially available.</p> <p>CERP action F for Chapter 5b – Trucks and Freeways also includes outreach to small businesses to provide</p>

<sup>1</sup> Clarifying comments or questions from CSC members not included in table.

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				information about the South Coast AQMD Small Business Assistance Office which helps small business owners to comply with South Coast AQMD rules and regulations, permit conditions, and recordkeeping through a variety of services offered. The small business office can be contacted at 1-800-388-2121 or <a href="mailto:smallbizassistance@aqmd.gov">smallbizassistance@aqmd.gov</a> . Additional details about the Small Business Assistance Office are available at <a href="http://www.aqmd.gov/home/programs/business/business-detail?title=small-business-assistance">http://www.aqmd.gov/home/programs/business/business-detail?title=small-business-assistance</a> .
2	Page 2 [of Executive Summary] mentions ongoing activities such as regulation and enforcement. Is this further clarified somewhere else in the document on what and how that plays out? What does ongoing regulation look like? Is it regular compliance checks, indefinitely?	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-1</b>		<p>South Coast AQMD conducts regular compliance inspections at facilities and responds to community complaints as part of the overall enforcement program. Chapter 4 includes an overview of South Coast AQMD and CARB enforcement programs, regulatory authority, enforcement history, and an outline of each agency's complaint process. Appendix 4 provides details on South Coast AQMD and CARB's legal right to issue violations and penalties, interagency collaboration, and contains summaries of all permitted facilities, complaints received, inspections conducted, enforcement actions taken, and vehicle/engine inspections conducted.</p> <p>The implementation timeline for the SELA CERP is five years beginning January 2021 and ending January 2026. The actions in the SELA CERP are tailored to address the air</p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included = 	Staff Response
				quality concerns prioritized by the SELA CSC. However, South Coast AQMD staff efforts to enforce South Coast AQMD rules and to develop new or amend existing rules that benefit the SELA and other communities in the South Coast Air Basin will continue after January 2026. For example, Rule 415 (Odors from Rendering Facilities) will continue to be in effect after January 2026 and South Coast AQMD compliance staff will continue to conduct regular inspections at rendering facilities.
3	Page 1 [of Introduction], under “Ongoing Efforts” references the LA County Green Zones Program. There should be a footnote to explain this program and link to more information.	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-2</b>		A footnote with more information about the LA County Green Zones Program has been included to Chapter 5a.
4	Page 1 [of Introduction], the last sentence references “rule development.” I believe rules are discussed in more detail in Chapter 4, but should be clear about what a rule is/means for AQMD (ex, this is the method for establishing regulations and provides a check to ensure compliance). Is rule synonymous with regulation?	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-3</b>		At South Coast AQMD, a regulation is composed of rules, each of which deals with a specific topic within that regulation. For example, Regulation II deals with permits, while Rules 201 through 221 pertain to specific types of permits, how they are granted and administered, and their impact.  South Coast AQMD staff develops rules to reduce air pollution from specific sources and to protect public health. Generally, the rule-making process incorporates extensive

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				<p>information gathering and research into available technologies, coordination with industry groups, and analysis of the economic impact of each proposed rule or rule amendment. South Coast AQMD provides an opportunity for public input on every proposed rule. At public workshops and consultations, the public can voice suggestions and concerns about the impact of a proposed rule. A public hearing is held before the South Coast AQMD Governing Board votes on a proposed or amended rule.</p> <p>A footnote will be provided in Chapter 5a to provide this information.</p>
5	The discussion draft CERP addresses many of the significant environmental justice concerns facing the community. SCAQMD must avoid “cookie-cutter” implementation for concerns shared with other AB 617 communities. Similarly, SCAQMD must also acknowledge and address other threats such as contamination from Exide and pollution from aviation operations.	Chris Chavez (Coalition for Clean Air) <b>Comment 3-1</b>		<p>The air quality priorities in the Southeast Los Angeles community and other AB 617 communities are selected by the community steering committees. The SELA Draft CERP actions were developed with the input from the SELA CSC provided during 9 CSC meetings, and over 40 individual and small group phone calls or virtual meetings. The SELA Draft CERP actions are a result of multiple iterations of edits between South Coast AQMD staff and the CSC.</p> <p>Additionally, staff updated Chapter 3a to include information about Exide and the Delta Jet Fuel Release.</p>
6	The next draft of the CERP should include emissions reduction projections. Further, these targets should have a nexus with community	Chris Chavez (Coalition for Clean Air)		Staff updated Chapter 5a of the Draft CERP to include emission reduction targets for 2025 and 2030 for NOx and DPM. DPM is emitted from heavy-duty trucks, trains and

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
	health needs. Reductions from future rulemakings should be shared with the CSC as soon as they are available.	<b>Comment 3-2</b>		industrial off-road equipment. DPM emissions continue to be the main driver of air toxics cancer risk in this community. Therefore, a reduction of DPM will provide long-term benefits for public health in the SELA community. Additionally, South Coast AQMD staff will continue to keep the CSC updated on the progress of CERP implementation, including emission reductions from rulemaking efforts that are described in the CERP.
7	To the greatest extent possible, CERP emissions reduction should meet the same criteria as the State Implementation Plan (quantifiable, surplus, enforceable, and permanent.) Projects and efforts that do not meet these criteria (e.g., working with local agencies to rectify bad land use decisions) should be included on their merits	Chris Chavez (Coalition for Clean Air) <b>Comment 3-3</b>		South Coast AQMD staff continues to pursue a suite of actions (e.g., regulatory efforts, incentives, and outreach) to achieve emission reductions. Some actions meet SIP creditable criteria, and some do not; however, they are equally important to the emissions and exposure reduction goals of the CERP.
8	Some strategies in the discussion draft are vague and only commit to further study, identification of sources, and developing reduction strategies later. Rather than deferring action and implementation, SCAQMD should strengthen these strategies and yield immediate emissions reduction	Chris Chavez (Coalition for Clean Air) <b>Comment 3-5</b>		The CSC has requested that we use available data as a guide and follow a methodical process to develop appropriate and effective actions to reduce emissions in this community. Thus, Chapter 5e – Metal Processing Facilities and Chapter 5g – General Industrial include actions that require a stepwise approach to 1) identify the sources of emissions; and 2) develop strategies to address those specific emissions sources. With a stepwise approach, these actions allow staff to work with the CSC to identify local community concerns

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				and air quality issues related to metal processing and other industrial facilities. This approach enables the CSC to focus on emissions and exposures reduction efforts on air quality issues affecting the community within the CERP implementation timeframe.
9	As with other SCAQMD AB 617 CERPs, the SELA CERP relies heavily on incentives and funding which may not exist. Additionally, it does not adequately assign responsibilities to polluters.	Chris Chavez (Coalition for Clean Air) <b>Comment 3-6</b>		Incentives are among the strategies used in the CERP because they can bring expedited emissions reductions above and beyond current requirements. However, the CERP does not rely on any single strategy, and instead uses a combination of strategies to reduce emissions, including regulation, enforcement, air monitoring, outreach and incentives. The totality of these actions will bring emission reductions to this community, as quantified in Chapter 5a.
10	AQMD needs to assemble a transparent / open-source comprehensive database online, of all the polluting sources in SELA, to identify all possible measures that could reduce emissions or eliminate emissions regardless of the cost, for each of these. This will assist both the community and AQMD in solving specific and overall cumulative impacts. This approach should include the upcoming Industrial Source category (yet to be completed for the CERP), as well as all sources.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-1</b>		South Coast AQMD developed a web tool that allows the user to search for public information about South Coast AQMD-regulated facilities (that is, facilities that are required to have a permit to operate equipment that releases pollutants into the air). The system is called F.I.N.D. (Facility INformation Detail). The FIND tool provides detailed information for each facility, including equipment lists, facility air pollution emissions information on key enforcement actions (Notices of Violation, Notices to Comply, Hearing Board cases), and other documents. The information in FIND is updated daily.  FIND includes an interactive map that users can use to locate facilities and link to information about those facilities.

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				<p>Users can also search for addresses and place names, and the tool will show a list of active facilities close to that address. Users can also click a link to access more detailed information about the facility.</p> <p>Visit this webpage to access the South Coast AQMD FIND tool: <a href="https://xappprod.aqmd.gov/find">https://xappprod.aqmd.gov/find</a></p> <p>Furthermore, AB 617 legislation requires CARB to establish and maintain a statewide Technology Clearinghouse that identifies the best technologies for reducing emissions, namely Best Available Control Technology (BACT), Best Available Retrofit Control Technology (BARCT), and related technologies for the control of toxic air contaminants (T-BACT). The Community Air Protection Program Blueprint requires the new Technology Clearinghouse to be used to identify rules, regulations, technologies, or practices that could offer emissions or exposure reduction opportunities within impacted communities. South Coast AQMD has been actively collaborating and supporting CARB in this statewide effort.</p> <p>More information on the Technology Clearinghouses is available here: <a href="https://ww2.arb.ca.gov/our-work/programs/technology-clearinghouse">https://ww2.arb.ca.gov/our-work/programs/technology-clearinghouse</a></p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
11	Some facilities are likely too close to sensitive receptors including schools, even when best emission reductions measures and practices are put in place. Consequently, there must be a partnership between AQMD, the City, impacted communities and industry for creating land-use solutions, zoning changes, amortization proceedings, and relocation of these facilities.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-2</b>		<p>South Coast AQMD recognizes the importance of collaboration with local land-use agencies and other relevant agencies to address land-use, zoning, and other issues surrounding facility emissions. Thus, the Draft CERP includes various actions require collaboration and outreach to local land-use and resource agencies.</p> <p>For example, Chapter 5c, Action C includes a commitment to “Collaborate with local land-use agencies and L.A. County Green Zones Program to review and inspect new rendering facilities for compliance with South Coast AQMD rules.”</p> <p>Chapter 5e, Actions G and H, commit to making “referrals to the appropriate agencies when issues are found during inspections that fall outside of South Coast AQMD’s jurisdiction (e.g., Water Board, DTSC, Cal-OSHA, local land-use agencies, and Public Health departments)” and pursuing “collaborations with local land-use agencies to provide outreach information to metal processing facilities on required South Coast AQMD permits”, respectively.</p> <p>Additionally, South Coast AQMD staff will work with the cities in SELA, the impacted community, and industry to address air quality concerns related to facilities.</p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
12	AQMD needs to cooperate with CalOSHA (in addition to other agencies) to assist facilities to comply with best practices for creating worker safety standards and programs. Workers are often the most impacted group in polluting facilities, are frequently people of color or low-income people, who may also live in the local community, and worker and community safety overlap in many ways. While AQMD regularly states that worker conditions are outside its purview, that does not mean that AQMD should ignore severe worker hazards it witnesses when doing its own inspections. CBE has directly witnessed such cases when AQMD inspectors ignored such conditions. AQMD has the ability to document and report hazardous conditions to OSHA, and to work to develop strong pollution prevention measures for everyone. Poor working conditions frequently also translate to poor health and safety for the residential community. Conversely,	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-3</b>		<p>South Coast AQMD staff recognizes the importance of inter-agency communication and has included an action in the Draft CERP to address concerns at facilities that may be outside this agency's purview.</p> <p>South Coast AQMD staff have made such referrals to Cal-OSHA in the recent past, and will work closely with our staff who enter facilities to be aware of environmental and occupational health hazards that may warrant a referral to the appropriate agency.</p> <p>Chapter 5e, Action G, states the following: "Make referrals to the appropriate agencies when issues are found during inspections that fall outside of South Coast AQMD's jurisdiction (e.g., Water Board, DTSC, Cal-OSHA, local land-use agencies, and Public Health departments)."</p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
	facilities with strong pollution prevention measures protect both the community and workers. We urge AQMD to incorporate a deeper analysis and implementation of pollution prevention.			
13	Add a measure to begin developing a SELA community-specific Just Transition Plan for inherently safer energy sources, with equity.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-6</b>		<p>According to the United Nations “Just Transition of the Workforce, and the Creation of Decent Work and Quality Jobs” Technical Paper, the transition towards inclusive and low-carbon economies must be just and fair, maximizing opportunities for economic prosperity, social justice, rights and social protection for all, leaving no one behind. Just Transition Plans have a strong emphasis on combating the effects of climate change, with social equity in mind.</p> <p>CARB is charged with implementing California’s comprehensive suite of policies to reduce emissions of greenhouse gases. The 2017 Scoping Plan for Achieving California’s 2030 Greenhouse Gas Target identifies how the State can reach our 2030 climate target to reduce greenhouse gas emissions by 40 percent from 1990 levels, and substantially advance toward CARB’s 2050 climate goal to reduce GHG emissions by 80 percent below 1990 levels. The 2017 Scoping Plan builds on and integrates efforts already underway to reduce the State’s GHG, criteria</p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				<p>pollutant, and toxic air contaminant emissions. Programs such as the Low Carbon Fuel Standard and Renewables Portfolio Standard are delivering cleaner fuels and energy, the Advanced Clean Cars Program has put more than a quarter million clean vehicles on the road, and the Sustainable Freight Action Plan will result in efficient and cleaner systems to move goods throughout the State. Enhancing and implementing these ongoing efforts, paired with a more stringent Cap-and-Trade Program, puts California on the path to achieving the 2030 target per SB 32 and to deliver climate, air quality, and other benefits. CARB will consider the CSC's suggestion to create a community-specific Just Transition Plan.</p> <p>More information about CARB's 2017 Climate Change Scoping Plan here: <a href="https://ww2.arb.ca.gov/our-work/programs/ab-32-climate-change-scoping-plan">https://ww2.arb.ca.gov/our-work/programs/ab-32-climate-change-scoping-plan</a></p>
14	Add a measure to support adoption of a robust regional ozone attainment plan for expeditious reductions of criteria pollutants in SELA, consistent with AQMD & CARB regional development of the next plan. This plan must bring SELA into attainment with Clean Air Act health standards.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega		The Air Quality Management Plan (AQMP or Plan) is a regional blueprint for achieving air quality standards and healthful air. On October 1, 2015, the U.S. Environmental Protection Agency (EPA) strengthened the National Ambient Air Quality Standards (NAAQS) for ground-level ozone, lowering the primary and secondary ozone standard levels to 70 parts per billion (ppb). The South Coast Air Basin is classified as an "extreme" non-attainment area for the 2015

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included = 	Staff Response
		(Communities for a Better Environment) <b>Comment 4-7</b>		Ozone NAAQS. The 2022 AQMP is being developed to address the requirements for meeting this standard, and will represent a comprehensive analysis of emissions, meteorology, regional air quality modeling, regional growth projections, and the impact of existing and proposed control measures. Various CERP actions (e.g., incentives prioritizing zero-emission trucks where commercially available) contribute to the reduction of criteria pollutants in SELA and to regional ozone attainment goals.
15	We do not support “bridge fuels” such as Natural Gas for transportation, which have major damaging impacts during extraction, transport, and refining, and are not zero emission options.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-8</b>		Chapter 5b – Trucks and Freeways, Table 1, Action F of the CERP prioritizes zero-emission technologies where commercially feasible. South Coast AQMD’s incentive programs provide a much larger incentive for zero-emission technologies compared to other technologies. These larger incentives for zero-emission projects recognize that these technologies are currently more expensive, and in many cases, not available, relative to near-zero technologies. It would take larger financial incentives, cause significant delays, and thus less emission reductions, if only the adoption of zero-emission technologies were encouraged.
<b>Trucks and Freeways</b>				
16	CERP should include language regarding air monitoring actions along	Lizette Ruiz (Active		Chapter 5b, Action I, was modified to include focused air monitoring efforts along the Alameda Corridor.

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included = 	Staff Response
	the Alameda Corridor to help assess truck emissions.	Residents – South Gate)		
17	Would also like to see CERP language regarding air monitoring actions along the Alameda Corridor to help assess truck emissions.	Laura Cortez (East Yard Communities for Environmental Justice)		The Alameda Corridor is one of the high priority areas for mobile surveys, as discussed in Appendix 6, section 7.2 of the CERP: “Measurements will be prioritized in the areas immediately surrounding the three railyards in this community and along major railways (e.g., Alameda Corridor).”
18	CERP should also incorporate language encouraging increasing the accessibility of fuel cell refueling infrastructure in addition to electric charging stations.	Mark Sheldon (Member of the public)		Chapter 5b, Action G, was modified to include accessibility to other alternative fueling stations in the community in addition to electric charging stations.
19	Page 2, action A describes establishment of a Community Pollution Enforcement Workgroup. The only metric listed under this action is the number of meetings held. Think about adding additional metrics tied to the goals of the group, such as number of complaints identified through the workgroup and number of complaints addressed by CARB, number of complaint referrals to other agencies, etc.	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-4</b>		Chapter 5b, Metric A, was modified to include the metric “Number of complaints identified through the workgroup and addressed by CARB”.

#	Comment <sup>1</sup>	Commenter(s)	Included =  Not Included= 	Staff Response
20	SCAQMD and the CERP should substantially expand its commitments relating to Interstate 710 expansion, which is the next environmental injustice facing SELA communities.	Chris Chavez (Coalition for Clean Air) <b>Comment 3-4</b>		Chapter 5b, Action H, commits to identifying freeway projects (e.g., freeway expansion projects) within the community that are circulated to South Coast AQMD for review under the California Environmental Act (CEQA). However, the Interstate 710 (I-710) expansion project is projected to take place beyond the timeframe of the CERP. More information on this project can be found here: <a href="https://www.metro.net/projects/i-710-corridor-project/">https://www.metro.net/projects/i-710-corridor-project/</a>
21	The CERP needs to commit to a strong Indirect Source Rule (ISR) for railyards, warehouses, and other pollution magnets.	Chris Chavez (Coalition for Clean Air) <b>Comment 3-9</b>		Chapter 5b, Action E, commits to continuing the development of the Warehouse Indirect Source Rule (ISR) to reduce emissions from large warehouses and fulfillment centers and inform CSC members about Warehouse ISR working group meetings and provide warehouse information to the CSC. Furthermore, Chapter 5f, Action C, also commits to continuing to develop the Railyard ISR, which includes strategies such as addressing exposures from load testing and maintenance activities.
22	The plan is still missing a list of measures by the California Air Resources Board.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega		Chapter 5b – Truck Traffic and Freeways and Chapter 5f – Railyards and Locomotives collectively contain over 10 different actions lead by CARB to help address these air quality priorities. Also, staff has provided a list of statewide measures that contribute to the emissions reduction targets in Chapter 5a. The list includes Advanced Clean Car 2, Heavy-Duty Inspection and Maintenance, Low- NOx Engine Standard, and the Small Off-Road Engine Amendment.

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
		(Communities for a Better Environment) <b>Comment 4-5</b>		
23	In addition to the Warehouse Indirect Source Rule (ISR), AQMD should adopt a Ports ISR rule, which will benefit all communities along the freeway corridors including SELA, which are heavily impacted by diesel traffic. This is well-within AQMD's authority, and has been put off for too long.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-12</b>		Over the last two years, under the Board's direction, AQMD staff has been working on developing a memorandum of understanding (MOU) with the Ports of Los Angeles and Long Beach based on the implementation of the San Pedro Bay's Clean Air Action Plan (CAAP). A Ports MOU Working Group as well as a more focused Ports MOU Technical Working Group (TWG) with representatives from AQMD, CARB, Ports, Coalition for Clean Air, Sierra Club, PMSA, and California Trucking Association were established to quantify the potential emissions benefits of CAAP measures. Through this process, the CAAP's Clean Truck Program was identified as the primary CAAP measure with a performance target (i.e., \$10/TEU) which could result in quantifiable emission reductions based on implementation of incentive programs for deployment of near-zero or zero-emission trucks. In March 2020, the Ports Boards of Harbor Commissioners adopted a resolution for the Clean Truck Fund (CTF) Rate of \$10/TEU but the Boards delayed the full adoption of the Clean Truck Program until later in 2020 (i.e., exemptions, CTF collection mechanism, tariff amendments, structure of incentive program). The adoption and implementation of the Clean Truck Program has been further delayed by the Ports citing uncertainties related to COVID-19 and

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				associated economic impacts (although Ports are currently experiencing record volumes of cargo). Since the details of the Ports Clean Truck Program have not been determined, the Ports MOU development has been delayed until that occurs.
24	Include specific goals for Zero Emission Transportation as soon as possible. We need CARB and AQMD staff to do everything in their power to plan and implement Zero Emission Transportation.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-13</b>		In 2018, the California Air Resources Board (CARB) was directed by Governor Jerry Brown to assess possible regulatory requirements to ensure greater inclusion of zero emission vehicles in public and private light- and heavy-duty vehicle fleets. <sup>[1]</sup> As CARB looks for ways to meet our 5 million zero-emission vehicle target by 2030, the conversion of public and private fleets to zero emission cars and trucks offers an important opportunity to get a large number of carbon-polluting fleet vehicles off the road. <sup>[2]</sup> In June 2020, CARB adopted the Advanced Clean Trucks Rule requiring truck manufacturers to transition from producing diesel trucks and vans to electric zero-emission trucks including heavy-duty vehicles beginning in 2024. CARB is developing a medium and heavy-duty zero-emission fleet regulation <sup>[3]</sup> with the goal of achieving a zero-emission truck and bus California fleet by 2045 everywhere feasible and significantly earlier for certain market segments such as last mile delivery and drayage applications; the CARB Governing

<sup>[1]</sup> [https://ww2.arb.ca.gov/sites/default/files/2020-06/zero\\_emission\\_fleet\\_letter\\_080118\\_ADA.pdf](https://ww2.arb.ca.gov/sites/default/files/2020-06/zero_emission_fleet_letter_080118_ADA.pdf)

<sup>[2]</sup> <https://ww2.arb.ca.gov/our-work/programs/zero-emission-vehicle-fleet>

<sup>[3]</sup> <https://ww2.arb.ca.gov/our-work/programs/advanced-clean-fleets>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				Board is anticipated to consider the adoption of the proposed Advanced Clean Fleets Regulation in 2021. In September 2020, Governor Gavin Newsom issued an executive order requiring sales of all new passenger vehicles to be zero-emission by 2035 and additional measures to eliminate harmful emissions from the transportation sector. <sup>[4]</sup> CARB is charged with developing regulations to mandate that 100 percent of in-state sales of new passenger cars and trucks are zero-emission by 2035 – a target which would achieve more than a 35 percent reduction in greenhouse gas emissions and an 80 percent improvement in oxides of nitrogen emissions from cars statewide.
25	Include a goal to make the 710 Freeway a Zero Emissions Corridor.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-14</b>		Chapter 5b, Actions J and K, were added to the Draft CERP. The two new actions state: Action J - “Encourage the designation of clean truck lanes on the I-710 Freeway.” Action K - “Encourage the deployment of zero-emission trucks in the Southeast Los Angeles community where commercially available (e.g., Class 6 or below).”  The AB 617 legislation does not expand South Coast AQMD’s authority to address land-use issues. Land-use and transportation agencies (e.g., CalTrans) have authority over the Interstate 710 (I-710) Freeway and I-710 corridor. However, South Coast AQMD staff will continue to

<sup>[4]</sup> <https://www.gov.ca.gov/2020/09/23/governor-newsom-announces-california-will-phase-out-gasoline-powered-cars-drastically-reduce-demand-for-fossil-fuel-in-californias-fight-against-climate-change/>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				<p>collaborate with land-use and transportation agencies to support the implementation of clean technologies (e.g., zero emission technology) for mobile sources along the I-710 corridor.</p> <p>Additionally, on June 25th, 2020, CARB adopted the Advanced Clean Truck Regulation. The regulation has two components including a manufacturer sales requirement, and a reporting requirement:</p> <p>Zero-emission truck sales: Manufacturers who certify Class 2b-8 chassis or complete vehicles with combustion engines would be required to sell zero-emission trucks as an increasing percentage of their annual California sales from 2024 to 2035. By 2035, zero-emission truck/chassis sales would need to be 55% of Class 2b – 3 truck sales, 75% of class 4 – 8 straight truck sales, and 40% of truck tractor sales.</p> <p>Company and fleet reporting: Large employers including retailers, manufacturers, brokers and others would be required to report information about shipments and shuttle services. Fleet owners, with 50 or more trucks, would be required to report about their existing fleet operations. This information would help identify future strategies to ensure that fleets purchase available zero emission trucks and place them in service where suitable to meet their needs.</p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  Not Included= 	Staff Response
				More information about the Advanced Clean Truck Regulation is available at: <a href="https://ww2.arb.ca.gov/our-work/programs/advanced-clean-trucks">https://ww2.arb.ca.gov/our-work/programs/advanced-clean-trucks</a>
26	AQMD should ensure that CalTrans and Metro revise the 710 South Freeway Project EIR (Environmental Impact Report) to include Zero Emissions options, and should coordinate with other agencies like CARB, to strengthen zero emissions requirements.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-15</b>		On October 20, 2017, South Coast AQMD staff submitted a comment letter on the Recirculated Draft Environmental Impact Report/Supplemental Draft Environmental Impact Statement (RDEIR/SDEIS) for the Interstate 710 (I-710) Corridor Project. A key comment in the letter included a need for zero-emission freight corridor and need to provide specificities regarding the schedule and process for development, construction, deployment, selection, and implementation of the zero-emission truck technology in the Final EIR/SEIS. The letter is available at <a href="http://www.aqmd.gov/docs/default-source/ceqa/comment-letters/2017/102717-710corridor.pdf">http://www.aqmd.gov/docs/default-source/ceqa/comment-letters/2017/102717-710corridor.pdf</a>
27	CARB & AQMD should propose to the Metro Board of Directors and CalTrans the incorporation of a Clean Truck Program that prioritizes zero emissions technology into any freeway project EIR published, effective 1/1/2021.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-26</b>		South Coast AQMD staff is supportive of opportunities to provide for zero emissions technology. Because zero emissions technologies are not currently feasible or available for all sectors, there may be times where deployment of zero emissions technology is not possible for a given project. However, where incorporation of zero emissions technology is possible we request that the use of such technology be considered.

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
28	AQMD should include more efforts to support truck drivers. Too many responsibilities now fall mostly on individual truckers. Truckers need places to rest legally without causing idling emissions in neighborhoods and need more support in transitioning to clean fuels.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-16</b>		South Coast AQMD and CARB recognize the importance of supporting truck drivers. Chapter 5b, Action A, includes a commitment from CARB to have CARB's Community Pollution Enforcement Group work with local municipalities and law enforcement to help establish truck parking zoning to move truck parking from local neighborhoods to approved parking locations. South Coast AQMD staff will focus outreach efforts on independent truck owners and operators for incentive funds, prioritizing zero emission trucks where commercially available, through Action F.
29	As this action (5b, Action C) relates to enforcement, consider bringing these reports to the CARB Community Pollution Enforcement Workgroup (to be established per Chapter 5b, Action A).	Gateway Cities Council of Governments <b>Comment 6-1</b>		Chapter 5b, Action A, establishes CARB's Community Pollution Enforcement Group, which would work with local stakeholders, including the CSC, to address community issues. Chapter 5b, Action C, commits to conducting quarterly enforcement sweeps, evaluating the findings, seeking input from CSC, and reporting back to CSC periodically.  South Coast AQMD staff recognizes that there is overlap in these CARB enforcement efforts, and has updated the metric to Chapter 5b, Action C to state, "Number of enforcement sweeps per quarter and CSC and CARB Pollution Enforcement Workgroup updates"
30	For programs where CARB and AQMD are not jointly responsible entities, such as for this action (5b, Action E),	Gateway Cities Council of Governments		An example of CARB and South Coast AQMD collaboration is community outreach, such as, the joint CARB and South Coast AQMD Railyard ISR Workshops in the San Bernardino,

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
	how will they collaborate or coordinate?	<b>Comment 6-2</b>		<p>Muscoy and East Los Angeles, Boyle Heights, West Commerce AB 617 communities. CARB staff presented statewide concepts to address emissions from rail operations including: 1) establishing a locomotive emission reduction spending account 2) Establishing an in-use locomotive remanufacture limit 3) adopting the U.S. EPA 30-minute idling limit and 4) genset repurposing. South Coast AQMD staff presented concepts for 1) an Indirect Source Rule (ISR) to reduce exposures from locomotive maintenance emissions 2) an ISR to require engineering plans for zero emissions operations 3) a new incentive program focused on the cleanest locomotive use 4) evaluating new monitoring approaches for 4 in-use locomotives. CARB and South Coast AQMD staff are continuing to closely coordinate their efforts on this rulemaking and will continue to take a similar approach on other rulemaking efforts.</p> <p>Additional examples of collaboration between CARB and South Coast AQMD include discussion on emissions information, regulatory development and incentive opportunities.</p>
<b>31</b>	Clarify the meaning, purpose, and accomplishments of including this action (5b, Action H). What freeway projects are there in the SELA	Gateway Cities Council of Governments <b>Comment 6-3</b>		The Southeast Los Angeles (SELA) community is surrounded by the Interstate 105 to the south, Interstate 110 to the west, and Interstate 710 (I-710) to the east. The SELA community has

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
	community besides CA-91, 1-5 and 1-710?			<p>consistently expressed concern about emissions from heavy-duty trucks traveling along the I-710.</p> <p>By committing to Chapter 5b, Action H, South Coast AQMD staff can identify future freeway projects within the community and take part in the review process under the California Environmental Act (CEQA). This would allow South Coast AQMD staff to submit letters responding to proposed projects, and comment on the potential local impact to the SELA community.</p> <p>More information about the I-710 Corridor Project here: <a href="https://www.metro.net/projects/i-710-corridor-project/">https://www.metro.net/projects/i-710-corridor-project/</a></p> <p>More Information about the I-105 ExpressLanes Project here: <a href="https://www.metro.net/projects/i105-expresslanes/">https://www.metro.net/projects/i105-expresslanes/</a></p>
32	How will this be further defined? Will the CSC and public have opportunities for input? What will be the governing committee or body for this action (5b, Action I)?	Gateway Cities Council of Governments <b>Comment 6-4</b>		<p>Mobile measurements of key indicator pollutants of truck emissions over time can help identify locations where concentrations of pollutants are persistently elevated and help assess the impact of truck emissions on community exposure, particularly at schools, day care centers and other sensitive receptors. South Coast AQMD staff will provide annual updates on monitoring results in future CSC meetings and through publication of progress reports to gather CSC input to identify next actions. The CSC, in conjunction with</p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				the South Coast AQMD and CARB, serves as the body that oversees these and all actions in the SELA CERP.
<b>Rendering Facilities</b>				
33	Should there be an explanation of what rendering facilities are similar to the explanation for metal processing facilities?	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-5</b>		Appendix 5 includes a Rendering Facilities section that provides details about community concerns, emissions, air monitoring, and regulatory and enforcement efforts around rendering facilities in SELA.
34	General comment: Is odor the only concern with rendering facilities? Are there other types of emissions from these facilities such as dust, particulate matter, other compounds, etc.? If so, should there be some way to measure and address other outputs from these facilities?	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-6</b>		The CSC identified odors from rendering facilities as the main concern from this air quality priority, which is why the CERP actions specifically address this concern. However, these facilities are also subject to additional rules that help control emissions of other pollutants. For example, although not specifically identified by the CSC, fugitive dust and particulate matter from rendering facilities are subject to South Coast AQMD Rule 403 – Fugitive Dust. Members of the public may submit a dust or other complaint at 1-800-CUT-SMOG or online at <a href="http://www.aqmd.gov">www.aqmd.gov</a> .

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
36	Is the goal simply to reduce odors from existing facilities or prevent new facilities from emitting odors?	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-7</b>		The actions outlined in Chapter 5c apply to all rendering facilities in the SELA community and emissions study area. South Coast AQMD Rule 415 – Odors from Rendering Facilities, applies to new and existing rendering facilities that process raw rendering materials; and wastewater associated with rendering. New rendering facilities would have to comply with the requirements in Rule 415 (e.g., odor best management practices, permanent total enclosure or operation in closed system).
37	What is AQMD's role in permitting when new rendering facilities are established? This is something our two agencies are beginning to discuss, but I wonder if there can be some inclusion about review and inspection of proposed facilities to ensure compliance with AQMD's rules. Consider a goal regarding coordination with land use agencies/County Green Zones Program.	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-8</b>		Chapter 5c, Action C, was modified to include "Collaborate with local land-use agencies and L.A. County Green Zones Program to identify proposed new rendering facility projects in the Southeast Los Angeles Community and identify South Coast AQMD rules that apply to the facilities".
38	We support the community's call for stronger action relating to odors from rendering plants.	Chris Chavez (Coalition for Clean Air) <b>Comment 3-8</b>		Chapter 5c includes four distinct actions to meet the goal to reduce odors from rendering facilities. Each action was carefully written to address the specific concerns that CSC has voiced. For example, providing information on filing odor complaints, tracking complaint responses, updates to

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				complainants, and identifying remaining odor concerns after Rule 415 emission control requirements go into effect.
39	Add an overall goal to eliminate noxious odors from rendering facilities	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-17</b>		<p>The first goal of Chapter 5c is to “Reduce Odors from Rendering Facilities”. There are four different actions written in the Draft CERP to help achieve this goal. Additional details on these actions are listed above.</p> <p>The goal is to eliminate odor nuisance from rendering facilities. In the CERP, South Coast AQMD staff commits to achievable short-term goals to reduce odors from these facilities. While Rule 415 will be fully implemented in 2023, portions that can be implemented already – such as Best Management Practices (BMPs) – are currently required and enforced.</p> <p>For example, one of the BMPs is to have a limit on the holding time for raw materials, and inspectors have issued multiple violations at rendering plants when noncompliance with this BMP has been found. Staff will continue to inspect rendering facilities and to take enforcement action, as appropriate.</p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
40	Identify specific monitoring equipment in the CERP, since odorous compounds can be difficult to detect. Identify an expeditious deadline for a monitoring plan, with public comment.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) Comment <b>Comment 4-18</b>		Information on specific monitoring equipment to be used for this AQ priority is provided in the sections 5.5 of the CAMP (mobile platform #3). A draft of the CAMP document was released as part of the CERP and South Coast AQMD is accepting public comments.  The CAMP is available here: <a href="http://www.aqmd.gov/nav/about/initiatives/community-efforts/environmental-justice/ab617-134/ab-617-community-air-monitoring/communities/southeast-los-angeles-community-air-monitoring">http://www.aqmd.gov/nav/about/initiatives/community-efforts/environmental-justice/ab617-134/ab-617-community-air-monitoring/communities/southeast-los-angeles-community-air-monitoring</a>
41	Report to community on status and progress on compliance with Rule 415	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-19</b>		Chapter 5c, Action C, includes a commitment from South Coast AQMD staff to provide an annual summary to the CSC.

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
42	Regarding exploring the schools odor notification process – also work with Community Groups that already work with schools to help facilitate this process, including Huntington Park High School and others, and report on progress to CSC biannually.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-20</b>		Chapter 5c, Action E, was updated to: “Explore the development of an odor event notification system, for schools and sensitive receptors. Consult with Community Groups that work with schools on key considerations for an odor event notification system (e.g., objectives of the notification system), and update CSC biannually on odor event notification system progress”
43	I recognize Rule 415 is being implemented in 2023, but are there any additional controls above and beyond what 415 requires that we could possibly put in place sooner? This is just a suggestion as this seems to be something that has been a huge nuisance for over 20 years.	Edith Moreno (SoCal Gas) <b>Comment 2-4</b>		While Rule 415 will be fully implemented in 2023, portions that can be implemented already – such as Best Management Practices (BMPs) – are currently required and enforced. For example, one of the BMPs is to have a limit on the holding time for raw materials, and inspectors have issued multiple violations at rendering plants when noncompliance with this BMP has been found. Staff will continue to inspect rendering facilities and to take enforcement action, as appropriate.
44	(5c, Action E) Add "number of notification systems installed for schools and sensitive receptors" as a metric.	Gateway Cities Council of Governments <b>Comment 6-5</b>		The purpose of Chapter 5c, Action E, is to 1) explore the development of a notification system, 2) identify the types of notifications that would be effective, and 3) determine the infrastructure of the system (e.g., email or web notifications).

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				<p>For example, South Coast AQMD's Rule 1118 - Control of Emissions from Refinery Flares, requires that certain facilities submit notifications and reports to the South Coast AQMD. Flare event notifications reported to South Coast AQMD from the facilities subject to Rule 1118 can be received by the public via email. Therefore, such notification systems may not be systems that are "installed", so that should not be part of the metric.</p> <p>The metric for Chapter 5c, Action E, has been updated to, "Biannual updates on odor event notification progress to the CSC"</p>
<b>Green Spaces</b>				
45	CERP should specify planting of tree species which are known for their ability to trap particulate matter and dust while also being able to provide shade, which can indirectly reduce emissions by helping to reduce energy consumption for air conditioning.	Lizette Ruiz (Active Residents – South Gate)		Chapter 5d, Action A, is modified to read "Collaborate with land-use, state and local agencies, non-profit organizations, <u>and the CSC</u> to develop a list a low-VOC and drought tolerant trees." Also, South Coast AQMD staff will review the CAL FIRE calculations as part of this development process.

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
46	How would the installation of vegetative buffers along freeways planned and executed?	Niki Okuk (Active Residents – Florence-Firestone)		South Coast AQMD will work with the CSC to identify freeway segments of concern in the community. Next, South Coast AQMD will identify the agency (Caltrans, LA Metro, etc.) responsible for maintaining that segment and see if there are plans to install any kind of vegetative buffers. Efforts to encourage installation of vegetative buffers will then be based off those plans.
47	Should we include an action to fund vegetative buffers along parts of I-710 to help capture some of the particulate emissions associated with the freeway expansion?	Lizette Ruiz (Active Residents – South Gate)		<p>It is known that the I-710 expansion project has dedicated funding towards vegetative buffers for air pollution mitigations efforts. South Coast AQMD staff will work with LA Metro to identify existing efforts to fund vegetative buffers in Southeast Los Angeles and explore new funding opportunities through Community Air Protection Incentives, other local, state and federal programs.</p> <p>Section 2.3.2 and Section 3.6 of the Recirculated Draft Environmental Impact Report/Supplemental Draft Environmental Impact Statement (RDEIR/SDEIS) discuss maximizing trees, shrubs, and foliage that are drought resistant and provide biosequestration/biofiltration.</p> <p>The I-710 Corridor Project RDEIR/SDEIS can be found here:  <a href="http://media.metro.net/projects_studies/I710/images/DEIR-SEIS/RDEIR_SDEIS-July-2017.pdf">http://media.metro.net/projects_studies/I710/images/DEIR-SEIS/RDEIR_SDEIS-July-2017.pdf</a></p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
48	Goal A mentions collaboration with land-use agencies. It would be good to also include Public Works as they can implement greening along right-of-ways and Parks and Rec/public parks agencies as an additional agency. Aside from requiring landscaping on private property, the Planning Department has little to no control in actually designating new open/green spaces that would be designed and maintained by Parks and Rec.	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-9</b>		Chapter 5d, Action A, modified to read “Collaborate with land-use, state and local <u>agencies (e.g., Public Works, Parks and Recreation)</u> , non-profit organizations, and the CSC to develop a list a low-VOC and drought tolerant trees”
49	CERP should include a metric to evaluate the progress made towards increasing the tree canopy in SELA in Action A for this air quality priority. Another metric which could be included to assess progress on this action could be the completion of the recommended list of tree-types for planting to increase green spaces. Assessment methods for tree canopy programs in the cities of Commerce and Lynwood might be helpful in developing this metric.	Stephanie Cadena (Gateway Cities Council of Governments)		Chapter 5d, Action C, was modified to add the following, “Collaborate with nonprofits, local, and regional agencies to identify potential metrics to measure progress in increasing tree canopy in SELA. “

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
50	Create state and local partnerships that would ensure new housing developments in SELA incorporate Green Spaces in their building designs. In instances where affordable housing sites are being contemplated, collaborate with state agencies like Department of Housing and Community Development to incentivize integration of Green Spaces.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-21</b>		Chapter 5d, Action C states “Collaborate with nonprofits, local, and regional agencies to provide letters of support and air quality information for urban greening funding opportunities, including maintenance.” Through this action, South Coast AQMD staff is looking to partner with appropriate organizations or entities to encourage green spaces in the community, including new development projects (e.g., new affordable housing projects).
51	Incentivize green spaces to all new developments within SELA (this includes, bikeways, river paths, transit corridors).	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-22</b>		Chapter 5d, Action B, includes “evaluate opportunities to use future settlement funds to support community green space projects ( <u>e.g., bikeways, river paths, transit corridors</u> ). The evaluation would include the use of settlement funds to incentivize green spaces in the community.
52	Identify appropriate sites where local communities have access to land for community gardens.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli		Local land-use agencies (e.g., cities and Los Angeles County) have the authority to identify and designate land uses for green space and community gardens. For example, the City of South Gate identified designated green space uses in the

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
		Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-23</b>		South Gate General Plan 2035 that is available at <a href="https://www.cityofsouthgate.org/192/General-Plan">https://www.cityofsouthgate.org/192/General-Plan</a> . The South Gate General Plan 2035 sets goals, objectives, policies, and implementation actions on making South Gate a green city. The actions in the CERP respect the land-use policies of the land-use agencies in Southeast Los Angeles and support efforts to improve and expand green space in the community. For example, Action B of Chapter 5d – Green Spaces requires South Coast AQMD staff to evaluate opportunities to use future settlement funds to support community green space projects.
53	(5d, Action A) Consider additional metrics, such as number of agencies identified, potential for tree plantings in the SELA community, and/or number of trees identified. As a follow-up action, consider also "planting" low-VOC and drought tolerant trees.	Stephanie Cadena (Gateway Cities Council of Governments) (Communities for a Better Environment) <b>Comment 6-6</b>		Chapter 5d, Metric(s) A, has been updated to: <ul style="list-style-type: none"> <li>• Number of agencies and nonprofits identified</li> <li>• Number of meetings with land-use agencies, state and local agencies, and nonprofit organizations</li> <li>• Present the list of trees to the CSC</li> </ul> Although South Coast AQMD does not have a program through which to conduct tree planting, Chapter 5d, Action C would facilitate collaboration between South Coast AQMD and relevant agencies to support urban greening projects, such as tree planting.
54	(5d, Action C) Include "reporting of funding opportunities to the CSC and	Stephanie Cadena		Chapter 5d, Action C, has been updated to include, "Collaborate with nonprofits, local, and regional agencies to

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
	local agencies" as a metric or deliverable.	(Gateway Cities Council of Governments) <b>Comment 6-7</b>		identify potential metrics to measure progress in increasing tree canopy in SELA. "
<b>Metal Processing Facilities</b>				
55	Goal G discusses referrals to other agencies. Please include land use agencies (e.g. Planning). Public Health might be appropriate as well.	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-10</b>		Chapter 5d, Action G, was modified to "Make referrals to the appropriate agencies when issues are found during inspections that fall outside of South Coast AQMD's jurisdiction (e.g., Water Board, DTSC, Cal-OSHA, <u>local land-use agencies</u> , and Public Health departments) "
56	Add robust emissions reductions to the metals processing air quality priority: at least 50% reductions by 2025, at least 75% by 2030 in SELA	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-4</b>		Establishing emission reduction targets for metal processing is challenging as there are a wide variety of toxic air contaminants that vary for the different metal processing activities. Fugitive emissions are generally a significant portion of metal processing emissions but are very difficult to quantify. Other metrics such as adopted and amended rules that are establishing point and fugitive point source control requirements may be a better indicator that these sources are being addressed.

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
57	It is important to add an overall goal to eliminate community exposure to hazardous metals processing and nuisance odors and noise.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4- 9</b>		Chapter 5e was updated to include the CSC's goal to eliminate community exposure to metal toxic air contaminants, hazardous metals processing, odors and noise from metal processing facilities. This goal and 8 various actions in Chapter 5c will help achieve the goal are aimed at achieving the community's goal, to reduce and eliminate exposure to metal toxic air contaminants to the maximum extent feasible.
58	AQMD should review existing regulations such as Bay Area metals processing rules and others, for potential inclusion of any strong measures into an AQMD regulation.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-10</b>		South Coast AQMD staff generally does review rules and regulations at other agencies. Staff will take a closer look at other air quality agencies to identify if there are any regulatory gaps in South Coast AQMD's toxics rules that are regulating metal processing facilities. In most cases, South Coast AQMD toxic rules are more stringent than other California air district rules and CARB air toxic control measures.
59	Include installation of permanent monitoring, so as not to overly rely on monitoring snapshots in time.	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli		Monitoring activities in SELA will include measurements of air toxic metals at a fixed monitoring station, which will be established as part of the AB 617 program. This type of measurement is initially conducted for a year and then repeated at the end of the AB 617 program to establish

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
		Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-11</b>		baseline concentrations for the pollutants of interest and to assess the effectiveness of emission reduction strategies.  The monitoring strategy to address Metal Processing Facilities is comprised of fixed monitoring, mobile monitoring, and follow-up measurements and investigative actions, as appropriate (see Appendix 6, section 7.3 of the CERP for more details).
60	Develop a health-protective setback (at least 2500 ft or more) for any new metals processing facilities and/or permits, between the facility and sensitive receptors and neighbors	Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-24</b>		The AB 617 legislation does not expand South Coast AQMD's authority to address land-use issues. However, the South Coast AQMD is collaborating with land-use agencies and programs, such as the Los Angeles County Green Zones Ordinance, to support setbacks and other measures to reduce residents' exposures to toxic metals.  South Coast AQMD staff wrote a comment letter on the Los Angeles County Draft Green Zones Program (Proposed Project) and Notice of Preparation (NOP) for the Proposed Project on August 24, 2020. In this letter, South Coast AQMD staff recommended that the Lead Agency include requirements in the Green Zones Program consistent with the CARB Air Quality and Land Use Handbook to avoid siting sensitive land uses within 1,000 feet of chrome platers. This recommendation is based on scientific studies that showed

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				<p>that potential health risk drops off rapidly, with over 90 percent reduction in risk within 300 feet.</p> <p>The letter from South Coast AQMD staff is available here: <a href="http://www.aqmd.gov/docs/default-source/ceqa/comment-letters/2020/August/LAC200616-01.pdf">http://www.aqmd.gov/docs/default-source/ceqa/comment-letters/2020/August/LAC200616-01.pdf</a></p> <p>The CARB Air Quality and Land-Use Handbook can be found here: <a href="https://ww3.arb.ca.gov/ch/handbook.pdf">https://ww3.arb.ca.gov/ch/handbook.pdf</a></p>
61	Explore development of a notification system for schools and sensitive receptors on public nuisances caused by metals facilities, including dust, noise, odors and others.	<p>Dilia Ortega, Lena Ruvalcaba, Natalie Martinez, Citlalli Gutierrez, Dayana Ortega (Communities for a Better Environment) <b>Comment 4-20</b></p>		<p>Chapter 5e, Action I, was added to the CERP and states, “Explore the development of e-mail notifications, for schools and sensitive receptors. Consult with Community Groups that work with schools on key considerations for the e-mail notifications (e.g., objectives of the notifications), and update CSC biannually on e-mail notifications progress”.</p> <p>Members of the public may submit a dust, nuisance, or other complaint at 1-800-CUT-SMOG or online at <a href="http://www.aqmd.gov">www.aqmd.gov</a>. Additionally, to encourage the posting of South Coast AQMD compliant hotline for industrial uses, the South Coast AQMD staff wrote a comment letter on the Los Angeles County Draft Green Zones Program, which includes portions of the SELA community, on August 24, 2020. In this</p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
				<p>letter, South Coast AQMD staff recommended that the Lead Agency include requirements in the Green Zones Program to include signage requirements for industrial uses, including metal processing facilities, within the Green Zone Districts and subject to South Coast AQMD rules. South Coast AQMD staff recommends that signage include information about how to submit air quality complaints by phone by calling 1-800-CUTSMOG or online by visiting <a href="http://www.aqmd.gov">www.aqmd.gov</a>. An example of signage requirements is in Paragraph (K) of South Coast AQMD Rule 1430 – Control of Emissions from Metal Grinding Operation at Metal Forging Facilities available at <a href="http://www.aqmd.gov/docs/default-source/rule-book/reg-xiv/rule-1430.pdf">http://www.aqmd.gov/docs/default-source/rule-book/reg-xiv/rule-1430.pdf</a>.</p> <p>The comment letter from South Coast AQMD staff is available here:  <a href="http://www.aqmd.gov/docs/default-source/ceqa/comment-letters/2020/August/LAC200616-01.pdf">http://www.aqmd.gov/docs/default-source/ceqa/comment-letters/2020/August/LAC200616-01.pdf</a></p>
62	(5e, Action A) Include "number of participants" as a metric.	Gateway Cities Council of Governments <b>Comment 6-8</b>		Chapter 5e, Action A, a metric was included that states, "Number of informational workshop participants"
63	(5e, Action E) Include "reporting of elevated levels of air toxic metals to the CSC" to the metrics.	Gateway Cities Council of Governments		Chapter 5e, Action E, a metric was included that states, "Report air monitoring findings to CSC".

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
		<b>Comment 6-9</b>		
<b>Railyards and Locomotives</b>				
<b>64</b>	CERP should incorporate language encouraging increasing the accessibility of fuel cell refueling infrastructure at railyards since railyard equipment can be powered through fuel cell technology.	Mark Sheldon (Member of the public)		<p>South Coast AQMD staff have presented Railyard ISR Workshops concepts to address emissions from rail operations including requiring engineering plans for zero emission operations. These zero emission operation fuel types are not specified and can be interpreted as either electric, fuel cell, or other viable zero emission options.</p> <p>The four South Coast AQMD Railyard ISR concepts being developed include: 1) an ISR to require engineering plans for zero emissions operations, 2) a new incentive program focused on the cleanest locomotive use, 3) evaluating new monitoring approaches for 4 in-use locomotives, and 4) reduce exposures from locomotive maintenance emissions.</p> <p>Additional information on the South Coast AQMD Railyard ISR rule development and other facility based mobile source measures, please visit:  <a href="http://www.aqmd.gov/home/air-quality/air-quality-studies/special-monitoring/clean-air-plans/air-quality-mgt-plan/facility-based-mobile-source-measures">http://www.aqmd.gov/home/air-quality/air-quality-studies/special-monitoring/clean-air-plans/air-quality-mgt-plan/facility-based-mobile-source-measures</a></p>

#	Comment <sup>1</sup>	Commenter(s)	Included =  <u>Not</u> Included= 	Staff Response
65	Has a baseline level of emissions been established for the railyards and locomotive air quality priority to help track future progress addressing this concern? Also, has an emissions inventory been established for the SELA community which can be used to help develop such reduction targets and track the progress made towards achieving them?	Stephanie Cadena (Gateway Cities Council of Governments)		CARB staff are committed to present the updated locomotive line-haul and switcher inventories to the SELA CSC mid-2021. Additionally, for community specific rail and railyard emissions for SELA, CARB can work to allocate the emissions to develop an updated locomotive/railyard community inventory to address this comment.

General Industrial Facilities				
66	CERP should include language outlining follow-up actions if an industrial facility is found to exceed emissions standards and encouraging the adoption of best available control technologies.	Lizette Ruiz (Active Residents – South Gate)	◆	<p>Over the next six months, South Coast AQMD staff will work with the SELA CSC to identify the types of industrial facilities of concern. The CSC will then prioritize emissions sources and identify potential air monitoring or emissions and exposure reduction measures, if necessary. Once this information is identified, staff can assess the state of control technologies currently being used by these facilities before evaluating the best available control technologies/best available retrofit control technology which those facilities might be able to adopt.</p> <p>South Coast AQMD staff will identify opportunities to use incentive funds to encourage the adoption of technologies above and beyond rule requirement.</p> <p>Facilities that have issues complying with South Coast AQMD rules are issued violations and can be brought before the Hearing Board to develop a plan for the facility to come into compliance.</p>
67	The CERP should encourage the use of zero-emission power sources in the industrial sector.	Mark Sheldon (Member of the public)	◆	<p>Over the next six months, South Coast AQMD staff will work with the SELA CSC to identify the types of industrial facilities of concern. The CSC will then prioritize emissions sources and identify potential air monitoring or emissions and exposure reduction measures, if necessary. Once this information is identified, staff can review this suggestion in consultation with the CSC as potential new actions are developed.</p>
68	Goal B discusses identifying a list of industrial facilities of concern. This should be done in collaboration with	Tahirah Farris (Los Angeles County)	●	<p>Chapter 5g, Action B, modified to read “Work with the <u>CSC and local agencies (e.g., L.A. County Industrial Use Task Force)</u> to identify industrial facilities of concern within the</p>

	other agencies. The County has an Industrial Use Task Force that focuses on the Alameda Corridor. It is still operating as a pilot, but would be great if we could expand this work or at least continue coordination with AQMD and other agencies so we are all aware of the facilities of concern.	Department of Regional Planning) <b>Comment 1-11</b>		SELA emissions study area, provide a list of South Coast AQMD rules applicable to the industrial facilities identified, provide a three (3) year compliance history of the facilities, summarize available emissions data and air monitoring data collected at or near facilities, and other sources of information.”
69	Clarity over the implementation of Best Available Retrofit Control Technology (BARCT) requirements is needed, especially considering the heavy industrial presence in the region.	Chris Chavez (Coalition for Clean Air) <b>Comment 3-7</b>	●	Please see Response 66, which describes the process we will undertake to prioritize and address facilities within this General Industrial air quality priority. Appendix 3a provides additional information regarding BARCT requirements, including the specific South Coast AQMD rules that implement such requirements. Appendix 3a also includes a list of NOx RECLAIM facilities within this community that may be subject to BARCT. Additional non-RECLAIM facilities may also be subject to BARCT requirements, but this assessment is still ongoing.
70	Recommends that air monitoring campaigns for the CAMP take into consideration facilities operating overnight.	Lizette Ruiz (Active Residents – South Gate)	●	Mobile air monitoring efforts occur at different times throughout normal business hours – from morning to late afternoon – to assess if there are any locations with persistent elevated levels or air pollution. If these locations are identified, stationary air monitors are placed in that area for 24 hours to determine if an emission source can be determined. This can then lead to enforcement or further investigative actions to reduce emissions at a given facility, including scheduling mobile air monitoring efforts during off hours for certain pollutants.
71	Through the AB 617 process CARB developed “Regulation for the Reporting of Criteria Air Pollutants and Toxic Air Contaminants” to implement statewide annual reporting of criteria air pollutant and	Edith Moreno (SoCalGas) <b>Comment 2-5</b>	●	Chapter 5g, Action A, was modified to include, “Conduct an annual community workshop with CARB to educate the community on the Criteria Pollutant and Toxics Emissions Reporting (CTR) process and share the data that has been collected from facilities in the SELA community. South Coast AQMD and CARB to help community interpret results

<p>toxic air contaminant emissions data from facilities. The reporting regulation became effective January 1, 2020. In Chapter 5g, we need to include CARB as a responsible entity as the community needs to be aware of this new regulation and we need to know what is being reported. CARB and SCAQMD need to work together to figure out how to use the CTR as a tool to identify which facilities are toxics hotspots. As 2020 data will be available mid next year, I propose we have CARB give us an update during Q2 of 2021. I recommend we take out Action A as an informational handout is just too generic and replace it with the following action:</p> <p>Action: Conduct an annual community workshop with CARB to educate the community on the CTR process and share the data that has been collected from facilities in the SELA community. SCAQMD and CARB to help community interpret results and identify industrial facilities with highest toxics emissions.</p> <p>Responsible Entity: CARB/AQMD</p> <p>Metric: Conduct CTR Public Workshop and Identify Industrial Facilities of Highest Concern</p> <p>Timeline: Annual. Starting Q3 2021/End 2025.</p>			<p>and identify industrial facilities with highest toxics emissions.”</p>
--	--	--	---

Other				
72	Does South Coast AQMD address emissions from planes flying over the community? Also, does the agency address situations such as the incident in January when a Delta jet dumped gasoline over the community?	Jasmine Beltran (Active Residents – South Gate)		<p>South Coast AQMD has an incidence report program to address specific situations including the example mentioned. However, emissions from airplanes flying overhead are not appropriately measured by air monitors at ground level. In general, airplane emissions are regulated by international organizations and the U.S. EPA, and not at the state or local level.</p> <p>South Coast AQMD issued a Notice of Violation (NOV) on January 17, 2020 to Delta Airlines following the jet fuel dump that impacted students, teachers and other members of the public in Los Angeles County.</p> <p>The NOV alleges that Delta Airlines caused a public nuisance in violation of the agency’s Rule 402 and California Health and Safety Code Section 41700. South Coast AQMD’s investigation was prompted by community complaints which resulted in inspectors being dispatched to several locations. Complaints regarding the exposure to the jet fuel were reported at multiple schools within the Los Angeles Unified School District, the Cudahy Public Library, and two schools within the El Rancho Unified School District.</p> <p>Once issued, NOV’s can result in civil penalties. In some cases, the company can choose to implement measures to reduce emissions or otherwise prevent further violations. If no settlement is reached, a civil lawsuit may ultimately be filed in superior court. South Coast AQMD has coordinated with, among others, the Los Angeles County Fire Department, the Los Angeles County Department of Public</p>

				Health, the Los Angeles Unified School District and the El Rancho Unified School District.
73	Are there plans to incorporate drones into the Community Air Monitoring Plan (CAMP) to conduct air measurements?	Jasmine Beltran (Active Residents – South Gate)	◆	This is a technology which South Coast AQMD is evaluating but is not currently being used for air measurements. The technology is currently under development and could possibly be a useful tool in the future to make air measurements in locations which are difficult to access, such as landfills. However, it is not currently being considered for AB 617 given its early stages of development.
74	A summary of the CAMP is provided. Is the full plan available somewhere else or will that be detailed in Appendix 6?	Tahirah Farris (Los Angeles County Department of Regional Planning) <b>Comment 1-12</b>	●	The Community Air Monitoring Plan is available at: <a href="http://www.aqmd.gov/nav/about/initiatives/community-efforts/environmental-justice/ab617-134/ab-617-">http://www.aqmd.gov/nav/about/initiatives/community-efforts/environmental-justice/ab617-134/ab-617-</a>
75	For the General Industrial air quality priority, has South Coast AQMD considered replacing the large amount of diesel generators with zero-emission alternatives?	Mark Abramowitz (Member of the public)	●	South Coast AQMD staff plans to continue working with the CSC to develop the General Industrial air quality priority in the upcoming months to identify and address emission sources of concern. Incentives could then be provided for back-up diesel engine alternatives such as fuel cells, battery storage, or cleaner combustion technologies. South Coast AQMD staff is also working to encourage alternatives to diesel back-up generators district-wide through upcoming rulemaking and the 2022 Air Quality Management Plan.

76	Where is the budget for the South Coast AQMD program coming from? And has South Coast AQMD prioritized the CERP actions or air quality priorities to receive the allotted funding to address those concerns?	Stephanie Cadena (Gateway Cities Council of Governments)		The funding allotted to the AB 617 program is never guaranteed as it is determined on a year-by-year basis by the state legislature. There is approximately \$70M available in AB 617 incentive funds for all of the South Coast AQMD communities to support the third year of the program and the agency will seek to identify emission reduction projects to effectively use those funds. Also, South Coast AQMD held the Incentives Strategies Public Consultation Meeting on October 15 <sup>th</sup> to seek input from CSC members from the different AB 617 communities as to how to equitably distribute those funds.
Chapter 4				
77	This chapter does not provide additional details on the additional enforcement and inspection to be conducted in SELA. Reads to me as business as usual activities would be conducted.	Edith Moreno (SoCal Gas) <b>Comment 2-1</b>		<p>The intention of the chapter was to introduce the enforcement process and approach for both CARB and South Coast AQMD. The actions to address community concerns through compliance and enforcement – which constitute enhanced enforcement, and not merely business as usual, are written into Chapter 5.</p> <p>The following actions are examples of actions that go beyond business as usual:</p> <ul style="list-style-type: none"> <li>• Chapter 5b, Action C, “CARB to collaborate with South Coast AQMD to conduct quarterly enforcement sweeps, evaluate findings, seek input from CSC, and report back to CSC periodically”</li> <li>• Chapter 5c, Action C, “Continue complaint response including SELA complaint tracking, provide timely updates to complainants, continue</li> </ul>

				<p>Rule 415 compliance inspections, and provide an annual summary of findings to the CSC. “</p> <ul style="list-style-type: none"> <li>• Chapter 5e, Action G, “Make referrals to the appropriate agencies when issues are found during inspections that fall outside of South Coast AQMD’s jurisdiction (e.g., Water Board, DTSC, Cal-OSHA, local land-use agencies, and Public Health departments)”</li> <li>• Chapter 5f, Action I, “CARB to prioritize the SELA community for enforcement of the TRU Regulation with semi-annual inspections and report the compliance rate to CSC “</li> <li>• Chapter 5f, Action J, “CARB to prioritize the SELA community for enforcement of the Cargo Handling Equipment (CHE) Regulation by conducting an annual audit for each railyard detailing: <ul style="list-style-type: none"> <li>○ Total number of regulated pieces of equipment – both yard and non-yard trucks at each rail facility</li> <li>○ Compliance rates for opacity and performance standards at each rail yard</li> </ul> </li> </ul> <p>CARB will be establishing a Community Pollution Enforcement Workgroup under Chapter 5b, Action A, and will work with local stakeholders, including the CSC, to address community issues related to enforcement.</p>
78	<p>Figure 4-1 is meant to show the number of complaints and the response, but according to the data presented in Appendix 4 (Table 4-2) out of the 692 complaints received, 632 resulted in no action. There is a big disconnect here and I realize that any nuisance odor or fugitive emission</p>	<p>Edith Moreno (SoCal Gas) <b>Comment 2-2</b></p>		<p>Complaints vary significantly depending on the type of complaint (odor, dust, smoke, etc.), and the alleged source (e.g., a particular facility, jobsite, or industry).</p> <p>For odor complaints, there may be small windows of opportunity for inspectors to detect the odors at issue depending on weather conditions and the particular type of facility or operation. Many inspectors are assigned to</p>

	<p>may not be present when an inspector comes by, but my recommendation would be to increase the frequency of inspection (e.g. once or twice a week for a month?) in the area where the complaint originated. The current enforcement actions in place are just not enough.</p>			<p>geographic areas and will make note of repeated or ongoing community concerns. In some situations, enforcement staff will conduct field operations (including during nights and/or weekends, when warranted) designed to position inspectors close to sites or areas where odor complaints are being received, so that they can respond more quickly and have a better chance to identify emission sources. We encourage community members to lodge complaints with South Coast AQMD every time they experience odors or other air pollution concerns. The complaints are documented and tracked in our system and allow us to identify ongoing problems that we can attempt to address through proactive field operations.</p> <p>For complaints associated with specific equipment at a facility, inspectors conduct focused inspections of the equipment or processes in question when responding to the complaints. That means more frequent in-person visits to the facility and enforcement actions for any violations observed while on-site.</p>
79	<p>If possible, could Figure 4-2 be modified to show the different categories of facility types that received an NOV or NC? As I looked at all of the facilities in the appendix there are many schools and even city facilities that are getting dinged for things like not updating their permit. Are these NOVs actually being given to a toxics facility of concern? It's like giving a speeding ticket. People are</p>	<p>Edith Moreno (SoCal Gas) <b>Comment 2-3</b></p>	◆	<p>The purpose of Figure 4-2 is to provide a global look at the number of NCs and NOVs issued annually in the SELA community. We enforce permit requirements and rules/regulations uniformly across all different types of air pollution sources. So while a certain portion of the notices may be issued to cities or schools, there are also notices issued to many other kinds of sources, including toxics facilities.</p> <p>South Coast AQMD takes toxics sources very seriously. We have a specialized enforcement team that is trained to</p>

	still going to speed. In my opinion, the figure is really misleading.			<p>inspect and evaluate – and focus exclusively on – facilities/sites where hazardous air pollutants are found. Some of these industries receive more frequent inspections. For example, we attempt to inspect certain types of facilities that use hexavalent chromium in their operations on a quarterly basis.</p> <p>We can provide to the CSC a future update on the breakdown of the types of facilities, industries, and sectors where NCs and NOVs are being issued.</p>
--	---	--	--	--

## Executive Summary

---

The Southeast Los Angeles Community Emissions Reduction Plan (CERP) is a critical part of implementing Assembly Bill (AB) 617 (Health and Safety Code Section 44391.2), a California law that addresses the disproportionate impacts of air pollution in environmental justice (EJ) communities. The AB 617 program invests new resources and focuses on improving air quality in EJ communities. The Community Emissions Reduction Plan (CERP) outlines goals and actions by the Community Steering Committee (CSC), the South Coast AQMD, and the California Air Resources Board (CARB) to reduce air pollution in the Southeast Los Angeles community. An essential piece of the program is partnership and collaboration with the community to address the community's air quality priorities in the CERP. The CSC is a diverse group of people who live, work, own businesses, or attend school within the community. Local land-use agencies, public health agencies, regulatory agencies, and elected officials are represented on the CSC. The CSC guides the development and implementation of the CERP.

One year from when CARB designates a new AB 617 community, the local air district must develop and adopt a CERP in consultation with CARB, community-based organizations, affected sources, and local governmental bodies.<sup>1</sup> The Southeast Los Angeles community had to account for the onset of the COVID-19 pandemic and its impact on the CERP development schedule. Despite a delay in the schedule, South Coast AQMD staff and the Southeast Los Angeles CSC worked together to develop this plan for consideration by South Coast AQMD's Governing Board in December 2020.

Based on the sources of air pollution impacting the community, the Southeast Los Angeles CSC identified the following air quality priorities to be addressed by this plan:

- Truck Traffic and Freeways
- Railyards
- Rendering Facilities
- Metal Processing Facilities
- Green Space
- General Industrial Facilities

At its core, this plan seeks to address the air quality priorities with actions that reduce air pollution emissions from sources within the community and reduce air pollution exposure to people in the community. This plan includes actions, such as developing and enforcing regulations, providing incentives to accelerate the adoption of cleaner technologies, and conducting outreach to provide useful information to support the public in making informed choices. Additionally, air monitoring efforts will provide critical information to help guide investigations or provide public information. Collaborative efforts with other agencies, organizations, businesses, and other stakeholders will amplify the impact of these actions. Many

---

<sup>1</sup> Assembly Bill 617 44391.2 (b)(2)

of the actions will only be conducted during the implementation timeframe of this plan; however, there are also many actions (such as regulation, ongoing enforcement activities, and certain incentive programs) that will be continuing activities conducted by the South Coast AQMD.

This plan focuses on improving air quality in the Southeast Los Angeles community through concentrated efforts and community partnerships. The CSC will continue to engage in the process of implementing the CERP and tracking its progress.

### The Reader's Guide to the CERP

The opening chapters provide background information about the AB 617 program and timeline (Chapter 1), the CSC process and community engagement (Chapter 2), and information about the air pollution sources in the community (Chapter 3).

Information about past and ongoing enforcement activities conducted by both the South Coast AQMD and CARB staff is provided in Chapter 4. This information will provide insights into future enforcement activities.

The specific actions for emissions and exposure reductions are in Chapter 5 – Actions to Reduce Community Air Pollution. Chapter 5 is organized by air quality priorities, followed by goals and actions to address each air quality priority. The actions are organized in a table that identifies the entities responsible for each action and specifies the timeframe for implementing them. The CERP actions are numbered in the order in which they are presented in each section. The proposed plan will include a California Environmental Quality Act (CEQA) analysis based on the proposed actions.

A summary of the air monitoring approach is in Chapter 6. These efforts are described in much greater detail in the Appendix 6 for the Community Air Monitoring Plan (CAMP).<sup>2</sup> The actions described in Chapter 5 also include specific air monitoring activities related to specific actions in the CERP. Findings from air monitoring will help evaluate next steps, and South Coast AQMD staff will work with the CSC to review findings and make necessary adjustments to the CERP.

The Appendices to the CERP include additional reference material related to the CERP content.

# CHAPTER 1:

## INTRODUCTION

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 1: Introduction

AB 617 was signed into California law in July 2017 and focused on addressing local air pollution impacts in environmental justice (EJ) communities. The bill recognizes that while California has seen tremendous regional air quality improvement, some communities are still disproportionately impacted. Many communities in the South Coast AQMD experience impacts from air pollution sources near places where people live. Major air pollution sources in EJ communities include mobile sources (trucks, locomotives, etc.) and industrial facilities. These communities also experience social and economic disadvantages that add to their cumulative burdens. The AB 617 program accelerates actions and provides additional resources to address air quality in these communities.

In 2018 (Year 1), CARB designated ten AB 617 communities statewide (see Figure 1-1), including three South Coast AQMD communities. On December 13, 2019 (Year 2), CARB designated two<sup>i</sup> additional AB 617 communities in South Coast AQMD (see Figure 1-1), including, Southeast Los Angeles and Eastern Coachella Valley. In October 2020, the South Coast AQMD Governing Board recommended that CARB select South Los Angeles to be a designated AB 617 community.

Figure 1-1: Statewide AB 617 Communities as of 2019

<sup>i</sup> Eastern Coachella Valley, Stockton, and Southeast Los Angeles were designated in 2019 to develop both a community emissions reduction plan and a community air monitoring plan. San Diego was designated in 2018 to develop a community air monitoring plan, which was expanded in 2019 to develop a community emissions reduction plan.

Local air districts are tasked with developing and implementing CERPs and CAMPs in partnership with residents and community stakeholders. The CAMP includes air monitoring efforts to enhance our understanding of air pollution in the designated communities and support CERP implementation.

Dec. 2020	<ul style="list-style-type: none"> <li>Draft CERP considered by South Coast AQMD Governing Board for adoption</li> </ul>

### Purpose of the Community Emissions Reduction Plan (CERP)

The CERP is developed to achieve air pollution emission and exposure reductions within the Southeast Los Angeles community and address this community's air quality priorities. The plan describes the community outreach conducted to develop the CERP and provides emissions and exposure reduction actions, an implementation schedule, and an enforcement plan.

Some actions in the CERP include a series of steps to address certain air quality concerns raised by the CSC. These actions provide flexibility for plan adjustments when new information becomes available. Staff will provide an annual progress report to the South Coast AQMD Governing Board on CERP implementation and identify actions that may require Board action.

## CERP Development Process and Emphasis on Community Input

Community engagement and input to inform both the process and the actions in the CERP are a primary element of the AB 617 program. Public meetings, workshops, conversations, and communications among committee members, South Coast AQMD, and CARB staff contribute to developing and implementing the plan. Chapter 2 describes the CSC and outreach efforts for CERP development.

## About this Community

This community includes South Gate, Florence-Firestone, Walnut Park, Huntington Park, Cudahy, and Bell Gardens (Figure 1-3).

Figure 1-3: Southeast Los Angeles Community Boundary and Emissions Study Area

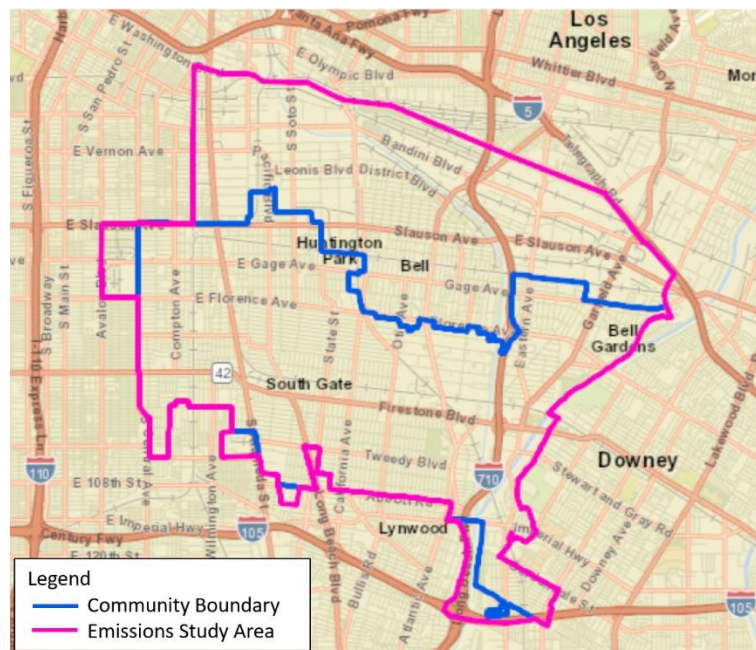

Figure 1-4: Location of the Southeast Los Angeles community in the South Coast AQMD jurisdiction

Figure 1-5: Population of the Southeast Los Angeles community, based on 2010 Census

Figure 1-6: Population by Race/Ethnicity in Southeast Los Angeles and the state of California, based on 2010 Census<sup>ii</sup>

More than 290,000 people live within the Southeast Los Angeles community (Figure 1-3). Most of the people living in this community are Hispanic or Latino (

Figure 1-6). About 2.2% of the residents in this community are White, and 2.3% are African American. The population in this community is younger than the average California population, with about 17.8% of children under the age of 10 years and 6.2% adults over the age of 65 years (Figure 1-7). These age categories are particularly important because young children and older adults can be more sensitive to air pollution's health effects.

<sup>ii</sup> Definitions of races are the same as CalEnviroScreen 3.0.

Figure 1-7: Age profile in Southeast Los Angeles and the state of California, based on 2010 Census

# CHAPTER 2:

## COMMUNITY OUTREACH, COMMUNITY STEERING COMMITTEE AND PUBLIC PROCESS

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 2: Community Outreach, Community Steering Committee and Public Process

### Introduction

Community engagement and a public process were integral parts of the Community Emissions Reduction Plan (CERP) development effort. Key features of the outreach efforts include establishing a Community Steering Committee (CSC), holding monthly meetings, South Coast AQMD and CARB presentations, providing materials via email and a webpage, live-streaming all CSC meetings, and establishing a Technical Advisory Group (TAG). In addition, numerous interactions between CSC members and South Coast AQMD staff occurred in one-on-one discussions or small group teleconference meetings, allowing for in-depth discussions on joint development and creation of the CERP.

### Chapter 2 Highlights

- The Community Steering Committee (CSC) and Technical Advisory Group worked with staff to develop the CERP
- Monthly meetings were held in the community to engage the CSC and public
- The Community Liaison served as the point of contact
- Additional one-on-one, small group, and community meetings also played an important part in community engagement
- A Community Webpage was created as an information portal

### Community Liaisons

Figure 2-1. South Coast AQMD community liaison Gina Triviso discusses CSC membership with community members Victor Ferrer and Liz Ruiz at the kick-off meeting in Huntington Park on January 9, 2020.

A Community Liaison from the South Coast AQMD was designated for the Southeast Los Angeles (SELA) community. The Community Liaison served as the point of contact to communicate with members of the CSC and members of the public to address any concerns regarding logistics and development of the CERP and Community Air Monitoring Plan (CAMP). The Community Liaison ensured communication throughout the process of developing the CERP and

worked with community members to identify the best ways to make information accessible and user-friendly. The South Coast AQMD Community Liaison for this community is Gina Triviso ([gtriviso@aqmd.gov](mailto:gtriviso@aqmd.gov)). In addition, Dianne Sanchez ([dsanchez@aqmd.gov](mailto:dsanchez@aqmd.gov)) serves as the South Coast AQMD point of contact for CERP-related discussions.

## Community Steering Committee (CSC)

A steering committee was formed in late January 2020 for the SELA community, and monthly in-person meetings were organized. Briefly, the main role of the CSC is to provide input and guidance as well as to propose actions for the community plans (i.e., CERP and CAMP). The CSC is comprised of stakeholders with community knowledge to help drive community action and develop the CERP and CAMP. The SELA CSC roster consists of 39 CSC members and 9 alternate members (Table 2-2 in Chapter 2 Appendix). Among these CSC members, 21 primary members and 7 alternate members reside within the community (53.8% resident percentage on the CSC). Some residents also represent community organizations or businesses; there are 6 community organizations and 7 businesses represented on the CSC. Additionally, there are 12 CSC members representing agencies, schools/universities, or offices of elected officials who serve this community.<sup>1</sup>

During the CERP and CAMP development process, the CSC developed the air quality priorities, strategies and actions, and provided feedback on the draft plans. CSC members were also invited to provide suggestions for agenda items for each meeting.

Figure 2-3. Community Steering Committee meeting #1 at Veterans Park in Bell Gardens on February 6, 2020.

The CSC will continue to play a prominent role as the CERP is being implemented, and staff will work with the CSC to adjust the outreach approaches as appropriate as we move into the plan implementation phase.

### CSC Charter

A charter was developed for the CSC and a draft was presented to members at the first meeting on February 6, 2020. CSC members were invited to comment and provide feedback before the charter was announced as final at the CSC meeting on May 7, 2020. The final charter is provided on the webpage: <http://www.aqmd.gov/docs/default-source/ab-617-ab-134/steering-committees/southeast-los-angeles/charter-feb-2020.pdf>

## Community Meetings

Community meetings were hosted by South Coast AQMD staff on an approximately monthly basis in the community, and then virtually due to COVID-19 restrictions. This included a kick-off

<sup>1</sup> Per discussion with California Air Resources Board staff, members representing agencies, schools, universities, hospitals, and offices of elected officials are not included in the calculation of resident percentage on the CSC.

meeting and a series of CSC meetings. Additionally, staff hosted 2 TAG meetings, a meeting to discuss AB 617 Incentive Strategies, and a CERP Question and Answer session; members of the SELA CSC participated in each of these meetings.

### Community Kick-Off Meeting

The SELA Community Kick-Off Meeting was held on Thursday, January 9, 2020 in the community (Figure 2-2). During this meeting, staff presented information about the AB 617 program and the critical role of the CSC in the development and implementation of the

Figure 2-3. SELA community kick-off meeting at Salt Lake Park Recreation Center in Huntington Park on January 9, 2020.

community plans. At the Kick-Off meeting, community members were invited to fill out an Interest Form to express their interest in being a CSC member, and were then notified by email or by phone if they were selected as a member or an alternate.

In addition to receiving information about AB 617, attendees were invited to visit a variety of booths, which provided information about South Coast AQMD programs, community air measurement efforts, and incentive programs.

### CSC Meeting Schedule and Co-Hosts

The CSC meetings were held on an approximately monthly basis (Table 2-1 of Chapter 2 Appendix). All CSC meetings were scheduled to be held in locations within the community, with the first meeting held in February 2020 in Bell Gardens. However, due to the COVID-19 pandemic and the resulting executive orders from the Governor<sup>2</sup>, staff transitioned all CSC meetings to be conducted via video conferencing and by

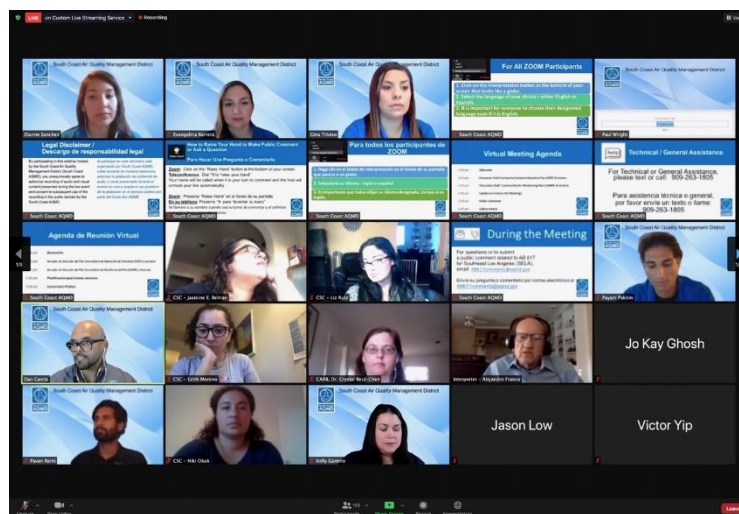

Figure 2-4. CSC meeting # 8 held virtually via zoom on October 29, 2020.

<sup>2</sup> Governor Newsom issued Executive Order N-25-20 on March 12, 2020 and Executive Order N-29-20 on March 17, 2020.

telephone. Because of the additional work needed to manage this transition to virtual formats, two meetings (March and April) were postponed, but CSC meetings resumed in May using the Zoom videoconferencing platform. Each meeting was open to the public, and Spanish interpretation was available at the kick-off meeting and at every CSC meeting. A full list of the meetings and details are provided in Table 2-1 of the Chapter 2 Appendix.

Several CSC meetings were co-hosted by a CSC member, who worked closely with South Coast AQMD staff to provide meeting input and to ensure each meeting ran smoothly. Niki Okuk, Miriam Burbano, Jesus Ortiz, and Jasmine Beltran all served as co-hosts from the SELA community.

### Meeting Facilitator

Each CSC meeting was facilitated by either a third-party facilitator or the Community Liaison for the SELA community.

### Social Media

All CSC meetings were live-streamed using Facebook Live, and links to the recorded videos were posted on the community webpage. Each video received more than 100 views. A screen shot of the October 8<sup>th</sup> live-streamed meeting is included in Table 2-4 of the Chapter 2 Appendix.

### Community Webpage

A community webpage was created for the SELA community. The webpage includes information about upcoming meetings, meeting materials such as flyers, agendas, presentations, handouts, live stream links, and meeting summaries. Additionally, the SELA community page includes interactive maps, the CSC roster, and the CAMP and CERP documents. All flyers, agendas, social media posts, presentations, and handouts to the CSC were made available in English and Spanish.

Webpage:

<http://www.aqmd.gov/nav/about/initiatives/community-efforts/environmental-justice/ab617-134/southeast-los-angeles>

In addition to being a central access point for meeting materials and documents, the webpage also includes interactive maps that present information about the community. These interactive maps provide data on land use, locations of facilities, schools, hospitals, and daycare centers, and the air quality concerns identified by the CSC and members of the public. This information was provided to help inform air quality priorities for the CERP.

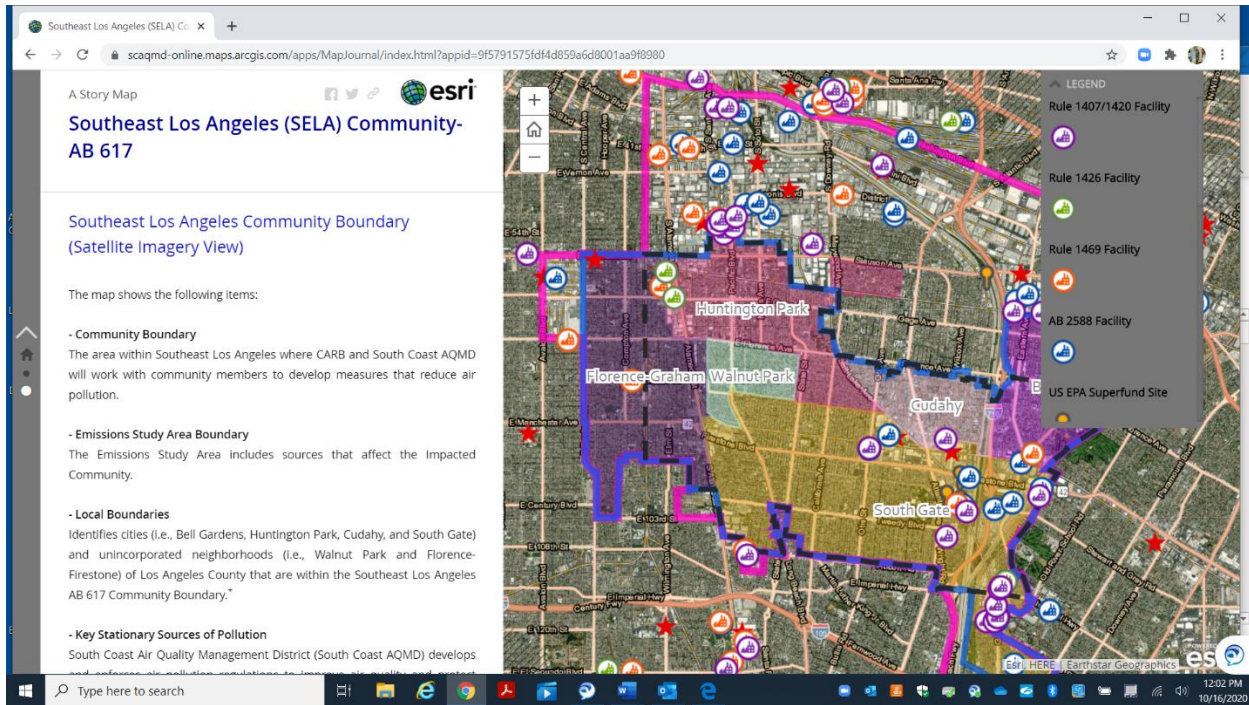

Figure 2-8 is an example of an interactive map that was created for the SELA community.

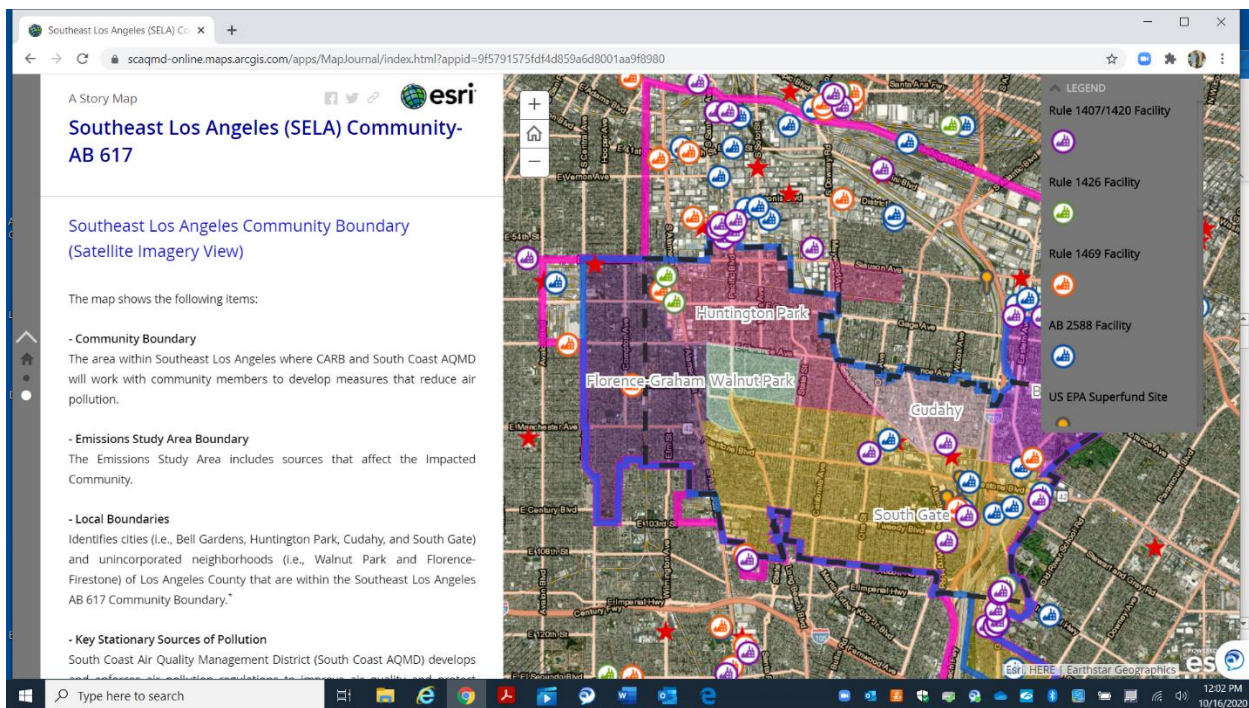

Figure 2-8. Interactive story map showing land use in the SELA community

### Community Bus Tour and Committee Presenters

A critical part of the CERP development and implementation is collaboration with CSC members and the agencies, organizations, businesses, or other entities that they represent. In early 2020, a Community Bus Tour was being organized by members of the CSC in collaboration with South

Coast AQMD staff. However, due to the Governor’s executive orders related to the COVID-19 pandemic, the community bus tour was put on hold until it is deemed safe to hold such an event.

Committee members were invited to give presentations during CSC meetings to share information about the work they are doing in the community that is complementary to the actions being developed in the CERP, such as programs implemented by their organization that address air quality issues in the community. At the August 27, 2020 CSC meeting, CSC member Tahirah Farris (Los Angeles County Department of Regional Planning) gave a presentation on LA County’s “Green Zones Program.” The goal of this program is to develop land use strategies to improve public health and quality of life for residents in environmental justice communities, including updating the land use ordinances to address incompatible land uses.

## Technical Advisory Group

In February 2019, the AB 617 Technical Advisory Group (TAG) was established to provide a forum to discuss technical details related to the development and implementation of the CAMPs and CERPs.<sup>3</sup> In 2020, the TAG met twice to discuss technical details related to the CERP and CAMP development for the two 2019-designated communities (SELA and Eastern Coachella Valley). Topics discussed included monitoring equipment and laboratory capabilities, methodology and data sources for developing an air toxics emissions inventory at a community scale, methodology for forecasting emissions in future years, and methodology for modeling air toxics levels across geographical areas. All meetings were open to the public, webcast on the [www.aqmd.gov](http://www.aqmd.gov) webpage, and included an email option to send questions to be answered during the meeting.

Many of these technical considerations apply to all five AB 617 designated communities, thus the TAG includes up to 3 members from each CSC, and additional technical experts from academia, research institutes, and governmental agencies. The SELA CSC members who served as TAG members in 2020 are Laura Cortez and Rudy Morales. Additional information about the TAG and the 2020 TAG meeting schedule are provided in the Chapter 2 Appendix.

## Additional Community Engagement

In addition to the regularly scheduled CSC meetings, South Coast AQMD staff have had more than 40 one-on-one or small group meetings with members to discuss the CSC process and seek input on the CERP actions (Table 2-8 of Chapter 2 Appendix). These meetings gave CSC members an opportunity to provide input in the CERP development process and address concerns directly with staff. Additionally, these meetings give staff an opportunity to provide information as requested by CSC members.

---

<sup>3</sup> The webpage for the TAG: <http://www.aqmd.gov/nav/about/initiatives/environmental-justice/ab617-134/technical-advisory-group>

In addition, staff attended meetings hosted by community organizations and local government agencies to discuss SELA CERP development and gain a better understanding of the unique issues in the community (Table 2-9 of Chapter 2 Appendix). South Coast AQMD staff will continue to work with the CSC to implement the CERP actions and provide regular updates on the progress of implementing the plan. Community engagement is essential to the success of the CERP as well as the AB 617 program as a whole, and all parties are committed to build and improve upon existing outreach efforts in the coming months and years.

# CHAPTER 3A:

## COMMUNITY PROFILE

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 3a: Community Profile

### Introduction

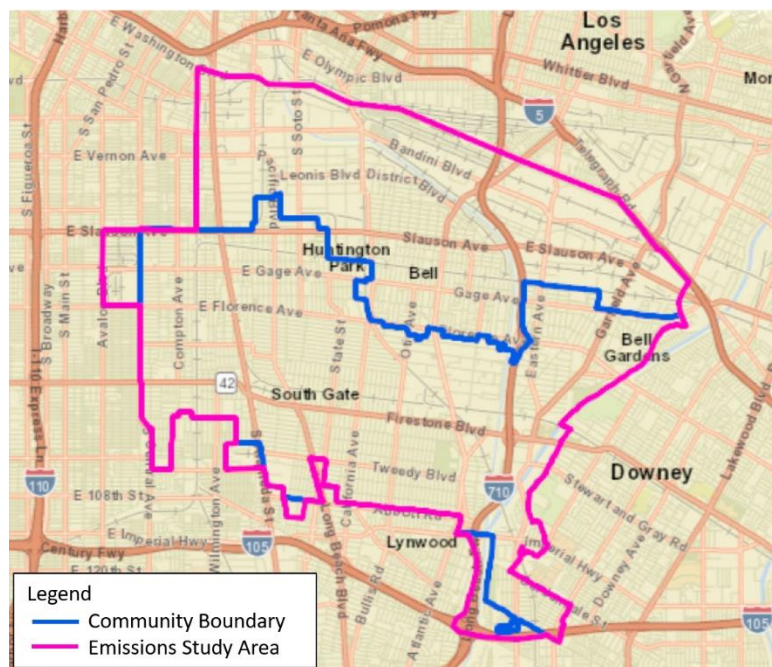

The community profile describes the characteristics of Southeast Los Angeles and the types of air pollution sources that impact the community. Understanding the characteristics of Southeast Los Angeles and the air pollution sources affecting the community is crucial to addressing the air quality priorities outlined in Chapter 5. Additional community details (e.g., types of stationary sources and socioeconomic information) is available in Appendix 3a – Community Profile.

### Community Boundary and Air Quality Priorities

During monthly CSC meetings, committee members, members of the public, and South Coast AQMD staff worked together to shape the elements and actions of this Plan. Topics discussed with the CSC include:

- What should be the community **boundaries** for the AB 617 community plans?
- What **air quality concerns** does the community have?
- What are the top **air quality priorities** that the community would like to address through the AB 617 CERP?
- What **priority actions** should be included in the CERP?
- What should the **goals** for the priority actions include?
- Additional **feedback on the Draft CERP**

Figure 3a-1: Southeast Los Angeles Community Boundary and Emissions Study Area

CSC members discussed which geographic areas and neighborhoods to include in the community boundary as part of the AB 617 program. The Southeast Los Angeles CSC established two distinct geographic boundaries (i.e., community boundary and emissions study area) to represent this

community for the purpose of the plan (Figure 3a-1). The “community boundary” focuses on places in the community where residents live, work, attend school, and spend most of their time. The “emissions study area” encompasses the community boundary and nearby air pollution sources (e.g., facilities and major truck routes) that affect the community.

After finalizing the community boundary and emissions study area, the CSC discussed their air quality concerns and identified a set of air quality priorities. The CSC built consensus to determine the top air quality priorities and the actions necessary to address them. The top air quality priorities for the Southeast Los Angeles community are:

- Truck Traffic and Freeways,
- Railyards,
- Rendering Facilities,
- Metal Processing Facilities,
- Green Space, and
- General Industrial Facilities.

The actions to address each air quality priority are described in Chapter 5.

#### Community Land Use Profile and Related Data

The Southeast Los Angeles community is shown in Figure 3a-1. The community boundary includes a land area of 17.92 square miles, and the emissions study area includes an area of 32.12 square miles. About 56% of this land area is used for residential living, 18% is zoned for commercial uses, 15% is zoned for industrial uses, and 5% is used for freeways, roadways, and utilities and communications services (Figure 3a-2).<sup>i</sup>

Figure 3a-2: Land use profile in Southeast Los Angeles

<sup>i</sup> Land use refers to how certain areas of land are classified for development and use. Land use data is often used for city or county planning, such as the placement of housing developments and transportation hubs. Land use data is derived from the 2016 Southern California Association of Governments (SCAG) Regional Transportation Plan/ Sustainable Communities Strategy, which is based on 2012 data.

Appendix 3a presents data based on previous cumulative impact studies<sup>ii</sup> to describe the impacts of toxic air pollutants in this community, as well as other environmental pollution, public health factors, and social and economic factors that make people more sensitive or vulnerable to the health effects of pollution.<sup>1</sup> The Multiple Air Toxics Exposure Study IV (MATES IV) and CalEnviroScreen 3.0 are two tools used to evaluate the characteristics that describe this community. The South Coast AQMD conducts the MATES study, which used air toxics monitoring, emissions inventories, modeling, and health risk assessment techniques to calculate the cancer risk due to toxic air pollutants (“air toxics cancer risk”).<sup>ii</sup> CalEnviroScreen3.0 is a screening tool developed by the California Office of Environmental Health Hazard Assessment (OEHHA) that is used to identify communities that are most affected by various sources of pollution, and where people are especially vulnerable to the effects of pollution.

## Other Community Environmental Issues

### Delta Airlines Jet Fuel Release

On January 14, 2020, Delta Airlines Flight 89 was headed to Shanghai, China from LAX when an in-flight emergency was declared, causing the plane to return to the airport. As part of its emergency landing, 15,000 gallons of jet fuel in the form of mist was released into the atmosphere impacting multiple areas of Los Angeles, including parts of the Southeast Los Angeles community. South Coast AQMD issued a Notice of Violation (NOV) on January 17, 2020 to Delta Airlines for the jet fuel dump that impacted students, teachers and other members of the public in Los Angeles County.

The NOV alleges that Delta Airlines caused a public nuisance in violation of the agency’s Rule 402 and California Health and Safety Code Section 41700. South Coast AQMD’s investigation was prompted by community complaints which resulted in inspectors being dispatched to several locations. Complaints regarding the exposure to the jet fuel were reported at multiple schools within the Los Angeles Unified School District, the Cudahy Public Library and two schools within the El Rancho Unified School District.

Once issued, NOV’s can result in civil penalties. In some cases, the company can choose to implement voluntary measures to reduce emissions or otherwise prevent further violations. If no settlement is reached, a civil lawsuit may ultimately be filed in superior court. South Coast AQMD has coordinated with, among others, the Los Angeles County Fire Department, the Los Angeles County Department of Public Health, the Los Angeles Unified School District and the El Rancho Unified School District.

### Exide Holdings, Inc.

Exide Holdings, Inc. is a former lead acid battery recycling facility located in Vernon, California and is within the Southeast Los Angeles emissions study area. After learning that the facility was persistently emitting excessive amounts of lead and arsenic into the air, South Coast AQMD quickly developed new rules and took enforcement action that resulted in significantly reduced toxic emissions. However, historical emissions prior to these actions led to soil contamination in the surrounding communities.

---

<sup>ii</sup> More information regarding MATES IV and the final report can be found on South Coast AQMD’s website at, <http://www.aqmd.gov/home/air-quality/air-quality-studies/health-studies/matesiv>.

Exide has a history of willfully concealing its violations. Specifically, Exide went to great lengths to mislead the South Coast AQMD about the true scope and source of the lead and arsenic emanating from the Vernon facility.

Because of Exide's long history of contaminating the surrounding community, and willfully concealing those violations, South Coast AQMD opposed the U.S. Department of Justice (DOJ) decision to allow Exide to abrogate its responsibility to clean-up both the Vernon site and the surrounding community that was impacted by the facility's operations. Nor should the public bear the financial responsibility for the costs of remediation. South Coast AQMD requested that the U.S. DOJ hold a public hearing to provide the public with information on the proposed abandonment and orphaning of the Exide facility in Vernon and to allow for full community engagement.

U.S. DOJ and U.S. Environmental Protection Agency (U.S. EPA) held a virtual public meeting on October 13, 2020 to listen to the community's concerns relating to the Exide Holdings, Inc. Consent Decree and Settlement Agreement Regarding the Non-Performing Properties. Unfortunately, the presiding judge sided with the DOJ and the clean-up is now being conducted by DTSC.

### Community Impacts from the Community Perspective

While this section and Appendix 3a provide an overview of the Southeast Los Angeles community, the community members make each community unique and distinct. Community members bring intimate familiarity with their community and the air quality concerns that affect their neighborhood. Below are some community voices describing this community.

"For decades the Southeast Los Angeles region has faced various injustices and challenges, one of those major injustices being environmental justice. Many of the factors specifically contributing to air pollution are truck traffic, tree ways, railyards, locomotives, processing/rendering facilities, etc. Our communities have been at the forefront of these injustices, we have faced the consequences and have seen the detrimental health effects of such injustices. The time has come for our communities to stand up and voice our concerns, AB 617 helps aid the cause. It allows our forefront communities to propose solutions with the guidance of the SCAQMD. This is an important opportunity that our communities must take note of in order to seek justice.

Assembly Bill 617 is a prime example of democracy, the SCAQMD is co-existing with the communities they represent. This community-based initiative has the potential to give the SELA region a platform, a platform that would allow our communities to voice our concerns. Never before has an initiative like such been implemented or practiced, AB 617 and the SCAQMD are setting the blueprints for other communities."

*- Jesus Ortiz, Resident of South Gate*

"I hope AB 617 in Southeast LA will close gaps between agencies and cities through collaborative structures and pass meaningful policies to reduce pollution in our communities."

*- Laura Cortez, Resident of Bell Gardens and East Yard Communities for Environmental Justice Co-Director*

“Growing up in South Gate I never thought I would have the opportunity to improve environmental quality in my community, but I was motivated and driven to obtain the tools I needed to do so. I left southeast LA to pursue undergraduate and graduate studies. I started my career in San Diego working with municipalities to improve water quality and then worked for SDG&E managing environmental compliance for large electric infrastructure projects. When I moved back to Los Angeles to pursue a career at SoCalGas to work on air and climate issues, I learned about AB 617 and was beyond excited to know that there was a bill that prioritizes action in communities that have been disproportionately impacted by poor air quality. I am honored to be working alongside SCAQMD and the other CSC members to help reduce toxics and criteria air pollutants in the community I grew up in and the community I have family that I love and care for. Although it’s upsetting to think that very little progress has been made to address nuisance odors and toxic emissions from industry that were impacting my community and my health when I was younger, I find solace in the fact that there are other passionate community members working collaboratively to get things done not only in southeast LA but in other AB 617 communities across the state. And I hope that all of this collective effort and prioritization of actions in my community over the next several years results in quantifiable emissions reductions.”

- *Edith Moreno, Southern California Gas Company*

# CHAPTER 3B:

## FUGITIVE EMISSIONS AND SOURCE ATTRIBUTION

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 3b: Emissions Inventory and Source Attribution

### The Community Emission

Reduction Plan (CERP) identifies air quality priorities based on community input and evaluation of technical data on emission sources in the community. The CERP defines actions and strategies to reduce the emissions and exposure burden from sources of criteria air pollutants (CAPs) and toxic air contaminants (TACs). To accurately determine emission reductions from these actions and strategies, a baseline reference needs to be established. The

baseline reference can be achieved through an emissions inventory that includes an accounting of sources and their resulting emissions. This rigorous accounting of sources, their emissions and their contribution to cumulative exposure burden is what the CARB guidelines identify as a source attribution analysis. Per the direction of CARB guidelines, source attribution is required to meet AB 617 statutory requirements.

CARB recommended five technical approaches to conduct source attribution analysis. They are emissions inventory, air quality modeling, targeted air monitoring/back trajectory/pollution roses/inverse modeling, chemical mass balance and positive matrix factorization. Among them, based on the availability of data and resources, an emissions inventory and an air quality modeling analysis are source attribution tools employed to identify sources contributing to air pollution levels in the community, with an emphasis on identifying sources within the community (emissions inventory). More information on source attribution methods is included in the Source Attribution Methodology report.<sup>1</sup> The most recent air quality modeling analysis was conducted as part of the Multiple Air Toxics Exposure Study (MATES IV) in 2015, which showed Diesel Particulate Matter (DPM) was the air pollutant that contributed most to the air toxics cancer risk in the South Coast AQMD, with the Southeast Los Angeles (SELA) community having higher air toxics cancer risk compared to the overall average. MATES V is currently under development and will update cancer risk estimation for the community as well as the South

### Chapter 3b Highlights

- Information about the sources of air pollution in this community is presented in a “source attribution” analysis
- Diesel particulate matter is currently the main air toxic pollutant in this community, and it comes mostly from on-road and off-road mobile sources
- Other key air toxic pollutants in this community are 1,3-butadiene (mostly from the chemical industry) and benzene
- In future years, diesel emissions will decrease substantially due to ongoing and newly proposed regulations, but these emissions continue to be the main driver of air toxics cancer risk in this community

<sup>1</sup> South Coast Air Quality Management District, Methodology for Source Attribution Analyses for the first year AB 617 Communities in the South Coast Air Basin (Technical Report), 2019. <http://www.aqmd.gov/docs/default-source/ab-617-ab-134/technical-advisory-group/source-attribution-methodology.pdf>. Accessed October 23, 2020.

Coast Air Basin. A community-specific emissions inventory was developed for criteria air pollutants (CAPs) and TACs based on the most recent available datasets.

**Figure 3b-1 Contribution of major source categories to NO<sub>x</sub> emissions, VOC emissions, PM<sub>2.5</sub> emissions in the Southeast Los Angeles community in 2018 (tons/year)**

Figure 3b – 1 shows the contribution of major source categories to NO<sub>x</sub> emissions, VOC emissions, and PM<sub>2.5</sub> emissions in SELA in 2018. The main sources of air pollutant emissions in the SELA community are on-road vehicles, trains, off-road equipment, and industrial activities.

NO<sub>x</sub> emissions in this community are dominated by mobile sources – both on-road and off-road – which account for 75% of the total emissions in 2018. Heavy-duty trucks, trains, and off-road equipment are the largest sources of NO<sub>x</sub>. Stationary sources contribute 25% of the NO<sub>x</sub> emissions in this community, mostly from natural gas fuel combustion in the residential, commercial, and industrial sectors.

VOC emissions are dominated by area sources, with consumer products being the largest source. Passenger vehicles and off-road equipment such as lawn mowers and other small gasoline engines, are the largest contributors to VOC emissions from on-road and off-road sources, respectively.

Unlike NO<sub>x</sub> and VOC, direct PM<sub>2.5</sub> emissions come from a wide variety of activities, which include commercial cooking, light and medium-duty automobiles, wood and paper industries, fuel combustion and off-road equipment.

**Figure 3b-2 Southeast Los Angeles Community TACs Emissions (toxicity-weighted diesel equivalent) in 2018**

Figure 3b – 2 shows TAC (toxic air contaminants) emissions in SELA in 2018. TAC emissions in the SELA community are dominated by diesel particulate matter (DPM) from diesel exhaust. DPM is emitted from heavy-duty trucks, trains, and industrial off-road equipment. 1,3 butadiene is the second most important TACs based on toxicity-weighted emissions, and the major source is plastic production. Other significant TAC species includes benzene and formaldehyde, which are mostly emitted from mobile sources.

Future NO<sub>x</sub> emissions in the community are expected to decrease due to continued implementation of existing regulations on mobile sources and recent and upcoming regulations on major stationary source facilities. VOC emissions are also expected to decline, although they will decline more slowly than NO<sub>x</sub> emissions. Emissions of DPM from heavy-duty trucks are also expected to decrease substantially due to upcoming deadlines for CARB's Truck and Bus Regulation. CARB's In-Use Off-Road Diesel-Fueled Fleets Regulation will also contribute to

reducing DPM. However, off-road vehicles will continue to be the largest contributor to DPM through 2030. Emissions of 1,3-butadiene from stationary sources are expected to increase slightly in the future years, due to growth in economic activity. However, in future years, DPM is still projected to be the main contributor to air toxics cancer risk in this community.

Trends for TAC emissions are shown in Figure 3b – 3. Diesel PM continues to dominate the TAC emission inventory in future years, despite a significant reduction in DPM from heavy-duty trucks. DPM decreases by 65% from 2018 through 2030. The second largest contributor to air toxics is 1,3-butadiene, with emissions increasing slightly due to slight increases in plastic production partially offset by reductions in emissions from vehicles. Benzene and formaldehyde emissions decrease throughout the 12-year period due to decreases in the emissions from vehicles, whereas emissions from metals (i.e., cadmium, nickel, arsenic and lead) experience small variability due to changes in industrial activities. Hexavalent chromium emissions decrease from 2018 to 2030 due to decrease in vehicle emissions that is partially offset by a slight increase in industrial emissions.

Details on the source attribution for Southeast Los Angeles can be found in Appendix 3b. Furthermore, Appendix 5b, 5c, and 5e – 5g contain more emissions and source attribution information as it pertains to the five air quality priorities: truck traffic and freeways, rendering facilities, metal processing facilities, railyards and locomotives, and general industrial facilities.<sup>2</sup>

---

<sup>2</sup> The green spaces air quality priority (Chapter 5d) does not include emissions information as it does not apply to the goals of this priority.

**Figure 3b – 3 Total emission trends for toxic air contaminants in Southeast Los Angeles (toxicity-weighted diesel-equivalent emissions, lbs/year) for the year of 2018, 2025 and 2030**

**Figure 3b – 4 Toxic Air Contaminant Emissions from On-Road Mobile Sources in the Southeast Los Angeles community for the year 2018 (toxicity-weighted diesel equivalent in lbs/year)**

**Figure 3b-5 Source Attribution of Diesel PM Emissions from On-Road Mobile Sources in the Southeast Los Angeles Community for 2018 (lbs/year)**

Emissions estimation contains inherent uncertainties, due to numerous assumptions and limited datasets, many of which are difficult to validate. Estimated emissions of toxic air contaminants have an even higher degree of uncertainty compared to estimates of criteria pollutants

emissions. Challenges for estimating TACs include the vast number of TAC species, extremely low ambient concentrations for some species, the higher costs of measurements and complexity of source tests, and the variety of processes from which TACs are emitted. The AB 617 guidance document recommends the use of reported emissions when available. Toxic emissions from point sources can also be estimated using speciation profiles using the same method as for area and mobile sources. However, large discrepancies are sometimes observed between directly reported TACs and speciated toxic emissions based on PM and VOC emissions. The large discrepancies observed may be due to non-specific or outdated chemical speciation profiles or indicate a need to improve measurement and reporting accuracy. Mobile source air toxics inventories contain similar uncertainties.

It is important to note that many of the South Coast AQMD regulations addressing toxic metal pollution emissions from industrial facilities (e.g., South Coast AQMD Rule 1407 and Rule 1469) include requirements that reduce fugitive emissions from these facilities. Fugitive emissions can often account for most of the toxic metal emissions from a facility. Unfortunately, the methods available to create an emissions inventory are not able to reflect fugitive emissions from these facilities. Therefore, while the inventory may not show an overall decrease in toxic metal emissions, the regulations result in overall decreased emissions due to reductions in fugitive emissions. While the emissions presented in the current report are the best currently available, further improvement is required to adjust the likely bias. Further adjustment will be explored to support the upcoming MATES V study and updates to CERPs in current and upcoming AB617 communities.

THIS PAGE IS INTENTIONALLY LEFT BLANK

---

# CHAPTER 4:

## ENFORCEMENT OVERVIEW AND HISTORY

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 4: Enforcement Overview and History

### Introduction

This chapter describes the history and overall approach to enforcement by South Coast AQMD and the California Air Resources Board (CARB). In addition, the Community Emissions Reduction Plan (CERP) includes focused enforcement actions, which are described within Chapter 5 (e.g., idling truck sweeps).

### Enforcement Programs - Purpose and Jurisdiction

The primary goal of enforcement activities is for regulated entities to achieve compliance with air quality rules and regulations, and to protect public health. Part of this process involves consistently identifying and resolving violations, thereby ensuring a level playing field for all regulated entities and preventing unfair advantages for companies that do not comply with rules and permit conditions.

Both CARB and South Coast AQMD enforce air pollution regulations, conduct inspections of air pollution sources, and have the authority to issue notices of violations that can lead to the recovery of penalties.<sup>i</sup>

An air pollution source can be a specific piece of equipment, a business, a government agency, or any other entity that creates air pollution. CARB is primarily responsible for enforcing rules that apply to mobile sources, while South Coast AQMD is primarily responsible for stationary sources (e.g., facilities).

### Chapter 4 Highlights

- From 2017 through 2019, CARB conducted over 3,500 inspections and South Coast AQMD conducted approximately 491 inspections and responded to approximately 688 complaints in the Southeast Los Angeles community.
- Both CARB and South Coast AQMD will continue to design their enforcement programs to address air pollution sources effectively within their respective jurisdictions.
- An enforcement approach that utilizes specialized program structures, outreach efforts in the community, use of technology, and interagency partnerships can lead to further emission reductions.

Table 4-1: Overview of regulatory authority for South Coast AQMD and CARB

Air Pollution Source Category	Examples	Main Regulatory Agency
<b>Mobile sources<sup>ii</sup></b>	Trucks, buses, ships, boats, cargo handling equipment	CARB
<b>Stationary sources</b>	Refineries, power plants, oil/gas facilities, manufacturing plants	South Coast AQMD
<b>Area-wide sources</b>	Paint used on buildings, prescribed burning	South Coast AQMD
<b>Sources of greenhouse gases</b>	Methane and certain other mobile source emissions, refrigerants, and other sources	CARB and South Coast AQMD

<sup>i</sup> More information about penalties is provided in the Appendix 4.

<sup>ii</sup> Railroad operations are regulated at the federal level primarily by the Federal Railroad Administration and the Surface Transportation Board, and locomotive emissions are regulated by the U.S. EPA. These agencies' regulatory authority may preempt certain federal, state, and local regulatory authorities and actions.

## Enforcement History

Over the years, both CARB and South Coast AQMD enforcement staff have had a significant presence in the community of Southeast Los Angeles (SELA). This section provides the most recent three-year enforcement history for each agency in this community.

### South Coast AQMD Enforcement History in the SELA Community

South Coast AQMD's enforcement presence comprises many different compliance-related activities including, but not limited to, investigating complaints, responding to breakdowns, and performing facility inspections.

Responding to complaints is a crucial part of South Coast AQMD's enforcement program. By taking complaints directly from members of the public, inspectors can focus their efforts to identify and address air pollution problems that matter to the community. South Coast AQMD's enforcement team gives priority to complaints and attempts to respond to every air quality complaint received. Figure 4-1 shows the number and types of complaints received and responded to by South Coast AQMD.

Figure 4-1: Number of complaints (by type) in the Southeast Los Angeles community.

Additionally, South Coast AQMD's enforcement staff perform inspections at facilities and other air pollution sources. These can include onsite inspections for permitted and non-permitted equipment, fugitive emissions, and compliance with rules and permit conditions, as well as surveillance activities in the community, such as efforts to trace the source of an odor. As of September 2020, there are approximately 675 facilities permitted by the South Coast AQMD in this community. A list of these facilities is available in Appendix 4. From 2017 through 2019, South Coast AQMD conducted approximately 491 facility inspections.

Enforcement actions may involve issuing one of two types of notices:

- *Notice to Comply* (NC) – requiring a facility to correct a minor violation or to provide specified records; or
- *Notice of Violation* (NOV) – formally identifying a violation of particular rules or regulations, which may result in civil penalties or, in some cases, referral for criminal prosecution.

From 2017 through 2019, South Coast AQMD issued 188 NOVs in the SELA community. Figure 4-2 shows the number of NCs and NOVs in this community during this period. A list of these enforcement actions is available in Appendix 4.

Figure 4-2: Number of Notices to Comply (NCs) and Notices of Violation (NOVs) issued in the Southeast Los Angeles community.

### CARB Enforcement History in this Community

CARB's enforcement approach is two-pronged: ensuring compliance through robust, regular inspections and deterring violations through a penalty assessment process. From the compliance-side, it includes conducting both field inspections and fleet-wide audits. For field inspections, the focus has been on enforcing heavy-duty diesel vehicle (HDDV) regulations, such as the Truck and Bus Regulation, the airborne toxic control measure (ATCM) to limit idling, and the Heavy-Duty Vehicle Inspection Program (HDVIP). At refineries and fueling stations, CARB enforces fuel formulation regulations. In railyards, CARB enforces regulations related to drayage trucks, transportation refrigeration units (TRUs), and cargo handling equipment. From the deterrence-side, CARB Enforcement encourages violators to support CARB's community-based projects program by setting aside a portion of penalties paid from enforcement action settlements for Supplemental Environmental Projects (SEPs).

As shown in Figure 4-3 below, CARB conducted over 3,500 HDDV inspections in the SELA community from 2017 to 2019<sup>iii</sup>. The overall compliance with CARB’s regulations was 87 percent but varies annually<sup>iv</sup>. This may depend on a few factors, including the number of vehicles inspected and the method of selecting vehicles for inspection (e.g., targeting vehicles that might fail inspection). Over the three-year period, CARB issued 467 citations in the SELA community, 343 of which were for emissions-related violations (i.e., violations that directly contribute to air pollution) and 124 for non-emissions related violations (e.g., violations that could contribute indirectly to air pollution, such as a truck not complying with labeling requirements).

Figure 4-3: CARB 2017-2019 HDDV Enforcement History in SELA

Of the 1,126 heavy-duty trucks and buses and off-road equipment CARB observed idling in the SELA community over the past three years, all but 27 were in compliance with CARB’s commercial vehicle, off-road equipment, and school bus idling rules (98% compliance overall). Reasons for a heavy-duty diesel truck to be compliant with the idling regulation can include idling for less than five minute or idling greater than 100 feet from restricted areas such as schools and senior care facilities with a certified clean idle sticker. Compliance with CARB’s idling rules does not mean a vehicle complies with CARB’s other rules. CARB field enforcement has begun to focus on ensuring that these idling vehicles are also in compliance with all of the other pertinent CARB rules as well by conducting heavy-duty diesel compliance

<sup>iii</sup> See Table 4-5 in Appendix 4 for more detailed breakdown of these heavy-duty diesel vehicle inspections in Southeast LA, Table 4-10 in Appendix 4 for a list of heavy-duty diesel vehicle inspections in Southeast LA, and Tables 4-6 through 4-9 in Appendix 4 for CARB inspections for other enforcement programs, including consumer products, fuels, and other vehicles and engines.

<sup>iv</sup> See Table 4-5 in Appendix 4 for CARB’s 2017-2019 heavy-duty diesel vehicle enforcement history in Southeast LA

inspections along with idling inspections. Two important areas with lower compliance rates were off-road vehicles, like construction equipment, and TRUs— small transportation refrigeration units used to cool truck cargo areas—with compliance rates of 72 and 42 percent, respectively.

For some of CARB’s regulations, enforcement staff have not yet conducted many enforcement activities within the community, however, CARB is enhancing enforcement efforts in this community to address community concerns, such as incorporating more comprehensive inspections into idling inspections as well as focusing on TRU and off-road vehicle inspections. These efforts will be explained in greater detail in the actions in Chapter 5.

In summary, due to the air pollution concerns in this community, an enforcement approach by both agencies that fully utilizes their specialized program structures, outreach efforts in the community, use of technology, and interagency partnerships can lead to further reductions in noncompliance and emissions. Both CARB and South Coast AQMD will continue to work closely with the CSC to identify and investigate air quality issues within the community.

### Enforcement Approach

CARB and South Coast AQMD have each designed their programs to effectively address compliance with air pollution sources under their respective jurisdictions.

### South Coast AQMD’s Office of Compliance & Enforcement (OCE)

The structure of this group is based on inspection teams that focus on source type, with most inspectors assigned by geographic region. The organizational structure based on source type enables inspectors to become technical specialists on the air pollution regulations that apply to the types of industries or facilities assigned to that team. In addition, assigning inspectors by geographic area improves the agency’s ability to respond in a timely manner to complaints or compliance issues in their assigned areas.

A list of OCE teams is provided in Figure 4-5 below. Examples of those teams include the Industrial team which has broad knowledge to inspect a wide variety of source types and equipment, the Toxics & Waste Management team which has the training and personal protective equipment to conduct inspections at facilities with toxic air contaminants, and the Service Station team which specializes in inspecting gas stations. Certain facilities may be inspected by staff members from multiple teams. This ensures that the approach is focused enough to address a variety of sources, yet flexible enough to handle complex facilities.

For most teams, the inspectors conduct regular inspections at their assigned facilities or within their assigned geographic regions. The frequency of regular inspections depends on the type of facility. For example, a chrome plating facility is inspected more frequently than an auto body shop. It is important to consider that there are approximately 110 chrome plating facilities in the South Coast Air Basin, compared to over 1,500 auto body facilities in the region. When considering limited resources, priority for inspections is typically given to higher risk pollution sources – that is, those facilities that emit the more toxic air pollutants and/or are close to schools, hospitals, and residential areas.

Figure 4-5: South Coast AQMD Enforcement Program

The **Energy team** focuses on crude oil production, energy storage sites, and bulk petroleum terminals. Inspectors in this team are assigned by facility, with each inspector assigned a set of facilities. Inspectors from this team are assigned facilities within SELA.

The **Industrial team** focuses on the widest variety of sources, ranging from dry cleaners to large manufacturing facilities to idling trucks. Inspectors in this team are assigned a geographic region and normally spend much of their time in the field. From this team, inspectors regularly conduct compliance activities in SELA.

The **Major Sources team** focuses on sources that are in the RECLAIM\* program. Examples of these sources include power plants, oil production sites, and large manufacturing facilities. Inspectors in this team are assigned by facility, with each inspector assigned a set of facilities, some of which are in SELA.

The **Service Station team** focuses on gasoline service stations that serve the public, which can emit volatile organic compounds (VOCs). Inspectors in this team are assigned a geographic region. From this team, inspectors regularly conduct compliance activities in SELA.

The **Toxics team** focuses on facilities that emit Toxic Air Contaminants, including hexavalent chromium, lead, and other toxic metals. Examples include landfills, waste treatment facilities, water treatment facilities, lead acid battery manufacturers, and chromium plating and anodizing shops. Inspectors in this team are assigned a geographic region, and regularly conduct compliance activities in SELA.

The **Refinery team** focuses on all the refineries, auxiliary hydrogen plants, and marine terminals in the South Coast Air Basin. Inspectors in this team are assigned by facility, with each inspector dedicated to a refinery and auxiliary plants. This team is based full-time in the Long Beach Field Office to ensure close proximity to the refinery sources that it regulates.

\*RECLAIM, is a program that requires participating facilities to manage their total nitrogen oxides (NO<sub>x</sub>) and/or sulfur oxides (SO<sub>x</sub>) emissions by adding pollution controls, changing their equipment or processes, or buying credits from other RECLAIM facilities that have lower emissions than their cap. The allowable amount of such emissions is reduced over time. The program is currently being transitioned to a command-and-control regulatory program.

## CARB Enforcement's Program Structure

CARB enforcement's structure is based on over 50 enforcement programs that focus on specific source types. One of CARB's most comprehensive inspection programs has been around for decades. The HDVIP ensures vehicles are well-maintained in order to help keep air pollution low and meet engine and smoke opacity standards. In 2019, CARB tightened its smoke opacity standard so that almost any smoke coming out of a HDDV is a violation of the standard (smoke opacity must be less than five percent for diesel particulate filter-equipped vehicles). This program helps reduce particulate matter emissions and ensure vehicles engines and emissions controls are properly maintained.

Because diesel particulate matter is classified as a toxic air contaminant in California, CARB is also able to regulate emissions from diesel vehicles. CARB regulations now reduce emissions from all types of fleets, including trash trucks, trucks and buses owned by public agencies, the drayage trucks that carry cargo containers to and from ports and railyards, and most other trucks and buses over 14,000 pounds. As discussed earlier, most of these trucks and buses will be required to have 2010 or newer model year engines by the end of 2023 to operate legally in California to comply with CARB's Truck and Bus Regulation. In fact, in January 2020, the DMV began requiring compliance with the Truck and Bus Regulation for some of the older trucks in order to get the vehicle registered.

CARB has other rules that may be pertinent to the SELA community. While marine rules do not directly affect the SELA community, they do affect the nearby marine ports and the vehicles which transport a significant amount of goods from those ports to SELA's railyards daily. Off-road construction equipment engines operate in the community and the cargo handling equipment that operates at SELA's railyards do as well. Also, TRUs (the small engines that keep goods in trucks cooled) are significant sources of diesel particulate matter for areas with cold storage warehouses. A few other important programs include our consumer products program, where CARB ensures the VOCs that contribute to smog formation are minimized in cleaners and other household goods through extensive statewide inspections. CARB also inspects fuels to make sure they meet fuel standards. Finally, CARB ensures commercial trucks and buses, school buses, and off-road construction equipment idle in compliance with the three corresponding regulations<sup>v</sup>. Please see Figure 4-6 below and Appendix 4 for more enforcement program descriptions.

---

<sup>v</sup> Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Vehicle Idling: <https://ww3.arb.ca.gov/regact/idling/idling.htm>; School Bus Idling Airborne Toxic Control Measure: <https://ww3.arb.ca.gov/toxics/sbidling/sbidling.htm>; Off-road Diesel Regulation: <https://ww3.arb.ca.gov/msprog/offroadzone/landing/offroad.htm>

Figure 4-6: CARB Enforcement Programs Relevant to the SELA Community

CARB ensures regulatory truck and bus **idling** limits are not exceeded.

**Drayage** vehicles move goods by certified heavy-duty diesel vehicles (HDDV). HDDV that enter the port or intermodal rail facility are required to be certified to meet 2007 EMY emission standards.

CARB leads **cargo handling equipment** investigations to identify opportunities to reduce emissions from equipment moving goods at ports and intermodal rail yards.

For the **Heavy-duty Vehicle Inspection Program**, CARB regularly conducts inspections for:

- Diesel Emission Fluid (DEF): a liquid used as a reductant in heavy duty diesel engines to reduce NOx emissions.
- Emission Control Label (ECL): Engine certification labeling requirements
- Smoke/Tampering: Requires heavy duty trucks/buses to be inspected

**Statewide Truck and Bus** program requires all vehicles with 2009 or older engines weighing over 14,000 pounds to reduce exhaust emissions by upgrading to 2010 or newer engines by 2023. Non-compliant vehicles are denied DMV registrations.

**Transportation Refrigeration Units** are refrigeration systems powered by diesel internal combustion engines designed to refrigerate or heat perishable products transported in various containers. CARB staff inspect TRUs to ensure that the units are meeting labeling and in-use performance standards.

The **Off-Road Regulation** requires off-road fleets (i.e., of construction equipment such as bulldozers, graders, and backhoes) to meet fleet average emission standards and be equipped with best available control technology (BACT).

CARB identifies potential violations through targeted enforcement and investigation of public complaints. CARB staff then contacts the responsible party to explain the enforcement process and to obtain additional information. Enforcement staff evaluate the information collected and work with CARB's Legal Office to determine violations of statutory and/or regulatory requirements. CARB staff can take enforcement action after substantiating violations, at which point the responsible party is provided an opportunity to discuss the violation.

Enforcement actions within the scope of CARB's enforcement authority may include issuing cease and desist orders, Notices of Violation, mitigation, or pollution prevention actions. Cases can be resolved via civil and criminal litigation as well as administrative penalties. In lieu of litigation, cases are typically resolved via mutual settlement. CARB seeks penalties that provide adequate deterrence to future noncompliance or public nuisance, and to take away any economic benefit of noncompliance.

For example, in 2017, CARB settled cases with Union Pacific Railroad Company (UP) and BNSF Railway regarding inaccurate and incomplete reporting of non-compliant drayage trucks entering their intermodal facilities. Under CARB's Drayage Truck Regulation, California ports and Class I rail terminals must report to CARB any non-compliant heavy-duty diesel trucks entering their facilities. For years, BNSF and UP failed to accurately report to CARB information on non-compliant trucks entering their facilities, which hampered CARB staff's ability to enforce the regulatory requirements. The settlements resulted in UP turning away non-compliant trucks from their facilities and BNSF accurately reporting truck data to CARB for enforcement, resulting in reduced diesel emissions from heavy-duty diesel trucks around both UP and BNSF facilities.<sup>vi</sup>

During the settlement process, violators have the opportunity to allocate up to 50 percent of their penalties to a Supplemental Environmental Project (SEP).<sup>vii</sup> SEPs are community-proposed and community-based projects that aim to improve public health, reduce pollution, increase environmental compliance or bring public awareness to air pollution issues. If community members are interested in submitting a SEP proposal, please contact the Community Outreach and Enforcement Section at [COES@arb.ca.gov](mailto:COES@arb.ca.gov) (See Appendix 4 for additional information on SEPs).

### How the Public Helps Reduce Air Pollution

Members of the public play an important role in communicating air quality concerns to both CARB and South Coast AQMD. The complaint process helps both agencies identify issues that are directly affecting the SELA community. The most effective way to contact the agencies is through the complaint hotlines. In addition to South Coast AQMD's mobile application, both agencies can be contacted by phone and online:

---

<sup>vi</sup> Other examples of enforcement settlement cases can be found in CARB's Annual Enforcement Reports (<https://www.arb.ca.gov/enf/reports/reports.htm>)

### CARB - Mobile Sources

Automobiles, Trucks, Off-road Equipment,  
or other Vehicles

Phone: 1-800-END-SMOG

Online: [calepa.ca.gov/enforcement/complaints](http://calepa.ca.gov/enforcement/complaints)

### South Coast AQMD - Stationary Sources

Odors, Smoke, Dust, or other Air  
Contaminants

Phone: 1-800-CUT-SMOG (1-800-288-7664)

Online:

<https://www.aqmd.gov/home/air-quality/complaints>

Both CARB and South Coast AQMD value input from those who live and work every day in the community. Communicating air quality issues directly to the agencies with the information below is the best way to address an air pollution concern. Reporting an issue when it is occurring rather than after the fact helps the investigating agency's ability to find the source of the problem.

An effective complaint should contain information with specific details. This information helps inspectors conduct a thorough investigation and take appropriate enforcement action. The following information is valuable to a thorough complaint investigation:

- Type of air quality concern (odor, smoke, dust, etc.)
  - o Odors: description of odor
  - o Smoke: color of smoke; does the smoke disappear or hang in the air?
  - o Dust: type of dust (e.g., construction activities)
- Location of air pollution concern
- Name or address of potential source
- Time of day that the air quality issue began, and is the concern still occurring?
- Has the concern occurred before, and do other people in your community experience it as well?
- Contact information for the person reporting the complaint<sup>viii</sup>

### Enforcement Considerations

An effective enforcement program must be flexible and adaptable to address the needs of the communities who are being served. Part of being adaptable is the ability to identify and address gaps in the enforcement process, such as previously unknown facilities or new pollutants of concern. As revealed over the course of the public process for CERP development, one such gap has been a lack of communication with members of the community, who have firsthand experience with local emissions sources and whose input is valuable to enforcement efforts. South Coast AQMD has therefore prioritized outreach and added new positions to interact directly with the AB 617 communities. Because South Coast AQMD organizes its enforcement division both by source type for technical specialization and by geographic region, there is not a single dedicated enforcement team for AB 617; rather, the effort is

<sup>viii</sup> Although anonymous complaints are accepted, staff have found that having contact information helps with confirming locations and other important information necessary for a successful investigation, as well as reporting findings to the complainant.

spread across multiple existing teams so that a larger number of complaints and potential violations of air quality rules can be identified and addressed.

In addition, both CARB and South Coast AQMD currently maintain extensive records of compliance-related activities using databases and other digital resources. South Coast AQMD uses these resources to track metrics such as complaints, inspections, and enforcement actions. The data provided in this chapter and Appendix 4 are obtained from those databases. The statistics being tracked are also routinely reevaluated. For example, South Coast AQMD recently added an Agency Technical Assistance metric for instances where South Coast AQMD was asked by another agency to assist in that agency's efforts. CARB and South Coast AQMD will both continue to evaluate new metrics that may help to track and analyze inspectors' efforts in the AB 617 communities in order to attempt to identify more effective allocations of resources and/or potential solutions to air quality issues.

Finally, enforcement mechanisms exist to promote, and if necessary, compel, compliance by regulated sources. As discussed above, after South Coast AQMD inspectors investigate complaints and/or conduct facility inspections, they can issue NCs or NOVs. While NCs will generally require further action by a source, NOVs are referred to the Office of the General Counsel, where civil penalties are negotiated. If no settlement is reached, a civil lawsuit may be filed in superior court. Ongoing noncompliance, however, may lead to a petition before the South Coast AQMD Hearing Board. CARB and South Coast AQMD have each had a presence in this community that has led to various enforcement actions against local facilities.<sup>ix</sup>

In summary, the compliance process seeks to ensure that all rules and regulations are followed through a fair and robust enforcement program, resulting in reduced air pollution emissions. Adaptability is crucial, whether in the programs overall, or in day-to-day operations, to ensure that community concerns are addressed, and that enforcement action is taken when violations are identified. Both CARB and South Coast AQMD enforcement teams will continue to search for innovative strategies, take swift action to address noncompliance, and update the CSC on enforcement actions in the community.

---

<sup>ix</sup> Additional detail on South Coast AQMD, including the Hearing Board, and CARB enforcement actions can be found in Appendix 4.

# CHAPTER 5A:

## INTRODUCTION

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

# Chapter 5a: Introduction

## Community Air Quality Priorities

The CERP provides an overall path to reducing air pollution in the Southeast Los Angeles (SELA) community. Through the development of the CERP, the CSC identified air quality priorities based on sources of air pollution (e.g., trucks and freeways, metal processing facilities, rendering facilities) that are of concern to the community. To reduce air pollution from these sources, the CSC developed a set of actions to be implemented by government agencies, organizations, businesses, and other entities.

The SELA community identified trucks and freeways, railyards and locomotives, metal processing facilities, and rendering facilities as air quality priorities. These air pollution sources are often near homes, schools, and other community areas where the public can be exposed to harmful pollutants. As a result, increasing green space in the community to reduce air pollution exposure is also a priority for the community. The community also cited general concerns about emissions from industrial facilities in the community, for which actions will be developed in 2021 based on additional analysis and CSC discussions.

## Ongoing Efforts

The South Coast AQMD, CARB and U.S. EPA have air quality regulations to reduce air pollution from sources such as trucks, railyards and locomotives, rendering facilities, and metal processing facilities. The relevant agencies enforce these regulations. Land-use agencies can establish long-term goals, ordinances, and policies for land use that can also have an impact on local air pollution (e.g., LA County Green Zones Program<sup>1</sup>). Additionally, the South Coast AQMD and CARB have begun developing new requirements that would further reduce air pollution from sources prioritized by the community. More information on regulatory and enforcement efforts can be found in Appendix 5 and Chapter 4, respectively.

## Opportunities for Action

In addition to the ongoing efforts described above, the South Coast AQMD, in collaboration with the CSC identified goals to reduce air pollution in the SELA community. The CERP defines the progress toward each goal with metrics for specific actions and a specified timeline. Additionally, the CERP identifies the entities responsible for implementing the actions. The actions set forth in this chapter define a path for further emissions and exposure reductions in the SELA community. In some instances, the actions reaffirm ongoing rule development<sup>2</sup> efforts and provide new commitments for localized reductions, sharing emissions data, timelines and other related information.

## Emission Reduction Targets

<sup>1</sup> The LA County Green Zones Program seeks to enhance public health and land use compatibility in the unincorporated communities that bear a disproportionate pollution burden. More information can be found at: <https://planning.lacounty.gov/greenzones#:~:text=Initiated%20by%20the%20Board%20of,bear%20a%20disproportionate%20pollution%20burden.>

<sup>2</sup> At South Coast AQMD, a regulation is composed of rules, each of which deals with a specific topic within that regulation. More information can be found here: <http://www.aqmd.gov/home/rules-compliance/regulations#:~:text=At%20South%20Coast%20AQMD%2C%20a,and%20administered%2C%20and%20their%20impact.>

Table 1 – CERP Emission Reduction Targets		
Emissions	NOx	DPM
2018 Emissions (tpy)	2,868	36
Projected 2025 Emissions Baseline (tpy)	2,098	16
Emission Reductions from CERP, by 2025 (tpy)	155	1
Overall Emission Reductions from 2018 (%)	32	58
Projected 2030 Emissions Baseline <sup>1</sup> (tpy)	1,983	13
Emission Reductions from CERP, by 2030 (tpy)*	297	3.5
Overall Emission Reductions from 2018 (%)	41	74

\*Estimated emission reduction targets from CERP, by 2030 include 31.4 tpy NOx and 1.5 tpy DPM from projected incentive projects.

Table 2 – Emission Reduction Targets for Statewide Measures*						
Statewide Measure	Action Date	Implementing Entity	Emission Reductions Targets 2025/2030 (tpy)			
			NOx	VOC	DPM	PM2.5
Advanced Clean Car 2	2020-2021	CARB	-/4	-/1	-/0	-/0
Heavy-Duty Inspection and Maintenance	2020	CARB	78/96	-/-	1/1	1/1
Low NOx Engine Standard	2019	CARB	7/53	-/-	-/-	-/-
Small Off-Road Engine Amendment	2020	CARB	71/112	37/123	1/1	1/4

\*Emission reduction targets based on estimates from CARB. Emission reductions are subject to future assessment and regulatory analysis that may result in emission reduction adjustments.

---

# CHAPTER 5B:

## TRUCKS AND FREEWAYS

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 5b: Trucks and Freeways

---

### Community Concerns

The Southeast Los Angeles (SELA) community is surrounded by Interstate 105 (I-105) to the south, Interstate 110 (I-110) to the west, and Interstate 710 (I-710) to the east. The I-710 is a vital transportation corridor for goods movement out of the Ports of Los Angeles and Long Beach, the busiest container ports in the United States. A daily average of up to 240,000 vehicles transit along the portion of the Interstate 710 in the SELA community.<sup>1</sup> Heavy-duty diesel trucks contribute to about 8.7% of the average daily traffic volume and over 90% of diesel particulate matter (DPM) emissions.<sup>2</sup>

The SELA community has expressed concern about emissions from heavy-duty diesel trucks traveling along the I-710 and idling near storage yards, fueling stations, residential areas, and near sensitive receptors. Community residents are also concerned about the general traffic congestion in their neighborhoods and the potential of large warehouses or fulfillment centers opening in the future, which may also increase truck activity. Please see Appendix 5 – Trucks and Freeways for more information.

### Actions to Reduce Emissions or Exposure

To address community concerns about emissions from trucks and freeways in SELA the CSC developed twelve (12) actions for the Community Emissions Reduction Plan (CERP). The tables below provide goals, actions, metrics, and a timeline to achieve emission or exposure reductions from trucks and freeways in SELA.

# CHAPTER 5C:

## RENDERING FACILITIES

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 5c: Rendering Facilities

### Community Concerns

The Southeast Los Angeles (SELA) community has five rendering facilities located in the emissions study area (ESA). Rendering facilities can emit odors from raw material receiving, processing operations, wastewater treatment, and other sources of fugitive odors at the facility.

The SELA community has expressed concern about odors from rendering facilities, particularly around schools. Community residents prioritized rendering facilities since these odors can cause adverse health effects such as coughing, sore throats, nausea, and respiratory irritations. Please see Appendix 5 – Rendering Facilities for more details.

### Actions to Reduce Emissions or Exposure

To address community concerns about odors from rendering facilities in SELA, the CSC and South Coast AQMD developed five (5) actions for the Community Emissions Reduction Plan (CERP). The tables below provide goals, actions, metrics, and a timeline to achieve odor exposure reduction from rendering facilities.

Table 1- Goal: Reduce Odors from Rendering Facilities					
	Action	Responsible Entity	Metric	Timeline	
				Start	Complete
<b>A</b>	Engage in community outreach and provide information on Rule 415 and how to file odor complaints	South Coast AQMD	Number of Rule 415 updates to community groups and CSC	1 <sup>st</sup> quarter, 2021	4 <sup>th</sup> quarter, 2025
<b>B</b>	Conduct air monitoring for VOCs and odorous compounds near each rendering facility and in the community to better characterize the emissions and to make data available to the public	South Coast AQMD	Begin conducting air measurements around rendering facilities	2 <sup>nd</sup> quarter, 2021	4 <sup>th</sup> quarter, 2025
<b>C</b>	Continue complaint response including SELA complaint tracking, provide timely updates to complainants, continue Rule	South Coast AQMD	Number of complaints responded to	1 <sup>st</sup> quarter, 2021	4 <sup>th</sup> quarter, 2025

	415 compliance inspections, and provide an annual summary of findings to the CSC. Collaborate with local land-use agencies and L.A. County Green Zones Program to identify proposed new rendering facility projects in the Southeast Los Angeles Community and identify South Coast AQMD rules that apply to the facilities		Updates to CSC about new rendering projects and collaborations with land-use agencies		
<b>D</b>	After the installation of the emissions controls (e.g., permanent total enclosures) required by Rule 415, work with the CSC to identify remaining odor concerns, evaluate the need for additional requirements to address odors, (e.g., conduct additional air monitoring for VOCs and odorous compounds) and establish a rule development schedule, if needed	South Coast AQMD	Number of odor complaints pre and post emission controls required by Rule 415  Additional metrics will be identified, if needed	1 <sup>st</sup> quarter, 2023	4 <sup>th</sup> quarter, 2023

**Table 2- Goal: Reduce Exposure to Odors from Rendering Facilities**

	Action	Responsible Entity	Metric	Timeline	
				Start	Complete
<b>E</b>	Explore the development of an odor event notification system, for schools and sensitive receptors. Consult with Community Groups that work with schools on key considerations for an odor event notification system (e.g., objectives of the notification system), and update CSC biannually on odor event notification system progress.	South Coast AQMD	Biannual updates on odor event notification progress to the CSC	1 <sup>st</sup> quarter, 2021	4th quarter, 2021

# CHAPTER 5D:

## GREEN SPACES

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 5d: Green Spaces

---

### Community Concerns

Green spaces such as parks and reserves, sporting fields, greenways and trails, and community gardens provide a variety of environmental benefits to residents. Green spaces may help lower air pollution,<sup>1</sup> reduce noise, and keep temperatures cool. Additionally, residents who live near green spaces may be encouraged to engage in physical activity which can improve physical health, reduce depression and anxiety, and improve cognitive function.<sup>2</sup> The CSC has prioritized increasing green spaces by conducting tree planting, establishing school gardens, installing vegetative buffers near freeways, greenways and/or tree canopy covers. Please see Appendix 5 – Green Spaces for more information.

### Actions to Reduce Emissions or Exposure

To address community interest in increasing green space in SELA, the South Coast AQMD and the CSC developed four (4) actions for the Community Emissions Reduction Plan (CERP). The table below provides goals, actions, metrics, and a timeline to increase green space in SELA.

---

<sup>1</sup>VOCs and NOx produce ozone and secondary organic aerosols in the presence of sunlight. Therefore, low VOC emitting trees should be planted so that they do not contribute to air pollution.

<sup>2</sup>C. Haaland and C.K. van den Bosch. Urban Forestry & Urban Greening 14 (2015) 760 – 771. <https://doi.org/10.1016/j.ufug.2015.07.009>. Accessed July 30, 2020.

<b>Table 1 – Goal: Increase Green Space in SELA</b>

# CHAPTER 5E:

## METAL PROCESSING FACILITIES

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 5e: Metal Processing Facilities

---

### Community Concerns

The Southeast Los Angeles (SELA) community and emission study area encompass approximately 130 metal processing facilities. The metal processing facilities in SELA conduct various operations, such as heat treating, melting, plating, finishing, machining, forging, cutting, shredding, grinding and recycling. Metal processing can be a source of toxic metal air pollutants, such as arsenic, cadmium, hexavalent chromium, lead and arsenic. A toxic metal air pollutant is a specific air pollutant which may cause or contribute to an increase in mortality or an increase in serious illness or pose a present or potential risk to human health.<sup>1</sup> South Coast AQMD, as well as other air agencies in California, rely on the Office of Environmental Health Hazard Assessment (OEHHA) to identify toxic air contaminants, the health effects and the methodology to estimate the health risks from toxic air contaminants. The SELA community has expressed concern about toxic air contaminants, such as hexavalent chromium, and are also concerned with emissions from metal recycling plants, metal dust, odors and noise. Please see Appendix 5 – Metal Processing Facilities for more information.

The CSC's goal is to eliminate community exposure to metal toxic air contaminants, odors and noise from metal processing facilities. The actions in Table 1 are aimed at achieving the community's goal, to the extent feasible.

### Examples of Actions to Reduce Emissions or Exposure

To address community concerns about emissions from metal processing facilities in SELA, the CSC and South Coast AQMD developed eight (8) actions for the Community Emissions Reduction Plan (CERP). The table below provides goals, actions, metrics and a timeline to achieve the emission or exposure reductions from metal processing facilities.

# CHAPTER 5F:

## RAILYARDS AND LOCOMOTIVES

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 5f: Railyards and Locomotives

---

### Community Concerns

The Southeast Los Angeles (SELA) community boundary and emissions study area includes three railyards and a portion of the Alameda Corridor, which is an express railway that runs from the Ports of Long Beach and Los Angeles to Downtown Los Angeles. The SELA community expressed concerns about diesel emissions from older and idling locomotives, and from cargo-handling equipment at railyards. The community concerns are heightened due to projected increases in regional rail volumes resulting from growing levels of international trade.<sup>1</sup> Additional details on railyards and locomotives in SELA are available in Appendix 5 – Railyards and Locomotives.

### Actions to Reduce Emissions or Exposure

To address community concerns about emissions from railyards and locomotives in SELA, South Coast AQMD developed eleven (11) actions for the Community Emissions Reduction Plan (CERP). The table below provides goals, actions, metrics, and a timeline to achieve the emission or exposure reductions due to railyard activities.

# CHAPTER 5G:

## GENERAL INDUSTRIAL FACILITIES

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 5g: General Industrial Facilities

### Community Concerns

The Southeast Los Angeles (SELA) community and emissions study area encompass approximately two hundred industrial facilities and related commercial activities. The industrial facilities in SELA include numerous facility types that conduct a wide variety of processes. The SELA CSC has expressed concerns about emissions from oil and gas facilities, chemicals, autobody shops, construction activities, waste transfer stations, fugitive dust from wood and glass processing facilities, and VOC emissions from industrial facilities.

### Examples of Actions to Reduce Emissions or Exposure

To address community concerns about emissions from general industrial facilities in SELA, the CSC and South Coast AQMD developed actions (or policies) for the Community Emissions Reduction Plan (CERP). The table below provides goals, actions, metrics, and a timeline to achieve the emission or exposure reductions from general industrial facilities.

Table1 – Goal: Reduce Emissions from General Industrial Facilities					
	Action	Responsible Entity	Metric	Timeline	
				Start	Complete
A	Develop an informational handout that describes the types of general industrial facilities within the emissions study area, sources of emissions at the facilities, and existing air monitoring efforts.	South Coast AQMD, CARB	Development of general industrial facilities document		
	Conduct an annual community workshop with CARB to educate the community on the Criteria Pollutant and Toxics Emissions Reporting (CTR) process and share the data that has been collected from facilities in the SELA community. South Coast AQMD and CARB to help community interpret results and identify industrial facilities with highest toxics emissions.		Conduct CTR Public Workshop and identify industrial facilities of highest concern	1 <sup>st</sup> quarter, 2021 4 <sup>th</sup> quarter, 2021	2 <sup>nd</sup> quarter, 2021 4 <sup>th</sup> quarter, 2025

<b>B</b>	Work with the CSC and local agencies (e.g., L.A. County Industrial Use Task Force) to identify industrial facilities of concern within the SELA emissions study area, provide a list of South Coast AQMD rules applicable to the industrial facilities identified, provide a three (3) year compliance history of the facilities, summarize available emissions data and air monitoring data collected at or near facilities, and other sources of information.	South Coast AQMD	Develop general industrial facility list  Provide applicable rules list, compliance history, air monitoring data, or other sources of information to the CSC	1 <sup>st</sup> quarter, 2021	3 <sup>rd</sup> quarter, 2022
<b>C</b>	Based on the information from Action B above, work with the CSC to prioritize emissions sources and identify potential air monitoring (conduct air monitoring, where feasible), emissions and exposure reduction measures, or identify opportunities to use incentive funds to encourage the adoption of technologies above and beyond rule requirements, if necessary.	South Coast AQMD	Conduct CSC activity to prioritize emissions sources for further investigation  Identify emissions and exposure reduction measures, if necessary	3 <sup>rd</sup> quarter, 2021	4 <sup>th</sup> quarter, 2021
<b>D</b>	Identify emissions and exposure reduction measures that require South Coast AQMD Governing Board action in the annual CERP progress report to the Board	South Coast AQMD	Identify measures requiring Board action in the annual CERP progress report	1 <sup>st</sup> quarter, 2022	4 <sup>th</sup> quarter, 2022

---

# CHAPTER 6:

## COMMUNITY AIR MONITORING PLAN (CAMP) SUMMARY

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Chapter 6: Community Air Monitoring Plan (CAMP) Summary

---

The Community Air Monitoring Plan (CAMP) for the Southeast Los Angeles (SELA) community has been developed through close collaboration between the Community Steering Committee (CSC) and South Coast AQMD staff. It outlines the objectives and strategies for monitoring air pollution in the community based on the air quality priorities identified by the CSC. Air monitoring plays an important role in enhancing our understanding of air pollution in SELA and supporting effective actions to reduce emissions and exposure within the community. Air monitoring can provide valuable information about sources of air pollution, types of air pollutants, and their impacts in the community. Information that is collected from air monitoring can also help track the progress of emissions and exposure reduction strategies developed by the CSC in the Community Emissions Reduction Plan (CERP). Air monitoring strategies are included in the actions described in Chapters 5b Truck Traffic and Freeways, 5c Rendering Facilities, 5e Metals, and 5f Railyards and Locomotives. Air monitoring could also become a strategy to address emissions from general industrial sources based on the outcome of the actions defined by the CSC for this air quality priority. The air monitoring actions are designed to support the strategies in the CERP that address the specific air quality priorities.

Overall, while the CERP and CAMP are separate documents, they work hand-in-hand to help achieve and track emissions and exposure reductions designed to improve local air quality in SELA. It is critical to develop a scientific air monitoring approach and use appropriate monitoring methods and equipment to satisfy the community-specific air monitoring objectives. SELA covers a large geographical area that is affected by a variety of air pollution sources. Consequently, multiple air monitoring methods are necessary to address the community's air quality priorities. These methods include mobile and fixed-site air monitoring that can be supplemented by low-cost air quality sensors. Mobile air monitoring can be conducted using real-time instruments to allow for wide scale community air pollution mapping, help identify air pollution hotspots and provide more detailed information about air pollution levels at specific locations, at specific times. Fixed site air monitoring can be strategically placed at specific locations near one or more potential stationary air pollution sources of interest to better characterize emissions and provide information about air pollution exposures. Additionally, deploying low-cost air quality sensors can supplement the overall monitoring efforts by improving the geographical coverage in the community and providing real-time air pollution information, but only for a limited number of pollutants (e.g. PM<sub>2.5</sub>). A detailed description of air pollutants to be measured and types of monitoring methods and technologies to be deployed in SELA is provided in Appendix 6 of the CAMP.

Overall, community air monitoring will implement the recommendations provided in CARB's "Community Air Protection Blueprint"<sup>i</sup>, support the implementation of the CERP, and track the progress towards improved air quality in the SELA community.

## **CHARTER**

A Charter was developed by South Coast AQMD and CSC member to cover committee objectives, roles and responsibilities, meeting frequency, meeting dates, times, and locations, etc.

English: <http://www.aqmd.gov/docs/default-source/ab-617-ab-134/steering-committees/southeast-los-angeles/charter-feb-2020.pdf>

Spanish: <http://www.aqmd.gov/docs/default-source/ab-617-ab-134/steering-committees/southeast-los-angeles/charter-feb-2020-span.pdf>

## **SIGN-IN SHEETS**

At every CSC meeting, members of the CSC and public were requested to sign in. The initial community kick-off meeting and the first meeting of the SELA CSC were in-person meetings, but the rest of the meetings were held virtually via zoom webinars. Thus, the zoom attendance report is included for each virtual meeting.

(attached)

## **AGENDAS**

Prior to every CSC meeting, the meeting agenda was emailed to CSC members and interested parties as well as posted online in English and Spanish.

<http://www.aqmd.gov/nav/about/initiatives/community-efforts/environmental-justice/ab617-134/southeast-los-angeles>

(attached)

## **MEETING DATES, TIMES, LOCATION**

Recent and upcoming activities regarding the SELA community, including interactive maps, the discussion draft of the CERP and CAMP, all meeting invitations, presentations, materials and summary notes can be found on South Coast AQMD's website:

<http://www.aqmd.gov/nav/about/initiatives/community-efforts/environmental-justice/ab617-134/southeast-los-angeles>

Specific links for meeting flyers, presentations, and meeting summaries are listed below.

## MEETING INTERPRETATION

Spanish interpretation was available at each kick-off meeting and CSC meeting. The following interpreters were contracted through California Certified Interpreters and provided their interpretation services at the various SELA CSC meetings:

**Table 2-4: Meeting Interpreters**

Alejandro Franco	Monica Desiderio	Madeline Rios
Patricia Hyatt	Estela Moll	Edna L. Santizo

## MEETING FACILITATION

The first two CSC meetings, occurring on February 6<sup>th</sup> and May 7<sup>th</sup>, were facilitated by Valerie Martinez of VMA Communications ([www.vmapr.com](http://www.vmapr.com)). The next seven CSC meetings were facilitated by Gina Triviso, Community Liaison for the SELA community.

---

# APPENDIX 3A:

## COMMUNITY PROFILE

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Process of CSC Input on CERP Elements

The elements and actions described in the CERP were developed during monthly CSC meetings and workshops, where committee members, members of the public, and South Coast AQMD staff worked together to discuss the various air quality concerns within the community boundaries (Community Boundary and Emissions Study Area) and identified opportunities to address them. The input process is summarized in Table Appendix 3a-1.

Table Appendix 3a-1: Process of CSC Input on CERP Elements

CSC Meeting #	Discussion Topic(s)	CSC input	How was this CSC input used in the CERP development process?
#1 February 2020	CSC Orientation, Community Boundary, Air Monitoring, Source Attribution Air Quality Prioritization Activity	Refined community boundaries. Identified community air quality concerns.  <u>Outcome:</u> List of air quality concerns	Boundaries were used to define focus area for CERP actions (see Meetings #2-6). Concerns were prioritized for inclusion in Plans (see Meeting #2).
#2 May 2020	Proposed Community Boundary, Emissions Study Area, Air Quality Priorities & Next Steps; CARB Blueprint Overview	Refined community boundaries and finalized air quality priorities  <u>Outcome:</u> Community boundary and emission study area, Air Quality Priorities	Boundaries and air quality priorities were used to define focus area for CERP actions (see Meetings #3-7).
#3 June 2020	Final Community Boundary & Emissions Study Area, CERP Development Overview, Goals, Strategies, & Actions Worksheet	Refined air quality priorities goals, strategies, and actions in Plans.  <u>Outcome:</u> Finalized community boundary and emissions study area, initial ideas for CERP/CAMP goals, strategies, and actions	Initial actions were discussed and developed to address air quality priorities (see Meetings #4-7)
#4 July 2020	Truck Traffic & Rail Workshops; Truck traffic Green Paper; Railyards and Locomotives Green Paper	Discussed and developed the foundation for strategies to address each air quality priority. Ideas for actions to be written into the Plans.  <u>Outcome:</u> Focused air quality concerns to address through list of actions for CERP	Feedback on air quality priorities and concerns that CERP actions need to address and include in the Draft CERP.
#5 August 2020	Metal Processing Facilities and Green Spaces Workshops; Metals Green Paper; Green Spaces Green Paper		
#6 September 2020	Rendering & General Industrial Workshops;		

	Rendering Green Paper; General Industrial Green Paper		
#7 October 8, 2020	CERP Development Overview; Potential Actions, Goals and Metrics; Workshop Comments;	Ideas for actions for each CERP air quality priority. Staff will work with CSC members to write CERP actions  <u>Outcome:</u> Draft CERP	Feedback on proposed ideas for specific goals will be used to inform the Draft CERP.
#8 October 29, 2020	Chapter 5 Draft CERP; Proposed actions, goals, metrics; Development Process Timeline	Feedback on Draft CERP. Ideas for specific goals for each CERP action.  <u>Outcome:</u> Revised Draft CERP	Feedback on Draft CERP and ideas for specific goals will be used to inform the Draft CERP prior to Stationary Source Committee.
#9 November 2020 (TBD)	CERP final comments and CSC approval	Feedback on CERP prior to Stationary Source Committee  <u>Outcome:</u> Final CERP presented to the South Coast AQMD Governing Board	Final comments will be addressed in December 2020 Governing Board Package

Additionally, the South Coast AQMD is holding a question and answer workshop on November 5, 2020 to address any questions that CSC and community members have about the Discussion Draft CERP.

### Key Stationary Sources in the Community

The South Coast AQMD develops and enforces air pollution regulations to reduce emissions, improve air quality and protect public health. Many South Coast AQMD rules apply to a specific type of operation or pollution source. *Figure Appendix 3a-1* describes the number of facilities in this community that are subject to some key South Coast AQMD rules to control emissions from facilities processing metals. The figure also includes information about facilities that are in important state and federal programs, which include major sources of air pollution or other types of environmental pollution.

Figure Appendix 3a-1: Key stationary sources in the Southeast Los Angeles community,<sup>1</sup> by regulatory program

	26 Facilities subject to Rule 1407 or 1420	<b>Rule 1407</b> reduces emissions of arsenic, cadmium, and nickel from metal melting operations. <b>Rule 1420</b> reduces emissions of lead from facilities
	4 Facilities subject to Rule 1426	<b>Rule 1426</b> reduces emissions from facilities performing chromium, nickel, cadmium, lead or copper electroplating operations, or chromic acid anodizing
	12 Facilities subject to Rule 1469	<b>Rule 1469</b> reduces hexavalent chromium emissions from chromium electroplating and chromic acid anodizing operations
	25 Facilities in the AB2588 program	<b>Assembly Bill 2588</b> (AB2588) is a statewide program that focuses on reducing air toxics pollution from facilities, and requires facilities above certain levels to disclose and/or reduce risks
	30 Facilities subject to U.S. EPA Title V	The <b>U.S. EPA Title V program</b> is a permitting program that includes all major sources of air pollutants across the United States.
	4 Sites in U.S. EPA Superfund program	The <b>U.S. EPA Superfund</b> program conducts environmental clean-ups of some of the most contaminated land, and responds to environmental emergencies, oil spills, and natural disasters

### Information on Best Available Retrofit Control Technology and the AB 2588 Program

AB 617 requires air districts to implement Best Available Retrofit Control Technology (BARCT) for facilities in the state greenhouse gas cap-and-trade program by December 31, 2023. The Southeast Los Angeles community has facilities that are subject to BARCT, specifically larger facilities that are in the RECLAIM program. In addition, CARB's Blueprint states that facilities located within the community with Risk Reduction Plans under the Assembly Bill (AB) 2588 program must be identified. Descriptions of the facilities that are subject to BARCT (specifically RECLAIM facilities) and the AB 2588 program are provided below.

### Best Available Retrofit Control Technology (BARCT)

#### RECLAIM facilities

Facilities within the RECLAIM program are typically larger facilities that have NOx emissions greater than four tons per year. The RECLAIM program<sup>2</sup> uses a market-based approach to achieve

<sup>1</sup> This data reflects facilities within both the emissions study area and community boundary.

<sup>2</sup> South Coast AQMD, RECLAIM, <http://www.aqmd.gov/home/programs/business/business-detail?title=reclaim>, Accessed September 10, 2020.

emission reductions from facilities for nitrogen oxides (NOx) and sulfur oxides (SOx) in the aggregate. However, an analysis of the RECLAIM program has shown that the ability to achieve NOx emission reductions using a market-based approach has diminished; therefore, pursuant to Board direction, RECLAIM NOx facilities will transition<sup>3</sup> to a command-and-control regulatory structure to ensure facilities meet BARCT. RECLAIM facilities that are also in the State greenhouse gas cap-and-trade program are subject to the BARCT requirements of AB 617. South Coast AQMD staff completed an analysis of the equipment at each RECLAIM facility, giving higher priority to older, higher polluting units that will need to install retrofit controls. The higher polluting units at RECLAIM facilities will be or have been evaluated for BARCT and will be subject to the following South Coast AQMD rules: Rules 1109.1,<sup>4</sup> 1110.2,<sup>5</sup> 1117,<sup>6</sup> 1118.1,<sup>7</sup> 1134,<sup>8</sup> 1135,<sup>9</sup> 1146, 1146.1, 1146.2,<sup>10</sup> 1147, 1147.1,<sup>11</sup> and 1147.2.<sup>12</sup> A BARCT assessment includes an evaluation of emission limits for existing units, South Coast AQMD regulatory requirements, other regulatory requirements, and pollution control technologies. Table Appendix 3a-2 lists the RECLAIM facilities that may be subject to BARCT. Identification of facilities in the State cap-and-trade program is pending verification from CARB.

800080	LUNDAY-THAGARD CO DBA WORLD OIL REFINING	9301 GARFIELD AVE, SOUTH GATE, CA, 90280-3898	Yes

#### *Non-RECLAIM facilities*

As a result of the BARCT assessment conducted for RECLAIM facilities, some equipment at non-RECLAIM facilities will also be affected and will be required to meet BARCT NO<sub>x</sub> emissions. The BARCT assessment is still currently being conducted for a number of rules and the list of affected non-RECLAIM facilities that may be subject to additional requirements is being developed.

<sup>13</sup> This data reflects facilities within both the emissions study area and community boundary.

<sup>14</sup> Cap-and-Trade designation by CARB for 2019.

## AB 2588 Program

The AB 2588 Program<sup>15</sup> is a statewide program that requires air districts to inventory air toxics from individual facilities.<sup>16</sup> The AB 2588 program is implemented in South Coast AQMD through Rule 1402 - Control of Toxic Air Contaminants from Existing Sources<sup>17</sup> which requires certain facilities to conduct Health Risk Assessments to assess the health risk (long-term versus short-term) to the surrounding community. Facilities are required to submit Health Risk Assessments<sup>18</sup> based upon the toxicity and volume of toxic air contaminants released within proximity to potential receptors (e.g., hospitals, residences, work sites). Depending on the risk, facilities may be required to provide public notices and hold a public meeting. If a facility is determined to exceed the significant risk level, as determined by each air district, they are required to reduce this risk by submitting a Risk Reduction Plan (RRP).<sup>19</sup> The RRP outlines what measures (e.g., high-efficiency particulate air (HEPA) filters) the facility will incorporate to reduce their risk. (Some facilities may be subject to the AB 2588 program, but do not exceed the action risk threshold and therefore are not required to submit a RRP.) Under Rule 1402, some facilities may also choose to voluntarily reduce their risk by submitting a voluntary RRP (VRRP).<sup>20</sup> If a facility has an approved VRRP, the risks will be reduced below the voluntary risk threshold. Table Appendix 3a-3<sup>21</sup> shows facilities within the Southeast Los Angeles community that are currently in the AB 2588 program in the South Coast AQMD. This table includes the facility name, location address, and the most recent status under the AB 2588 program. Facilities in the AB 2588 program without a RRP or VRRP will have the prioritization level (High, Intermediate, or Low)<sup>22</sup> and what year the prioritization was conducted listed as the status. Prioritization is based on reporting every four years.

<sup>15</sup> South Coast AQMD, Air Toxics “Hot Spots” Program (AB 2588), <http://www.aqmd.gov/home/rules-compliance/compliance/toxic-hot-spots-ab-2588>, Accessed September 10, 2020.

<sup>16</sup> The South Coast AQMD’s AB 2588 Program incorporates the requirements of the state AB 2588 program, as well as additional and/or more stringent requirements.

<sup>19</sup> South Coast AQMD, Risk Reduction, <http://www.aqmd.gov/home/rules-compliance/compliance/toxic-hot-spots-ab-2588/risk-reduction>, Accessed September 10, 2020.

<sup>20</sup> Some facilities may have submitted applications for a VRRP; however, if the facility is found to be already under the voluntary risk threshold, no further reduction measures are required.

<sup>21</sup> Facilities listed in the table are reducing risk or in the process of reducing risk.

<sup>22</sup> Facilities designated as high priority are required to submit Health Risk Assessments to assess the risk to their surrounding community based on their air toxics emissions. Facilities ranked as Intermediate priority are required to submit a complete toxics inventory once every four years. Facilities ranked as low priority are exempt from reporting.

### Technology Clearinghouse

South Coast AQMD staff have been conducting Best Available Control Technology (BACT) analyses and working closely with CARB to provide data for the Technology Clearinghouse. Requirements for Toxics-Best Available Control Technology (T-BACT) are established through the adoption and amendment of rules affecting air toxics (i.e., Regulation XIV). Staff will reference the Technology Clearinghouse and applicable air toxic rule requirements (inclusive of state Air Toxic Control Measures (ATCMs) and federal National Emission Standards for Hazardous Air Pollutants (NESHAPs), when available, to evaluate potential tightening of South Coast AQMD rules through the rule development process. Permit considerations for both new and modified sources throughout the district are based on rule requirements.

### Community Air Pollution Profile Details and Related Data

Understanding what air pollution sources exist in the community and what air pollutants come from these sources helps identify key issues that can be addressed through CERP actions. This section presents data based on previous cumulative impact studies<sup>24</sup> to describe the impacts of toxic air pollutants in this community, as well as other environmental pollution, public health factors, and social and economic factors that make people more sensitive or vulnerable to the health effects of pollution.<sup>25</sup>

Air toxics are one group of air pollutants that can affect public health on a local community scale. This includes pollutants from diesel exhaust, metal particulate pollutants (e.g., hexavalent chromium, lead, arsenic, nickel, etc.), and gases (e.g., benzene, formaldehyde, etc.). The South

<sup>24</sup> More information regarding MATES IV and the final report can be found on South Coast AQMD's website at, <http://www.aqmd.gov/home/air-quality/air-quality-studies/health-studies/matesiv>.

<sup>25</sup> Office of Environmental Health Hazard Assessment. CalEnviroScreen 3.0. <https://oehha.ca.gov/calenviroscreen/report/calenviroscreen-30>, Accessed September 10, 2020.

Coast AQMD conducts the Multiple Air Toxics Exposure Study (MATES) every few years to understand the cumulative health impacts of air toxics in communities across the region. The most recently completed study was MATES IV, which was released in 2015, and used air toxics monitoring, emissions inventories, modeling, and health risk assessment techniques to calculate the cancer risk due to toxic air pollutants (“air toxics cancer risk”).<sup>26</sup> MATES V is currently in progress. Based on MATES IV modeled data, approximately three-quarters of the air toxics cancer risk in the Basin is due to diesel particulate matter (Figure Appendix 3a-2). The average air toxics cancer risk in the Southeast Los Angeles community is higher than the Basin-wide average and dominated by diesel particulate matter.

Figure Appendix 3a-2: Air toxics cancer risk, based on MATES IV modeled data

Figure Appendix 3a-3: Diesel mobile sources in Southeast Los Angeles

Mobile sources include trucks, ships, trains, cars, buses, and other mobile equipment. Much of this equipment is powered by diesel, which is the air toxic pollutant with the highest impact in

<sup>26</sup> More information regarding MATES IV and the final report can be found on South Coast AQMD's website at: <http://www.aqmd.gov/home/air-quality/air-quality-studies/health-studies/matesiv>.

this community. The community includes more than 2.65 miles of freeways and two railyards, and many of these are located near residential areas (*Figure Appendix 3a-3*).

Understanding the community's public health and socioeconomic profile helps to provide context for the work being done through this CERP. CalEnviroScreen 3.0 is a screening tool developed by the California Office of Environmental Health Hazard Assessment (OEHHA) that is used to identify communities that are most affected by various sources of pollution, and where people are especially vulnerable to the effects of pollution. The CalEnviroScreen 3.0 data show that this community has public health factors, as well as social and economic factors, that make the community more sensitive and vulnerable to the harmful effects of air pollution compared to statewide averages (

Figure Appendix 3a-4 and

Figure Appendix 3a- 5). These data show that, on average, the Southeast Los Angeles community has generally worse public health factors and more social and economic disadvantages compared to California as a whole. The public health factors specifically show that this community has higher rates of emergency department visits for asthma and heart disease, and babies born with a low weight in comparison to statewide averages.

Figure Appendix 3a-4: CalEnviroScreen 3.0 scores for public health factors in Southeast Los Angeles compared to statewide averages

Figure Appendix 3a- 5: CalEnviroScreen 3.0 scores for social and economic factors in Southeast Los Angeles compared to statewide averages<sup>27, 28</sup>

<sup>27</sup> The metric of Educational Attainment in CalEnviroScreen 3.0 is defined as the percent of people whose highest level of education is less than a high school education. A lower percentile score shown in the blue bar on the graph for this metric means the community has fewer people who have completed a high school education.

<sup>28</sup> The metric of Linguistic Isolation in CalEnviroScreen 3.0 is defined as the percent of households where no one over age 14 speaks English well. A higher percentile score shown in the blue bar on the graph for this metric means there are more households that meet this definition.

---

# APPENDIX 3B:

## EMISSIONS AND SOURCE ATTRIBUTION ANALYSIS

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

## Introduction

The Community Emission Reduction Plan (CERP) identifies air quality priorities based on community input and evaluation of technical data on emission sources in the community. The CERP defines actions and strategies to reduce the emissions and exposure burden from sources of criteria air pollutants (CAPs) and toxic air contaminants (TACs). To accurately determine emission reductions from these actions and strategies, a baseline emission profile needs to be established. Baseline emissions can be developed through

an emissions inventory that includes an accounting of sources and their resulting emissions. This rigorous accounting of sources, their emissions and their contribution to cumulative exposure burden is identified by CARB guidelines to conduct source attribution analysis. Per the direction of CARB guidelines, source attribution is required to meet the following AB 617 statutory requirements:

*California Health and Safety Code § 44391.2 (b) (2) directs CARB to provide “[a] methodology for assessing and identifying the contributing sources or categories of sources, including, but not limited to, stationary and mobile sources, and an estimate of their relative contribution to elevated exposure to air pollution in impacted communities...”*

CARB recommended five possible technical approaches to conduct the source attribution analysis: emissions inventory, air quality modeling, targeted air monitoring/back trajectory/pollution roses/inverse modeling, chemical mass balance, and positive matrix factorization. Among them, based on the availability of data and resources, an emissions inventory and an air quality modeling analysis are the source attribution tools employed here to identify sources contributing to air pollution levels in the community, with an emphasis on identifying sources within the community (emissions inventory). More information on source attribution methods is included in the Source Attribution Methodology report.<sup>1</sup> The most recent air quality modeling analysis was released in 2015 as part of the Multiple Air Toxics Exposure Study (MATES IV), which showed Diesel Particulate Matter (DPM) as the air pollutant that contributed most to the air toxics cancer risk in the South Coast AQMD, with the Southeast Los

### Appendix 3b Highlights

- Information about the sources of air pollution in this community is presented in a “source attribution” analysis
- Diesel particulate matter is currently the main air toxic pollutant in this community, and it comes mostly from on-road and off-road mobile sources
- Other key air toxic pollutants in this community are 1,3-butadiene (mostly from the chemical industry) and benzene
- In future years, diesel emissions will decrease substantially due to ongoing and newly proposed regulations, but these emissions continue to be the main driver of air toxics cancer risk in this community

<sup>1</sup> South Coast Air Quality Management District, Methodology for Source Attribution Analyses for the first year AB 617 Communities in the South Coast Air Basin (Technical Report), 2019. <http://www.aqmd.gov/docs/default-source/ab-617-ab-134/technical-advisory-group/source-attribution-methodology.pdf>. Accessed October 27, 2020.

Angeles (SELA) community having higher air toxics cancer risks compared to the overall basin-wide average. MATES V is currently under development and will update cancer risk estimates for the community as well as the South Coast Air Basin. A community-specific emissions inventory was developed for CAPs and TACs based on the most recent available datasets.

The SELA community contains sources of air pollution, including the Interstate 710 freeway (I-710), the Alameda corridor, and 3 major rail yards within the community that support the goods movement industry. The community also includes a wide range of industrial facilities, including metal processing, surface coatings, auto body shops, rendering facilities, and warehousing that attracts heavy-duty truck traffic. The source attribution analysis (discussed in the next section) highlights that in the year 2018, DPM had the highest contribution to the community's overall air toxics inventory. On-road and off-road mobile sources were the predominant sources of DPM, with the major contributors being heavy-heavy duty trucks, medium-heavy duty trucks, off-road diesel equipment, and trains. In this community, 1,3-butadiene is the second largest contributor, which is largely emitted from stationary sources and area sources in the chemical industry and plastics production. The analysis presented in this chapter provides further details on the sources of volatile organic compounds (VOC) and particulate matter with a diameter smaller than or equal to 2.5 micrometers (PM<sub>2.5</sub>). Projected emissions in future years show decreases in DPM emissions, although DPM continues to be the main contributor to air toxics cancer risk.

The PM<sub>2.5</sub> emissions inventory in this appendix reflect “primary”, or directly emitted PM<sub>2.5</sub>. However, the majority of PM<sub>2.5</sub> in the air in this and most communities is formed in the atmosphere from chemical reactions of “precursor” pollutants, including SO<sub>x</sub>, NO<sub>x</sub>, ammonia, and VOC. Given the importance of this “secondary” PM<sub>2.5</sub>, the primary emissions described in this appendix are not a good indicator of this community's overall exposure to PM<sub>2.5</sub>. While the detailed methodology to develop these emissions is provided in the Source Attribution Methodology report<sup>2</sup>, the community-level emissions and their sources are discussed in this appendix, including base year and future emissions of CAPs and TACs.

## Base year emissions inventory and source attribution

### Overall profiles of CAPs and TACs

A variety of sources contribute to the emissions of criteria pollutants in the Southeast Los Angeles community (**Figure Appendix 3b-1**). NO<sub>x</sub> emissions are related to combustion sources, and in this community, on-road mobile sources are the largest emitters of NO<sub>x</sub>, with heavy-duty trucks being the largest contributor. Off-road mobile sources are the second largest contributor to NO<sub>x</sub> and include trains and off-road equipment. Stationary sources of NO<sub>x</sub> are mainly from fuel

<sup>2</sup> South Coast Air Quality Management District, Methodology for Source Attribution Analyses for the first year AB 617 Communities in the South Coast Air Basin (Technical Report), 2019. <http://www.aqmd.gov/docs/default-source/ab-617-ab-134/technical-advisory-group/source-attribution-methodology.pdf>. Accessed October 27, 2020.

combustion in industrial activities and for space and water heating at commercial businesses and homes.

Stationary and area sources contribute to two thirds of the VOC emissions, with consumer products and outdoor paints (architectural coatings) being the largest contributors. Mobile sources make up the remaining third of the VOC emissions, with vehicle exhaust being the largest contributor. Stationary and area sources are the largest contributors to PM<sub>2.5</sub> emissions. Commercial cooking, fuel combustion in residential, commercial and industrial sectors, and manufacturing are the main stationary sources of PM<sub>2.5</sub>. PM<sub>2.5</sub> is also emitted from vehicle exhaust and tire and brake wear. While paved road dust is also related to vehicles traveling on roads, it is considered a stationary source in the inventory rather than a mobile source.

Figure Appendix 3b-1: Contribution of major source categories to NO<sub>x</sub> emissions, VOC emissions, PM<sub>2.5</sub> emissions in the Southeast Los Angeles community in 2018 (tons/year)

TAC emissions from point sources were compiled from the emissions reported by facilities to South Coast AQMD's Annual Emissions Reporting (AER) program. TAC emissions from on-road, and off-road sources were calculated using chemical speciation profiles applied to Total Suspended Particulate matter (TSP) and Total Organic Gas (TOG) emissions. Details on the chemical speciation profiles are described in the Source Attribution Methodology report<sup>3</sup>. 3 pollutants were analyzed and included in this report. This list of air toxic pollutants is consistent with the list of TACs that facilities are required to report under the South Coast AQMD AER and AB2588 programs, except for chlorofluorocarbons (CFCs) and ammonia. CFCs do not have an associated air toxics cancer risk and is included in the criteria pollutant inventory because it is a PM precursor. While there is no cancer toxicity associated with ammonia, there are potential health impacts associated with ammonia, therefore, detailed ammonia emissions by major source category are included in Appendix 3b.

The contribution from stationary, on-road and off-road emission sources to TACs emissions in this community are presented in **Figure Appendix 3b-2**. Note that the emissions in the figure are weighted based on the cancer-causing potency of each TAC relative to DPM. For example, cancer potency of Cr<sup>6+</sup> is approximately 464 times higher than the toxicity of DPM per unit of mass. Thus, Cr<sup>6+</sup> emissions are multiplied by 464 to estimate the toxicity-weighted emissions of Cr<sup>6+</sup>. The units in the cancer-weighted DPM-equivalent emissions are expressed in pounds per year (lbs/year). This weighting approach enables a comparison of the contribution of each TAC to overall cancer risk using a consistent scale. **Figure Appendix 3b-2** indicates that DPM is the largest contributor to the overall air toxics cancer risk in the community, followed by 1,3-butadiene, benzene, Cr<sup>6+</sup> and formaldehyde. **Figure Appendix 3b-2** also indicates the major source categories from which the five TACs originate. Most of the DPM is emitted from mobile sources. Also, mobile sources are the major contributor to benzene, Cr<sup>6+</sup> and formaldehyde. The major contributor to 1,3-butadiene emissions is plastic production in the chemical industry, but mobile sources also contribute to 1,3 butadiene considerably. A detailed emission inventory by major source categories is provided in the Appendix.

<sup>3</sup> South Coast Air Quality Management District, Methodology for Source Attribution Analyses for the first year AB 617 Communities in the South Coast Air Basin (Technical Report), 2019. <http://www.aqmd.gov/docs/default-source/ab-617-ab-134/technical-advisory-group/source-attribution-methodology.pdf>. Accessed October 27, 2020.

Figure Appendix 3b-2: Contribution of major sources to toxic air contaminant emissions (toxicity-weighted diesel-equivalent, lbs/year) in the Southeast Los Angeles community in 2018.

## Stationary sources

**Figure Appendix 3b-3** provides the source attribution of VOC and PM<sub>2.5</sub> emissions from stationary sources in the SELA community in 2018. The largest contribution to VOC emissions is from consumer products. A wide range of industries also contribute significantly to total VOC emissions from stationary sources, with degreasing and surface coating being the second largest source of VOC from stationary sources, and gas stations (petroleum marketing) also being a significant source of VOC emissions.

Emissions of PM<sub>2.5</sub> in the SELA community originate from a wide range of activities, including commercial cooking, wood and paper industry, fuel combustion in the manufacturing, industrial, residential and commercial sectors, and from a variety of industrial processes.

**Figure Appendix 3b-4:** Toxic air contaminant emissions from stationary sources in the Southeast Los Angeles community for the year 2018 (toxicity-weighted diesel-equivalent, lbs/year) illustrates the emissions of the major TACs from stationary sources in the community. The emissions of each pollutant is weighted by their corresponding cancer potency relative to Diesel PM. In this community, 1,3-butadiene is the most predominant air toxic from stationary sources, and is primarily emitted from the chemical industry (**Figure Appendix 3b-5**).

Figure Appendix 3b-3: Source attribution of VOC emissions and PM2.5 emissions from stationary sources in the Southeast Los Angeles community for the year 2018 (Emissions in tons/year)

Figure Appendix 3b-4: Toxic air contaminant emissions from stationary sources in the Southeast Los Angeles community for the year 2018 (toxicity-weighted diesel-equivalent, lbs/year)

Figure Appendix 3b-5: Source attribution of 1,3-butadiene emissions from stationary sources in the Southeast Los Angeles community for 2018 (toxicity-weighted diesel equivalent, in lbs/year)

### On-road mobile sources

In this community, passenger vehicles and light- and medium-duty vehicles contribute the majority of VOC and PM<sub>2.5</sub> emissions (**Figure Appendix 3b-6**). VOC emissions are mostly from gasoline vehicles<sup>4</sup>, and as a result, passenger cars are the main contributor to VOC emissions because of the large number of vehicles and miles travelled by these types of vehicles. PM<sub>2.5</sub> emissions from on-road sources are from fuel combustion as well as from tire and brake wear. Light- and medium-duty vehicles are the main contributors to the total emissions of PM<sub>2.5</sub> because these vehicles travel the most miles within the community. Even though heavy-duty

<sup>4</sup> Evaporative and running losses contribute to 50% of total gasoline vehicle VOC emissions in Los Angeles County

trucks drive less than 10% of the total vehicle miles travelled in Los Angeles County, heavy-duty trucks contribute to 24% of the total PM<sub>2.5</sub> emissions from on-road sources<sup>5</sup>.

Toxic emissions from on-road mobile sources are largely dominated by DPM (**Figure Appendix 3b-7**). The largest contributor to DPM emissions are diesel-fueled heavy-duty trucks, and so the largest impacts from on-road mobile sources in the community are concentrated along the main goods movement corridors. Other important contributors to TACs are benzene, 1,3-butadiene and formaldehyde. The source of benzene is from evaporative losses and from the incomplete combustion of gasoline, whereas formaldehyde and 1,3-butadiene emissions are generated from fuel combustion. Hexavalent chromium also contributes to the toxicity of on-road emissions, and it is emitted from brake wear and, to a smaller extent, from fuel combustion. Because of the large contribution of DPM to overall toxicity from on-road emissions, heavy-duty trucks are the main contributor to TACs in this community (**Figure Appendix 3b-8**).

---

<sup>5</sup> Heavy-duty diesel vehicles tend to have higher PM exhaust and tire and brake wear emissions per mile driven compared to gasoline cars.

Figure Appendix 3b-6: Source attribution of VOC emissions and PM2.5 emissions from on-road mobile sources in the Southeast Los Angeles community for 2018 (tons/year)

Figure Appendix 3b-7: Toxic air contaminant emissions from on-road mobile sources in the Southeast Los Angeles community for the year 2018 (toxicity-weighted diesel equivalent, in lbs/year)

Figure Appendix 3b-8: Source attribution of Diesel PM emissions from on-road mobile sources in the Southeast Los Angeles community for 2018 (lbs/year)

## Off-road mobile sources

**Figure Appendix 3b-9** presents the major sources of VOC and PM<sub>2.5</sub> emissions from off-road sources. The largest contributor to total VOC from off-road sources in the community is small off-road equipment. This category includes small off-road spark-ignition engines used in lawn and garden equipment, industrial and commercial utility equipment, and specialty vehicles. Other significant sources of VOC's include evaporative emissions from fuel storage and handling, recreational boats and recreational vehicles, and emissions from trains. Although there is no major waterway or waterbody in the SELA community, boats that are parked in the community still emit pollutants through fuel evaporation.

As in the case of VOC emissions, the largest off-road source contributing to PM<sub>2.5</sub> emissions include industrial, commercial and construction equipment, transport refrigeration units (TRU) and lawn and garden equipment. The second largest contributor of PM<sub>2.5</sub> emissions from off-road sources in the community is from trains. There are large railyards within the community boundaries, and some of them are near residential areas.

**Figure Appendix 3b-10** presents the contribution of TAC emissions from off-road sources in the SELA community. Diesel PM is the toxic air contaminant that contributes the most to total air toxics cancer risk in the community from off-road sources. The two main sources of DPM are diesel off-road equipment and trains (**Figure Appendix 3b-11**). Off-road equipment encompasses a wide variety of equipment categories (**Figure Appendix 3b-12**). In this community, the largest category is construction and mining equipment, followed by industrial and commercial equipment and TRU. While construction and mining equipment is the name of a defined category used to build off-road mobile source emission inventories, this community does not have significant mining activities. Thus, emissions from this category are primarily from construction equipment.

## Future year emissions inventory and source attribution

### Trends of emission changes for CAPs and TACs

Future emissions of CAPs and TACs in the SELA community were projected using the best available information for population growth, economic growth and emission adjustments reflecting the ongoing implementation of existing regulations targeting specific air pollutants. The community includes a variety of facilities subject to toxics rules. On-road DPM emissions from heavy-duty diesel vehicles in this community will be subject to California Air Resources Board's Truck and Bus Regulation implemented after 2018. Off-road diesel equipment is also subject to state regulations that will reduce DPM and NO<sub>x</sub> emissions. South Coast AQMD has also developed various regulations to reduce NO<sub>x</sub> and VOC emissions since the adoption of the 2016 AQMP in March 2017. However, control factors for those newer regulations are currently under development and not reflected in the current inventory. The cutoff date for stationary NO<sub>x</sub> and VOC adopted rules, for the purpose of these emissions projections, was December 2015.

**Figure Appendix 3b-13** presents the projected trend in major CAPs emissions (NO<sub>x</sub>, VOC and PM<sub>2.5</sub>) in the SELA community from 2018 to the two milestone years, 2025 and 2030. NO<sub>x</sub> emissions in the community are expected to decrease substantially between 2018 and 2030, due

to the existing regulations for mobile sources and the emission reduction commitments under the RECLAIM program. VOC emissions are also expected to decrease between the years 2018 and 2030, mostly due to cleaner vehicle emissions. Unlike NO<sub>x</sub> and VOC emissions, PM<sub>2.5</sub> emissions remain virtually unchanged, with less than 1% change during the period from 2018 to 2030, reflecting that growth in population and economic activity outweighing benefits from regulations.

Trends for TAC emissions are shown in **Figure Appendix 3b-14**. Diesel PM continues to dominate the TAC emission inventory in future years, despite a significant reduction in DPM from heavy-duty trucks. DPM emissions are projected to decrease by 65% from 2018 through 2030. The second largest contributor to air toxics is 1,3-butadiene, with emissions increasing slightly due to slight increases in plastic production partially offset by reductions in emissions from vehicles. Benzene and formaldehyde emissions are projected to decrease throughout the 12-year period due to decreases in the emissions from vehicles, whereas emissions of toxic metals (i.e., cadmium, nickel, arsenic and lead) experience small variability due to changes in industrial activities. Hexavalent chromium emissions are projected to decrease from 2018 to 2030 due to decreases in vehicle emissions that is partially offset by a slight increase in industrial activity.

Many of the South Coast AQMD regulations addressing toxic metal pollution emissions from industrial facilities (e.g., South Coast AQMD Rule 1407 and Rule 1469) include requirements that reduce fugitive emissions and local air quality impacts from these facilities. Fugitive emissions often account for most of the toxic metal emissions from a facility. Unfortunately, the methods available to create an emissions inventory are not able to reflect fugitive emissions from these facilities. Therefore, while the inventory may not show an overall decrease in toxic metal emissions, the regulations result in overall decreased emissions due to measures that reduce fugitive emissions.

Figure Appendix 3b-13: The community total emission trends for NOx, VOC & PM2.5 (tons/year) for the years 2018, 2025 and 2030

Figure Appendix 3b-14: Total emission trends for toxic air contaminants in Southeast Los Angeles (toxicity-weighted diesel-equivalent emissions, lbs/year) for the years 2018, 2025 and 2030

**Figure 3b-15** presents the cumulative TAC emissions by the major categories for the three years of interest. The overall toxicity-weighted emissions are projected to decrease between 2018 and 2030. In particular, diesel heavy-duty trucks and off-road equipment are projected to decrease substantially over the 12-year period, driving down the overall TAC emissions.

Figure 3b-15: Toxic air contaminant emissions from all sources in the Southeast Los Angeles community, shown by major categories (cancer potency-weighted diesel equivalent emissions, lbs/year)

## Stationary Sources

Community-level emissions of NO<sub>x</sub>, VOC and PM<sub>2.5</sub> from stationary sources are presented in **Figure Appendix 3b-16** for the years 2018, 2025 and 2030. NO<sub>x</sub> emissions are expected to decline from 2018 to 2025, primarily due to emission reductions from RECLAIM facilities.<sup>vi</sup> VOC and PM<sub>2.5</sub> emissions are expected to grow gradually due to growth in population and in economic and industrial activities.

1,3-butadiene is the largest contributor to total toxic emissions from stationary sources (**Figure Appendix 3b-17**), and 1,3-butadiene emissions are expected to grow from 2018 to 2030 due to projected industrial activity growth during the same period. The major source for 1,3-butadiene emissions is from plastic production from the chemical industry. Inventory-based emissions of other TACs that are primarily emitted from industrial activities (i.e., cadmium, hexavalent chromium, and nickel) are also expected to increase due to industrial growth. However, they are difficult to quantify and thus not reported to South Coast AQMD and are estimated for regulatory efforts. As such, reductions from fugitive emissions as a result of South Coast AQMD's regulatory efforts are not accounted for in the analysis. Emissions of methylene chloride are expected to increase due to increase in degreasing activity and consumer products uses, whereas benzene, DPM, and perchloroethylene emissions are expected to decline due to on-going regulations.

Figure Appendix 3b-16: Trends in NO<sub>x</sub>, VOC and PM<sub>2.5</sub> emissions from stationary sources in the Southeast Los Angeles community. Emissions are presented in tons per year

<sup>vi</sup> NO<sub>x</sub> RECLAIM is an emission cap-and-trade program that includes larger stationary sources located in the Basin. The current regulation, Rule 2002 requires 12 tons per year of NO<sub>x</sub> emission reductions from 2016 to 2022. In addition, the 2016 AQMP includes a control measure to target an additional 5 tons per year of NO<sub>x</sub> reduction from the RECLAIM facilities by 2025. The rulemaking to achieve additional 5 TPD NO<sub>x</sub> is still ongoing and will be reflected on the inventory when it is finalized.

Figure Appendix 3b-17: Trends in toxic air contaminant emissions (toxicity-weighted diesel-equivalent, lbs/year) from stationary sources in the Southeast Los Angeles community

### On-road mobile sources

Trends for on-road emissions are presented in **Figure Appendix 3b-18**. On-road emissions are expected to decline significantly from 2018 to 2025, due to turnover to cleaner vehicles for both light-duty vehicles and heavy-duty trucks. Vehicle emissions decrease from 2018 to 2030 despite the projected increase in vehicle activity, i.e. vehicle-miles traveled (VMT).

VOC emissions are expected to decline for all vehicle types except for motorcycles, for which emissions are projected to grow steadily from 2018 to 2030. PM<sub>2.5</sub> emissions are expected to decline for all vehicle types from 2018 to 2025. After 2025, the effect of vehicle regulations on

light-, medium- and heavy-heavy duty trucks is offset by growth in numbers and VMT. Tire and brake wear, the major source of PM<sub>2.5</sub> vehicle emissions, are proportional to VMT, which increases with time due to population and economic growth in the area. Emissions of PM<sub>2.5</sub> from heavy-duty trucks are expected to increase slightly, offsetting passenger vehicle PM<sub>2.5</sub> emission reductions. As a result, overall PM<sub>2.5</sub> emissions from vehicles are projected to remain the same from 2025 to 2030.

**Figure Appendix 3b-19** presents the trends in emissions of toxic air contaminants from on-road mobile sources, with emissions weighted based on their cancer potency relative to DPM. In 2018, DPM is the pollutant contributing most to cancer risk, followed by benzene, 1,3-butadiene and hexavalent chromium. However, regulations for heavy-duty diesel trucks are projected to reduce the DPM emissions drastically beginning in 2018 through 2025. Beyond 2025, DPM emission reductions are anticipated to slow down due to increased vehicle activity; however, the DPM emissions in 2030 are projected to still be 83% lower than in 2018. Benzene, formaldehyde, and 1,3-butadiene emissions are projected to decline due to reductions in evaporative and exhaust emissions from vehicles. Hexavalent chromium emissions are also expected to decline.

Figure Appendix 3b-18: Trends in NO<sub>x</sub>, VOC and PM<sub>2.5</sub> emissions from on-road mobile sources in the Southeast Los Angeles community. Emission values in tons per year

Figure Appendix 3b-19: Trends in toxic air contaminant emissions (toxicity-weighted diesel-equivalent, lbs/year) from on-road sources in Southeast Los Angeles

### Off-road mobile sources

Trends in emissions of NO<sub>x</sub>, VOC, and PM<sub>2.5</sub> from off-road mobile sources in the community are presented in **Figure Appendix 3b-20**. All three pollutants are projected to decline steadily from 2018 to 2030. In general, emissions are expected to decline due to emission reductions from trains and industrial off-road equipment, due to turnover of older equipment to newer, cleaner equipment. Reductions in evaporative emissions from gasoline off-road equipment, fuel storage handling and recreational vehicles drive the overall VOC reductions in the community.

Trends in toxic air contaminant emissions are presented in **Figure Appendix 3b-21**. Emissions from off-road mobile sources in this community are dominated by diesel emissions from trains and heavy industrial and construction off-road equipment. Off-road equipment regulations and turnover to cleaner and more fuel-efficient locomotives reduce the overall TACs in the community.

Figure Appendix 3b-20: Trends in NOx, VOC and PM2.5 emissions from off-road mobile sources in the Southeast Los Angeles community. Emission values in tons per year

Figure Appendix 3b-21: Trends in toxic air contaminant emissions (toxicity-weighted diesel-equivalent, lbs/year) from off-road sources in Southeast Los Angeles community

## Summary

The main sources of air pollutant emissions in the SELA community are on-road vehicles, trains, off-road equipment and industrial activities.

NO<sub>x</sub> emissions in this community are dominated by mobile sources – both on-road and off-road – which account for 75% of the total emissions in 2018. Heavy-duty truck traffic, trains, and off-road equipment are the largest sources for NO<sub>x</sub>. Stationary sources contribute to 25% of NO<sub>x</sub> emissions in this community, mostly from fuel combustion in the residential, commercial, and industrial sectors.

VOC emissions are dominated by area sources, with consumer products being the largest source category. Passenger vehicles and off-road equipment, such as lawn mowers and other small gasoline engines, are the largest contributors to VOC emissions from on-road and off-road sources, respectively.

Unlike NO<sub>x</sub> and VOC, sources of PM<sub>2.5</sub> emissions span a wide variety of activity sectors, which include commercial cooking, light and medium automobiles, wood and paper industries, fuel combustion and off-road equipment.

Toxic air contaminants (TACs) emissions in the SELA community are dominated by diesel particulate matter (DPM) from diesel exhaust. DPM is emitted from heavy-duty trucks, trains, and industrial off-road equipment. 1,3-butadiene is the second largest component of TACs based on cancer-weighted emissions, and the major source is plastic production. Other significant TAC species includes benzene and formaldehyde, which are mostly emitted from mobile sources.

Future NO<sub>x</sub> emissions in the community are expected to decrease due to the existing regulations on mobile sources and the emission reduction commitments for major stationary source facilities. VOC emissions are also expected to decline, although they will decline more slowly compared to NO<sub>x</sub> reductions. Emissions of DPM from heavy-duty trucks are also expected to decrease substantially because of CARB's Truck and Bus Regulation. CARB's In-Use Off-Road Diesel-Fueled Fleets Regulation will also contribute to reducing DPM. Emissions of 1,3-butadiene from stationary sources are expected to increase slightly in the future years, due to increased industrial activity. However, in future years, DPM continues to be the main contributor to air toxics cancer risk in this community.

# APPENDIX 4:

## ENFORCEMENT OVERVIEW AND HISTORY

---

THIS PAGE IS INTENTIONALLY LEFT BLANK

### South Coast AQMD

The primary goal of South Coast AQMD enforcement activities is for regulated entities to achieve compliance with air quality rules and regulations, and to protect public health. Part of this process involves consistently identifying and resolving violations, thereby ensuring a level playing field for all regulated entities and preventing unfair advantages for companies that do not comply with rules and permit conditions.

Air pollution concerns received directly from community members by way of public complaints are a very important source of information. All complaints are assigned to an inspector for investigation, with priority for ongoing issues that are impacting the public. In addition to receiving complaints from community members, South Coast AQMD also receives notifications directly from facilities and referrals from other agencies.

South Coast AQMD also performs unannounced inspections at facilities to verify compliance.

### California Air Resources Board

CARB's enforcement approach is two-pronged: ensuring compliance through robust, regular inspections and deterring violations through our penalty assessment process. From the compliance-side, it includes conducting both field inspections and fleet-wide audits. For field inspections, the focus has been on enforcing heavy-duty diesel vehicle (HDDV) regulations, such as the Truck and Bus Regulation, the airborne toxic control measure (ATCM) to limit idling, and the Heavy-Duty Vehicle Inspection Program (HDVIP). At refineries and fueling stations, CARB enforces fuel formulation regulations. In railyards, CARB enforces regulations related to drayage trucks, transportation refrigeration units (TRUs), and cargo handling equipment (CHE). From the deterrence-side, CARB Enforcement encourages violators to support CARB's community-based projects program by setting aside a portion of penalties paid from enforcement action settlements for Supplemental Environmental Projects (SEPs).

### CARB Statewide Truck and Bus Regulation

CARB is achieving compliance with the Statewide Truck and Bus (STB) Regulation, section 2025 of Title 13, California Code of Regulations (STB) by 2023 via a streamlined auditing process. STB requires diesel trucks with a Gross Vehicle Weight Rating (GVWR) greater than 14,000 pounds that operate in California to install diesel particulate filters or replace older engines with cleaner engine technology on a phased-in schedule based on the model year of the engine and GVWR. CARB staff process data from vehicle registration, compliance reporting, and inspection databases to identify potentially non-compliant fleets and prioritize them for enforcement action.

In April 2017, the Governor signed Senate Bill 1 (SB1) into law which included a provision that, beginning in 2020, a vehicle must demonstrate compliance with the STB regulation before it can be registered with the Department of Motor Vehicles (DMV). Beginning in

2020, the DMV, in conjunction with data provided by CARB, will deny vehicle registration to non-compliant heavy-duty diesel vehicles (HDDV) based on the model year of the HDDV, so that by the end of 2023, 100% compliance will be achieved for the truck and bus rule.

### Authority and Legal Right to Issue Violations and Penalties

Under both the federal Clean Air Act and the California Health & Safety Code, South Coast AQMD is under a legal obligation to make and enforce air pollution regulations. These regulations are primarily meant to ensure that the surrounding (or ambient) air will meet federal and state air quality standards. However, South Coast AQMD also has broad authority to regulate toxic and hazardous air emissions, which are enforced in the same manner as rules regulating criteria pollutants to attain the ambient air quality standards.

To enforce local, state, and federal air pollution regulations, CARB and South Coast AQMD both use their authority to conduct inspections of alleged air pollution sources under their jurisdiction and issue notices of violations that can lead to civil and criminal penalties. Civil penalties vary based on multiple factors, however in the most egregious cases, penalties can be up to \$250,000 per day for individuals and up to \$1,000,000 per day for corporations. In cases with potential criminal violations, South Coast AQMD may refer matters to federal, state, or local prosecuting agencies. Inspection warrants also may be obtained if necessary when access to facilities or potential emissions sites is denied.

For further information on South Coast AQMD's<sup>1</sup> and CARB's<sup>2</sup> authority, please refer to our websites.

### South Coast AQMD Hearing Board

The Hearing Board is a quasi-judicial panel authorized to provide relief from South Coast AQMD regulations under certain circumstances and to order businesses to take specific actions to come into compliance with regulations. As state law requires, Hearing Board members are appointed by, but act independently of, the South Coast AQMD Governing Board.

The Hearing Board is authorized to hear:

- Petitions by entities (individuals, companies, public agencies, etc.) companies for variances.
- Petitions for abatement orders. An abatement order requires an entity operating out of compliance to take specific actions or to shut down its operation. This is a severe remedy normally reserved for serious violations.

---

<sup>1</sup> South Coast AQMD, <https://www.aqmd.gov/nav/about/authority/enforcement>. Accessed November 3, 2020.

<sup>2</sup> California Air Resources Board, <https://ww2.arb.ca.gov/about/history>. Accessed November 3, 2020.

- Appeals regarding granting of permits, permit conditions, permit denials and suspensions, denials of emission reduction credits, and denials of pollution control plans.
- Appeals by third parties.

The Hearing Board is not authorized to:

- Modify rules.
- Exempt an entity from complying with a rule.
- Grant a variance from a violation of the public nuisance law, such as one that creates an odor problem or threatens public health or property.
- Review a violation notice in any way.

After hearing all sides of a case in which an entity is having problems complying with South Coast AQMD rules, the Hearing Board weighs the evidence and reaches a decision.

### CARB Supplemental Environmental Project Process

During the settlement process, violators have the opportunity to allocate up to 50% of their penalties to a supplemental environmental project (SEP). Community-proposed projects are funded by the violators to help improve public health, reduce pollution, increase environmental compliance and bring public awareness to air pollution issues. Additional SEPS are possible in the SELA community through the proposal process. Proposals of projects that meet the following four requirements: reducing direct/indirect air emissions or exposure to air pollution, relates to the violation, does not benefit the violator, and goes above and beyond regulatory requirements can be submitted for consideration for future settlements through the SEP proposal form (<https://calepa.ca.gov/sep-proposal-form>). Nine SEPs have been funded in South Coast AQMD's jurisdiction including paid environmental education internships, planting trees, writing articles to inform community about air pollution and resources, conducting research (e.g., air monitoring, truck traffic survey), and school air quality education programs and filtration systems.

### Technology

Both South Coast AQMD and CARB enforcement staff have embraced the use of technology as a means for more efficient and effective inspections. South Coast AQMD inspectors have access to advanced instruments to help identify air pollution issues in real-time. The following portable instruments are available to inspectors:

**Figure 4-1: Portable instruments used by South Coast AQMD inspectors in the field**

*Toxic Vapor Analyzers (TVA):* Inspectors can use TVAs to measure the level of certain gases in a specific area. This includes methane and volatile organic compounds (VOCs), which are emitted by petroleum sources and other types of sources.

*Infrared Cameras:* Inspectors can use specialized infrared cameras to view emissions of gases (including methane and VOCs) that would otherwise be invisible to the naked eye. This equipment enables inspectors to scan areas for emissions and quickly check for large leaks at a facility.

*X-Ray Fluorescence (XRF):* Inspectors can use this handheld instrument to identify the types of chemicals that are on a surface or in a dust pile. This tool helps identify potential pollutants that are particles. For example, an XRF can be used to scan surfaces at a facility to identify which specific toxic metals may be deposited in that location, and which locations have the highest levels of those toxic metals.

*H<sub>2</sub>S Analyzers (Jerome Meters):* Inspectors can use this handheld instrument to measure hydrogen sulfide gas levels in the air. This information can be used to identify a potential source of rotten egg type odors.

### Further Information on Technology Used for Compliance Investigations

#### Toxic Vapor Analyzer (TVA)

Using a Flame Ionization Detector (FID) or Photoionization Detector (PID), this instrument is capable of detecting a wide variety of organic and inorganic compounds. The unit must be calibrated to identify specific compounds. Any day that the instrument is used for conducting compliance inspections, a trained inspector calibrates the equipment to a set calibration standard depending on the inspection type. For example, in an oil and gas process leak inspection to identify VOCs, a 3-Point Methane Calibration Curve is used.

This instrument displays concentrations of the gas it is calibrated to detect in parts per million (ppm), also known as the number of molecules of that gas per one million molecules of air. Inspectors can use TVAs to identify organic and inorganic vapors according to a standard set by the U.S. Environmental Protection Agency (EPA) Method 21 – Determination of Volatile Organic Compound Leaks.<sup>3</sup> This method from U.S. EPA sets the standard for the specifications and performance criteria of the instrument, as well as the process of identifying a leak.

#### *Infrared Cameras*

Using infrared cameras equipped with Optical Gas Imaging (OGI) technology, inspectors can detect hydrocarbon leaks at a variety of facilities, including those in the oil and gas industry. The device uses a non-contact technology which identifies the infrared energy (heat) of a specific gas and converts it into an electronic signal. This signal is processed into an image, giving inspectors the ability to view emissions that would otherwise be invisible to the naked eye.

Using infrared OGI cameras enables inspectors to scan areas for emissions and quickly gain an overall understanding regarding any large leaks there may be at a facility. The technology generally used by OCE is specifically calibrated to methane, enabling users to visibly identify VOC leaks. Inspectors can follow up with a TVA to quantify the leak. Inspectors who use this equipment have training through a multi-day course to understand the technology, as well as its uses and limitations.

#### *X-Ray Fluorescence (XRF)*

A handheld instrument which uses a non-destructive method to determine the chemistry of a sample. The device sends an x-ray to the sample that displaces the electrons, causing a release of energy. The energy released is measured by the special detector to analyze the chemistry of the sample. Inspectors can scan surfaces for the presence of toxic metals to identify sources of contamination and fugitive emissions.

#### *H<sub>2</sub>S Analyzer (Jerome Meters)*

A handheld instrument that can detect hydrogen sulfide in the air. This device takes in a small sample of air and provides a reading on the amount of H<sub>2</sub>S within a few seconds, down to levels in the parts per billion (ppb) range. This instrument serves as a safety tool for inspectors conducting an inspection in an area with potential H<sub>2</sub>S.

In addition, inspectors are trained on how to collect field samples, including air samples, liquid samples, and bulk material samples. These samples can then be provided to the South Coast AQMD laboratory or contract laboratories for analysis. The results of these analyses can be used as evidence to support investigations and/or Notices of Violation issued to air pollution sources.

## Interagency Collaborations

CARB and South Coast AQMD are committed to working with other agencies on joint initiatives that will directly result in cleaner air. The combined resources, expertise, and legal authorities of different agencies can create a well-rounded approach to the regulatory process that leverages their respective strengths to address issues that cumulatively impact public health. For example, the Los Angeles City Attorney's Office partnered with South Coast AQMD to conduct inspections at specific facilities, including auto-body shops, in the City of Los Angeles.

**Figure 4-2: Examples of agencies that routinely collaborate with South Coast AQMD and CARB**

CARB partners with local agencies to create memoranda of understanding (MOUs), such as an agreement with South Coast AQMD to enforce CARB's greenhouse gas standards at certain types of facilities. In addition, CARB has already established partnerships with California DMV working on implementing registration holds for non-compliant trucks and buses, California Highway Patrol (CHP) to conduct roadside inspections, and other state and regional agencies to ensure the agencies are supporting each other's enforcement efforts. Both South Coast AQMD and CARB have experience working in close collaboration with other regulatory agencies, cities and counties, public health agencies, and local police and fire departments to conduct investigations and provide public information about local air pollution sources.

## South Coast AQMD & CARB Enforcement Approach

South Coast AQMD regulates over 25,000 facilities, receives approximately 10,000 public complaints per year, and operates a vast air quality monitoring network; and CARB regulates mobile sources throughout the state through ensuring compliance with over 50 programs. Analyzing the data that results from these efforts can provide insight into the trends and sources of air pollution as well as new enforcement opportunities. Both agencies use information technology to enhance the ability to conduct investigations and enforce regulations. As an example, for CARB's truck fleet enforcement program, the traditional approach was to inspect several thousand trucks annually through fleet-based inspections. From January 2018 through December 2019, CARB's Streamlined Truck Enforcement Process (STEP), and was able to conduct 20,000 to 25,000 inspections per year through the use of a data-driven approach, non-compliance letters, and a scheduled settlement process. South Coast AQMD's investigation of crude oil tankers is another example of using information technology and interagency collaboration in enforcement activities. Inspectors used mapping software, weather data, ship databases, and support from other local government entities to help identify an oil tanker as a potential source of emissions. The oil tanker was later issued a Notice of Violation when it berthed at a port. These multi-faceted approaches can be applied to address other air pollution concerns in the Southeast Los Angeles community. Providing transparent access to the information that both agencies possess will lead to a stronger partnership with the community.

## South Coast AQMD Compliance History in SELA, January 2017 to December 2019

### List of All Active Facilities with Active or Expired Permits

This table contains all of the facilities that are considered active and have valid or expired permits, that are located within the SELA Emissions Study Area. Expired permits are included to ensure that any facilities that are still in operation but had not paid fees at the time of the query were still included.

**Table 4 -1: List of All Active Facilities with Active or Expired Permits**

Facility ID	Facility Name	Address	Technical Specialty	North American Industrial Classification System (NAICS)	
				Code	Description

# Summary of All Complaints Received<sup>4</sup>

This table contains a summary of the number of complaints received by complaint type and sorted by their disposition between January 2017 and December 2019 for this community.

**Table 4 -2: List of All Complaints Recieved**

Complaint Disposition	Asbestos	Dust	Gas Station	Odors	Other	Smoke or Fire	Total
<b>Investigation in Progress</b>	3	0	0	0	0	0	3
<b>No Enforcement Action Taken<sup>5</sup></b>	24	58	9	487	34	20	632
<b>Notice of Violation Issued</b>	0	3	0	13	0	0	16
<b>Notice to Comply Issued</b>	9	8	1	4	12	1	35
<b>Referred to Another Agency</b>	1	1	2	3	1	0	8
<b>Total</b>	<b>37</b>	<b>70</b>	<b>12</b>	<b>507</b>	<b>47</b>	<b>21</b>	<b>694</b>

<sup>4</sup> The information below is based on the following Zip Codes: 90723, 90001, 90002, 90003, 90023, 90040, 90201, 90058, 90255, 90262, 90270, and 90280.

<sup>5</sup> *No Enforcement Action Taken* means that the complaint investigation has concluded but did not result in any formal enforcement action. For example, an alleged air pollution source may have been operating in compliance at the time of the inspection or the event underlying the complaint was no longer occurring.

### List of all Inspections Conducted

This table contains a list of inspections conducted within the SELA Emissions Study Area between January 2017 and December 2019. Additional information can be found via the Facility INformation Detail (FIND) portal on the South Coast AQMD webpage.<sup>6</sup>

OWENS_BROCKWAY GLASS CONTAINER INC	7427	NOV	P66921	7/12/2019	1/1/2018	2004	<p>NOV issued for:</p> <p>-Rule 2004(b)(4): Inaccurate Annual Permit Emissions Program (APEP) report. A typographical error in 4th quarter Major Sources emissions resulted in NOx being over-reported by 930 lbs and SOx being under-reported by 8,440 lbs.</p> <p>-Rule 2004(e): Inaccurate Quarter 2 Quarterly Certification of Emissions Report (QCER). A QCER correction was submitted to amend emissions due to an incorrect stack flow Bias Adjustment Factor (BAF) applied to furnace D112 for 06/07/2018-06/30/2018. Although the corrected figures were accurate, Rule 2004(c)(1)(A) requires demonstration that emissions were originally inaccurately certified due to an error caused by conditions beyond the reasonable control of the permit holder. Since BAF application is within the facility's reasonable control, the original Q2 QCER is considered inaccurate.</p> <p>-Rules 2012(c)(3)(A) &amp; 2011(c)(3)(A): Late daily electronic reporting of Major Source emissions. These rules require NOx and SOx emissions from Major Source devices be electronically reported by no later than 5pm the following day. The NOx and SOx reports for D112 and D147 for 12/18/2018 were transmitted on 12/29/2018 (ten days late).</p> <p>-Rules 2004(f)(1) &amp; 3002(c)(1): Failure to comply with RECLAIM permit conditions / Title V permit conditions. These conditions were: --D12.9: The differential pressure (DP) across Ceramic Catalyst Filter housing units shall be monitored and maintained at 1.0-12.5 inches WC. As reported via Form 500-C2, the "differential pressure reading communication signal coding device malfunctioned from 6/2/2018 to 6/19/2018. Missing DP reading until the malfunctioned device was replaced." Records show that the differential pressures of all four CCF housing units comprising C286 were unmonitored for approximately 18 days.</p>

## CARB Compliance History in SELA, January 2017 to December 2019

As shown in Table 1, from 2017 through 2019, CARB conducted over 3,500 HDDV inspections in the SELA Community.

Of the 1126 heavy-duty trucks and buses and off-road equipment CARB's observed idling in the SELA community over the past three years, all but 27 were in compliance with CARB's commercial vehicle, off-road equipment, and school bus idling rules (98 percent compliance overall). This is likely because the vehicles had Clean Idle stickers, idled for less than five minutes, or were not idling within 100 feet of restricted areas near sensitive receptors like schools and senior care facilities. Compliance with CARB's idling rules does not mean a vehicle complies with CARB's other rules. CARB field enforcement has begun to focus on ensuring that these idling vehicles are also in compliance with all of the other pertinent CARB rules as well by conducting heavy-duty diesel compliance inspections along with idling inspections. Two important areas with lower compliance rates were off-road vehicles, like construction equipment, and TRUs—small transportation refrigeration units used to cool truck cargo areas—with compliance rates of 72 and 42 percent, respectively.

CARB field enforcement can only pull over a limited number of trucks. Therefore, CARB tends to pull over vehicles that are more likely to be out of compliance, such as older or smoking vehicles. Even with that, compliance rates for drayage trucks, HDVIP, and CHE rules are very high. Additionally, California Department of Motor Vehicles (DMV) now supports compliance with the Truck and Bus Regulation through registration holds for non-compliant vehicles, moving that compliance rate even closer to 100 percent.

Beginning in 2018, CARB added the Streamlined Truck Enforcement Program (STEP) to enhance its ability to enforce the Truck and Bus Regulation through fleet-wide audits. From January 2018 to October 2019, CARB audited 1,033 fleets with a total of 4,084 vehicles in the SELA community. Of these 3325 were compliant. CARB sent 797 fleets warning letters, and 409 vehicle owners Notice to Comply or Notice of Violation letters during this time. From this process, CARB brought 40 vehicles into compliance through meeting CARB's Truck and Bus Regulation requirements and another 354 vehicles into compliance by requesting registration holds from DMV. Other vehicles are either in compliance through declaration of non-operational or low mileage usage status, being sold out of state, or still in the process of being brought into compliance. While this process is faster than in-person fleet inspections, CARB staff believes that compliance with the Truck and Bus Regulation will continue to improve as DMV vehicle registration is tied to compliance with the regulation through the end of 2023.

In addition to HDDV inspections, CARB conducted 222 inspections on CHE at the BNSF railyards in SELA in 2017 and found no violations. As well, CARB inspected 94 other, less common vehicle types and smaller engines, such as off-highway recreational vehicles and small off-road engines, from 2017 – 2019 in the SELA community, and found no violations of our regulations (Table 4-8).

<sup>1</sup>This list covers a number of other statewide enforcement programs briefly described here:

49 State: Ensures that vehicles and engines are certified to both California and USEPA standards, not just USEPA standards that are valid for the other 49 states. Dealer and Fleet Tampering: Staff inspect automobile dealerships and commercial fleets to ensure new vehicles and engines are certified to California emissions standards, and that emissions control systems are not tampered with.

LSI: CARB ensures compliance with certified emissions standards for spark-ignition engines, including large spark-ignition (LSI) engines, and the evaporative emissions control systems of vehicles and equipment like forklifts, sweeper/scrubbers, industrial tow tractors, and airport ground support equipment.

OHVR: CARB ensures off-highway recreational vehicles (OHVR), such as off-highway motorcycles and all-terrain vehicles (ATVs) used recreationally, in agriculture, building and trades, landscape maintenance and law enforcement, meet emissions standards for smog pre-cursors and evaporative emissions. Portable fuel containers: CARB ensures all gas cans (PFCs) used to fill equipment like lawnmowers, vehicles, and personal watercraft minimize spillage and meet low-emissions requirements through the implementation of low permeation plastics and automatic sealing nozzles.

R134A: CARB ensures small containers of mobile air conditioning refrigerant (HFC-134a) minimize greenhouse gas emissions by meeting requirements, such as having self-sealing valves on the containers.

SORE: CARB ensures that certified exhaust emissions standards are complied with for Small Off-Road Engines (SORE) used in lawn and garden equipment as well as other outdoor power equipment and specialty vehicles.
