The California Air Resources Board (CARB or Board) held a meeting remotely on January 27, 2022 via a web-based videoconferencing service. The key items presented are summarized below.

### **DISCUSSION ITEMS**

#### **22-1-1: Public Meeting to Consider the Clean Fuels for Fleets Certification for the 70 ppb Ozone Standard**

The Board adopted the California Clean Fuels for Fleets Certification (CFF Certification) for the 70 parts per billion Ozone National Ambient Air Quality Standard. The CFF Certification demonstrates that California's Low Emission Vehicle program exceeds the level of emissions reductions that would be achieved through implementation of the U.S. EPA Clean-Fuel Vehicle Programs. Therefore, the CFF Certification meets Clean Air Act requirement for ozone nonattainment areas classified as Serious and above with 1990 populations above 50,000. These nonattainment areas include the Coachella Valley, Sacramento Metropolitan Area, San Joaquin Valley, South Coast Air Basin, Ventura County, and West Mojave Desert. In addition, the Board directed the Executive Officer to submit the CFF Certification to the U.S. EPA as a revision to the California State Implementation Plan.

**22-1-2: Public Meeting to Consider the Proposed Research Projects for Fiscal Year 2022-2023**

The Board approved the Proposed Research Projects for Fiscal Year 2022-2023 (Proposed Research). The Proposed Research will advance the state of the science and support the Board's efforts to meet California's air quality and climate goals. For the fiscal year 2022-2023, a research budget of approximately \$3.8 million is anticipated that will fund seven research projects and two white papers. The research projects will inform the state's efforts to maximize health, environmental, and economic co-benefits; create additional health endpoints to assess our programs; leverage new tools and methods to identify and refine mitigation strategies to support air quality goals; and support equitable and sustainable communities. The two white papers will analyze the state of the science and identify research gaps for emerging priority areas to shape future research projects.

**22-1-3: Public Meeting to Hear the 2021 Legislative Update**

The Board heard an update from the CARB Office of Legislative Affairs on 2021 air quality and climate legislation for the first year of the 2021-2022 Legislative Session. The Legislature and Governor made significant appropriations to CARB programs supporting work to achieve diverse and ambitious goals to better protect priority populations, improve air quality, and reduce greenhouse gas emissions. CARB staff highlighted major legislation from 2021. In this legislative session, CARB staff analyzed bills that propose: 1) to support the State's transition to zero-emission technologies in the light-, medium-, and heavy-duty sectors, as well as the small off-road sector; 2) to implement recommendations made by the California State Auditor in response to the audit of CARB's transportation incentive programs; 3) to integrate labor and equity standards into CARB's programs; and 4) to reduce greenhouse gas emissions from the cement sector. Seventeen of the 110 bills analyzed by CARB staff in this legislative session directly impact CARB.

**22-1-4: Public Meeting to Hear a Report on the California Air Resources Board's Program Priorities for 2022**

The Board heard an overview by Executive Officer Richard Corey of the California Air Resources Board's accomplishments from 2021 and program priorities for 2022. The presentation outlined key activities that CARB plans to undertake in 2022 to achieve our Community, Clean Air and Climate goals. Highlights from 2021 included the Board's adoption of foundational regulations that will lead California to a zero-emission future, such as Advanced Clean Trucks, the Heavy-Duty Inspection and Maintenance program, transitioning small off-road engines to zero-emissions, and the phasing out of open agricultural burning in the San Joaquin Valley. CARB's 2022 priorities will focus on communities, clean air, and climate. This year, CARB will bring multiple regulations to the Board and implement programs that help protect communities, including the Advanced Clean Feet Regulation, the In-Use Locomotive Regulation, the Commercial Harbor Craft Regulation, amendments to the Chrome Plating ATCM, Advanced Clean

Cars II Regulations, programs to increase choice in mobility, building decarbonization efforts, and various efforts for prescribed fires and wildfire smoke. Many of these programs will also improve regional air quality and reduce greenhouse gases. In 2022, CARB will be working with its district partners to develop the State SIP Strategy that will serve as a crucial function to align all our programs statewide in pursuit of the common goal of meeting federal air quality standards. 2022 will also be a pivotal year with the most comprehensive Scoping Plan to date laying out a path to keep us on track to achieve our 2030 target as well as, for the first time, presenting a strategy to achieve carbon neutrality by 2045.

## **Discussion Items:**

### **22-1-1: Public Meeting to Consider the Proposed California Clean Fuels for Fleets Certification for the 70 ppb Ozone Standard**

The Board will consider adoption of the California Clean Fuels for Fleets Certification for the 70 parts per billion (ppb) Ozone Standard and will also consider adopting a California Environmental Quality Act exemption as part of its action. If adopted, CARB will submit the California Clean Fuels for Fleets Certification for the 70 ppb Ozone Standard to the United States Environmental Protection Agency as a revision to the California State Implementation Plan.

## **22-1-2: Public Meeting to Consider the Proposed Research Projects for Fiscal Year 2022-2023**

The Board will consider the Proposed Research Projects for Fiscal Year 2022-2023 (Proposed Research) and hear and the modifications to the process to date to operationalize racial equity in CARB research. The research projects will advance the state of the science and support the Board's efforts to meet California's air quality and climate goals. If the Proposed Research is approved by the Board, staff will work with our research partners to develop full proposals. The Executive Officer will then consider the full proposals for approval and funding with consultation from interested Board Members.
