

Southeast Los Angeles (SELA) Metal Processing Facilities

The map and table below show the locations of metal processing facilities located in the SELA community boundary. This map may be used as a resource to help identify facilities that have South Coast Air Quality Management District (South Coast AQMD) active permits for a variety of operations including metal plating, finishing, cutting, grinding, and melting. This map does not include coating/iron workplaces that only have a paint spray booth unless there are other metal-related permitted equipment onsite.

Pages 2 and 3 includes a more extensive table listing the facilities' names and addresses corresponding to how they are labeled in the map. It also includes each facility's Facility Information Detail (F.I.N.D.) Facility ID, which can be used to find more facility information on South Coast AQMD's FIND website.
