The November 20, 2025 Board meeting of the California Air Resources Board (Board) was held in Sacramento, California at the California Environmental Protection Agency Headquarters Building. The key item presented is summarized below.

### **DISCUSSION ITEM**

**25-8-1: Public Hearing to Consider Proposed Amendments to the Regulation on Methane Emissions from Municipal Solid Waste Landfills**

The Board approved amendments to the Landfill Methane Regulation designed to reduce methane emissions from large solid waste landfills. Landfills are the second largest source of methane emissions in California. Originally adopted by the Board in 2010 as an early action measure under Assembly Bill 32 (Núñez, Chapter 488, Statutes of 2006), the Board amended the regulation to improve methane emissions monitoring, enhance gas collection and control system operation, and require operators to investigate and repair leaks when notified by CARB of remotely detected emission plumes. The amendments will remove exemptions from methane emissions monitoring, increase the frequency of monitoring in areas with recurring leaks, reduce repair timelines, and incorporate advanced leak detection technologies. The amendments will also require

earlier gas collection and control system installation, limit system downtime, and expand wellhead monitoring. In addition to approving the amendments, the Board directed the staff to coordinate with districts and industry on how to efficiently implement the regulation and better understand and reduce costs for all parties while maintaining the enhanced oversight resulting from the amendments.
