Background

Under the direction of the Executive Officer and the Chief Operating Officer, each division continually reviews and assesses staffing resources and functionality to determine whether changes should be made to increase efficiency and effectiveness of South Coast AQMD programs. Class specifications in the Finance Division and Legal Office were evaluated to determine whether their duties and positions were up to date with industry standards, as well as to make changes to address operational needs, recruitment efforts, and staff retention and development. The proposed revisions to Finance Division class specifications and proposed salary adjustments have been discussed, and agreed upon, with union representatives of the bargaining unit. In addition, this item proposes amendments to the FY 2025-26 Budget allocation of positions in the Monitoring and Analysis Division to better support operational needs.

Proposal

Finance Division

Fiscal Assistant staff provide a variety of clerical accounting responsibilities in the support of a fiscal recordkeeping system or purchasing invoicing system. The proposed revisions update the current Fiscal Assistant and Senior Fiscal Assistant class specifications with new titles to, respectively, Account Clerk I and Senior Account Clerk for consistency with industry standards. In addition, a new advanced-journey level Account Clerk II class specification is being added to this job series to better assign work assignments, and to also establish a new career ladder within the Finance Department. Incumbents in current class specifications will be placed in the appropriate new class specification.

Proposed salaries for these new and revised class specifications are set forth in Attachment C.

Legal Office

Legal Secretary staff provide a wide variety of difficult and complex legal secretarial duties. The proposed revisions include title changes to the Legal Secretary and Administrative Secretary/Legal positions to, respectively, Legal Assistant and Senior Legal Assistant to achieve consistency with industry standards. This proposal also revises the job duties for these class specifications to reflect current Legal operations and to delete outdated functions. In addition, the minimum requirements are being revised to enhance recruitment efforts to search for a well-qualified applicant pool. Incumbents in current class specifications will be designated into the revised class specification.

Monitoring and Analysis Division

Based upon review of operations for the Monitoring and Analysis Division, staff recommends adding a Monitoring Operations Manager position to the Advanced Monitoring Technologies unit to support rule development, implementation, and rule-based fence line air monitoring plan review. Specifically, the position would provide technical support and input during the rule development process, participate in cost analysis for rules, communicate to vendors and manufacturers, and oversee performance evaluation of monitoring equipment to determine applicability for rule implementation. The cost of the added position would be offset by the deletion of a Program Supervisor position from the division's budget.

Resource Impacts

Sufficient funding exists in the FY 2025-26 Budget. In addition, there is sufficient funding available in the General Fund Undesignated (Unassigned) Fund Balance to appropriate funding for the FY 2026-27 Budget to cover the costs of the new and revised class specifications, and the staffing additions and deletions. Funding will also be requested in subsequent fiscal year budgets.
