Date: 5/4/2026

South Coast Air Quality Management District
Attn: RECLAIM, Thomas Lee, Clerk of Board
Case No: 6248-4
Facility ID: 186899
Subject: Monthly Report Requirement, May

To Whom It May Concern,

In compliance with Item 5 the Minute Order attached to Case No; 6248-4, Enery Holdings provides the following status updates.

REPLACEMENT OF CEMS/DAHS SYSTEM

- On 12/3/25 Enery Reported that: Enery has engaged three vendors to provide fixed quote for a replacement CEMS/DAHS system that can communicate through fiber optic line.
- During specification, we learned that the laser CEMS system requires a larger diameter than our stack currently has. We are reviewing whether we can retrofit the top of our stack to accommodate the larger diameter.
- As of 2/3/26 Enery has determined that there are laser CEMS systems that will fit within our stack. We have obtained system quotes from two vendors. We are conducting job walks this week to review installation feasibility.
- As of 3/3/26, Enery has determined that installation is feasible. Vendors are refining their quotes after the job walks to fully align with the components that need to be replaced.
- As of 3/18/26, Enery has received quotes from vendors. We are now on pause until we understand the application process to receive SCAQMD approval for laser CEMS.

APPLICATION FOR CEMS/DAHS SCAQMD APPROVAL

- Enery will not make any additional inquiries to AQMD until such time as we know whether the laser system is feasible to install.

- On 2/24/26 Enery sent certified letters to AQMD Board Members Polidori, Aspell, Katzenstein, Krause, Low, MacMillan, Rees, and Nastri requesting a meeting to determine the path forward to receive laser CEMS/DAHS approval at SCAQMD. To date, we have not heard back from any party.
- On 4/23/26 Mike Munoz wrote to John Jones and attached his written request to the Executive Officer.

EMAILS/DATES OF MEETINGS WITH SCAQMD STAFF

- On 11/24/25 Enery contacted Colin Eckerle and Bill Welch regarding progress at AQMD with approving laser CEMS systems for use in Part 75 and Part 60. We have not received a response.
- On 12/5/25 Mike Munoz contacted John Jones to request assistance in contacting the executive office regarding the change of Rule 2012, and contacting Mr. Eckerle and Mr. Welch, as they had not responded to our request for clarity and process on certification protocol for TDL or integrated path CEMS under RECLAIM
- On 12/9/25 John Jones responded to Mike Munoz, indicating that the process to amend Rule 2012 will being after the Rule Forecast Report was revised at year end.
- As of 2/3/26 there have been no further communications between Enery and SCAQMD staff.
- On 3/27/26 Enery was notified that a recent SCAQMD workshop proposed an amendment to allow an alternative means of transmitting data, outside of the current modem technology.
- On 4/7/26 Olivia Goldstein contacted the Clerk of the Board to request help understanding the process to apply for laser CEMS/DAHS approval. The Clerk pointed to Inspector Thomas Lee as the contact for discussion of that topic. John Jones responded on behalf of AQMD that “Rules 2011 and 2012 do not provide an approval pathway for use of laser CEMS by the permit holder of a major source. The District is amending both rules, and the amendment process is the appropriate vehicle for addressing your concern. Enery’s participation in that process is the most direct path to the outcome you are seeking.”
  Mr. Jones attached copies of the notices of the workshop, the workshop presentation, and a link to sign up for future workshop notifications. Olivia Goldstein signed up for future workshop notifications.
- On 4/9/26 John Jones wrote to Olivia Goldstein to correct an error in the Monthly Report. He attached an email showing that Mike Munoz was contacted on 3/19/26 about a public workshop that would take place on 3/24/26. Mike missed the email and was unable to attend the workshop.
- On 4/10/26 Mike Munoz emailed John Jones to ask for assistance scheduling a meeting with the Executive Officer concerning the use of Laser CEMS.
- On 4/16/26 John Jones replied to Mike Munoz that he was unable to schedule a meeting directly with the Executive Officer, and asked Mike Munoz to submit the document in writing.

- On 4/23/26 Mike Munoz replied to John Jones with his written request to the Executive Officer, and included the first written request document from 2/24/26. To date he has not received a response.
- On 5/1/26 Olivia Goldstein received a Notice of Public Hearing for PAR 2011, 2012, and 2015 scheduled for June 5th 2026. Enery will send representatives to this hearing.

PURCHASE ORDERS/INSTALLATION

- Enery has made no purchase orders

Please contact me if you have any questions or require additional clarification.

Thank you,

Olivia Goldstein
