Subject: [EXTERNAL] Lineage Meeting 8/5/26 Comment

Hello,

This is my comment for the 8/5/26 Lineage Meeting. My name is Madeline I live in Monterey Park and I've been smelling rotten animal flesh for weeks now because of the Lineage disaster. If I can smell it from Monterey Park, I shudder to think what Boyle heights residents are enduring. This affects physical health and it's psychological torture. This is clear environmental racism because we all know that a rich white community would never have to deal with this toxic smoke and garbage smell. Students and school staff are supposed to be in school next week inhaling this stench. This is ridiculous. I'm sick and tired of corporations prioritizing profit over the health and well-being of people. What good is money if you slowly kill people and our environment ? We must hold Lineage accountable. They have no place here. Their monstrous warehouses should cease to exist.

Finally, why is this meeting at 9:30am on a work day in Diamond Bar? It makes it harder for working class people to attend and I wonder if this is on purpose.

From,

Madeline
