HYBRID MOBILE SOURCE COMMITTEE MEETING

Committee Members

Chair Vanessa Delgado, Committee Chair
Supervisor Holly J. Mitchell, Committee Vice Chair
Mayor Pro Tem Larry McCallon
Supervisor V. Manuel Perez
Councilmember Nithya Raman
Mayor Carlos Rodriguez

January 23, 2026 ♦ 9:00 a.m.

TELECONFERENCE LOCATIONS:

Office of Senator Vanessa Delgado 944 South Greenwood Ave. Montebello, CA 90640	Office of Supervisor V. Manuel Perez 78015 Main Street, Suite 205 La Quinta, CA 92253	
Yorba Linda Public Library Study Room 2 4852 Lakeview Avenue Yorba Linda, CA 92886	Los Angeles City Hall 200 N. Spring Street, Room 415 (Conference Room) Los Angeles, CA 90012	Kenneth Hahn Hall of Administration 500 W. Temple Street HOA Room 372 Los Angeles, CA 90012

A meeting of the South Coast Air Quality Management District Mobile Source Committee will be held at 9:00 a.m. on Friday, January 23, 2026, through a hybrid format of in-person attendance in the Dr. William A. Burke Auditorium at the South Coast AQMD Headquarters, 21865 Copley Drive, Diamond Bar, California, and remote attendance via videoconferencing and by telephone. Please follow the instructions below to join the meeting remotely.

Please refer to the South Coast AQMD's website for information regarding the format of the meeting, updates if the meeting is changed to a full remote via webcast format, and details on how to participate:

<http://www.aqmd.gov/home/news-events/meeting-agendas-minutes>

**ELECTRONIC PARTICIPATION INFORMATION
(Instructions provided at bottom of the agenda)**

Join Zoom Webinar Meeting - from PC or Laptop
<https://scaqmd.zoom.us/j/1600484168>

**Audience will be allowed to provide public comment in person
or through Zoom connection or telephone.**

PUBLIC COMMENT WILL STILL BE TAKEN

AGENDA

Members of the public may address this body concerning any agenda item before or during consideration of that item (Gov't. Code Section 54954.3(a)). If you wish to speak, raise your hand on Zoom or press Star 9 if participating by telephone. All agendas for regular meetings are posted at South Coast AQMD Headquarters, 21865 Copley Drive, Diamond Bar, California, at least 72 hours in advance of the regular meeting. Speakers may be limited to three (3) minutes total for all items on the agenda.

Please note that under the California Public Records Act (Gov't. Code § 7920.000 et seq.) your written and oral comments, attachments, and associated contact information (e.g., your address, phone, email) become part of the public record and can be released to the public on request or posted on the South Coast AQMD website.

CALL TO ORDER

ROLL CALL

INFORMATIONAL ITEMS (Items 1-2)

1. **Airports MOU Implementation Progress for Calendar Year 2023**
(No Motion Required)
Staff will provide an overview of reports detailing the Airports MOU Implementation Progress for Calendar Year 2023.

Elaine Shen, Ph.D.
Planning and Rules Manager

2. **Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program Annual Report**
(No Motion Required)
Staff will present a summary of the 3rd WAIRE Program Annual Report.

Kalam Cheung,
Ph.D.
Planning and Rules Manager

WRITTEN REPORTS (Items 3-4)

3. **Rule 2202 Activity Report: Rule 2202 Summary Status Report**
(No Motion Required)
Status Report summarizes activities for the period of January 1 to December 31, 2025. The report identifies the plan submittal activities by compliance option and lists Air Quality Investment Program funds collected by county.

Ian MacMillan
Assistant Deputy Executive Officer

**4. Intergovernmental Review of Environmental Documents and CEQA Lead Agency Projects
(No Motion Required)**

Sarah Rees, Ph.D.
Deputy Executive Officer

This report provides a listing of environmental documents prepared by other public agencies seeking review by South Coast AQMD between December 1, 2025 and December 31, 2025, and proposed projects for which South Coast AQMD is acting as lead agency pursuant to CEQA.

OTHER MATTERS

5. Other Business

Any member of the Committee, or its staff, on his or her own initiative or in response to questions posed by the public, may ask a question for clarification, may make a brief announcement or report on his or her own activities, provide a reference to staff regarding factual information, request staff to report back at a subsequent meeting concerning any matter, or may take action to direct staff to place a matter of business on a future agenda. (Gov't. Code Section 54954.2)

6. Public Comment Period

At the end of the regular meeting agenda, an opportunity is provided for the public to speak on any subject within the Committee's authority that is not on the agenda. Each speaker may be limited to three (3) minutes.

7. Next Meeting Date: Friday, February 20, 2026 at 9:00 a.m.

ADJOURNMENT

Americans with Disabilities Act and Language Accessibility

Disability and language-related accommodations can be requested to allow participation in the Mobile Source Committee meeting. The agenda will be made available, upon request, in appropriate alternative formats to assist persons with a disability (Gov't Code Section 54954.2(a)). In addition, other documents may be requested in alternative formats and languages. Any disability or language-related accommodation must be requested as soon as practicable. Requests will be accommodated unless providing the accommodation would result in a fundamental alteration or undue burden to the South Coast AQMD. Please contact Jacob Allen at (909) 396-2282 from 7:00 a.m. to 5:30 p.m., Tuesday through Friday, or send the request to jallen2@aqmd.gov.

Document Availability

All documents (i) constituting non-exempt public records, (ii) relating to an item on an agenda for a regular meeting, and (iii) having been distributed to at least a majority of the Committee after the agenda is posted, are available by contacting Jacob Allen at (909) 396-2282 or send the request to jallen2@aqmd.gov

INSTRUCTIONS FOR ELECTRONIC PARTICIPATION

Instructions for Participating in a Virtual Meeting as an Attendee

As an attendee, you will have the opportunity to virtually raise your hand and provide public comment.

Before joining the call, please silence your other communication devices such as your cell or desk phone. This will prevent any feedback or interruptions during the meeting.

Please note: During the meeting, all participants will be placed on Mute by the host. You will not be able to mute or unmute your lines manually.

After each agenda item, the Chair will announce public comment.

A countdown timer will be displayed on the screen for each public comment.

If interpretation is needed, more time will be allotted.

Once you raise your hand to provide public comment, your name will be added to the speaker list. Your name will be called when it is your turn to comment. The host will then unmute your line.

Directions for Video ZOOM on a DESKTOP/LAPTOP:

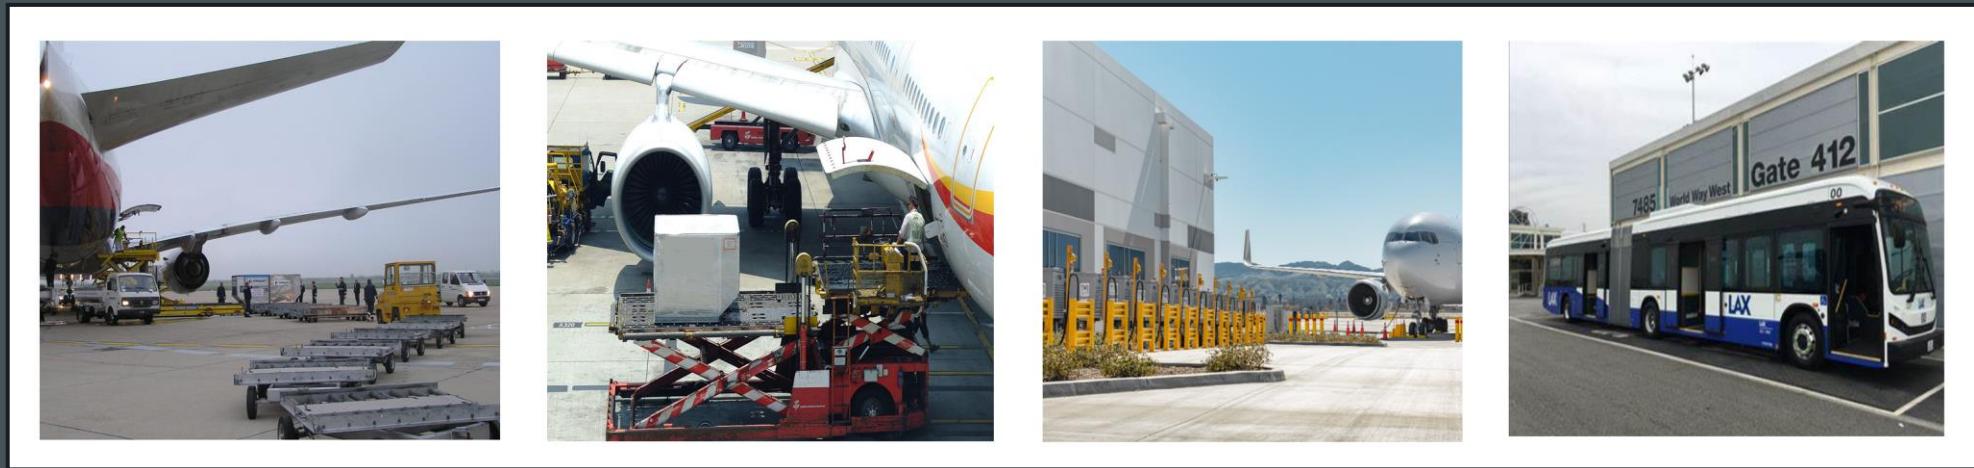

- If you would like to make a public comment, please click on the “Raise Hand” button on the bottom of the screen.
- This will signal to the host that you would like to provide a public comment and you will be added to the list.

Directions for Video Zoom on a SMARTPHONE:

- If you would like to make a public comment, please click on the “Raise Hand” button on the bottom of your screen.
- This will signal to the host that you would like to provide a public comment and you will be added to the list.

Directions for TELEPHONE line only:

- If you would like to make public comment, please dial *9 on your keypad to signal that you would like to comment.

AIRPORT MOU IMPLEMENTATION PROGRESS REPORTS FOR CALENDAR YEAR 2023

Mobile Source Committee
January 23, 2026

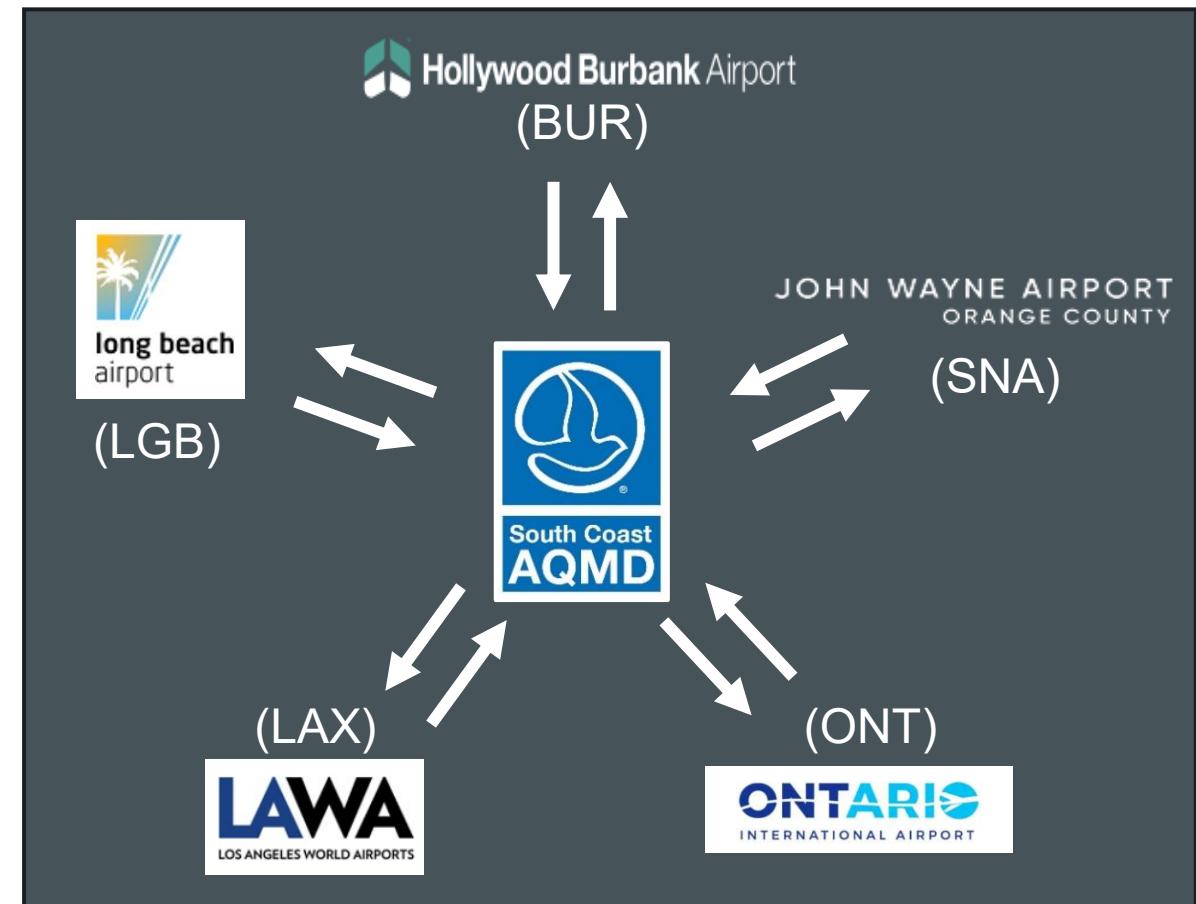

JOHN WAYNE AIRPORT
ORANGE COUNTY

BACKGROUND OF AIRPORT MOU

- Memoranda of Understanding (MOU) signed in 2019 with each of five major commercial airports in the South Coast Air Basin
- Focused on reducing non-aircraft emissions
- Performance targets set for years 2023 and 2031

MAIN MOU COMMITMENTS

Commercial Airports

- Meet performance targets by timely implementing specific measures
- Measures vary by airports
- Annually provide emissions inventory and associated activity data reports to South Coast AQMD

South Coast AQMD

- Commit to SIP creditable emission reductions with U.S. EPA based on airports' commitments
 - Report to U.S. EPA and the public
- Auditing and monitoring of MOUs implementation progress

MOU MEASURES

Ground Support
Equipment (GSE)
Fleet Performance

Shuttle Bus
Electrification

Heavy-Duty Vehicle
(HDV) Emission
Reductions

MOU MEASURES (CONT.)

Airport	GSE	Shuttle Buses	HDV
BUR	✓	✓	---
LAX	✓	✓	✓
LGB	✓	---	---
ONT	✓	---	---
SNA	✓	✓	✓

STATUS OF AIRPORTS COMMITMENTS

GSE FLEET PERFORMANCE

Airport	2023 Fleet Emission Rate Performance Target ¹	2023 Fleet Emission Rate Actual Performance ¹
BUR	≤ 1.66	0.87
LAX	≤ 1.8	1.04
LGB	≤ 0.93	0.55
ONT²	≤ 2.2	2.60
SNA³	≤ 1.7	1.84

■ Met 2023 Target in CY 2023

■ Did not meet 2023 Target in CY 2023

- Table shows airport-specific GSE fleet performance for CY2023
- Airport-to-Airport performance factors not comparable with each other due to variations in calculation methodology⁴

¹ In grams per brake horsepower-hour (g/bhp-hr)

² ONT is projected to meet the 2023 GSE fleet performance target in 2025

³ SNA is anticipated to meet the 2023 GSE fleet performance target in 2024

⁴ Pg. 42 of the Final Staff Report for Facility-Based Mobile Source Measure for Commercial Airports (December 2019): Link [here](#)

STATUS OF AIRPORTS COMMITMENTS

SHUTTLE BUS ELECTRIFICATION

Airport	2023 Shuttle Fleet Target (ZE % of Fleet)	2023 Operating Shuttle Fleet (ZE % of Fleet)
LAX	20%	50%
BUR ¹	50%	0%
SNA ²		<i>(Delayed until 2025 due to infrastructure procurement & installation time needed)</i>

■ Met 2023 Target in CY 2023

■ Did not meet 2023 Target in CY 2023

- Fleet percentages for CY 2023

¹ In March 2025, four electric shuttles (50% of total fleet) and supporting chargers were delivered to BUR; Electric shuttles subsequently began operations in May 2025

² In May 2025, SNA installed temporary chargers and began operation of five electric shuttles (~50% of total fleet); permanent chargers pending installation of infrastructure upgrades

STATUS OF AIRPORTS COMMITMENTS

HDV EMISSION REDUCTIONS

Airport	2023 Performance Target	2023 Actual Progress
LAX	Distribute up to \$500,000 to incentivize adoption of zero or near-zero emission vehicles with vehicle weight \geq 14,000 lbs	\$500,000 made available; \$325,000 distributed as of 2020; and remaining \$175,000 directed towards updated incentive program*
SNA	Eliminate routine commercial passenger jet fuel deliveries by truck through the installation of a fuel pipeline	Jet fuel pipeline became operational in October 2019; supplied all routine fuel deliveries in 2022 and 2023

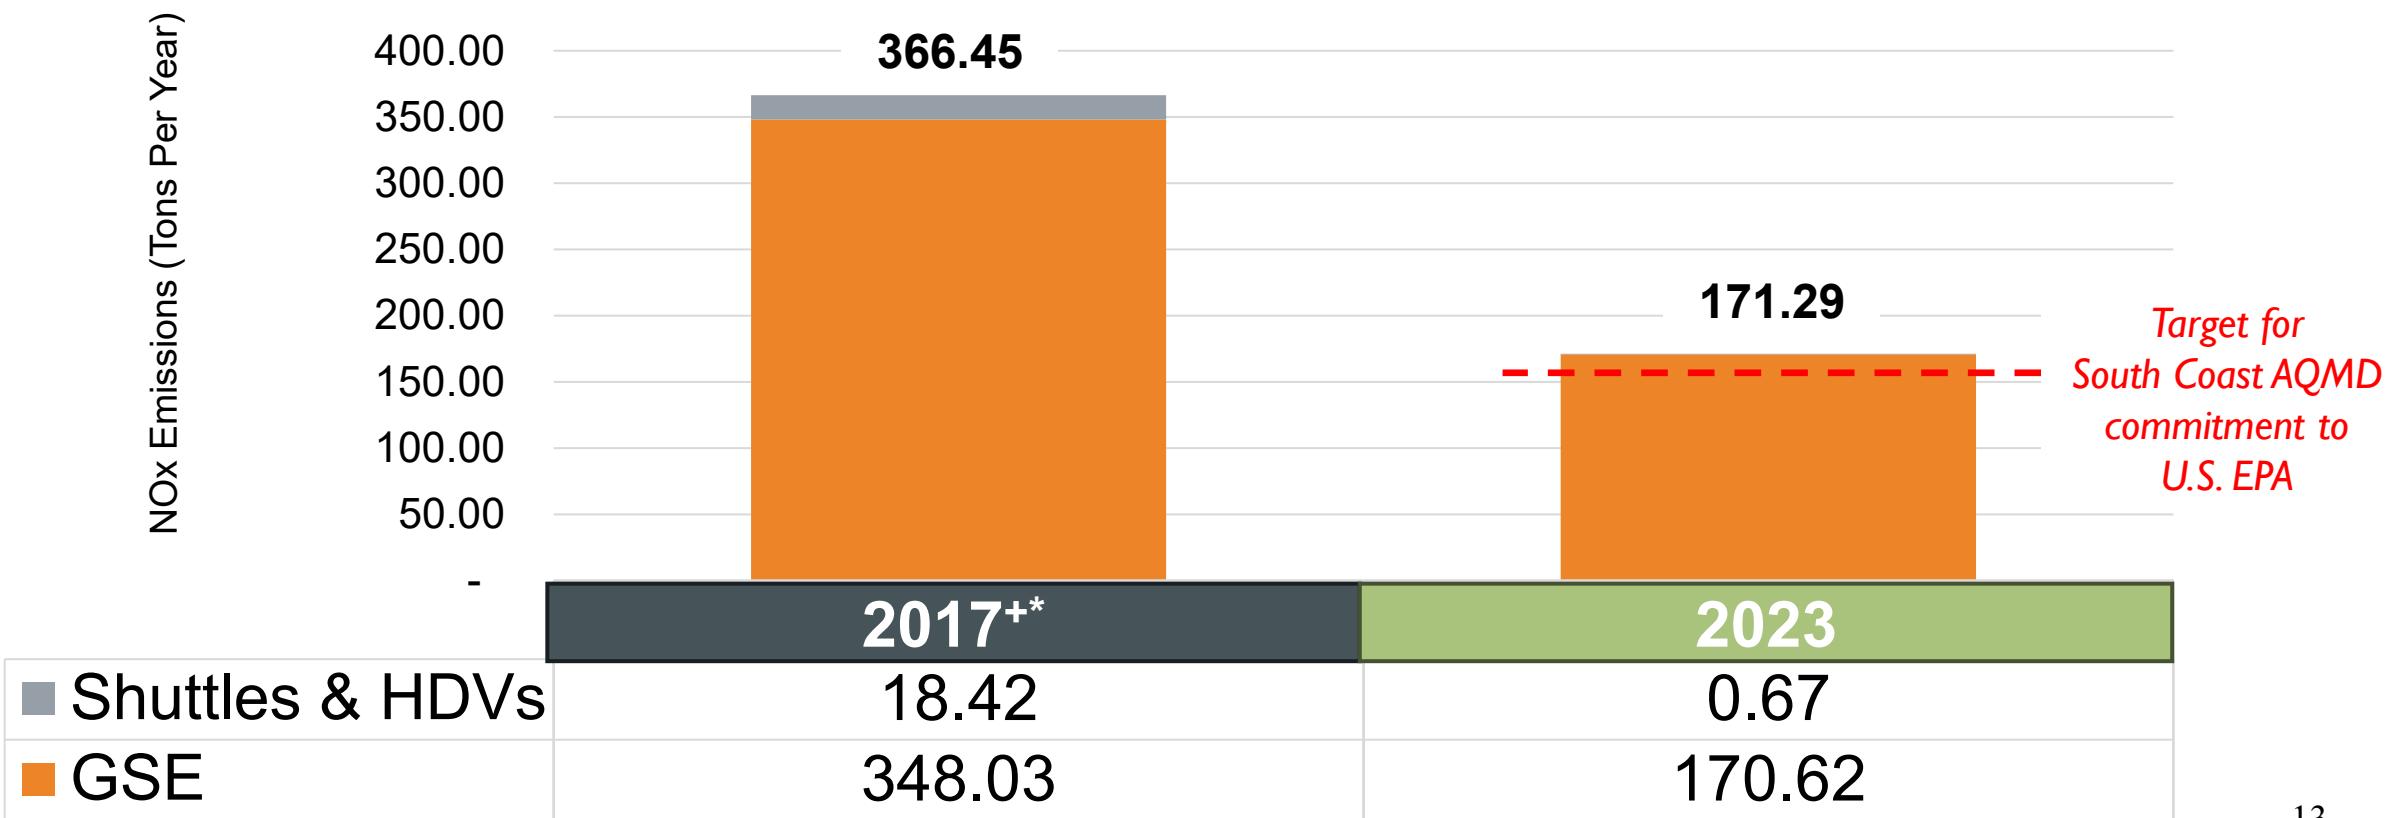

Has met 2023 Performance Target

Has not yet met 2023 Performance Target

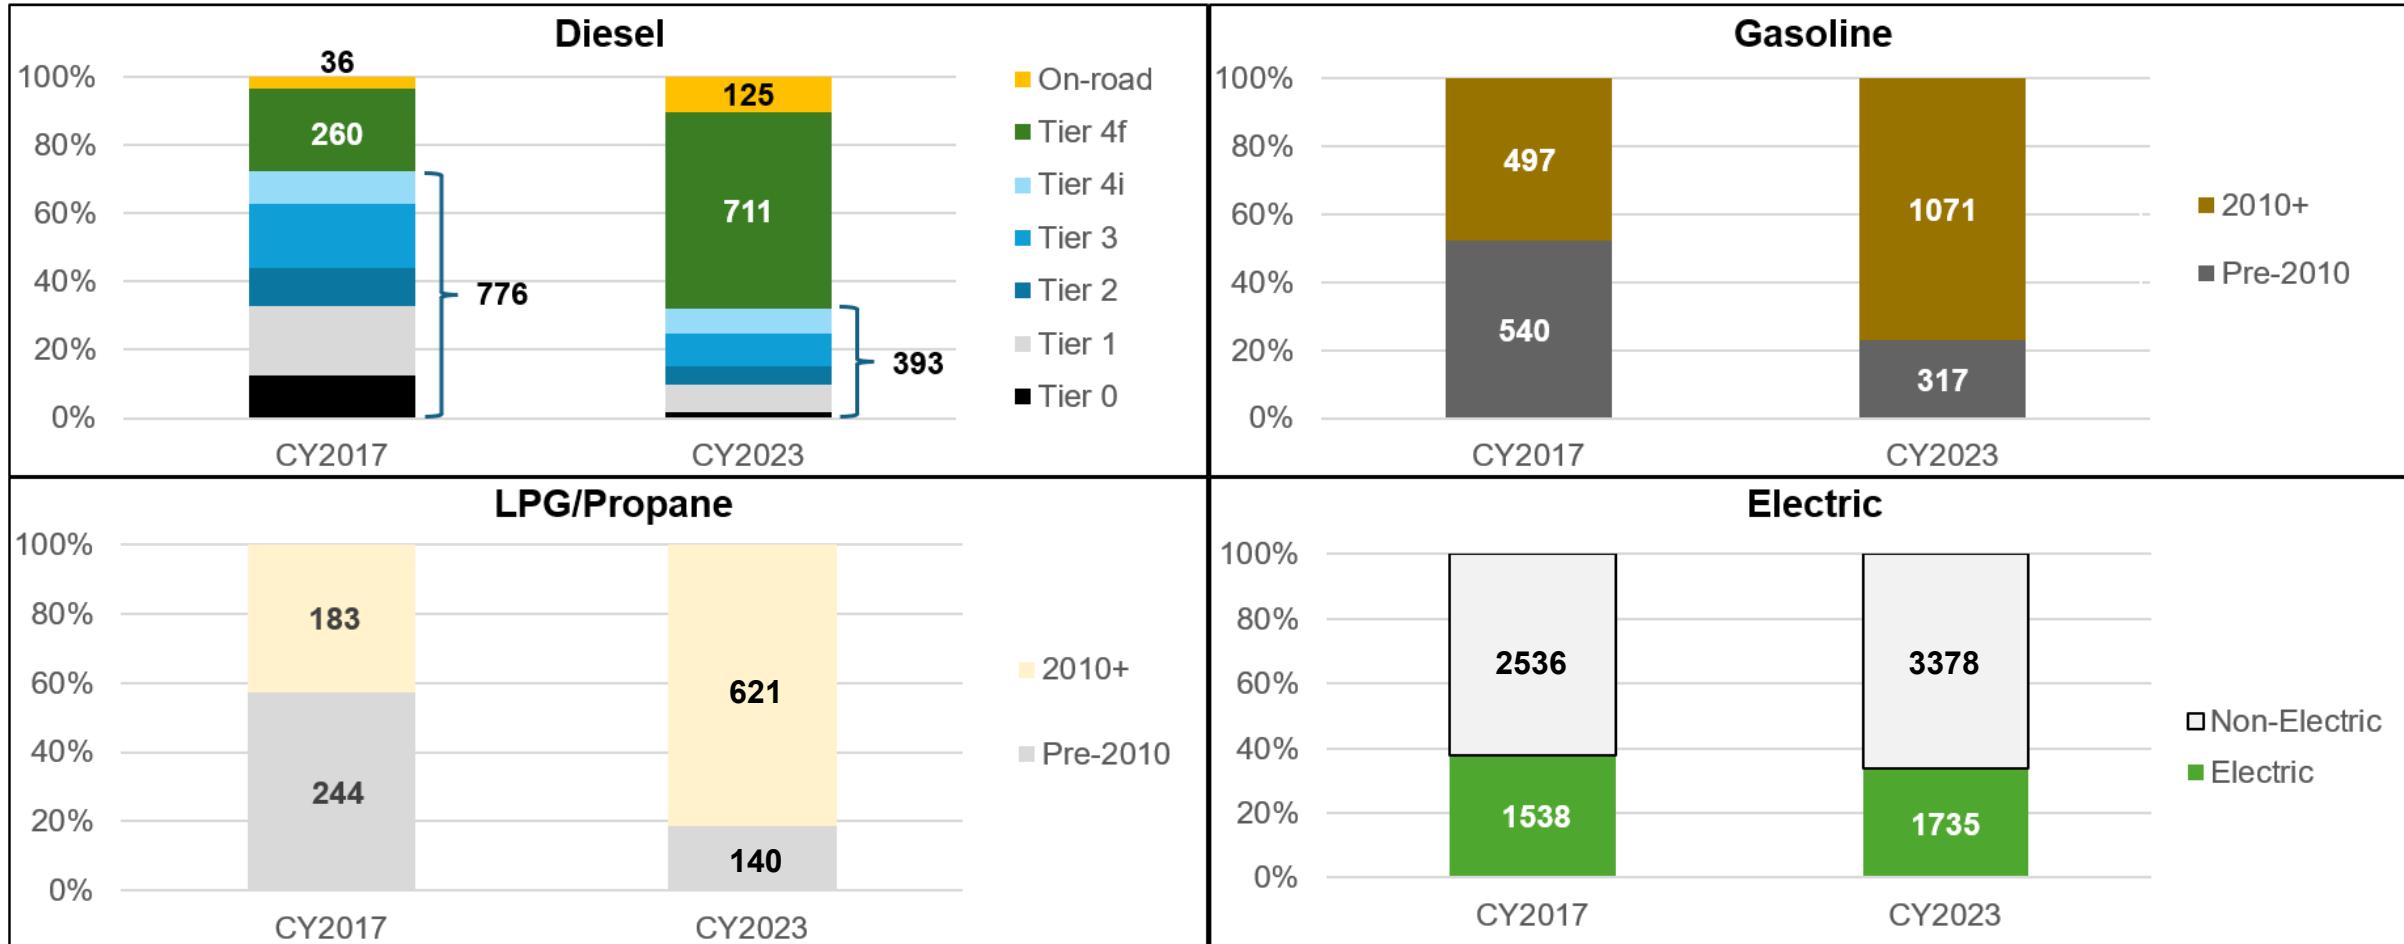

- *LAX and SNA included measures aimed at lowering emissions from HDV traffic at airports*
- *Goal progress reflected for CY 2023*

PROGRESS IN NOx EMISSION REDUCTIONS

Airport-Reported Emissions from Vehicles Covered by MOUs

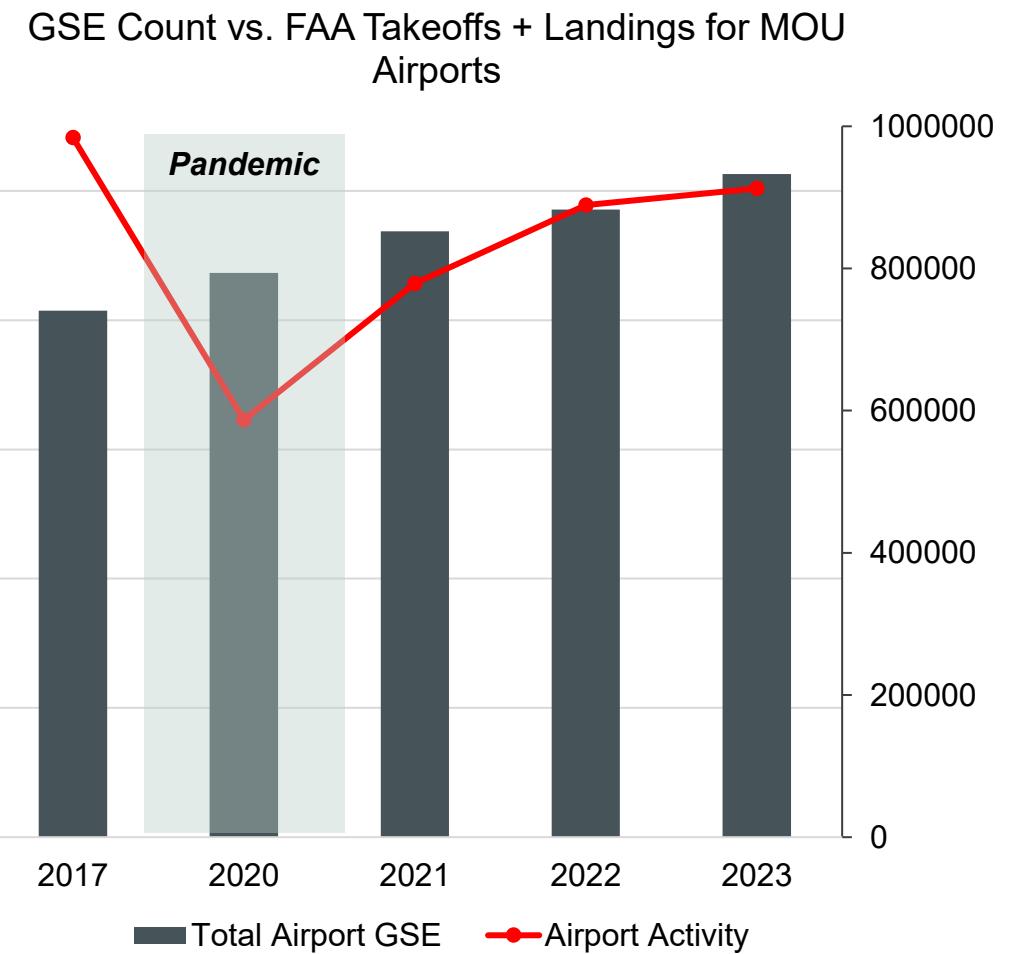

Overall Result: Cleaner and Newer GSE Fleet in South Coast Air Basin

UNEXPECTED GROWTH IN GSE POPULATION

- 17% growth in reported GSE population between 2017 and 2023
 - SIP commitments for NOx reductions assumed minimal changes
- Growth not fully explained by flight activity
 - Flight activity not yet recovered to pre-pandemic level by 2023
- Growth partially explained by increased recordkeeping accuracy from MOUs implementation
 - Fleet performance includes all GSE units reported under the MOUs

HIGHLIGHTS OF RECENT AIRPORT INITIATIVES

New GSE programs

- LAX adopted
 - Zero-Emission GSE Policy: 100% ZE by 2033
 - eGSE incentives
 - SNA completed lease amendments requiring GSE improvement
 - ONT implemented GSE Motor Vehicle Operating Permit (GSE MVOP) Program

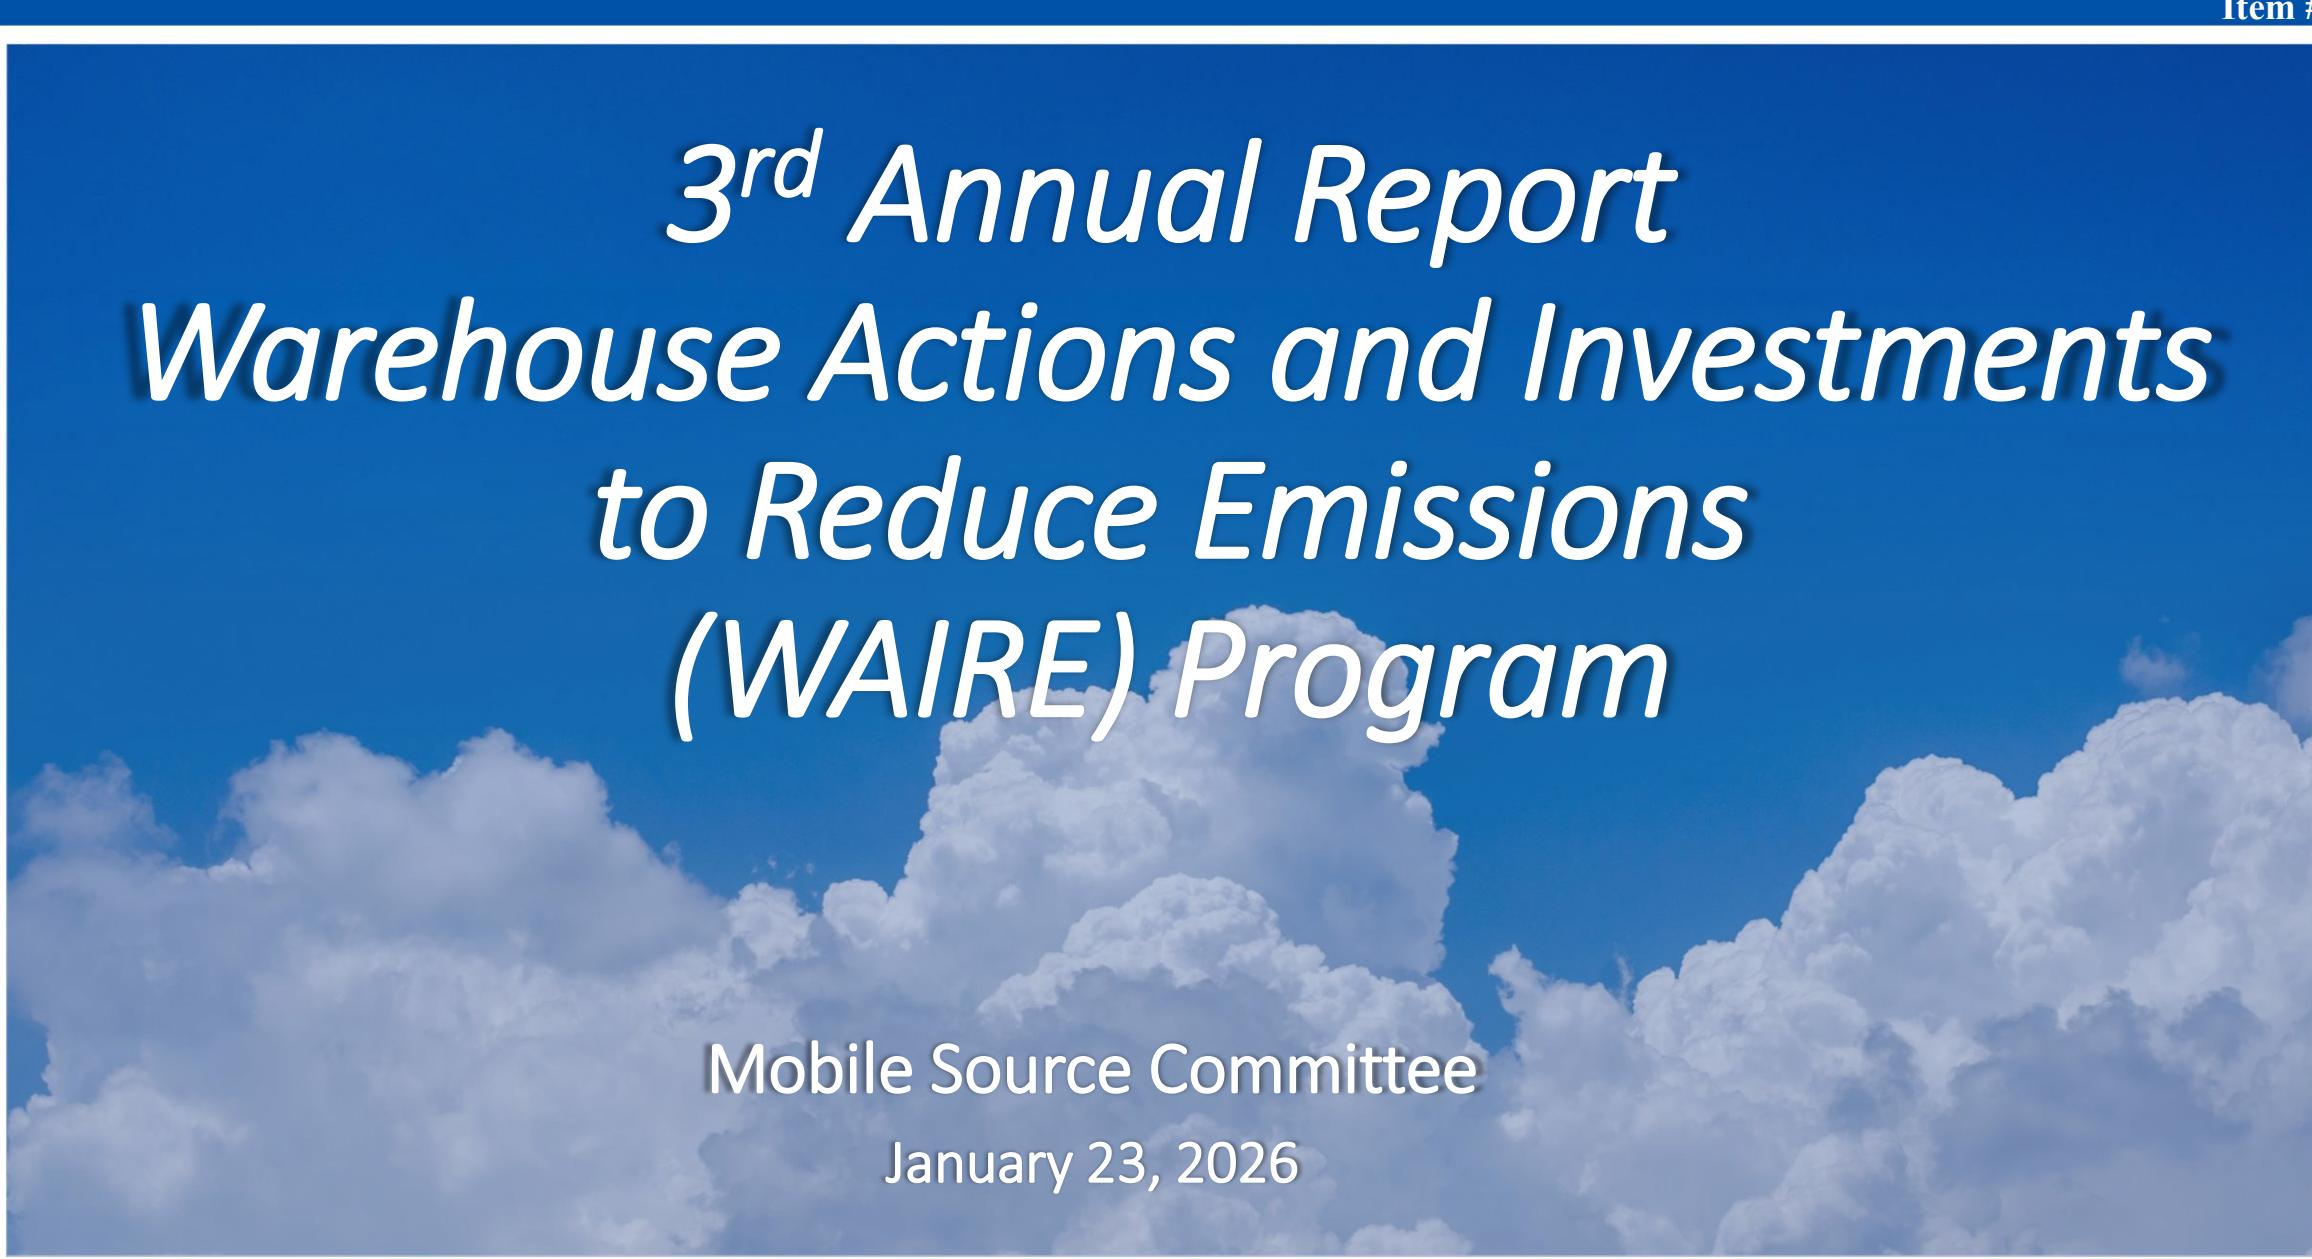

Infrastructure improvement projects

- All airports are planning or implementing various projects, e.g., electrical infrastructure upgrades, equipment/vehicle charging, gate/terminal electrification

PUBLIC PROCESS AND NEXT STEPS

- Airports MOUs Working Group Meeting Held on November 18, 2025
- Finalize updates to South Coast AQMD's Airports MOU Implementation Progress for CY 2021-2023 report
- Submit the CY 2021-2023 South Coast AQMD Report to U.S. EPA
- Evaluate CY 2024 Airport Reports and Draft Respective Progress Report

3rd Annual Report Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program

Mobile Source Committee
January 23, 2026

WAIRE Program Introduction

Purpose

- Reduce NOx and diesel PM from mobile sources associated with warehouses
 - Regional and local benefits
 - First in the nation landmark rule

Applicability

- Applies to owners and operators of warehouses greater than or equal to 100,000 square feet
 - Limited exemptions

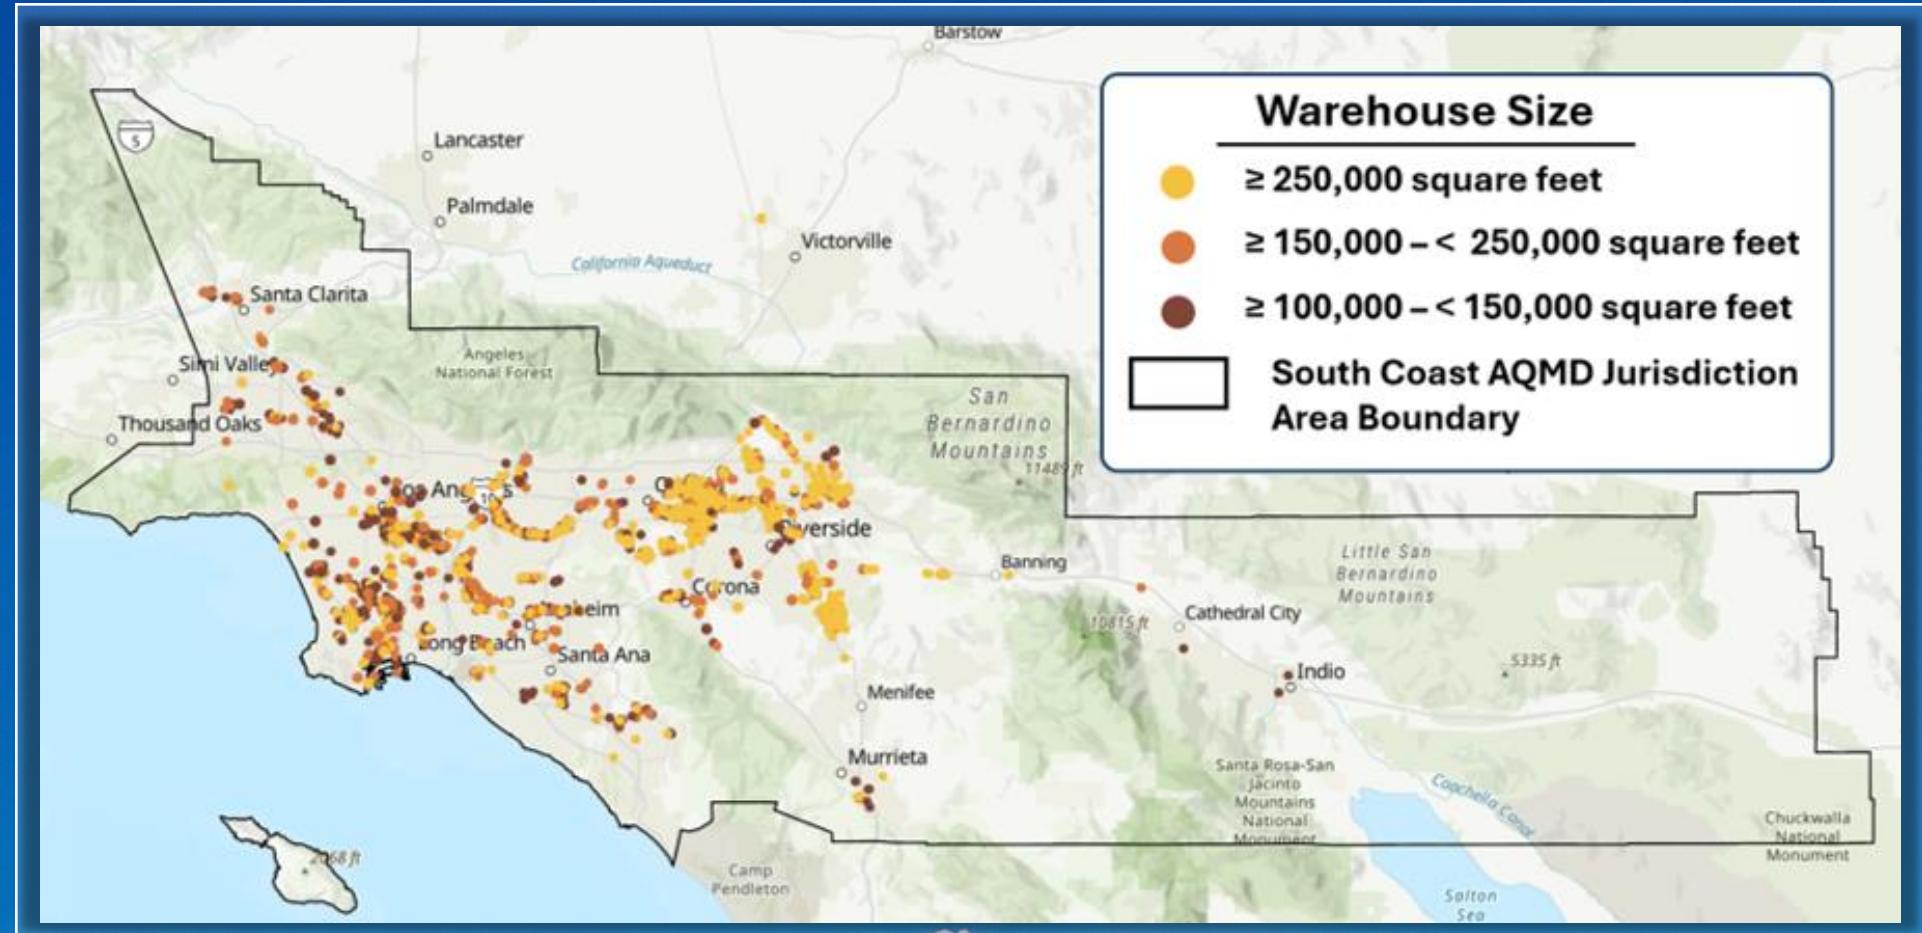

Key Parties and Obligations

	Warehouse Operations Notification (WON)	Initial Site Information Report (ISIR)	Annual WAIRE Report (AWR)
Applicability	Owners	Operators	Operators
Frequency	Once, unless changes occur	Once, in first year of operation	Annually
Key Information Required	<ul style="list-style-type: none">▪ Warehouse information▪ Tenant information▪ Area used for warehousing activities	<ul style="list-style-type: none">▪ Fleet information▪ Existing infrastructure▪ Anticipated truck trips▪ Anticipated actions to comply	<ul style="list-style-type: none">▪ WAIRE Points Compliance Obligation<ul style="list-style-type: none">• Number of truck trips▪ Points Earned<ul style="list-style-type: none">• Completed actions or investments• Banked or transferred points

WAIRE Program Warehouses

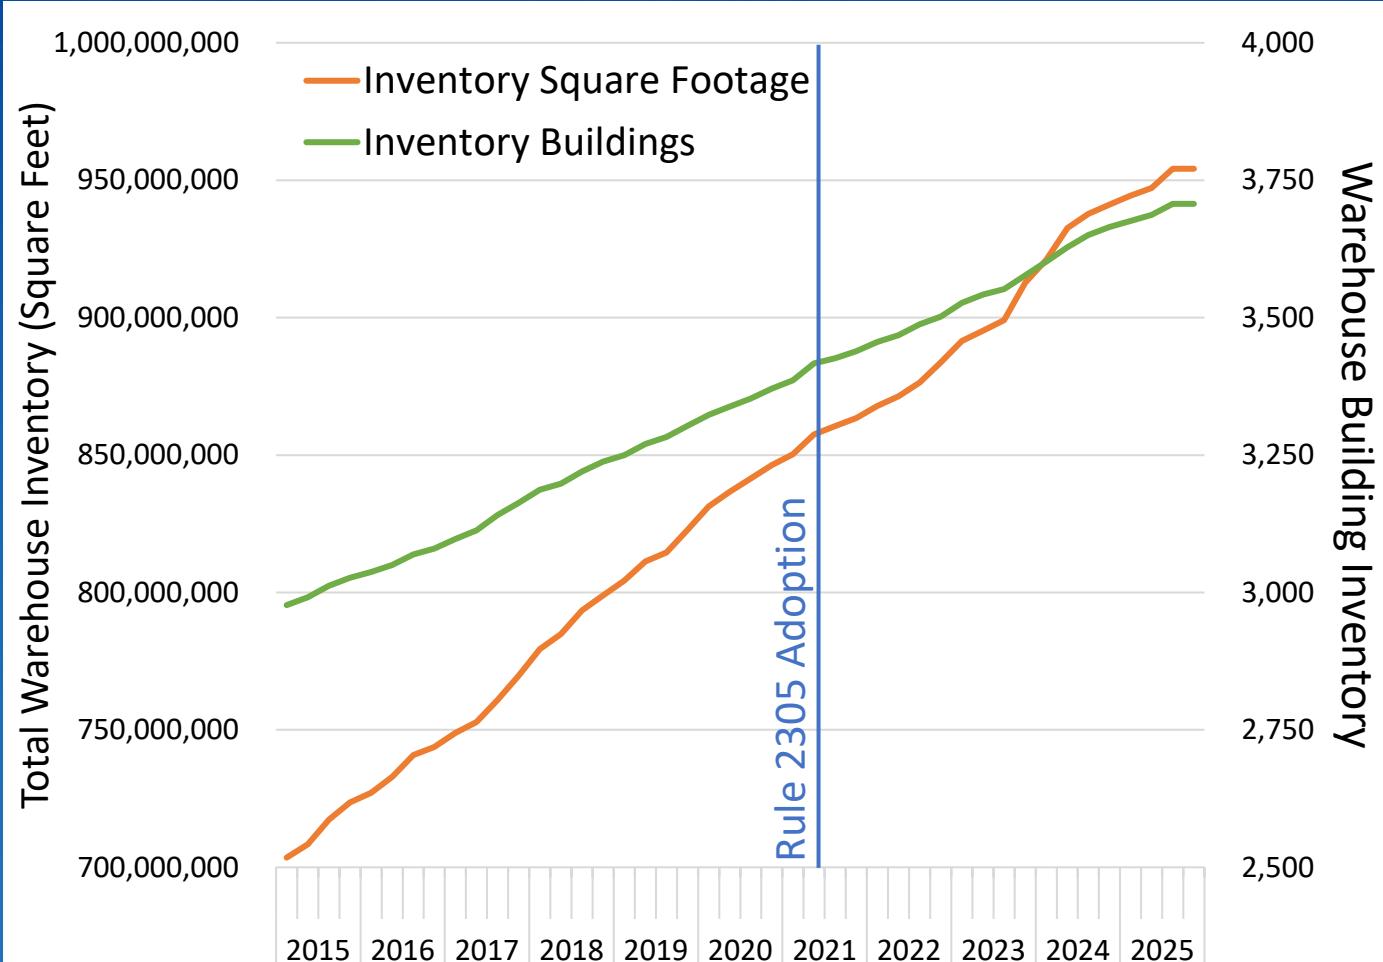

Over 4,000 applicable warehouses in South Coast AQMD

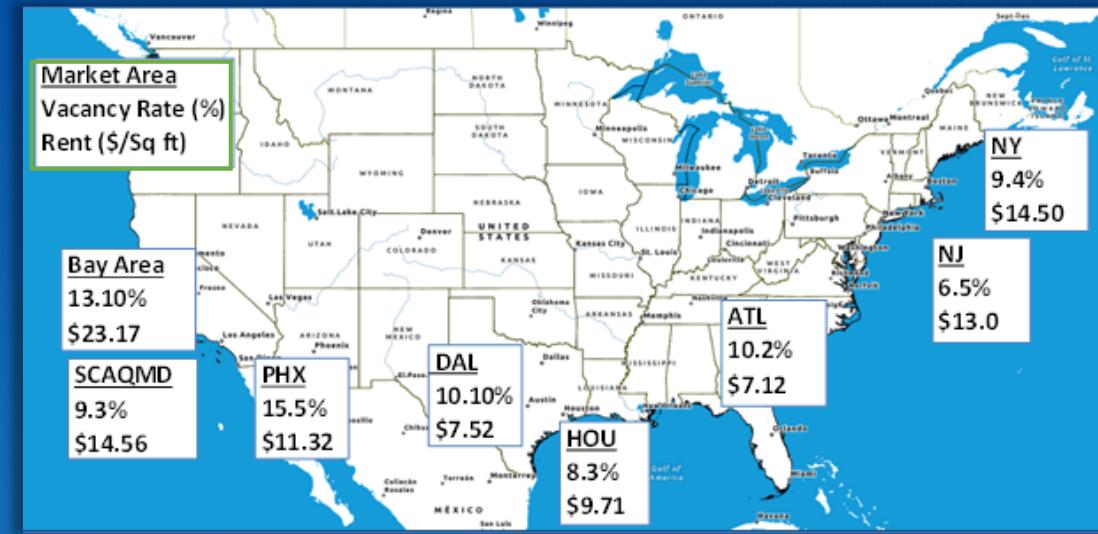

Local and National Warehousing Industry

Total Warehousing Area and Number of Warehouses

Vacancy Rate (%) and Rent Price (\$/square foot)

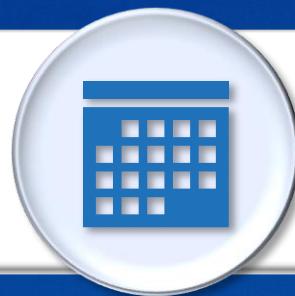

Warehousing industry in South Coast AQMD continues to expand despite rent and vacancy rates rising across the nation

WAIRE Program Warehousing Universe

	Phase 1 (≥250,000 sf)	Phase 2 (≥150,000 - <250,000 sf)	Phase 3 (≥100,000 - <150,000 sf)	Total
Total Building Universe	1,228	1,170	1,644	4,042
Expected Number of Operators	1,645	1,579	2,080	5,304
Number of Expected AWRs	1,627	1,531	886	4,044

- Universe is bigger than originally estimated
 - Some buildings occupied by multiple tenants
- Universe is complex
 - Different operations and parties involved (lessees, sublessees, etc.)
 - Some operators are exempt from WAIRE Menu actions and submitting AWRs

Required Phase-In Schedule

Warehouse Phase	Compliance Period					
	2022	2023	2024	2025	2026	2027
Phase 1 ≥250,000 sf	33% WPCO*	67% WPCO		100% WPCO		
Phase 2 ≥150,000 - <250,000 sf		33% WPCO	67% WPCO		100% WPCO	
Phase 3 ≥100,000 - <150,000 sf			33% WPCO	67% WPCO		100% WPCO

Phase-in continues through 2027

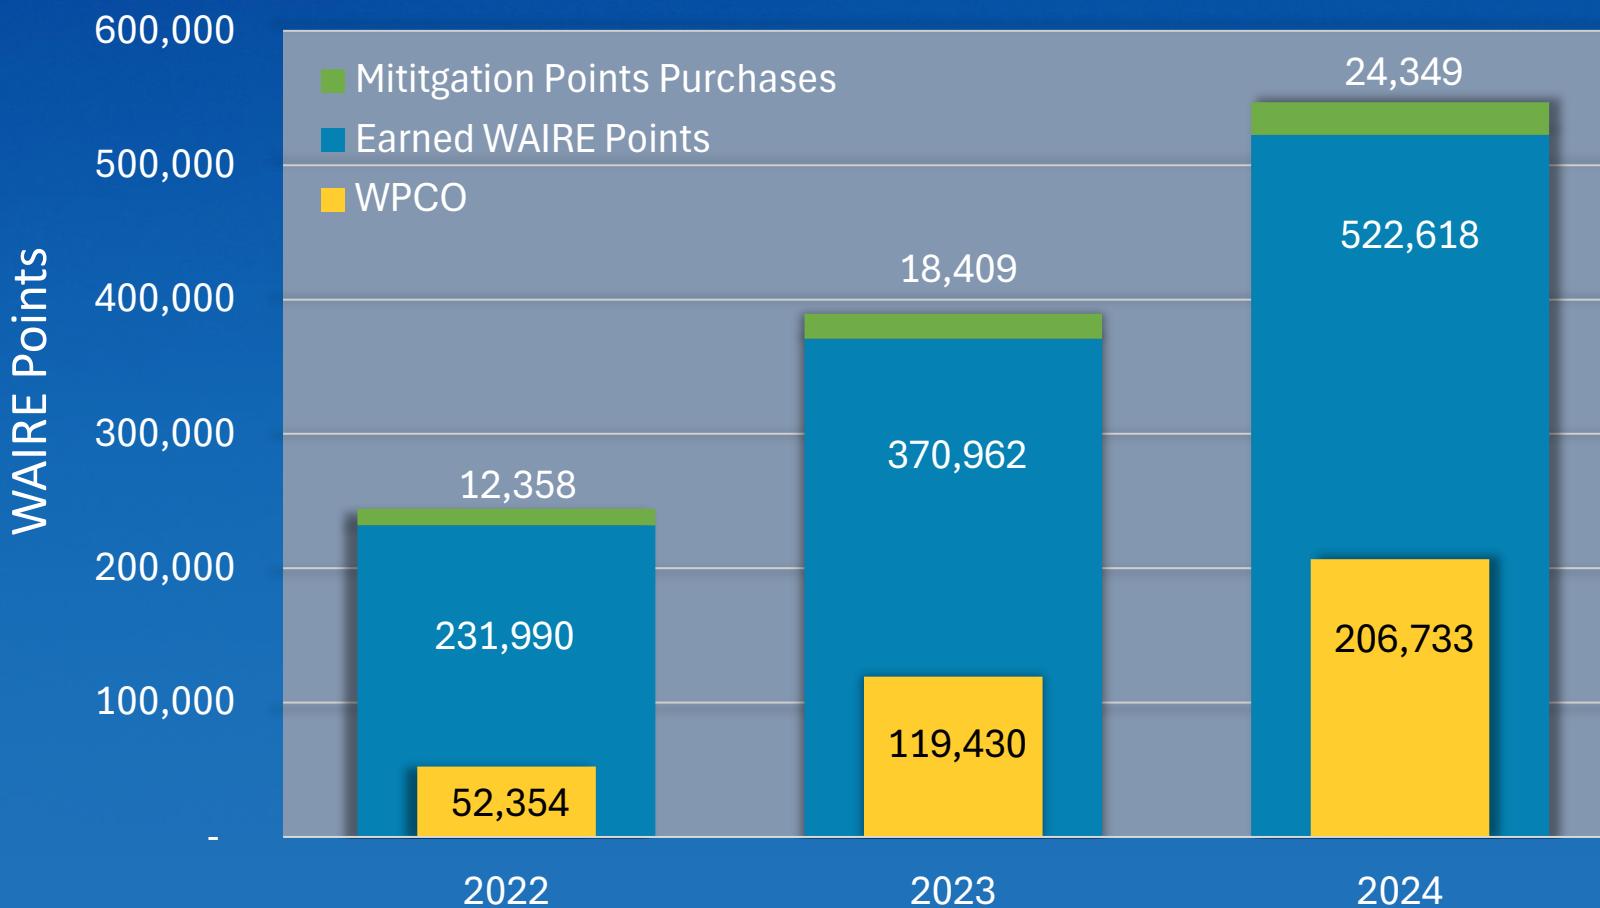

1st AWR deadline
for all warehouses

Now

1st AWR deadline with
100% WPCO for all
warehouses

Actions Surpass Obligation

- On average, reporting warehouse operators earned 3.5 times more points than required
- Mitigation points purchased make up 5% of total WAIRE points earned

ZE Actions Among Leading Selections

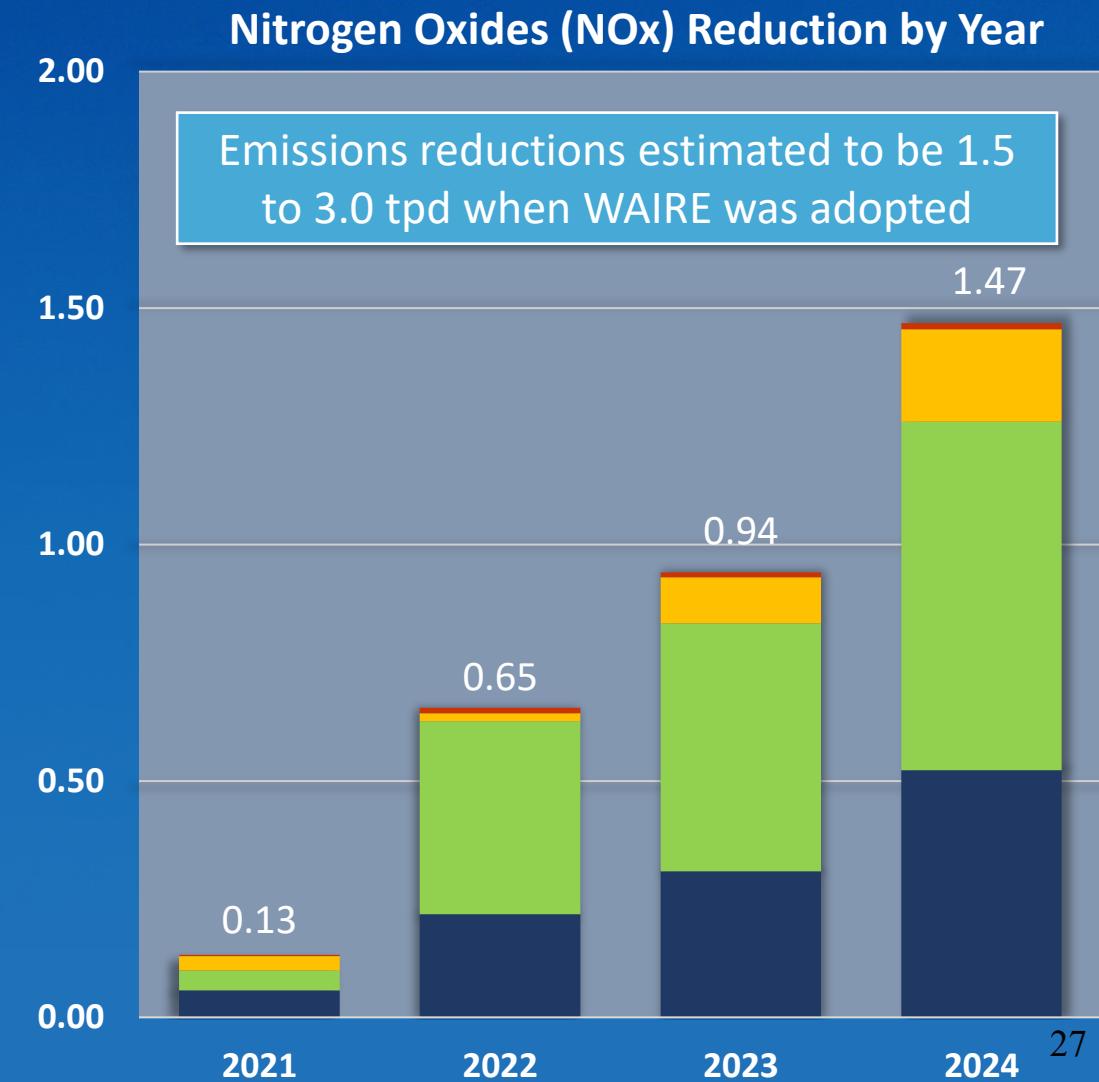

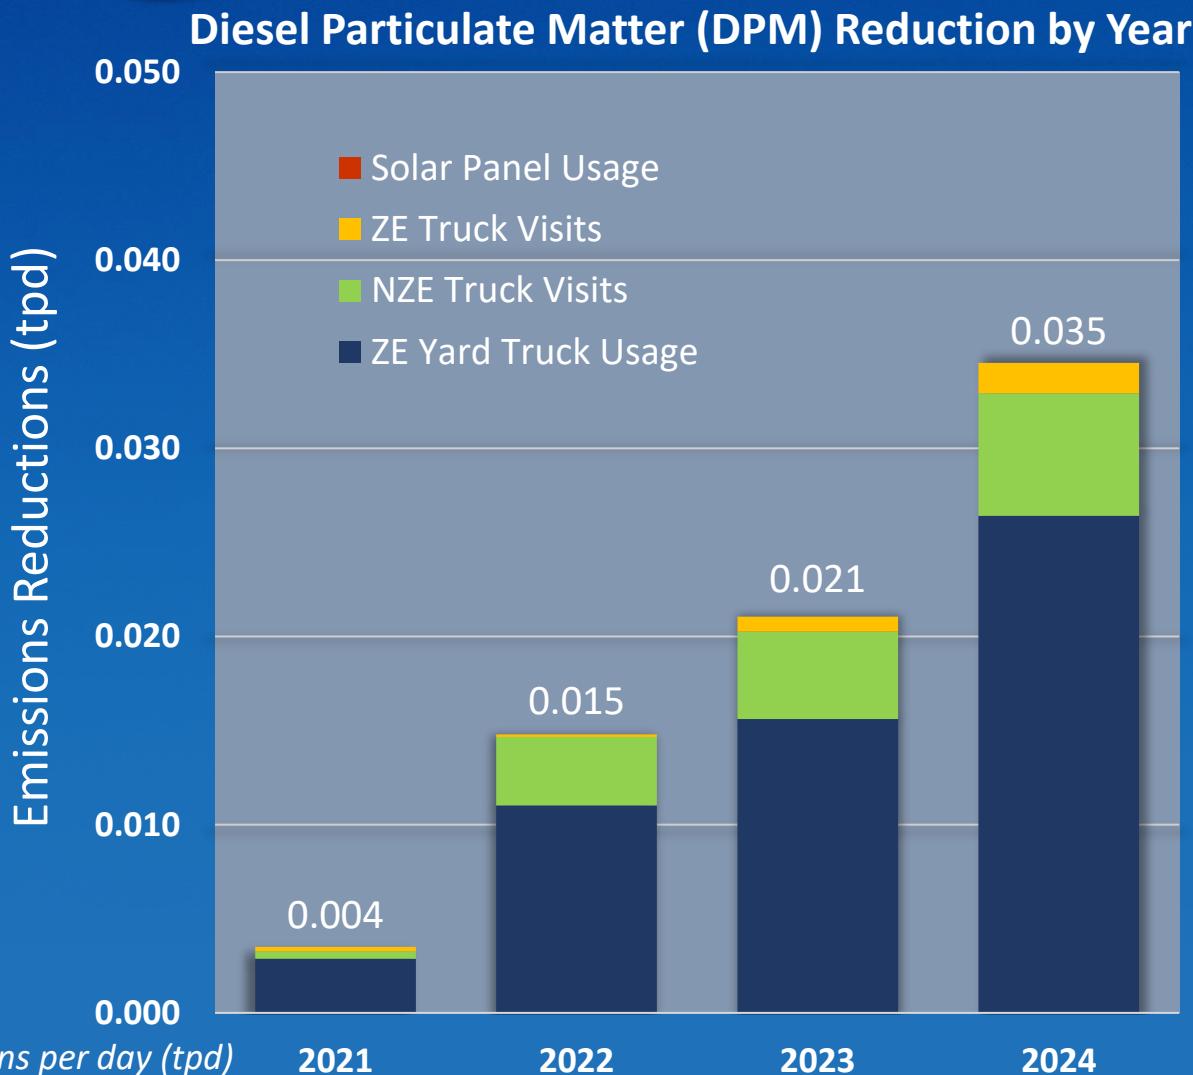

- Over 315 million kilowatt-hours of clean solar energy
 - Enough to power roughly 50,000 households for a year
- ZE Vehicles and Infrastructure are 65% of total points earned
 - 43% ZE Yard Truck Usage
 - 9% ZE Infrastructure & Usage
 - 8% ZE Truck Acquisitions
 - 5% ZE Truck Visits

WAIRE Menu Category*	Instances Reported	Number of Facilities
<i>ZE Infrastructure Energization</i>	692 units	220
<i>Charger Usage</i>	45 GWh	280
<i>Solar Panel Installations</i>	54 systems	53
<i>Solar Panel Usage</i>	315 GWh	118
<i>Hydrogen Dispensed</i>	136,153 kg	8
<i>ZE Class 2b-3 Truck Acquisitions</i>	440 units	29
<i>ZE Class 2b-3 Truck Visits</i>	356,969 visits	137
<i>ZE Class 4-7 Truck Acquisitions</i>	97 units	15
<i>ZE Class 4-7 Truck Visits</i>	59,762 visits	145
<i>ZE Class 8 Truck Acquisitions</i>	392 units	51
<i>ZE Class 8 Truck Visits</i>	448,263 visits	390
<i>ZE Yard Truck Acquisitions</i>	313 units	161
<i>ZE Yard Truck Usage</i>	2,052,007 Hours	244

* Results based on reported information & are subject to audit by South Coast AQMD

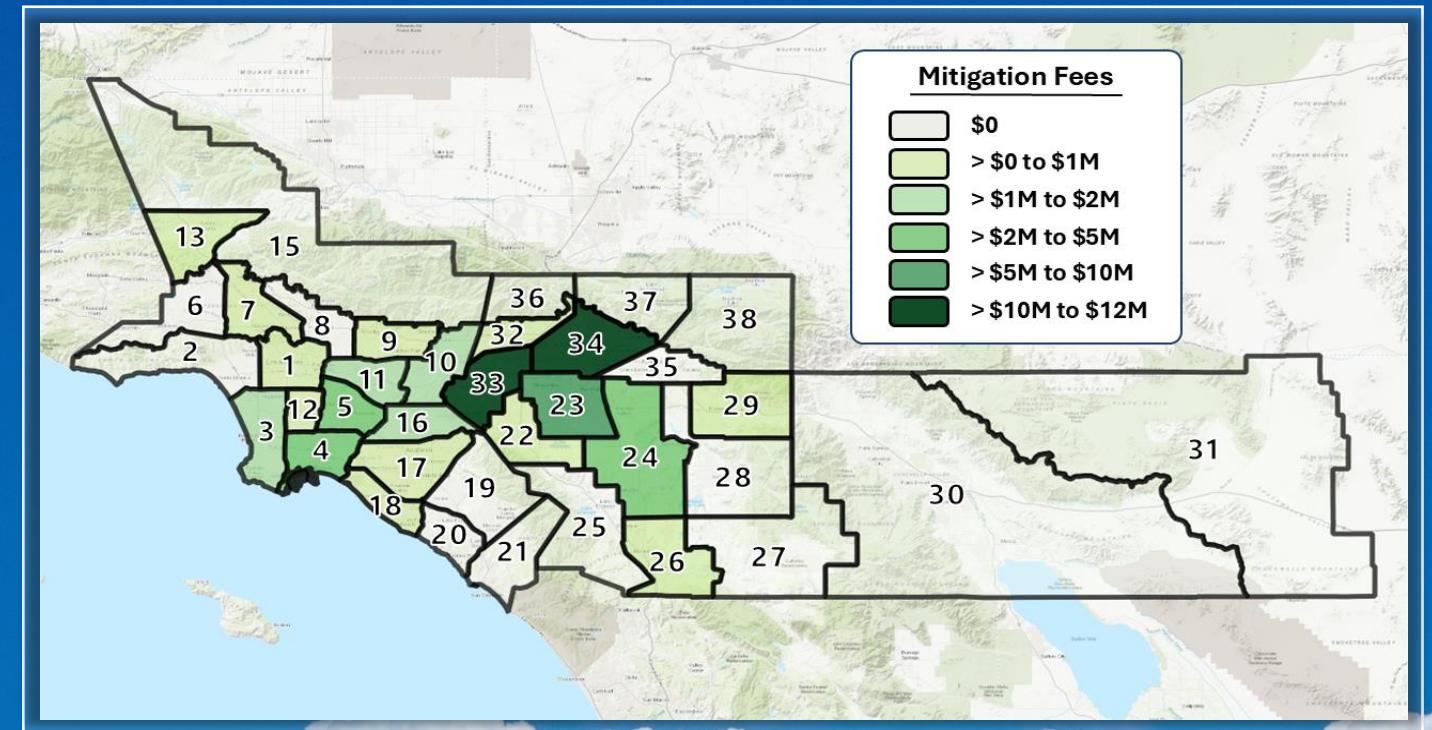

Emission Reductions

Mitigation Fees Collected

- Operators may choose to obtain mitigation points through paying a fee
 - \$56 million* collected through 2025 from operators who purchased mitigation points
 - Funds generated to be spent through a WAIRE Mitigation Program to reduce emissions in communities near warehouses that paid fee
 - More information will be made publicly available soon in upcoming solicitation for projects

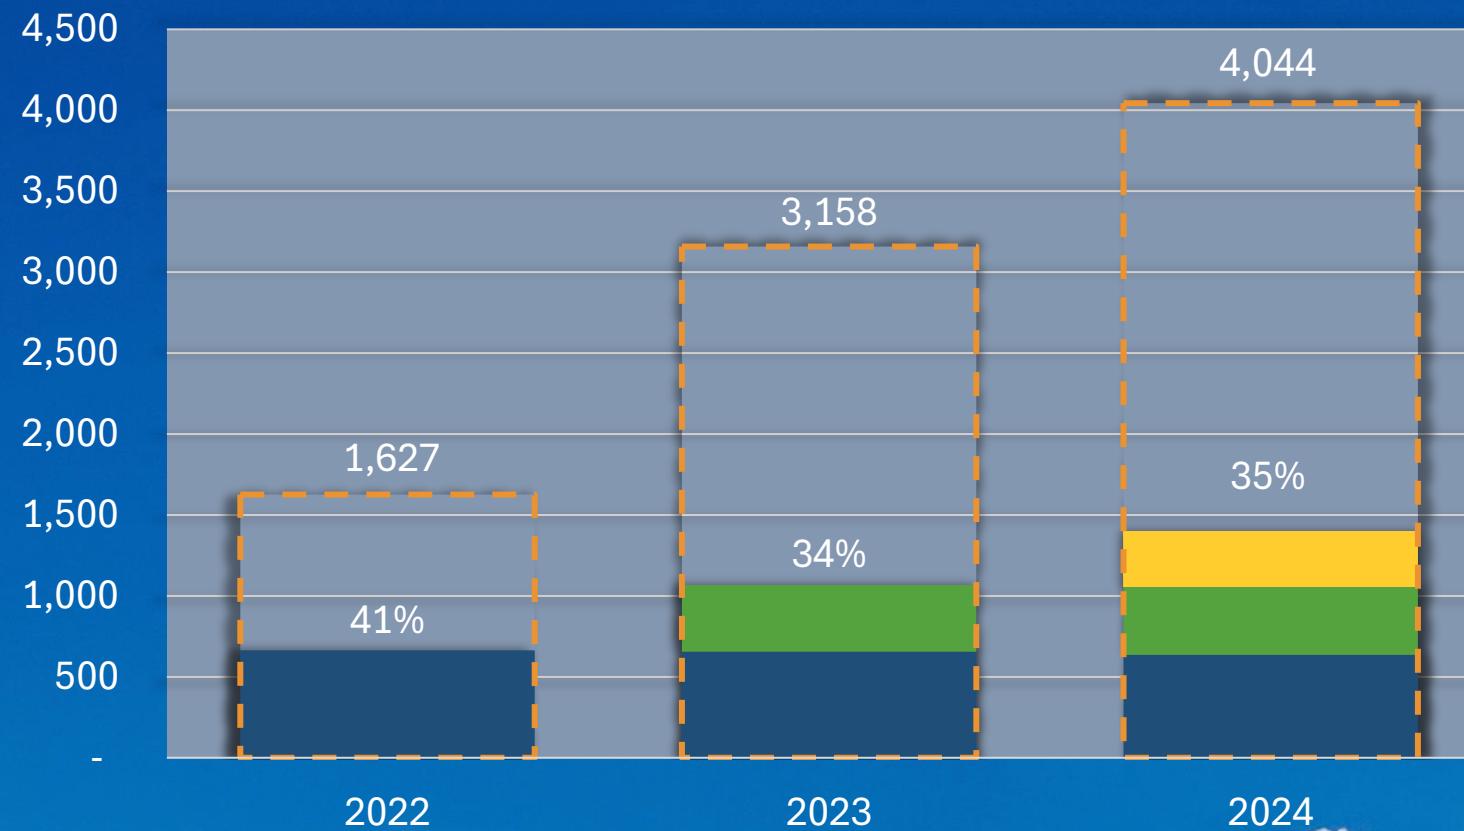

* \$55.1 million as of August 2025, as stated in Annual Report

Reporting Progress

Annual WAIRE Reports Received by Phase and Year

Reporting rates are expected to continue improving as industry adapts to new program

- Phase 3
- Phase 2
- Phase 1
- AWRs Expected

Implementation Efforts Since Rule Adoption

- As of August 31, 2025:
 - **5,500+** warehouse operators visited in-person
 - **18,200+** calls and emails to WAIRE Program Hotline
 - **150+** in-person and virtual webinar presentations
 - **7,700+** views of training videos (outside of webinars)
 - **104,300+** visits to www.aqmd.gov/waire
 - **108,400+** informational emails sent about program resources
 - **21,800+** compliance advisory mailers sent
- Significant staff effort required for program implementation:
 - Reporting software
 - Data management
 - Report auditing

Enforcement Actions

- 768 NOVs issued as of December 31, 2025
 - Failure to submit ISIR and/or AWR
 - 400 facilities completed 772 reports following NOV issuance
 - 200 NOVs fully resolved, resulting in a total of \$2,117,349 in penalties*
- Next Steps:
 - Continue enforcement efforts
 - Continue providing compliance assistance and resolution of NOVs

* As of August 31, 2025: 702 NOVs issued; 380 facilities completed 706 reports following NOV issuance; 170 NOVs fully resolved, resulting in a total of \$1,578,951 in penalties. Per AB 98, staff will conduct public outreach in 2026 on spending penalties funds received since January 1, 2025.

YOU ARE HEREBY NOTIFIED THAT YOU HAVE BEEN CITED FOR ONE OR MORE VIOLATIONS OF THE SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT (SCAQMD) RULES, STATE LAW OR FEDERAL LAW. IF PROVEN, SUCH VIOLATION(S) MAY RESULT IN THE IMPOSITION OF CIVIL OR CRIMINAL PENALTIES. EACH DAY A VIOLATION OCCURS MAY BE HANDLED AS A SEPARATE OFFENSE REGARDLESS OF WHETHER OR NOT ADDITIONAL NOTICES OF VIOLATION ARE ISSUED.

DESCRIPTION OF VIOLATIONS

#	Authority*	Code Section or Rule No.	SCAQMD Permit to Operate or CARB Registration No.	Condition No. (if Applicable)	Description of Violation
1	<input checked="" type="checkbox"/> SCAQMD <input type="checkbox"/> CHSSC <input type="checkbox"/> CCR <input type="checkbox"/> CFR	2305(d)(7)(C)			Failure to timely submit an Annual WAIRE Report to the South Coast AQMD by March 2, 2023.
2	<input checked="" type="checkbox"/> SCAQMD <input type="checkbox"/> CHSSC <input type="checkbox"/> CCR <input type="checkbox"/> CFR	2305(d)(7)(B)			Failure to timely submit an Initial Site Information Report to the South Coast AQMD no later than July 1, 2022.

More information regarding Rule 2305 can be found on the agency's dedicated WAIRE webpage (www.aqmd.gov/waire), and questions may be directed to the WAIRE Program Hotline (909) 396-3140 or via email to waire-program@aqmd.gov.

Recent Industry Feedback

Key Comment #1 – Emission benefits of rule are overstated. Traditional mobile source regulations are more effective in reducing emissions.

Staff Responses

- South Coast AQMD faces unique challenges in meeting federal air quality standards and must implement all feasible measures to achieve emissions reductions
 - Limited authority to directly regulate mobile sources
 - Indirect source rule is a viable regulatory approach for warehouses
- WAIRE Program results:
 - Delivers quantifiable emissions reductions beyond existing requirements
 - Facilitates implementation of zero emissions technologies

Recent Industry Feedback (Continued)

Key Comment #2 – Rule is burdensome and complex, with potential long resolution timelines for some cases (e.g., non-compliance).

Staff Responses

- WAIRE Program has some necessary complexity
 - Regulates a diverse and highly dynamic industry
 - Implements a novel framework to provide flexibility to operators
- Challenges in initial implementation are expected in a first-in-the-nation program on an industry not previously regulated by South Coast AQMD
 - Extensive outreach conducted and self-help materials (e.g. fact sheets, guidelines, etc.) developed
 - Staff available to provide further guidance and address unique cases
- Example cases with potentially longer timelines
 - Facility provided inaccurate reports or is non-compliant
 - Facility A transfer WAIRE Points to Facility B, but later wants to pull that back

Looking Ahead

Continue Enforcement Efforts

Continue Outreach to Warehouse Owners

Continue to Audit WAIRE Reports

Continue to Update WAIRE Program Online Portal

Conduct Outreach on Spending Penalty Funds

Issue Solicitation for WAIRE Mitigation Program

Prepare and Report on Technology Assessment

Executive Summary

South Coast AQMD is home to the most densely concentrated warehouse and logistics networks in the nation, where clusters of large distribution centers are linked to freight corridors serving the Ports of Los Angeles and Long Beach and local rail yards. This goods movement system is a significant driver of the region's and nation's economic activity. However, it also results in a high volume of heavy-duty truck trips, yard equipment movement, and last-mile delivery activity, generating substantial air pollution that affects regional air quality and disproportionately burdens nearby communities. On May 7, 2021, the South Coast AQMD Governing Board adopted Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program and Rule 316 – Fees for Rule 2305 to reduce regional and local emissions of nitrogen oxides (NOx) and diesel particulate matter (DPM). The WAIRE Program is the nation's first rule designed to reduce smog-forming emissions from the warehouse sector. The rule facilitates emission reductions by providing multiple flexible compliance pathways to reduce air pollution from goods movement and trucking activities associated with warehouses.

Through implementation of the WAIRE Program, measurable emissions reduction benefits have been achieved by accelerating the deployment of cleaner trucks, battery-electric yard equipment, on-site charging and infrastructure investments, and cleaner last-mile delivery operations. These efforts are delivering real-world benefits, including reduced diesel pollution, improved public health outcomes in disadvantaged communities, and technology market transformation. Collectively, these achievements demonstrate how regulating warehouse-driven indirect sources can produce tangible emission reductions while supporting a cleaner, more sustainable freight system. Each year, South Coast AQMD staff publishes a WAIRE Program Annual Report to provide an update of program implementation. This 3rd WAIRE Program Annual Report summarizes the WAIRE Program's implementation from rule adoption on May 7, 2021 through August 31, 2025, including outreach, reporting, mitigation program, enforcement, program results and other rule-related activities. The first four years of implementation for the WAIRE Program were primarily focused on program development, outreach, and providing technical support and compliance assistance for warehouse facility owners and operators subject to Rule 2305.

As a first-in-the-nation rule, the WAIRE Program has always been expected to evolve as specific implementation practices are adopted across the industry. This latest year has seen continued improvement in the program. As of August 31, 2025, a total of 3,150 Annual WAIRE Reports (AWRs) were submitted by warehouse operators for the 2022, 2023, and 2024 compliance periods. In 2024, the third year of its five-year phase-in period, the WAIRE Program achieved approximately 1.47 tons per day of NOx reductions and 0.035 tons per day of DPM reductions. WAIRE compliance is most commonly achieved through acquiring or using zero-emission (ZE) and near-zero emissions (NZE) trucks and cargo handling equipment, installing and using ZE charging infrastructure, and installing and using solar panels, while only about 5% of total compliance is achieved through mitigation fees. The \$55.1 million collected in mitigation fees through August 2025 will be used to fund projects that achieve and/or facilitate emissions reductions. Total WAIRE Points earned to date exceed what was projected during rulemaking.

Overall, actions from the WAIRE Program have resulted in emissions reductions that go beyond any state or federal regulation to assist in meeting ambient air quality standards and reducing localized air quality impacts in communities that are located near warehouses. The site-based focus of the WAIRE Program is also helping to build the ecosystem needed for ZE operations through the buildout of charging stations and solar installations.

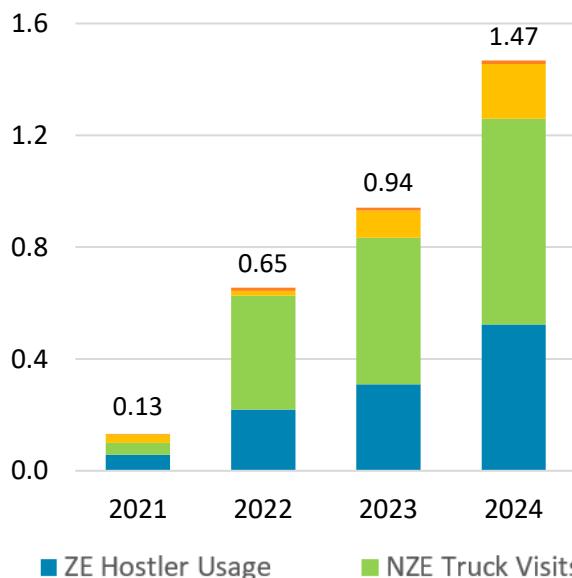

WAIRE Program - 3rd Annual Report Highlights

The 3rd Annual Report summarizes the WAIRE Program's implementation from rule adoption (May 7 2021) through August 31, 2025. The Program's targeted actions result in measurable NOx and Diesel PM emission reductions, improving air quality regionally and locally.

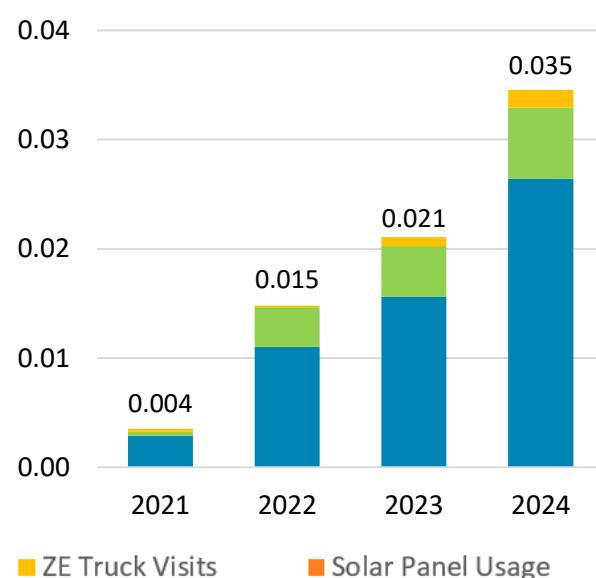

WAIRE Menu Item	Total Reported Activity (Compliance Periods 2021-2024)
Near-Zero Emissions Class 4-7 Truck	234 Acquisitions
	644,777 Visits
Near-Zero Emissions Class 8 Truck	227 Acquisitions
	2,709,325 Visits
Solar Panel Usage	315,213,352 kWh
Zero Emissions Class 2b-3 Truck	440 Acquisitions
	357,069 Visits
Zero Emissions Class 4-7 Truck	97 Acquisitions
	59,764 Visits
Zero Emissions Class 8 Truck	392 Acquisitions
	453,165 Visits
Zero Emissions Yard Truck	313 Acquisitions
	2,052,007 Hours Used

**Emission Reductions in NOx
(tons per day)**

**Emission Reductions in Diesel PM
(tons per day)**

Introduction

The South Coast Air Quality Management District (South Coast AQMD) is the regulatory agency responsible for improving air quality for large areas of Los Angeles, Orange, Riverside and San Bernardino counties, including the Coachella Valley. This jurisdiction spans across three air basins which are the South Coast Air Basin, and portions of the Salton Sea Air Basin (SSAB or Coachella Valley Planning Area) and the Mojave Desert Air Basin (MDAB) located in Riverside County. On May 7, 2021, the South Coast AQMD Governing Board adopted Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program and Rule 316 – Fees for Rule 2305 to reduce regional and local emissions of nitrogen oxides (NOx) and diesel particulate matter (DPM).

South Coast AQMD Rule 2305 applies to both operators and owners of warehouses greater than or equal to 100,000 square feet of indoor floor space within a single building. Rule 2305 requires warehouse operators to annually report the truck traffic visiting their warehouse. The truck traffic visiting a warehouse each year is a proxy for the NOx and DPM emissions associated with that warehouse operation. To reduce these emissions, the truck traffic visiting each warehouse determines a specified number of points a warehouse operator must earn annually. To earn points, warehouse operators can choose from a variety of actions that reduce NOx and DPM emissions, such as acquiring or using a ZE or NZE truck or installing or using electric chargers. Through the implementation of Rule 2305, warehouse operators were phased into the program over a 3-year period based on warehouse size,¹ with the stringency increasing over a subsequent 3-year period once a warehouse is in the program.

This annual report provides information on rule implementation activities, including outreach, reporting, mitigation program, enforcement, program results and other rule-related activities, including updates on development and/or enhancement of the WAIRE Program Online Portal (POP).² Each annual report includes updates on the status of rule implementation based on WAIRE Program activities that occurred since the previous annual report. This 3rd WAIRE Program Annual Report provides an overview of the WAIRE Program's implementation from rule adoption on May 7, 2021, through August 31, 2025. The annual report also identifies the anticipated next steps for Rule 2305 implementation for the following year.

¹ Pursuant to Rule 2305(c)(33), “warehouse size” means the indoor floor space, measured in square feet, of an individual warehouse building that may be used for warehousing activities. There may be scenarios where the building’s “warehouse size” does not equal the total square feet within the building.

² This 3rd Annual Report for the WAIRE Program is prepared pursuant to South Coast AQMD’s May 7, 2021 Governing Board Resolution No. 21-9.

WAIRE Program Implementation Update

Goods Movement Industry in South Coast AQMD

South Coast AQMD encompasses approximately 10,743 square miles and is home to the nation's largest marine port complex – the Ports of Los Angeles and Long Beach (Ports). These twin ports serve as a critical gateway for international trade, handling over one-third of all containerized cargo entering the United States.³ The goods movement sector has experienced significant volatility after its rapid growth in 2021-2022, as evidenced by cargo container volumes processed through the San Pedro Bay ports. Following the peak in 2022, the ports saw twenty-foot equivalent units (TEUs) volume decline as consumption patterns normalized. In 2024 and 2025, the ports saw a rebound in TEU movement. While annual TEU volumes at the ports^{4, 5} may vary significantly from year to year, the TEU transportation mode split remains remarkably consistent. Approximately 30% of containers are transported by rail through the Alameda Corridor, while the remaining 70% are moved by trucks to warehouse facilities throughout the region.⁶ This stable distribution pattern persists regardless of total ports throughput (Figure 1).

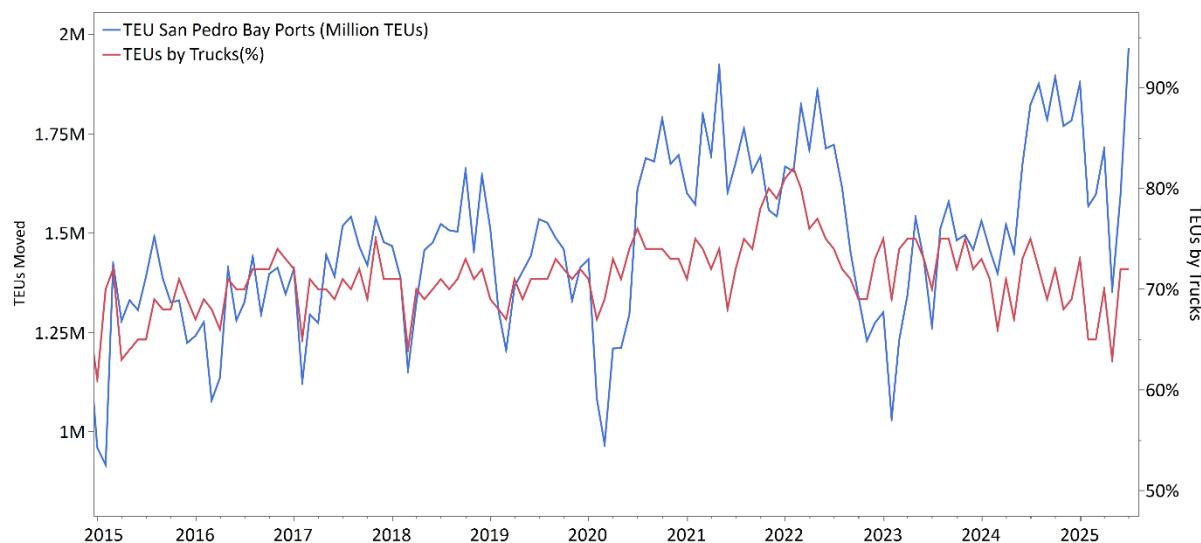

Figure 1: San Pedro Bay Ports Twenty-Foot Equivalent Units (TEU) Throughput and TEUs by Trucks (%)

The warehousing and logistics sector within South Coast AQMD's jurisdiction has continued to thrive since the adoption and implementation of Rule 2305, consistent with the Final Socioeconomic Impact Analysis for Rule 2305.⁷ In the last 10 years, the total inventory of

⁷ <https://www.aqmd.gov/docs/default-source/agendas/governing-board/2021/2021-may7-027.pdf>

warehousing space in buildings larger than 100k square feet increased by 31% to 954 million square feet (Figure 2). Over the last ten years ending in Quarter 4 (Q4) 2025, warehouse rental prices increased by 209% to \$14.56 per square foot (Figure 3).

Despite this upward trend in rental prices over the last decade, a combination of post-pandemic changes in consumer spending, record deliveries of new warehouses, geopolitical uncertainties, new tariff policies, and other factors have increased the availability of warehouse space and more recently driven down rental prices. The vacancy rate in South Coast AQMD jurisdiction area climbed from its all-time low of 1.3% in Quarter 2 (Q2) 2022 to 9.3% in Q4 2025 (Figure 3). This increase in vacancy rates includes completely empty and partially occupied buildings with space available for lease throughout the area. Overall, since Rule 2305 was adopted, the total inventory increased by about 100 million square feet, and rental prices increased by 28%.⁸ Vacancy rates have also increased across many other major U.S. warehousing markets since record lows immediately post-pandemic. The multitude of contributing factors over the last year makes it difficult to generalize a market-wide trend, with some markets demonstrating greater susceptibility to these pressures than others due to the complex interactions between local and national conditions (Figure 4). However, in general vacancy in our region remains lower, and rents remain higher than other regions around the U.S.

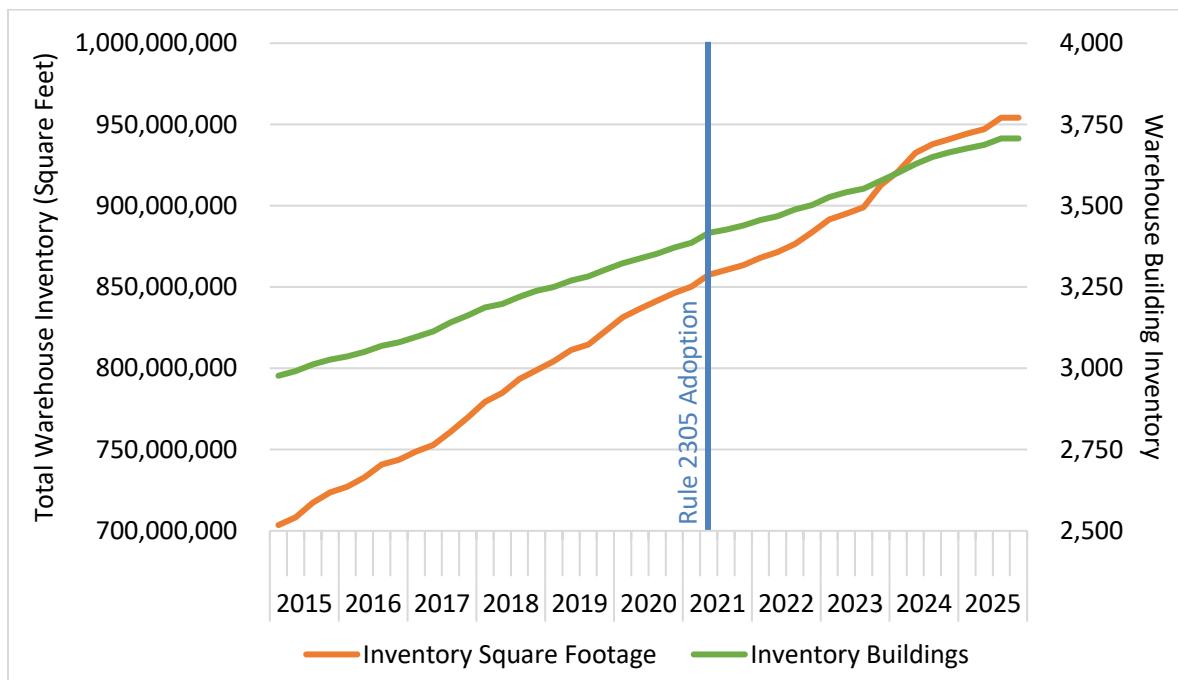

Figure 2: Total Warehousing Area and Number of Warehouses in South Coast AQMD Jurisdiction Area from 2015 to 2025

⁸ Source: CoStar. Dollar values are nominal and have not been adjusted for inflation

Figure 3: Vacancy Rate (%) and Rental Price (\$/sq ft) in South Coast AQMD Jurisdiction Area

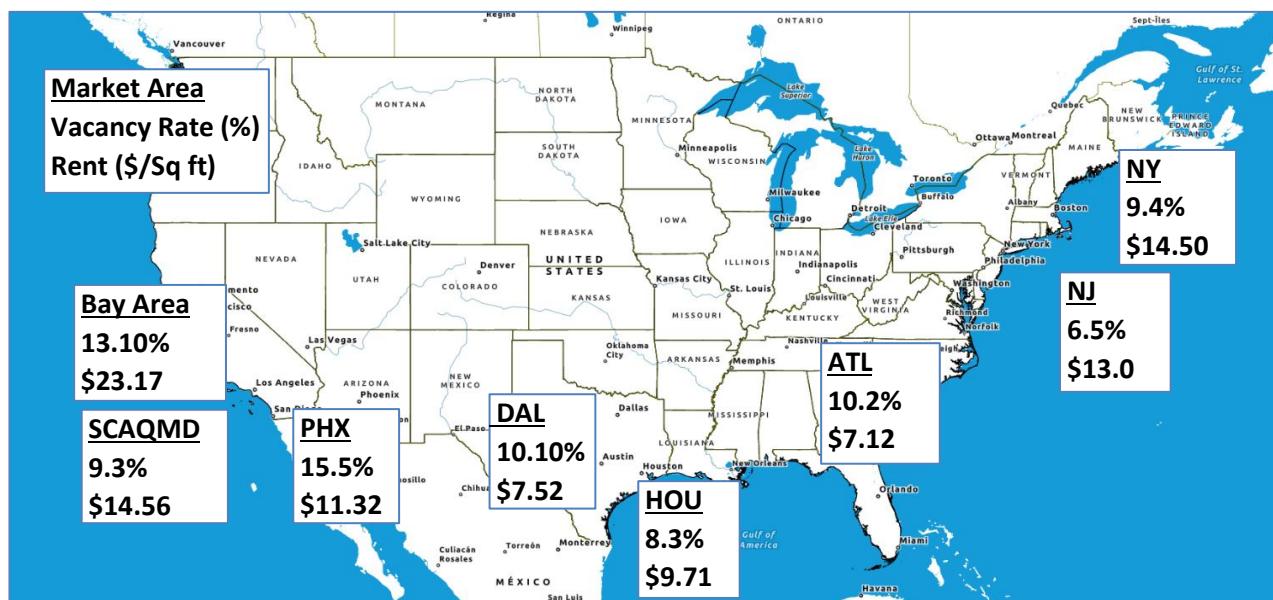

Figure 4: Vacancy Rate (%) and Rent Price (\$/sq ft) in Q4 2025

Warehouse Building Population Potentially Subject to the WAIRE Program

At the time of rule adoption in 2021, South Coast AQMD staff estimated that approximately 3,320 warehouses may be subject to Rule 2305 requirements.⁹ However, not all of these warehouses were expected to be required to earn WAIRE Points if they did not conduct the requisite amount of “warehousing activities” as defined in Rule 2305. For example, recording studios, manufacturing, and retail facilities are typically not considered warehousing activities for the purpose of the rule, but may be located in industrial buildings larger than 100,000 square feet.¹⁰ These larger buildings may still be subject to limited reporting of basic facility information.

Recognizing that construction of new warehouses has continued since rule adoption (Figure 2) the estimate of the potential warehouse universe subject to Rule 2305 has been updated for this Annual Report. Based on August 2025 CoStar data, the potential warehouse inventory increased in all three warehouse phases since rule adoption (Figure 5).

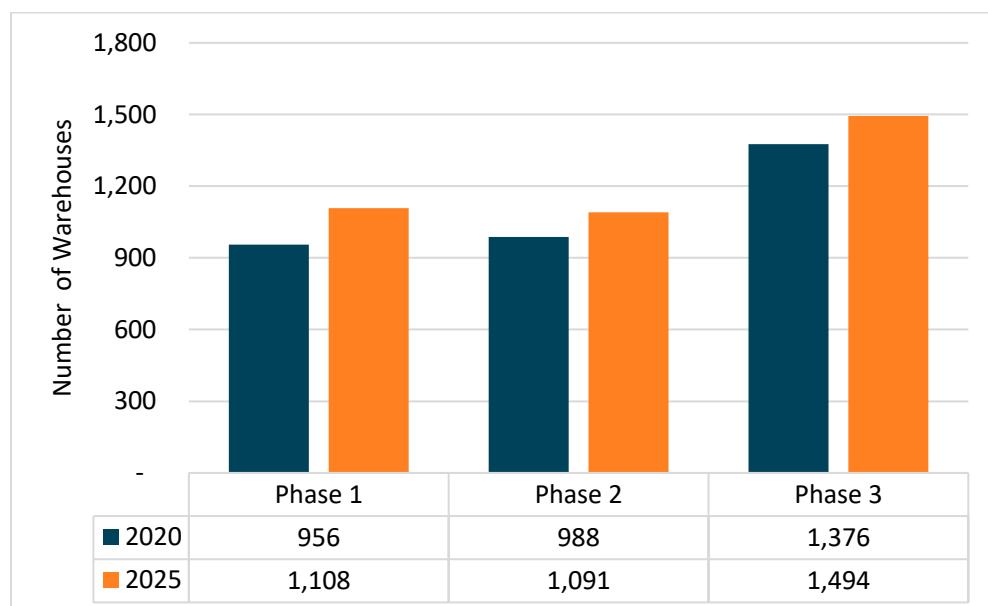

Figure 5: Potential Warehouse Buildings in 2020 vs 2025 Subject to Rule 2305 by Phase, Based Only on Data Available from CoStar

Additional warehouses were identified through reports submitted by warehouse owners and operators, increasing the population to 4,042 warehouses (Table 1). Table 1 also identifies the minimum number of Initial Site Information Reports (ISIRs) and Annual WAIRE Reports (AWRs) expected to be submitted per phase, according to data collected up to August 31, 2025. The ISIRs

⁹ The data and the methodology that led to this estimation are described in detail in Appendix C of the Final Staff Report.

¹⁰ In addition, some warehouses may change tenants through time, with some tenants conducting warehousing activities subject to WAIRE Points requirements, while others do not. Thus Rule 2305 requires basic reporting from a larger group of entities than just those conducting warehousing activities in order to determine who needs to earn WAIRE Points.

and AWRs figures are different than the warehouse buildings because there can be multiple operators in a single building, and each operator has its own reporting obligation. There are fewer AWRs required than ISIRs because some operators use less than 50,000 square feet for warehousing activities, exempting them from needing to earn WAIRE Points and filing AWRs. Further details about these figures can be found in Appendix G.

Table 1: Potential Universe of Warehouse Buildings and Expected Reports

Criteria ¹	Phase 1 ($\geq 250,000$ sf)	Phase 2 ($\geq 150,000 - < 250,000$ sf)	Phase 3 ($\geq 100,000 - < 150,000$ sf)	Total
Total Potential Building Universe ²	1,228	1,170	1,644	4,042
Minimum Number of ISIRs Expected	1,645	1,579	2,080	5,304
Minimum Number of AWRs Expected	1,627	1,531	886	4,044

¹ Further detail can be found in Appendix G.

² Values shown in this row are higher than Figure 5 due to additional facilities identified through Rule 2305 reporting.

Figure 6 identifies the locations of the warehouses potentially subject to Rule 2305. The potential implementation phase of each warehouse is color-coded in this figure.

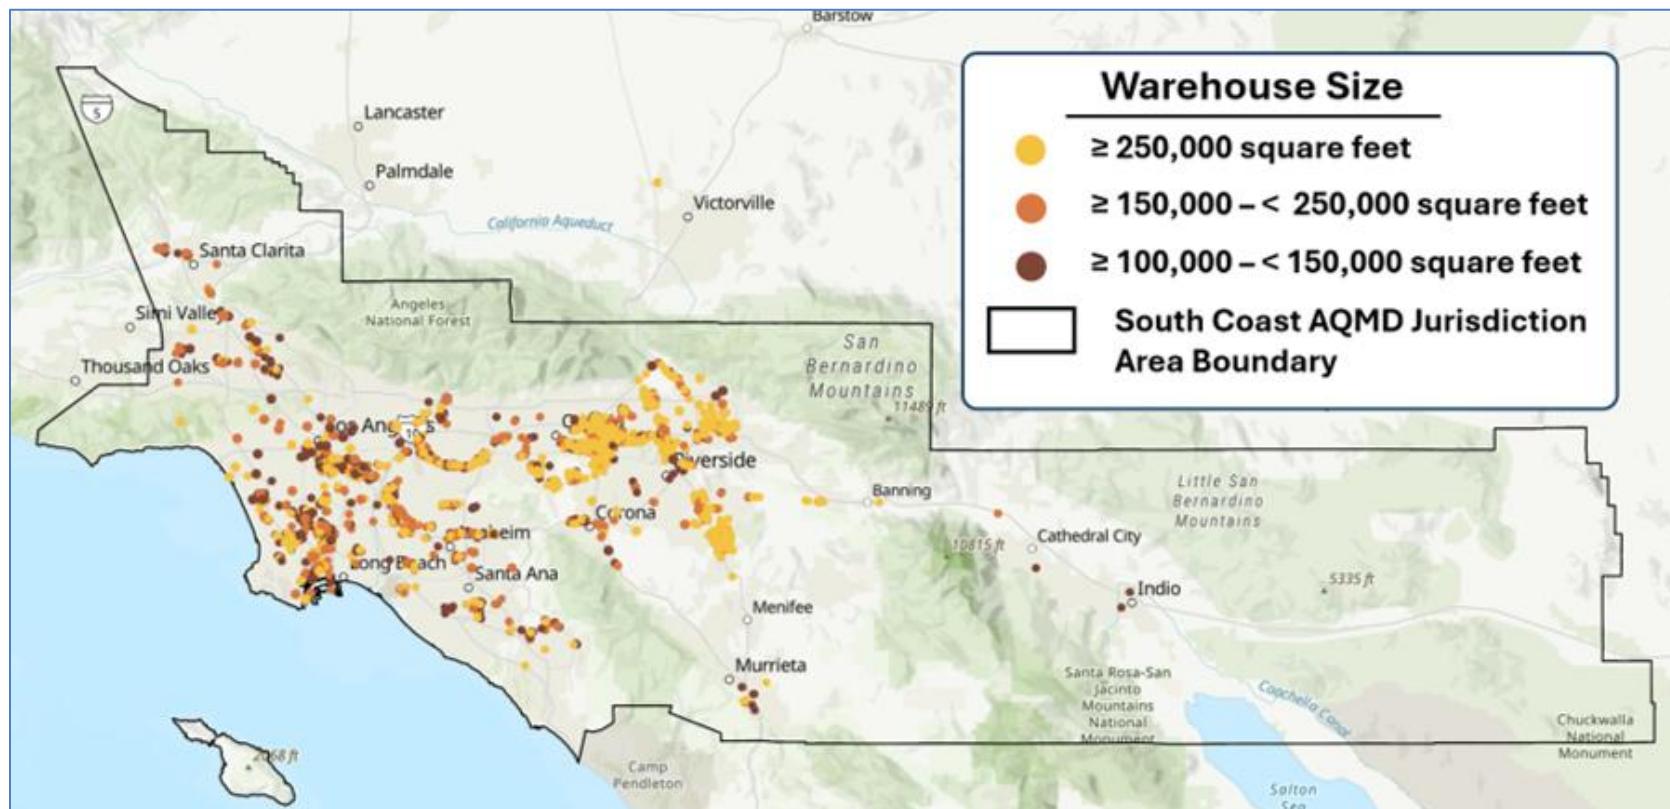

Figure 6: Potential Warehouse Locations Subject to Rule 2305

WAIRE Program Reporting Overview

Warehouse facility owners and operators subject to Rule 2305 are required to submit reports to South Coast AQMD to provide details on their applicable warehouse operations and compliance.¹¹ Table 2 provides an overview of the reporting requirements for the first three years of Rule 2305's implementation. The full implementation schedule continues through January 31, 2027, when all three phases of warehouses will have to meet their full compliance obligation.

Table 2: Rule 2305 Reporting Overview

		Warehouse Facility Owners	Warehouse Operators				
Phase	Warehouse Size (Square Feet)		Warehouse Operations Notification (WON) Due Date ¹	Initial Site Information Report (ISIR)	Annual WAIRE Report (AWR)		
			Reporting Period	1 st Due Date	1 st Compliance Period	1 st Due Date ²	
1	≥250,000	September 1, 2021 ³	Previous 12 Months and Anticipated for AWR	July 1, 2022	January 1, 2022 – December 31, 2022	January 31, 2023	
2	≥ 150,000 - <250,000		Previous 12 Months and Anticipated for AWR	July 1, 2023	January 1, 2023 – December 31, 2023	January 31, 2024	
3	≥100,000 - <150,000		Previous 12 Months and Anticipated for AWR	July 1, 2024	January 1, 2024 – December 31, 2024	January 31, 2025	

¹ WON is the only required reporting obligation for warehouse facility owners subject to Rule 2305, see Rule 2305(d)(7)(A).

² If the warehouse operator vacates the warehouse during the compliance period, the AWR is due the date the operator leaves.

³ Or within 14 days of operator change or 30 days after renovation that changes the square footage.

Warehouse Operations Notification (WON)

Warehouse facility owners of warehouse buildings with 100,000 square feet or more of indoor floor space in a single building are required to submit a Warehouse Operations Notification (WON). The initial due date for submitting the WON to South Coast AQMD was September 1,

¹¹ All WAIRE reports must be submitted through the WAIRE POP online reporting software, <https://xappp.aqmd.gov/isp>

2021.¹² Owners must also file a WON within 14 days of an operator change (e.g., if a lease is signed with a new tenant).

Information required in the WON includes, but is not limited to, the following:

- Warehouse location and building size
- Name and contact information of warehouse owner(s) and lessee(s)
- Start and end date of each lease, square footage used by each lessee, and square footage usable for warehousing activities by each lessee

About 278 WONs have been submitted since last year's Annual Report. Through August 31, 2025, a total of approximately 1,352 WONs have been received, covering 2,534 warehouses.¹³ This represents about 63% of the total expected warehouse population shown in Table 1 above.¹⁴ The majority of warehouses include one tenant, however there are many warehouses with multiple tenants. Figure 7 shows the distribution of tenancy of the 2,534 warehouses with a WON.

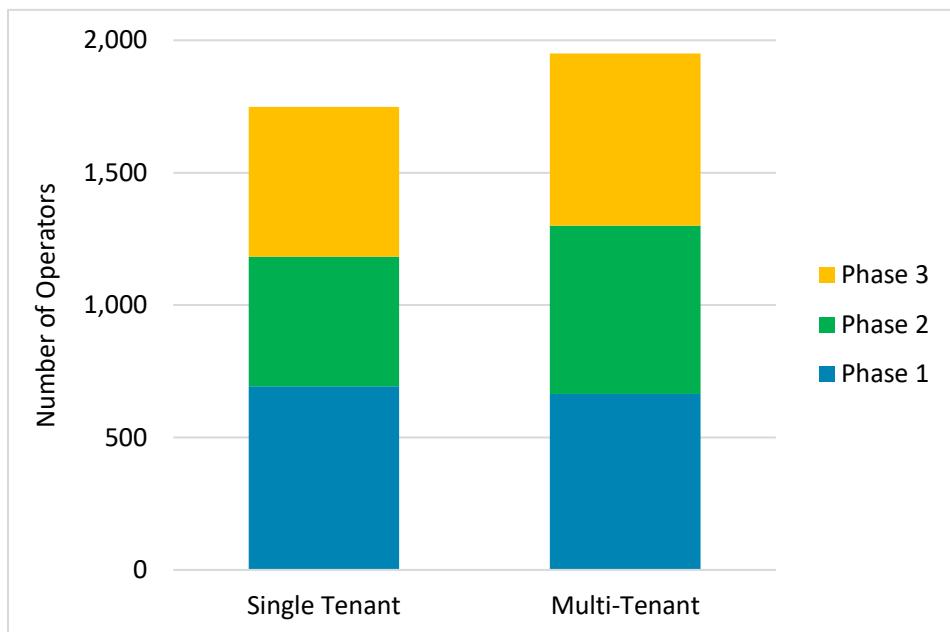

Figure 7: Number of Operators in Single vs Multi-Tenant Warehouses According to WONs

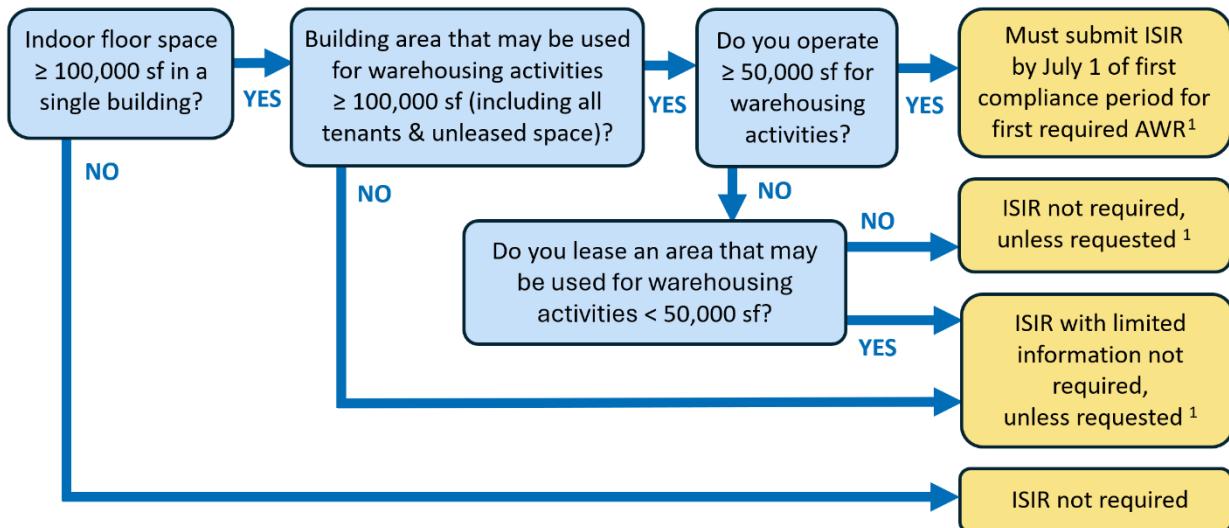

¹² Rule 2305 sets forth requirements for warehouse facility owners to submit updated WON reports in a timely manner if warehouse operators change, if renovations occur and certificates of occupancy are provided, or if a formal request is made by South Coast AQMD. See Rule 2305(e)(1).

¹³ A single report submittal may include multiple warehouse facilities.

¹⁴ South Coast AQMD plans to continue conducting targeted outreach to the remaining warehouse facility owners that have not submitted a WON. Additional compliance and enforcement actions will be pursued to ensure complete reporting from all applicable facilities as required by the rule.

Initial Site Information Report (ISIR)

Warehouse operators are required to submit an ISIR. There are cases where a warehouse operator may not be required to earn WAIRE Points and would only need to submit an ISIR with limited information.¹⁵ See Figure 8 for details on ISIR applicability for warehouse operators.

¹ Due within 30 calendar days of a written request by the Executive Officer.

Figure 8: Simplified Flow Chart for Warehouse Operators' ISIR Applicability

Example information required in the ISIR includes, but is not limited to the following:

- Total indoor square footage of the applicable warehouse and the amount of space that may be used for warehousing activities
- Truck trip data from the previous 12-month period and an estimate of the number of truck trips for their upcoming AWR
- Fleet information (owned and/or leased), including on-road trucks or tractors and yard trucks used at the facility
- Onsite charging or alternative fueling stations
- Onsite alternative energy generation or energy storage equipment
- Anticipated actions and/or investments the warehouse operator anticipates using to comply with the WAIRE Points Compliance Obligation (WPCO)

As shown in Table 2, all warehouse operators must have already submitted at least one ISIR.¹⁶ Table 3 lists the total number of ISIRs received by South Coast AQMD as of August 31, 2025. About 754 ISIRs have been received since the previous Annual Report.

¹⁵ As an example, if an operator is in a warehouse building greater than 100,000 square feet, but less than 100,000 square feet of that building can be used for warehousing activities (e.g., the remaining space is used for offices), then an ISIR that only includes limited information is required. See Rule 2305(b) and Rule 2305(e)(2)(A).

¹⁶ ISIRs are a one-time report that were required from all operators when the rule first was phased in. A one-time ISIR is also required in the future for any warehouse operator in their first year of operations at a warehouse.

Table 3: ISIRs Received by Phase

Submittal Date	Phase 1 (≥250,000 square feet)	Phase 2 (≥150,000 - <250,000 square feet)	Phase 3 (≥100,000 - <150,000 square feet)	Total
On or Before Due Date	296	360	663	1,319
After Due Date	671	405	189	1,265
Total	967	765	852	2,584
Estimated Minimum Number of ISIRs Expected ¹	1,645	1,579	2,080	5,304

¹ Further detail can be found in Appendix G.

See Appendix A for a comparison of ISIRs received and the potential universe subject to Rule 2305 by phase, including the additional buildings identified in the WONs.

Out of 2,584 ISIRs received, 633 ISIRs were submitted with limited information as allowed by Rule 2305(e)(2)(A)(i) and (ii) or were otherwise exempt from Rule 2305. An ISIR with limited information includes basic information about the warehouse (i.e., warehouse size and the square footage that may be used for warehousing activities) and contact information. These operators are not required to earn WAIRE Points or submit AWRs.

The ISIR is intended to be a planning exercise to assist the warehouse operators and South Coast AQMD in identifying the anticipated mechanisms that will be used for compliance. ISIRs are also a primary means for South Coast AQMD to collect basic information about regulated entities. Figure 9 provides an overview of the anticipated WAIRE Menu actions and mitigation fee points identified by the 1,951 ISIRs submitted by warehouse operators that would need to earn WAIRE Points.¹⁷ These reports show that a total of 636,899 WAIRE Points were anticipated to be earned by these warehouse operators in their first year of implementation. The anticipated aggregate WPCO for ISIRs received is approximately 104,262 Points. Operators that completed an ISIR anticipated they would earn about six times the required WPCO, indicating that compliance with Rule 2305 was anticipated to be feasible among these warehouse operators.

A complete list of the anticipated WAIRE Points to be earned by each WAIRE Menu action is provided in Appendix A. In addition to expecting to take actions from the WAIRE Menu, operators anticipated earning about 4% of all WAIRE Points through payment of mitigation fees, totaling about \$28.3 million.

¹⁷ This excludes ISIRs with limited reporting requirements, as those ISIRs are not required to earn WAIRE Points. Subject to final auditing by South Coast AQMD.

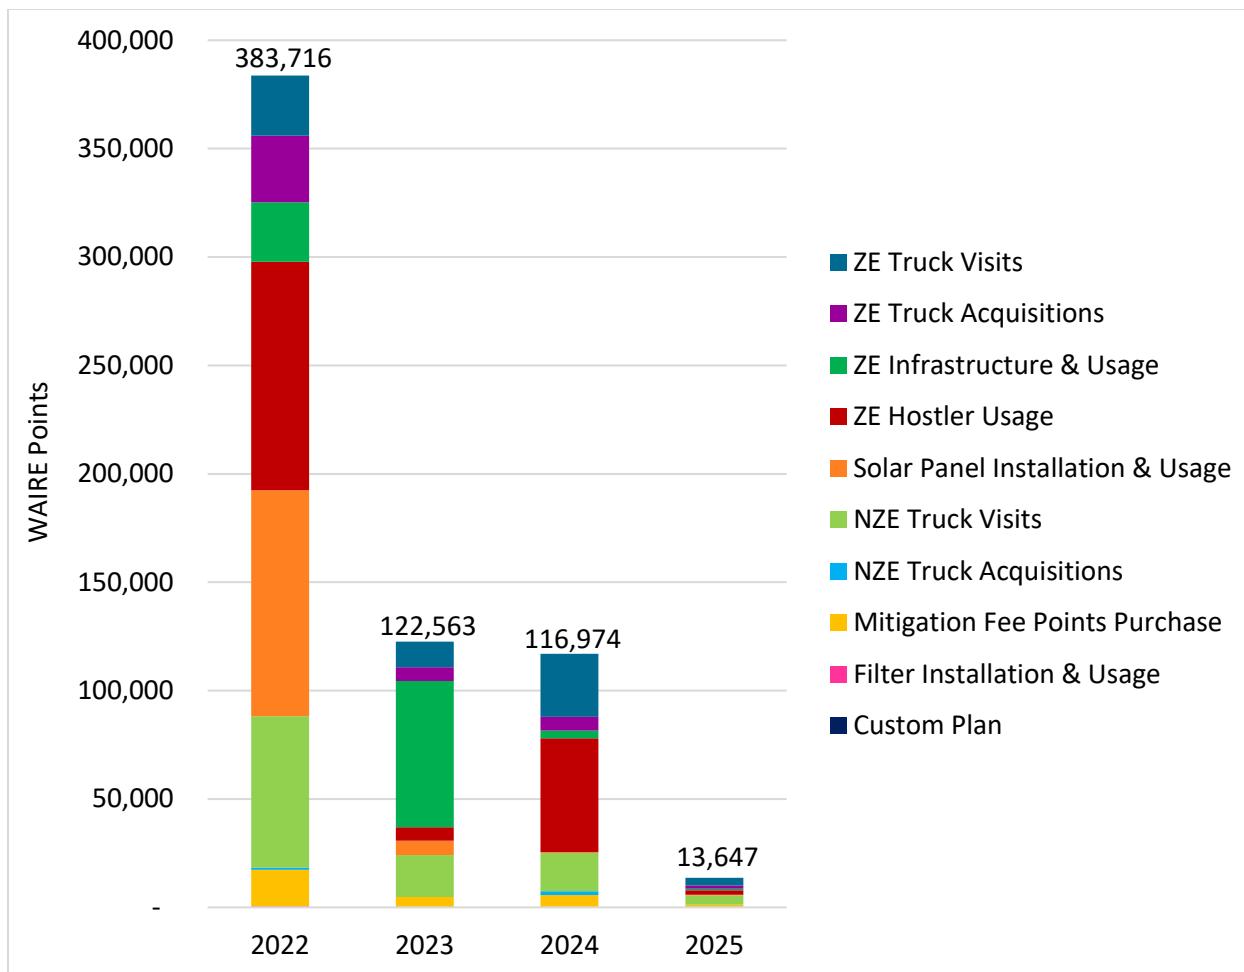

Figure 9: Total Anticipated WAIRE Points and WAIRE Menu Actions as Identified in Initial Site Information Reports

Annual WAIRE Report (AWR)

Warehouse operators fully applicable to the WAIRE Program must submit AWRs. AWRs may also be submitted by a warehouse facility owner if they chose to voluntarily earn WAIRE Points at an applicable warehouse location.¹⁸ AWRs must be submitted by January 31 following the compliance period when the WAIRE Points were earned. If a warehouse operator vacates a warehouse before the AWR due date in any compliance period, they must submit an AWR no later than the date they vacate the warehouse. Figure 10 details the circumstances in which a warehouse operator must submit an AWR.

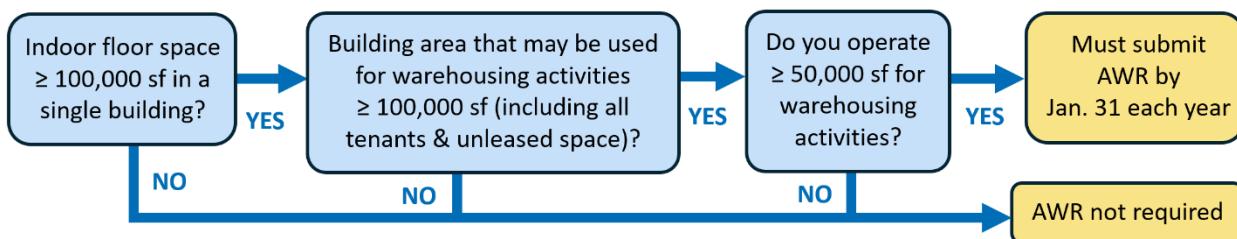

Figure 10: Simplified Flow Chart for Warehouse Operators' AWR Applicability

Key information in each AWR includes the following:

- The number of truck trips entering/exiting the warehouse site for the compliance period, including the number of truck trips based on the truck weight classification grouping (Class 2b-7 and Class 8).
- Details showing how WAIRE Points were earned to satisfy the WPCO including:
 - Each WAIRE Menu action
 - Actions in an approved Custom WAIRE Plan (CWP)
 - WAIRE Points transferred from another site or banked from a previous year
 - Mitigation fees (see "WAIRE Mitigation Program" for more details)

Warehouse operators in Phase 1 were required to submit their first AWR by March 2, 2023. Phase 2 operators were required to submit their first AWR by January 31, 2024. Phase 3 operators were required to submit their first AWR by February 14, 2025.

Rule 2305 establishes a phased implementation schedule for the WPCO, which is reported through the AWR. The phase-in continues through January 31, 2027. As shown in Figure 11, the WAIRE Program is currently in the fourth year of a five-year phased implementation schedule for the AWRs. Once a warehouse operator begins submitting AWRs, they are required to submit a new AWR every year until Rule 2305 sunsets.

¹⁸ Pursuant to Rule 2305(d)(6)(C), warehouse facility owners may transfer earned WAIRE Points to a warehouse operator at the warehouse facility at which the WAIRE Points were earned.

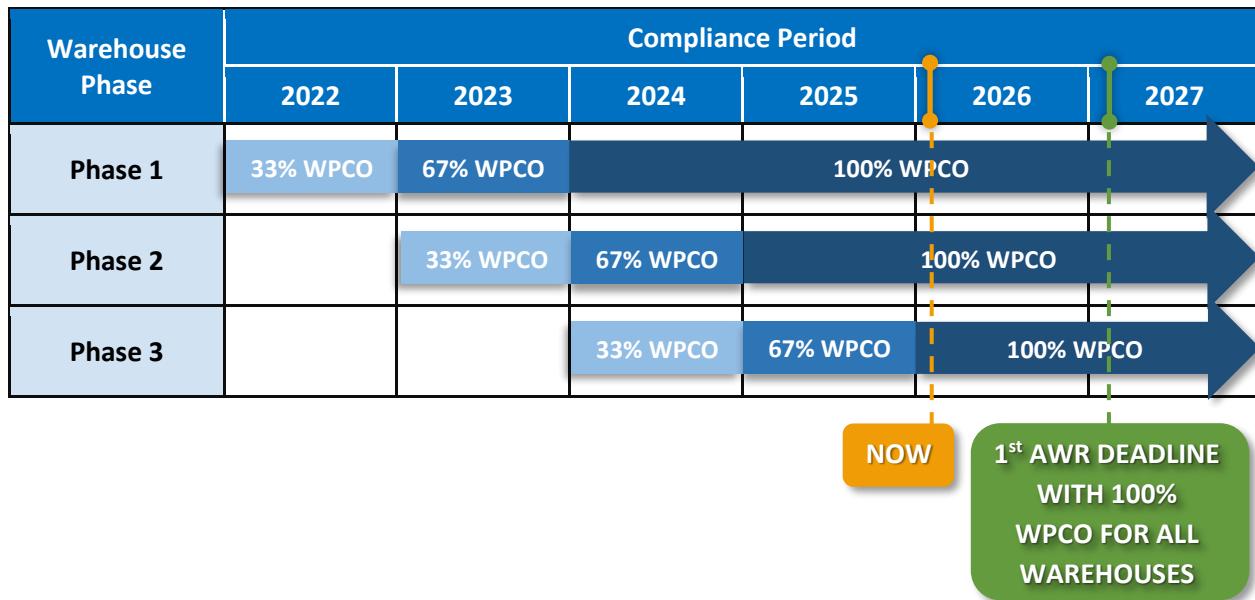

Figure 11: WAIRE Points Compliance Obligation Phase-In Schedule

Table 4 shows the number of AWRs received by South Coast AQMD by phase and compliance period as of August 31, 2025, as well as the estimated number of AWRs that are expected based on the potential universe. Since the last Annual Report, the number of AWRs that have been submitted late for compliance periods 2022 and 2023 has increased by 52 and 122, respectively. More details on the reporting rates are included in Appendix B.

Table 4: AWRs Received by Phase and Compliance Period

Phase	Compliance Period			Total
	2022	2023	2024	
Phase 1	664	656	635	1,955
Phase 2	-	410	421	831
Phase 3	-	-	345	345
Total	664	1,066	1,401	3,131
Estimated Number of AWRs Expected ¹	1,627	3,158	4,044	8,829

¹ Further details can be found in Appendix G. This table reflects the latest potential operators for the WAIRE Program, based on the best available data from CoStar, site visits, and facility-submitted data at the time of annual report preparation. These values are expected to change over time due to normal fluctuations in the warehousing industry, including changes in facility operations, ownership, leasing activity, and building use. Accordingly, potential operators should be considered a dynamic estimate rather than a static count.

The staff report analysis for Rule 2305 anticipated that the total WPCO, representing the total number of WAIRE Points the warehouse operators would be required to earn to offset warehouse activities, across all warehouse operators during the first three compliance periods would be 1,004,808.

The reported WPCO is based on the total annual truck trips reported in 3,131 AWRs by 1,585 warehouse operators. During the program's first three compliance periods, these warehouse operators reported a total WPCO of approximately 378,517 WAIRE Points, which is significantly less than the total WPCO anticipated in the staff analysis.

During the program's first three compliance periods, the warehouse operators who submitted AWRs reported earning a total of approximately 1,180,685 WAIRE Points across all compliance options, which is three times more than the total reported WPCO.¹⁹

Total WAIRE Points earned to date are about 17% higher than was estimated to be earned at the time of rule adoption.

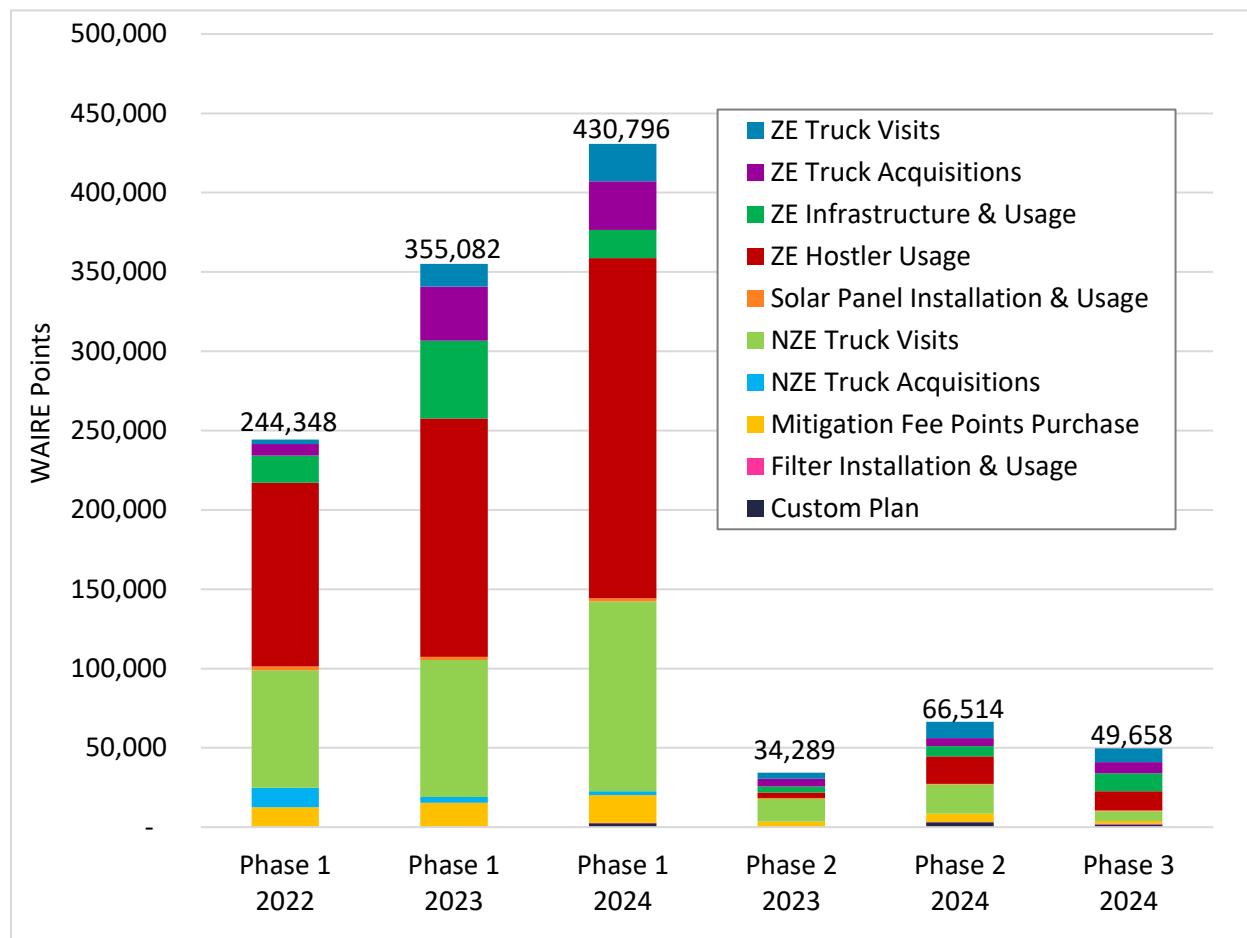

Figure 12: Total WAIRE Points Earned by Phase and Compliance Period by Warehouse Operators Who Submitted an AWR

¹⁹ This figure does not account for WAIRE Points reported in Early Action AWRs. Details on these reports can be found in Appendix C. WAIRE Points earned in excess of the warehouse operator's WPCO in one compliance period may be banked for use in any of the next three compliance periods, after which they expire. Excess WAIRE Points earned for one warehouse may also be transferred to another of that operator's warehouses during that compliance period.

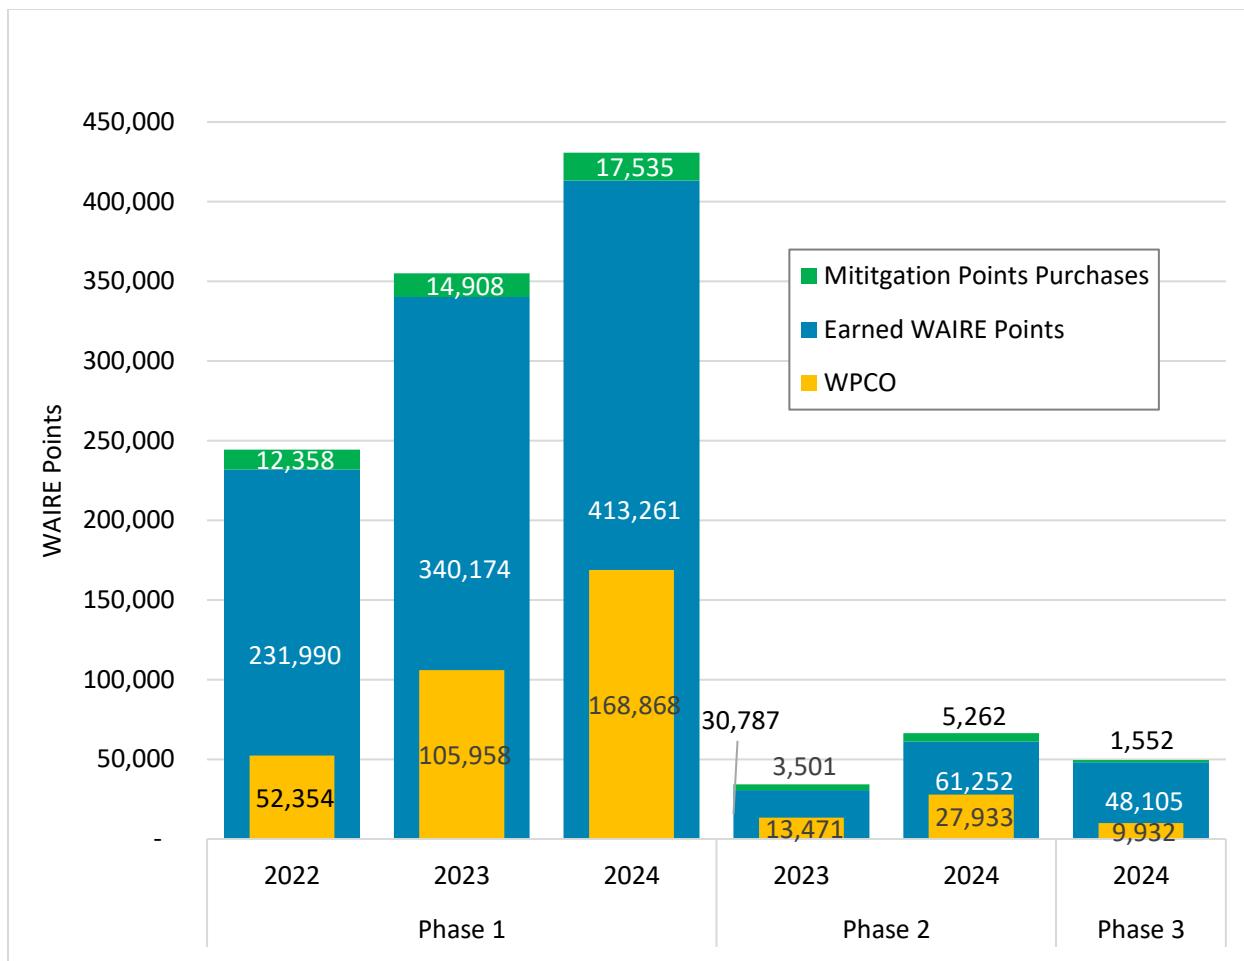

Figure 13: WPCO, Earned WAIRE Points, and Mitigation Fee Points by Phase and Compliance Period for Operators Who Submitted an AWR

Figure 12 provides an overview of the WAIRE Menu actions and Mitigation Fee Points selected by warehouse operators who submitted the AWRs. For AWRs, ZE hostler usage (i.e., yard tractors that move trailers and containers around warehouse facilities) accounts for about 43% of the reported total WAIRE Points earned across all compliance periods. Additional major categories were NZE Truck Visits (~27%), ZE Infrastructure & Usage (~9%), and ZE Truck Acquisitions (~8%).²⁰ A complete list of all the WAIRE Points by category are provided in Appendix B. Figure 13 shows a comparison of the total WPCO compared to the total number of earned WAIRE Points and Mitigation Fee Points broken down by Phase and Compliance Period.

²⁰ Subject to final auditing by South Coast AQMD.

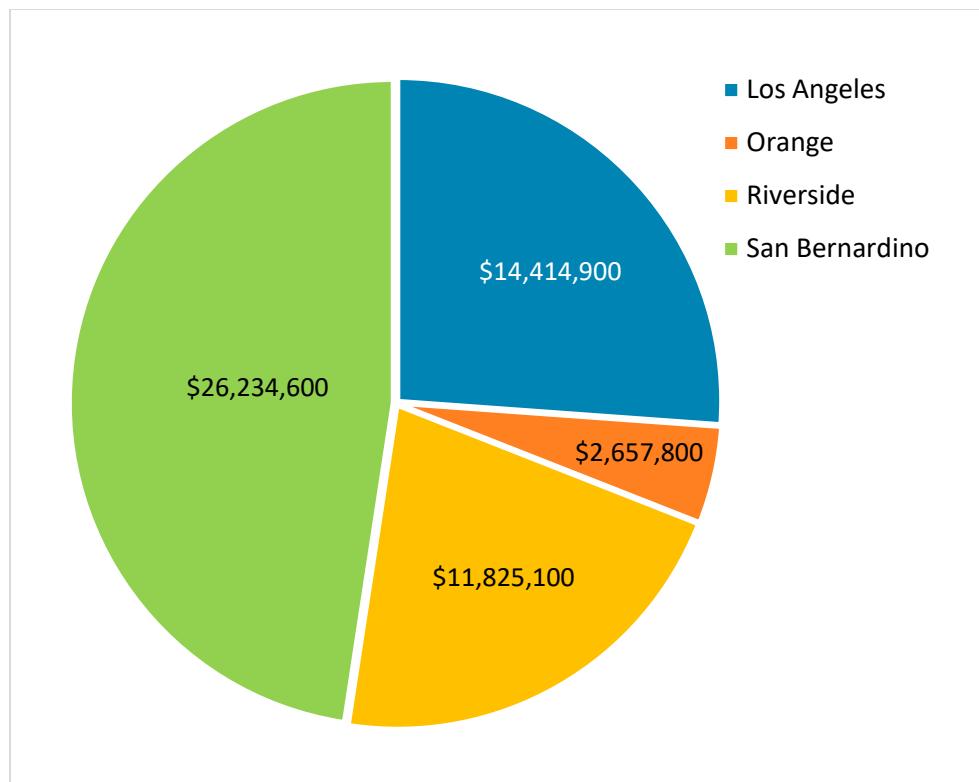

Figure 14: Mitigation Fee Points Purchased in the 2022-2024 Compliance Periods

In lieu of earning points from the WAIRE Menu or through CWP_s, warehouse operators can choose to earn WAIRE Points by paying a mitigation fee of \$1,000 per WAIRE Point. Mitigation fees paid by warehouse operators in each county are shown in Figure 14. Warehouse operators reported approximately \$55.1 million in mitigation fees, which accounts for approximately 5% of the total WAIRE Points earned through the AWR_s over the first three compliance periods.²¹

²¹ Pursuant to Rule 316, there is also a 6.25% administrative fee associated with the mitigation fee. This results in an additional \$3.3 million in fees that South Coast AQMD will use to administer the WAIRE Mitigation Program.

WAIRE Mitigation Program

In the Governing Board Resolution adopting Rule 2305, staff were directed to develop a WAIRE Mitigation Program with the funds generated from mitigation fee payments from Rules 2305 and 316.²² Rule 2305 may generate funds to the WAIRE Mitigation Program if a warehouse operator opts to offset their WPCO by purchasing mitigation fee points in their AWR submittal. Rule 316 generates revenue through administrative fees that warehouse operators must pay to support South Coast AQMD Rule 2305's compliance activities, including implementation of the WAIRE Mitigation Program.

As of August 31, 2025, a total of \$55,115,600 million in mitigation fees have been reported for all compliance periods. Of this amount, \$53,919,100 was fully paid. The \$55.1 million in mitigation fees reported include about \$11,670,200 from Phase 1 operators for the 2022 compliance period, \$18,370,700 from Phase 1 and 2 operators for the 2023 compliance period, and \$23,878,200 from all three phases for the 2024 compliance period.²³ Additional mitigation fees are expected to be reported for the 2025 compliance period. The stringency of Rule 2305 continues to increase for the first five years of the WAIRE Program, which in turn, increases the WPCO and amount of mitigation fees purchased.

Mitigation fees paid by warehouse operators are compiled and tracked according to the Source Receptor Area (SRA), as shown in Figure 15, and county in which they are located. The WAIRE Mitigation Program will fund projects that achieve and/or facilitate emissions reductions in the same SRAs and counties in which the mitigation fees were paid. If sufficient projects are not identified in each individual SRA relative to the available funding, funds may be directed either to an adjacent SRA in the same county or held for a subsequent funding cycle. More information will be made publicly available soon in an upcoming solicitation for projects.

²³ Total amount may vary after amendments are finalized and/or refunds are issued. Subject to final auditing by South Coast AQMD.

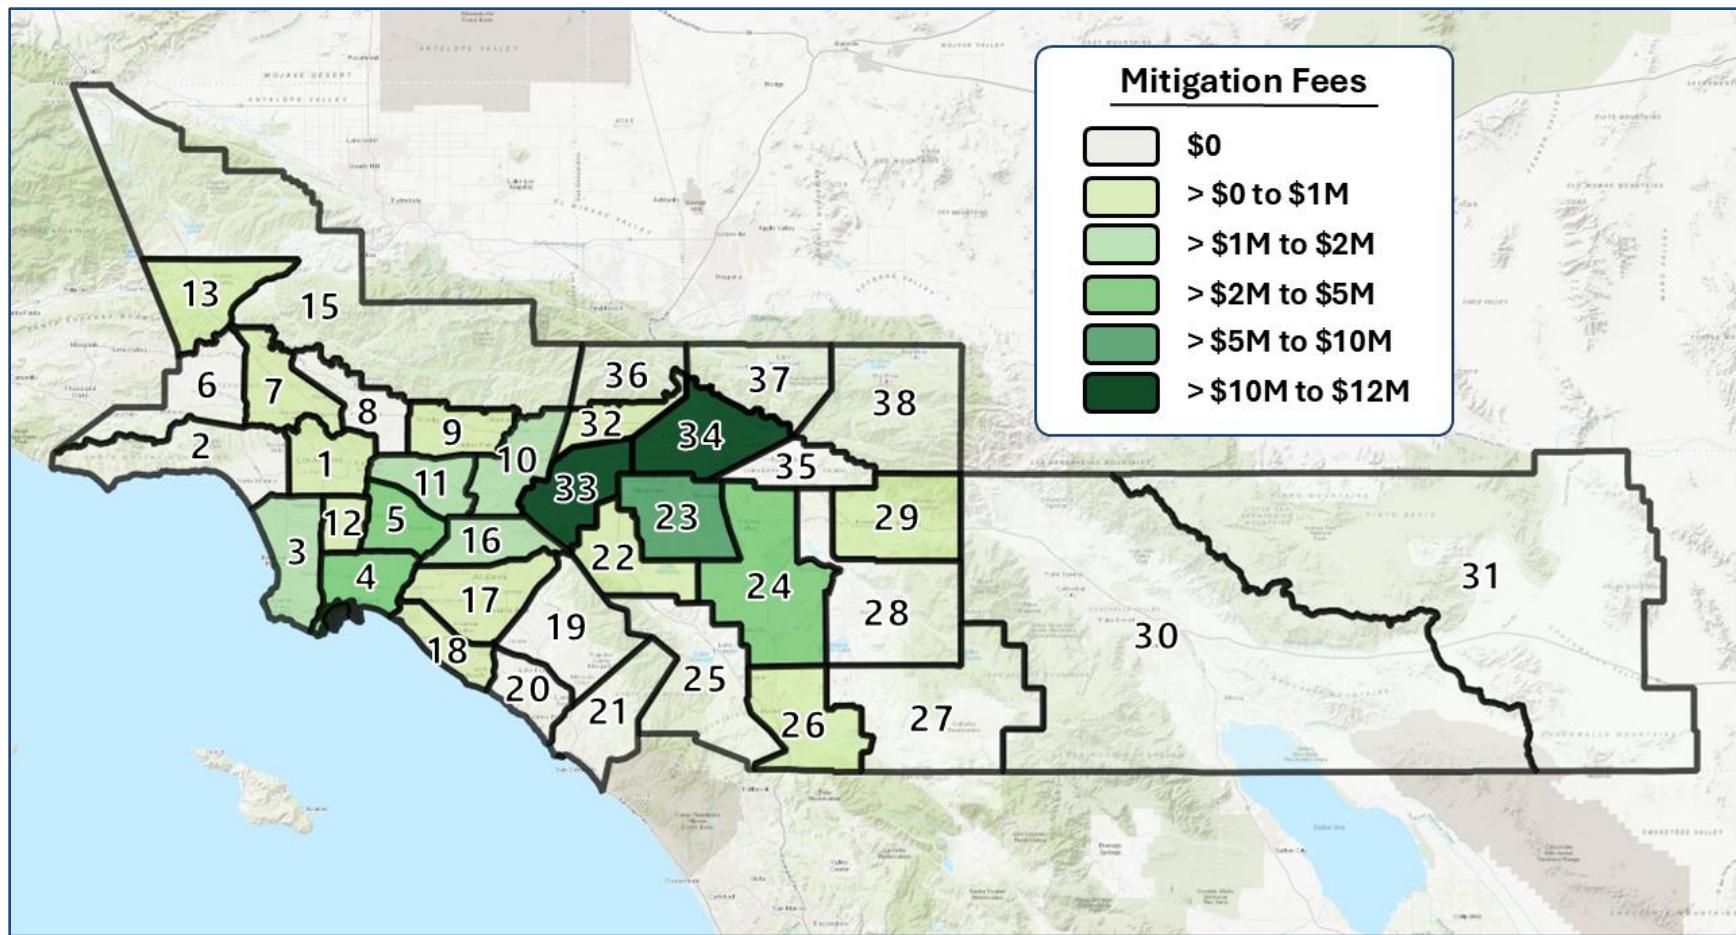

Figure 15: Total Mitigation Fees Collected by Source Receptor Area¹

¹ Mitigation fees by SRA through 4/18/2025.

Custom WAIRE Plans Applications

The WAIRE Program allows the submission of CWPs for innovative actions not listed in the WAIRE Menu. In 2023, staff evaluated eight CWP applications from eight facilities, ultimately approving three. The three approved plans were submitted by Maersk Warehousing & Distribution Services USA LLC (Maersk) and enable Maersk, in partnership with Prologis, to earn WAIRE Points for the construction and installation of 96 electric vehicle (EV) charging ports at an offsite yard (also known as the "Denker Yard") located in Torrance, CA. Figure 16 shows the EV charging ports installed at the Denker Yard and the ZE, battery-electric trucks operated by Maersk plugged into the charging stations. WAIRE Points continued to be earned from these CWP in 2024.

Figure 16: Class-8 EV Truck Charging at Denker Yard

In 2024, staff received, evaluated, and approved one CWP, submitted by United Airlines for their operations at their warehouse at LAX. This CWP allows United Airlines to earn WAIRE Points for the usage of three battery electric tow trucks and use of onsite ZE charging infrastructure. All of the approved CWP are available online at: <https://www.aqmd.gov/home/rules-compliance/compliance/waire-program/custom-waire-plans>.

Administrative Fees

Rule 316 establishes the administrative fees for Rule 2305 to recover the costs associated with implementation of the WAIRE Program. South Coast AQMD staff estimate, based on the potential warehouse universe and the number of reports estimated in Table 1, that the administrative fee revenues should include a total of approximately \$4.6 million for the submittal of WONs, ISIRs, and AWRs by the warehouse owners and operators since rule implementation.

Rule 316 was amended in May 2025 to introduce an Additional Post-Reporting Deadline Fee for WONs, ISIRs, and AWRs submitted after their deadline. This fee was adopted to recoup the cost of staff time required to process late reports. More information can be found in Table 1 of Rule 316(d).

As of August 31, 2025, South Coast AQMD has received approximately \$1.7 million in administrative fee revenue based on the Rule 316 fee schedule. The revenue collected is expected to increase as the reporting/compliance rates continue to improve. Please see Appendix D: Estimate of Filing Fees from WAIRE Program Reporting for additional details.

Emissions Reductions

The submitted AWRs document the actions and/or investments that were completed by warehouse operators to comply with the rule. The following actions completed by warehouse operators can be directly associated with emissions reduction: Solar Panel Usage, NZE Truck Visits, ZE Truck Visits, and ZE Hostler Usage. Other actions completed by warehouse operators can help to facilitate emissions reductions, such as: Hydrogen (H₂) Station Usage, Charger Usage, and transport refrigeration unit (TRU) Plug Usage. The methodology and data used to calculate the emissions reductions associated with the WAIRE Menu actions are described in detail in Rules 2305 & Rule 316 Final Staff Report.²⁴ The methodologies used to calculate emissions reductions here have been developed to ensure that there is no double counting with any existing federal, state, or local requirements.²⁵

Warehouse operators who select these action items are required to report key metrics associated with each action in their AWR. For example, a warehouse operator that has a solar panel system installed on its roof can report the solar system usage and the annual amount of solar energy that it generated in kilowatt-hours (kWh).

Table 5 includes the detailed accounting of key metrics for actions that can be directly associated with emissions reductions (for a complete list of the reported metrics see Table A-2). Based on the

²⁴ Rule 2305 Governing Board package and Final Staff Report, <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf>

²⁵ Methods used to calculate emission reductions here are the same as were used during rulemaking in 2021. As an example, baseline on-road emission rates before accounting for any reductions from Rule 2305 are assumed to already include emission reductions from CARB's ACT, Omnibus, and Heavy-Duty Inspection and Maintenance rules as estimated in early 2021. Omnibus and HD I/M were adopted after Rule 2305 and were assumed to achieve greater reductions than the final adopted regulations. At the time of this writing, it is unclear what portions, if any, of these rules will receive full federal approval. Therefore, emission reduction estimates shown here are likely conservative and may be even higher.

AWRs and EAWRs received, the NOx and DPM emissions reductions from NZE/ZE Truck Visits, Solar Panel Usage and ZE Hostler Usage reached 1.47 and 0.035 tons per day (tpd) in 2024, respectively. At the time of rule adoption, staff estimated that the WAIRE Program would conservatively achieve between 1.5 to 3.0 tons per day of NOx reductions. The reported metrics²⁶ over the last four compliance periods show a strong adoption and implementation of actions that contribute to emissions reductions (Table 5 and Table 6). The reductions shown in Figure 17 and Figure 18 account for reductions from all ZE or NZE truck visits reported in AWRs. The reported metrics of using ZE charging or fueling infrastructure have also demonstrated strong adoption (Table 6).

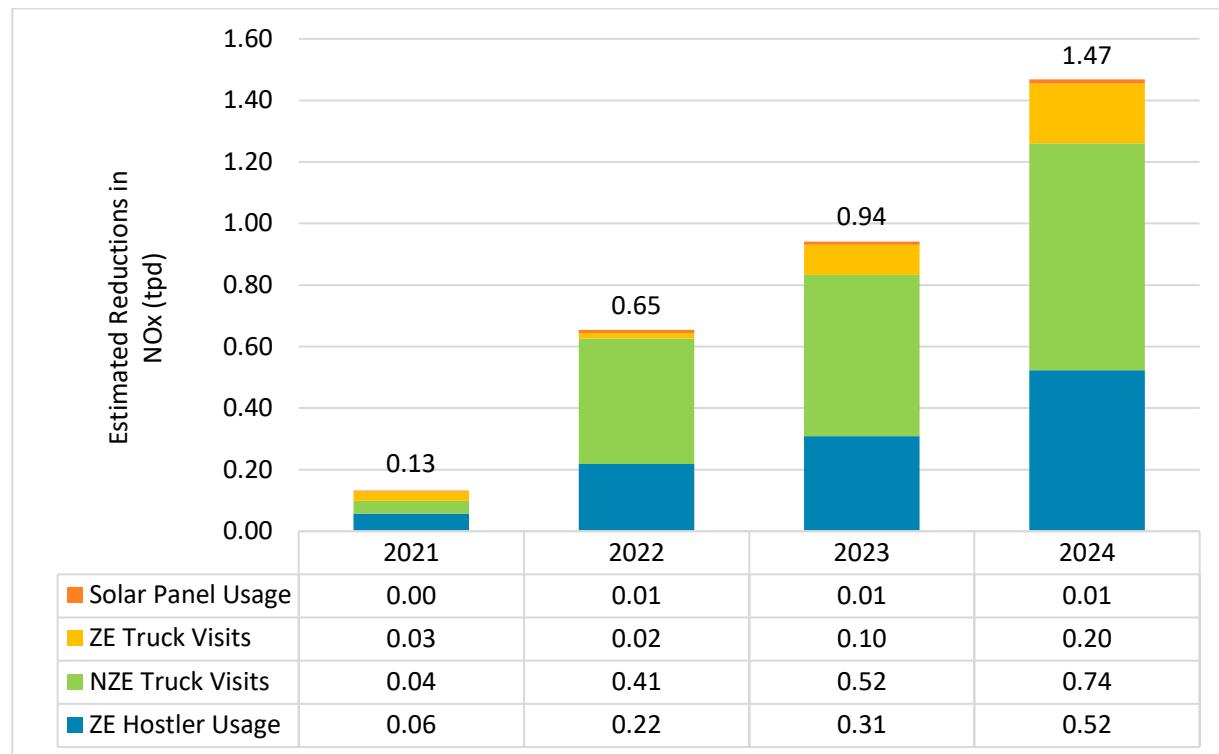

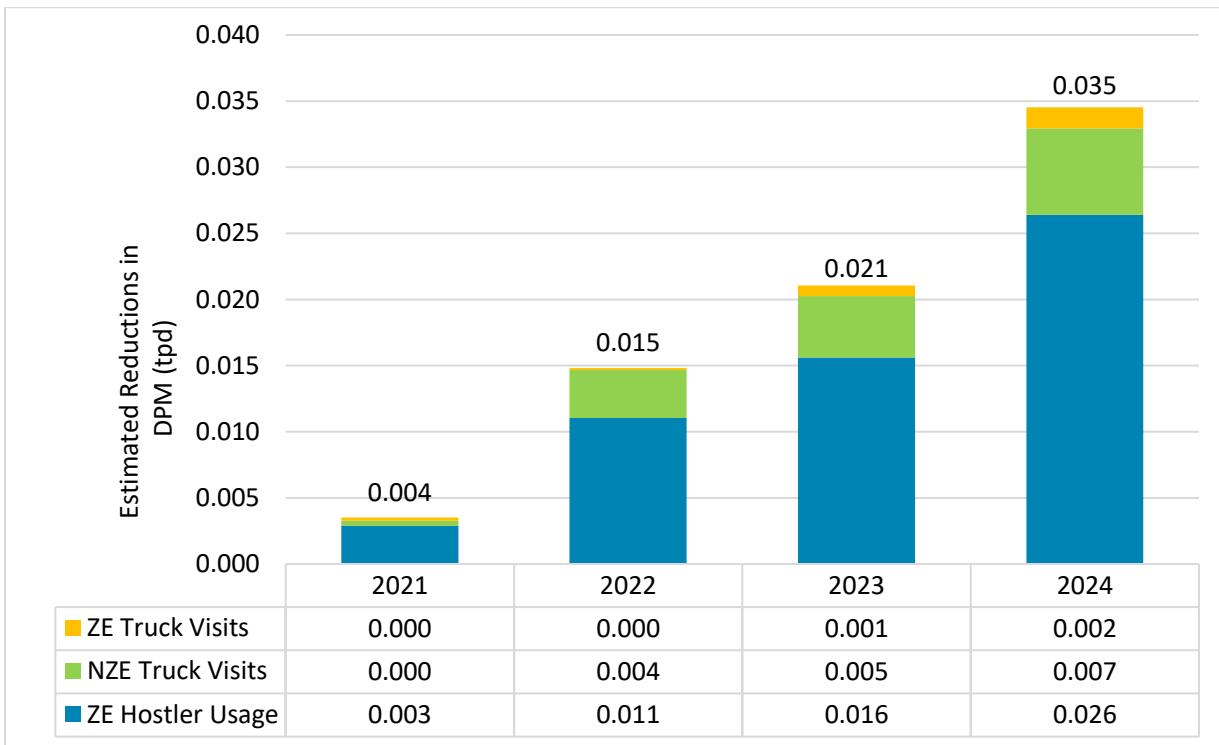

Table 5: Total Level of Activity as Reported by Warehouse Operators – Truck Visits and Usage

WAIRE Menu Item	Metric Reported	Total Reported Activity per Compliance Period			
		2021	2022	2023	2024
NZE Class 4-7 Truck Visits	Visits	1	104,877	213,234	326,665
NZE Class 8 Truck Visits	Visits	69,551	653,575	827,370	1,158,830
Solar Panel Usage	kWh	24,476,129	95,011,534	89,583,347	106,142,342
ZE Class 2b-3 Truck Visits	Visits	-	19,961	113,205	223,903
ZE Class 4-7 Truck Visits	Visits	82	6,818	16,931	35,934
ZE Class 8 Truck Visits	Visits	44,521	22,015	128,357	258,273
ZE Hostler Usage	Hours of Use	105,736	404,667	572,817	968,788

Table 6: Total Level of Activity as Reported by Warehouse Operators – Zero Emission Charging/Fueling Usage

WAIRE Menu Item	Metric Reported	Total Reported Activity per Compliance Period			
		2021	2022	2023	2024
Charger Usage	kWh	872,411	5,232,571	16,598,090	22,959,374
H ₂ Station Usage	Kg H ₂	-	10,630	116,949	8,574
TRU Plug Usage	kWh	-	16,583	1,644,106	3,234,750

²⁶ This information was reported by warehouse operators and may be subject to final auditing by South Coast AQMD.

**Figure 17: NOx Emissions Reductions from Reported Actions (tpd)****Figure 18: DPM Emissions Reductions from Reported Actions (tpd)**

Key Recent Developments Related to Rule 2305

There have been some key developments related to Rule 2305 since the last annual report which include:

- California Air Resources Board's (CARB's) withdrawal of its waiver and authorization request for the Advanced Clean Fleets (ACF) Regulation
- The U.S. House of Representatives' passage of resolutions disapproving the U.S. EPA's waivers and authorization requests for CARB's Advanced Clean Trucks (ACT), Heavy-Duty Engine and Vehicle Omnibus Regulation, and Advanced Clean Cars II (ACC II) regulations

Federal Waiver Actions

Under the Clean Air Act (CAA) Section 209(b), CARB must obtain a waiver of federal preemption from the U.S. EPA to enforce emissions standards for new motor vehicles or engines that are more stringent than federal standards. On January 13, 2025, CARB withdrew its waiver and authorization request for the drayage and high priority fleets portion of the Advanced Clean Fleets regulation.^{27,28} In September 2025 CARB subsequently voted to rescind those portions of ACF.²⁹ However, the state and local government fleet portion of ACF is still being enforced by CARB as fleets owned by state or local government entities remain subject to state regulation even without a federal waiver.

Further, Congress passed (and the president signed) resolutions disapproving the U.S. EPA's waiver and authorization decisions for CARB's ACT, ACCII, and CARB's Heavy-Duty Engine and Vehicle Omnibus Regulation, respectively.³⁰ CARB has initiated litigation against the federal government in response to these actions. There are also several pending lawsuits against CARB on these rules in state and federal court. The result and timeline for court decisions on each of these cases is uncertain.³¹ During this period of uncertainty, CARB has issued guidance indicating that they will continue to certify vehicles consistent with these regulations.³² As of this writing, CARB is also pursuing emergency regulations to ensure certification programs remain in effect regardless of litigation outcomes.

Rule 2305 explicitly points to a provision of ACT to define ZE trucks, and to a provision in the Omnibus rule to define NZE trucks. Despite the recent federal and state actions and ongoing litigation, the definitions in these CARB rules remain in place, and there have been no resulting changes to ZE and NZE definitions in Rule 2305. Further, the WAIRE Program is a local program

that does not require federal approval³³ and continues to provide a reliable and enforceable mechanism for achieving near-term air quality and public health benefits in communities most affected by warehousing operations.

WAIRE Program Enforcement

A key component of WAIRE Program implementation is ensuring that applicable warehouses are aware of and in compliance with the requirements of Rule 2305 and Rule 316. South Coast AQMD staff conducted significant outreach to notify the warehousing industry of compliance requirements for the WAIRE Program. The WAIRE Implementation Guidelines³⁴ provide an initial overview of the compliance program anticipated at the time of rule adoption. South Coast AQMD periodically conducted both desk and field audits to verify compliance with the WAIRE Program. An overview of the main requirements for Rule 2305 was provided in the WAIRE Program Reporting Overview section of this report.

Throughout rule development and in the WAIRE Program's implementation, South Coast AQMD conducted significant outreach to identify warehouses that are subject to the rule. The outreach efforts have included, but are not limited to, field visits, mailing hardcopy fliers about the program, hosting webinars, participating in stakeholder webinars, developing online WAIRE Training Videos, presenting requested topics to stakeholders, sending informational emails through eNewsletter Pro, providing information about the WAIRE Program to local governments, and fielding calls and emails to the WAIRE Program Hotline (909-396-3140) and Helpdesk (waire-program@aqmd.gov). For detailed information on the outreach efforts conducted, please refer to the WAIRE Program Outreach & Implementation Efforts section of this report.

As of August 31, 2025, South Coast AQMD inspectors have performed 5,571 warehouse location site visits to provide outreach materials. Additionally, facilities were identified that submitted required reports late or failed to submit them, and South Coast AQMD therefore issued 702 Notices of Violation (NOVs). Following the issuance of these NOVs, 706 reports (256 ISIRs and 450 AWRs) have been completed by 380 facilities. In these AWRs, operators reported about 98,376 WAIRE Points earned and \$103,542 worth of Mitigation Points purchased.

170 of these NOVs have been resolved as of August 31, 2025, resulting in a total of \$1,578,951 in penalties.³⁵ Settlement funds are generally paid into the South Coast AQMD general fund and allocated through standard budget processes. Consistent with Health and Safety Code section 40522.7 (enacted in 2024), for any penalties received after January 1, 2025, South Coast AQMD will establish a process for receiving community input prior to spending any of these funds.³⁶ Staff anticipates conducting a first round of outreach on these penalty funds in the first half of 2026.

³³ While federal approval is not needed, South Coast AQMD submitted Rule 2305 to U.S EPA through CARB for approval into the State Implementation Plan. EPA approved Rule 2305 into the SIP in September 2024 (89 FR 73568).

³⁴ <https://www.aqmd.gov/docs/default-source/planning/fbmsm-docs/waire-implementation-guidelines.pdf>

³⁵ NOVs are settled on a case-by-case basis, considering the facts of each individual violation.

³⁶ Penalties totaled \$787,751 from Jan. 1 through Aug. 31 of 2025.

South Coast AQMD staff continues to conduct desk audits of the reported information in AWRs and WONs to verify reported information and ensure that the warehouse facility owners and operators are following recordkeeping requirements.³⁷ Audits will also be conducted to verify exemptions claimed through report submittals, and that AWRs filed late accurately report their actions.

Consistent with South Coast AQMD's standard practice in the field, inspectors may conduct unannounced site visits to evaluate facility compliance and to verify WAIRE Menu items implemented through the WAIRE Program. If noncompliance with air quality rules is identified, an NOV may be issued to inform a business that it is out of compliance with specific South Coast AQMD rule requirements or permit conditions. NOVs are referred to the South Coast AQMD Office of General Counsel for settlement negotiations and can result in civil penalties. If no settlement is reached, a civil lawsuit may ultimately be filed in superior court.³⁸

WAIRE Program Outreach & Implementation Efforts

As part of the adopting Resolution for Rule 2305 and Rule 316, the South Coast AQMD Governing Board directed South Coast AQMD staff to conduct outreach to applicable warehouse facility owners and operators to provide training and guidance on how to comply with Rule 2305 with emphasis on warehouse operators that are small businesses. The WAIRE Program Hotline (909-396-3140) and Helpdesk email inbox (waire-program@aqmd.gov) were established to directly assist regulated entities with WAIRE Program questions and information about the WAIRE Program, especially regarding rule applicability and reporting requirements. The hotline and email address were also used to provide outreach, compliance assistance, and schedule individual facility consultations. Since rule adoption, South Coast AQMD has responded to over 18,200 calls and emails to the WAIRE Program Hotline and Helpdesk.

Staff developed guidance resources to assist warehouse facility owners and operators in submitting the reports as required by Rule 2305, and to provide information to the public about rule compliance options. As part of the outreach plan, South Coast AQMD staff set up the Rule 2305 WAIRE Program Compliance Website (www.aqmd.gov/waire), which went live in June 2021. There have been over 104,300 visits to the website since then. This website was designed to provide a central hub for all web-based resources to assist warehouse facility owners and operators subject to the rule requirements by providing online access to compliance guidance documents and program resources such as the:

- WAIRE Implementation Guidelines
- WAIRE Training Videos
- Custom WAIRE Plans

³⁷ Rule 2305 requires that all records used to demonstrate compliance with all reporting requirements shall be maintained by warehouse operators (or owners if applicable) for a period of no less than seven years and made available to South Coast AQMD upon request during normal business hours to determine compliance.

³⁸ More information can be found on the South Coast AQMD website:

<https://www.aqmd.gov/nav/about/authority/enforcement>.

- Compliance and Enforcement Activity
- Frequently Asked Questions (FAQs) document
- WAIRE User Calculator
- WAIRE upcoming compliance due dates

In addition to public virtual outreach efforts, over 21,875 compliance advisory mailers have been sent to all warehouse facility owners and operators that may be potentially subject to Rule 2305. South Coast AQMD has also sent over 117,000 informational emails about WAIRE Program resources, conducted over 150 in person and virtual webinar presentations to warehouse facility owners/operators, elected/appointed officials, community/environmental organizations, consultants, Assembly Bill 617 (AB 617) Community Steering Committees (CSCs)³⁹, various trade associations, and chambers of commerce. WAIRE Training Videos have also been viewed more than 7,700 times since 2021.

Next Steps

The first four years of implementation for the WAIRE Program were primarily focused on program development, outreach, and providing technical support and compliance assistance for warehouse facility owners and operators subject to Rule 2305. Development of the WAIRE POP reporting system continues to be a significant undertaking to design, program, test, and deliver a user-friendly and robust software reporting tool for warehouse facility owners and operators subject to Rule 2305. South Coast AQMD staff has developed implementation guidelines and compliance assistance resources and materials to provide technical support for the warehouse owners and operators of the approximately 5,304 warehouse operations that are potentially subject to Rule 2305. Staff will continue to reach out to entities that are potentially subject to Rule 2305 and will continue pursuing compliance and enforcement action as necessary for non-reporting warehouses. In addition, in the next year staff will provide two new sources of information for general public use regarding the WAIRE Program. This includes making some warehouse information available on the South Coast AQMD FIND website and providing case studies of actions taken by warehouses on the WAIRE Program website.

Additionally, in accordance with Governing Board Resolution No. 21-9, included in the [Rule 2305 and Rule 316 Governing Board Package](#), staff will conduct an evaluation of the state of technology and the WAIRE Menu every five years following the adoption of Rule 2305.⁴⁰ The first evaluation is scheduled for 2026, and the findings, along with any recommendations for updates to the WAIRE Menu, will be presented to the Mobile Source Committee.

The ongoing implementation of the WAIRE Program will continue to deliver measurable emission reductions by speeding up the adoption of cleaner trucks, battery-electric yard equipment, on-site charging, infrastructure upgrades, and cleaner last-mile delivery practices. These actions help

³⁹ For additional information regarding the Rule 2305's applicability to AB 617, please refer to Appendix E in this report.

⁴⁰ <https://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf>

ensure that investments within the goods-movement sector directly reduce air pollution in disadvantaged communities and advance a cleaner, more sustainable freight system.

Appendix A: Initial Site Information Report (ISIR) WAIRE Menu Items Anticipated

Figure A-1 and Figure A-2 include information about the ISIRs including the number of reports received versus the potential universe of operators subject to Rule 2305 (Figure A-1) and a breakdown of the ISIRs received and potential number of operators by county (Figure A-2).

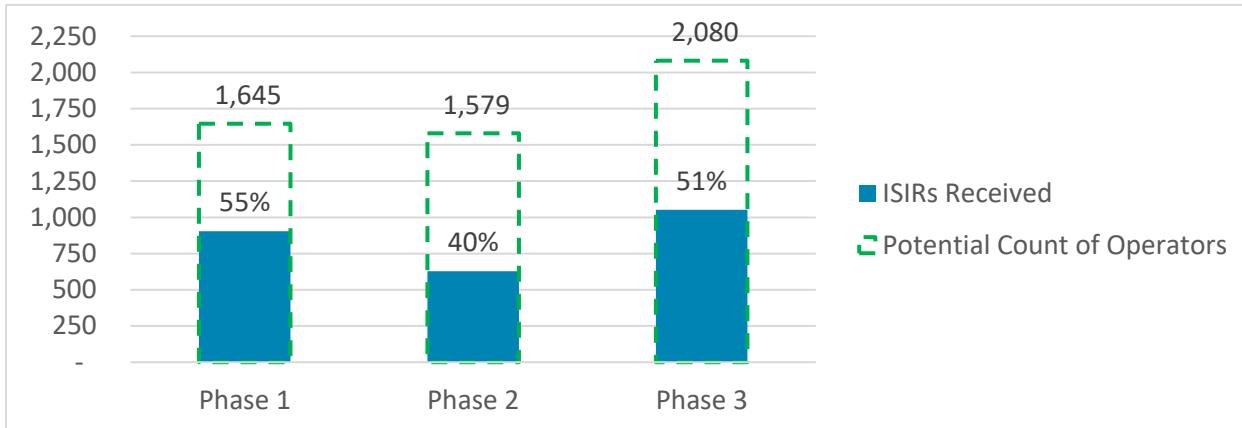

Figure A-1: Initial Site Information Reports Received and the Potential Operators Subject to Rule 2305 by Phase

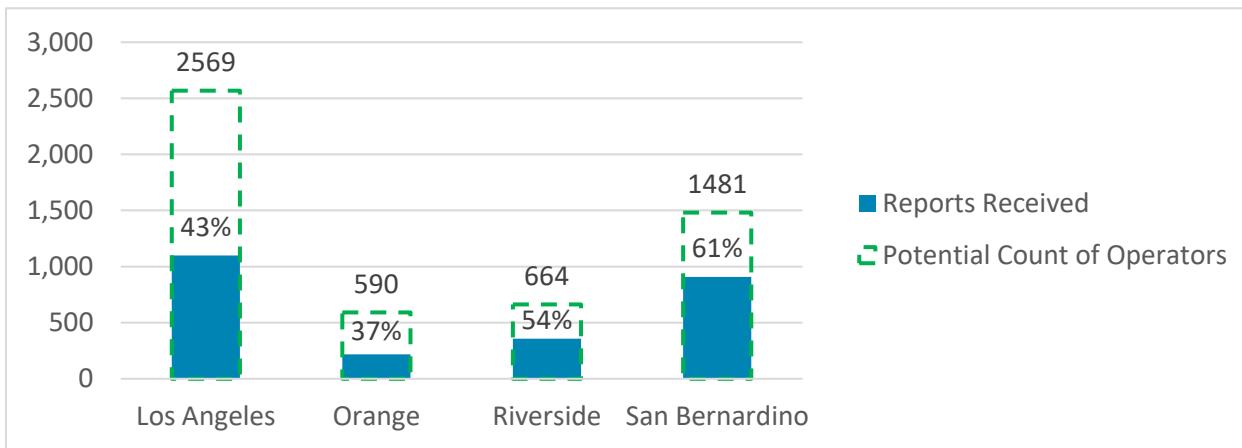

Figure A-2: Initial Site Information Reports Received and Potential Operators Subject to Rule 2305 by County

Table A-1 provides a complete list of the anticipated WAIRE Points to be earned by warehouse operators as reported in ISIRs received through August 2025. This table also includes the number of times, or occurrences⁴¹, a WAIRE menu action was selected in those ISIRs. Mitigation fee points are also listed in the table, although they are not part of Table 3 – WAIRE Menu in Rule 2305.

⁴¹ These occurrences may differ from menu option to menu option. For example, the number of occurrences that corresponds to “Finalize 19.2- 350 kW charger project” reflects the number of individual chargers, or EVSE, that were anticipated to complete final energization or permit sign off.

Table A-1: Anticipated WAIRE Menu Items as Reported in the ISIRs

WAIRE Menu Item Name	WAIRE Points	Occurrence ¹
ZE Truck Visits		
ZE Class 2b-3 Truck Visits	939	56 reports
ZE Class 4-7 Truck Visits	511	57 reports
ZE Class 8 Truck Visits	70,835	279 reports
ZE Truck Acquisitions		
ZE Class 2b-3 Truck Acquisitions	434	16 trucks
ZE Class 4-7 Truck Acquisitions	1,496	9 trucks
ZE Class 8 Truck Acquisitions	19,152	37 trucks
ZE Hostler Acquisitions	23,670	101 trucks
ZE Infrastructure & Usage		
150-350 kW EVSE Acquisition	5,900	50 chargers
19.2-50 kW EVSE Acquisition	1,092	42 chargers
51-149 kW EVSE Acquisition	969	19 chargers
Begin Construction on 19.2-350 kW charger project	738	82 projects
Begin Construction on TRU Plug project	3,185	16 projects
Begin Construction on up to 19.2 kW charger project	500	100 projects
Charger Usage	3,188	185 reports
Finalize 19.2-350 kW charger project	5,074	86 projects
Finalize TRU Plug project	3,605	5 projects
Finalize up to 19.2 kW charger project	815	163 projects

¹ Each 'occurrence' metric varies by action. 'Reports' indicates the number of ISIRs that included that action, however multiple actions may be in each report (e.g., multiple truck visits in each report).

Figure A-3 identifies the percentage of each WAIRE Menu action, including mitigation fee points, that were anticipated to be used for Rule 2305 compliance by operators who submitted ISIRs. As shown in this figure, a variety of WAIRE Menu actions were anticipated to be selected by warehouse operators to comply with the rule, and mitigation fee points represent a small percentage of the total WAIRE points that were anticipated for compliance.

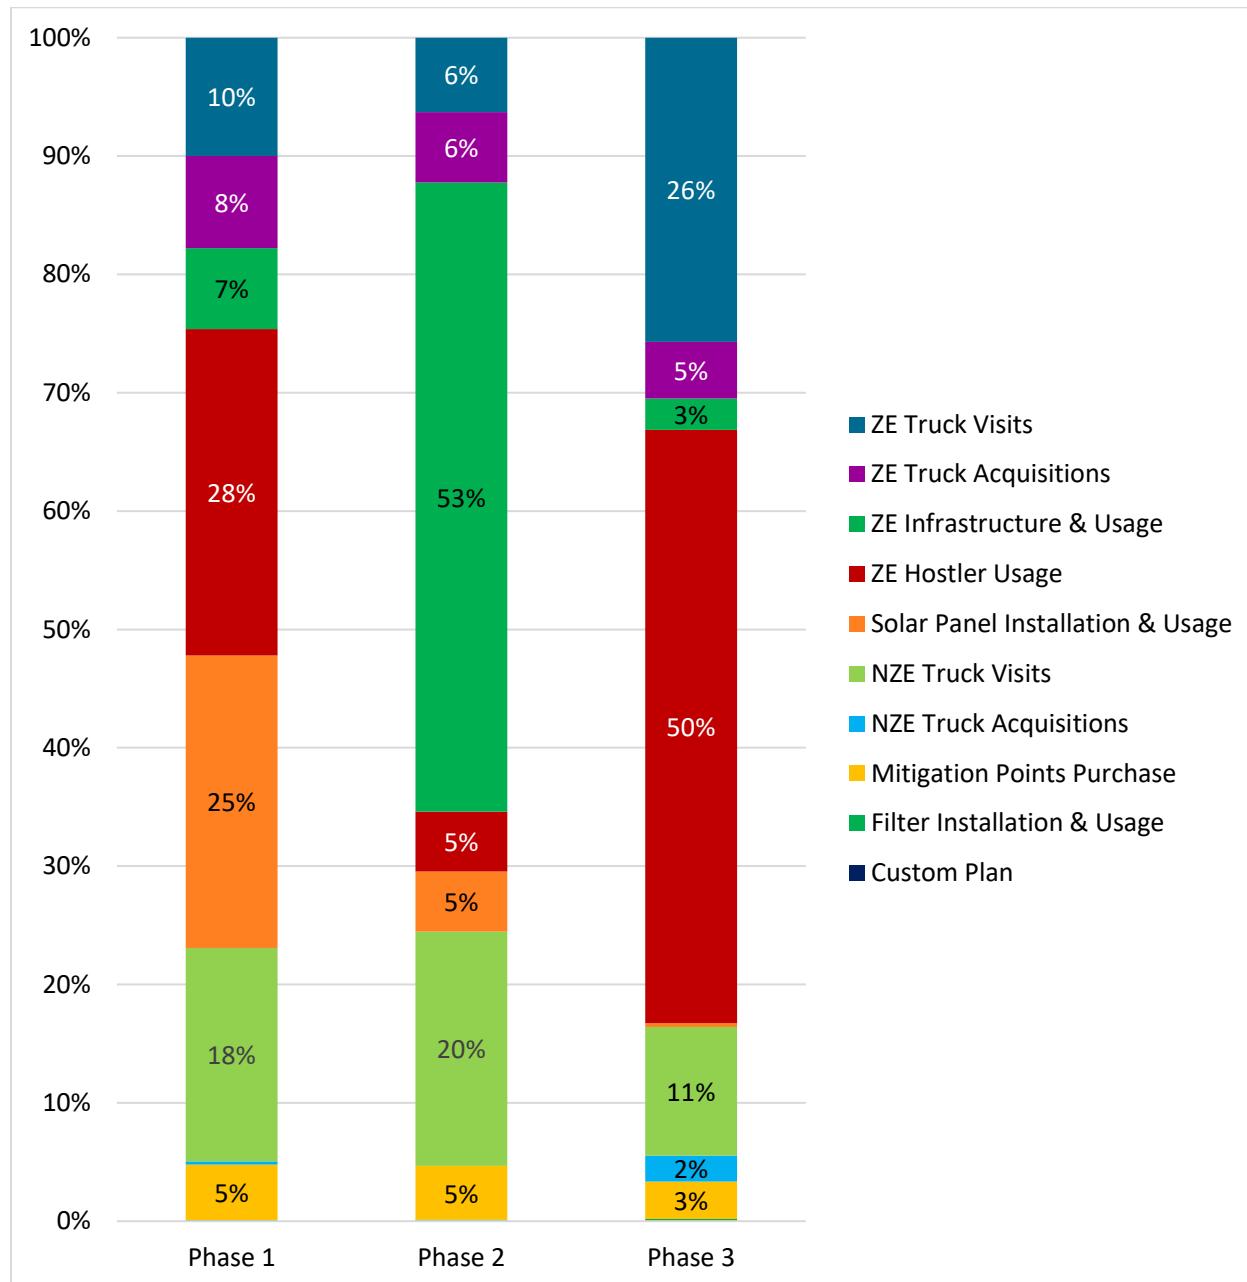

Figure A-3: Total Anticipated WAIRE Points Menu Items and Mitigation Fees (Normalized)

Appendix B: Annual WAIRE Report (AWR) WAIRE Menu Items Implemented

Figure A-4 identifies the number of AWRs that were received by compliance period. This figure also shows the potential universe of operators that are subject to AWR reporting. Additional details regarding the anticipated AWRs are included in Appendix G.

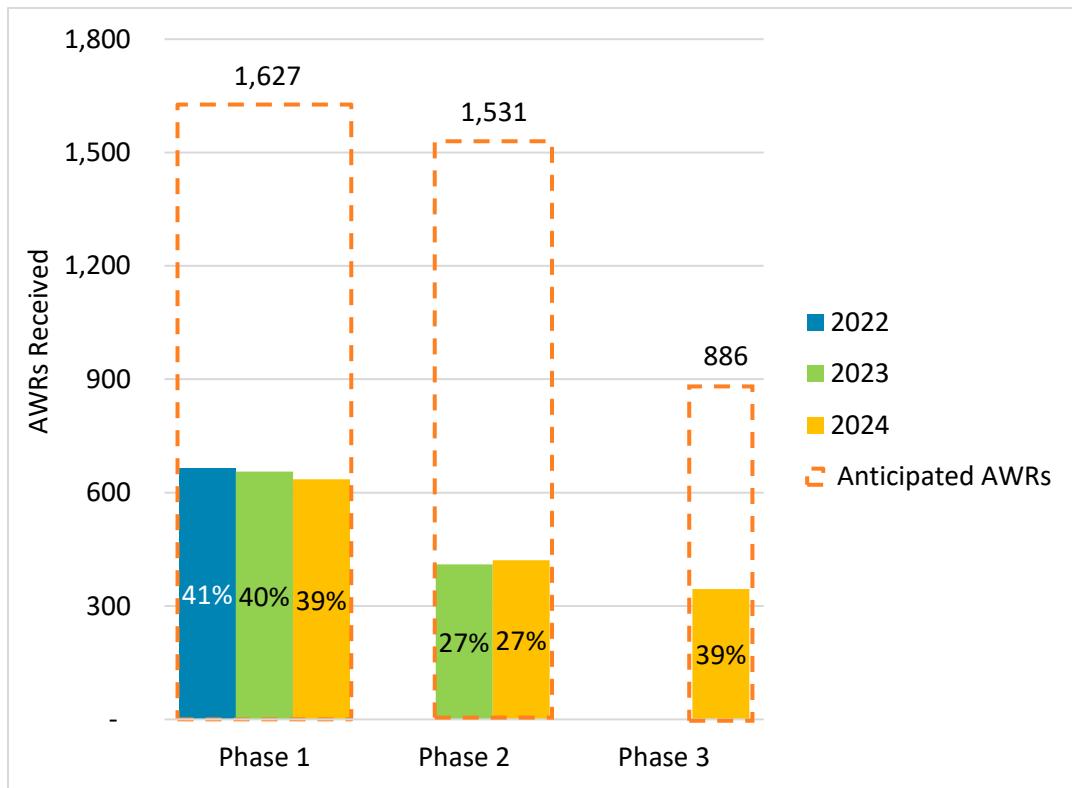

Figure A-4: AWRs Received out of Potential Universe of Warehouses Subject to Rule 2305 by Phase

Table A-2 provides a complete list of all 1,180,685 WAIRE Points earned by WAIRE menu action, as reported in the AWRs received through August 2025. This table also includes the number of times or occurrences⁴² that a WAIRE Menu action category was selected in those AWRs. Mitigation points are also listed in the table, although they are not part of Table 3: WAIRE Menu in Rule 2305. Warehouse operators are not required to complete any of the actions shown in the table below for any other regulation except the WAIRE Program.

⁴² These occurrences may differ from menu option to menu option. For example, the number of occurrences that corresponds to “Finalize 19.2- 350 kW charger project” reflects the number of individual chargers, or EVSE, that are anticipated to complete final energization or permit sign off in the 2022 compliance period.

Solar Panel Installation & Usage		
Carport Solar Panel Installations	76	1 system
Rooftop Solar Panel Installations	2,139	10 systems
Solar Panel Usage	241	41 reports
NZE Truck Visits		
NZE Class 4-7 Truck Visits	219	6 reports
NZE Class 8 Truck Visits	13,842	93 reports

¹These occurrences may differ from menu option to menu option. For example, the number of occurrences that corresponds to “Finalize 19.2- 350 kW charger project” reflects the number of individual chargers, or EVSE, that completed the final energization or permit sign off.

Figure A-6 identifies the WAIRE Menu actions reported in Early Action AWRs by county.

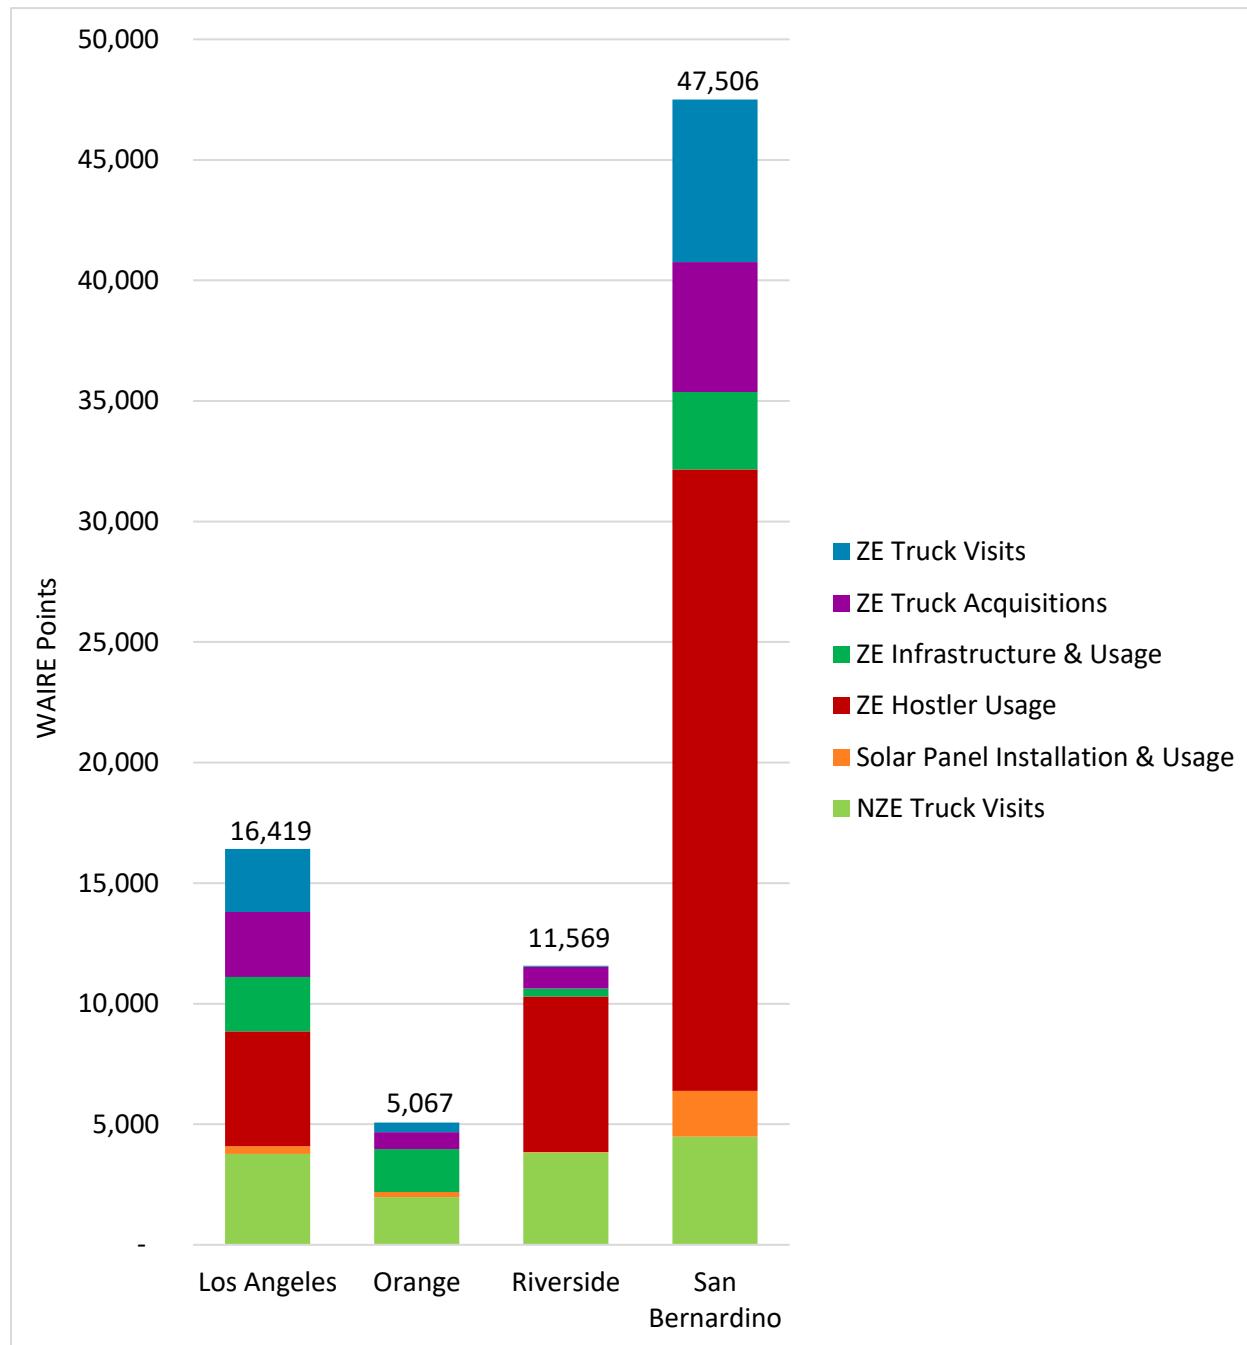

Figure A-6: Early Action AWR WAIRE Menu Items by County

Figure A-7 identifies the percentage of each of these actions taken by year.

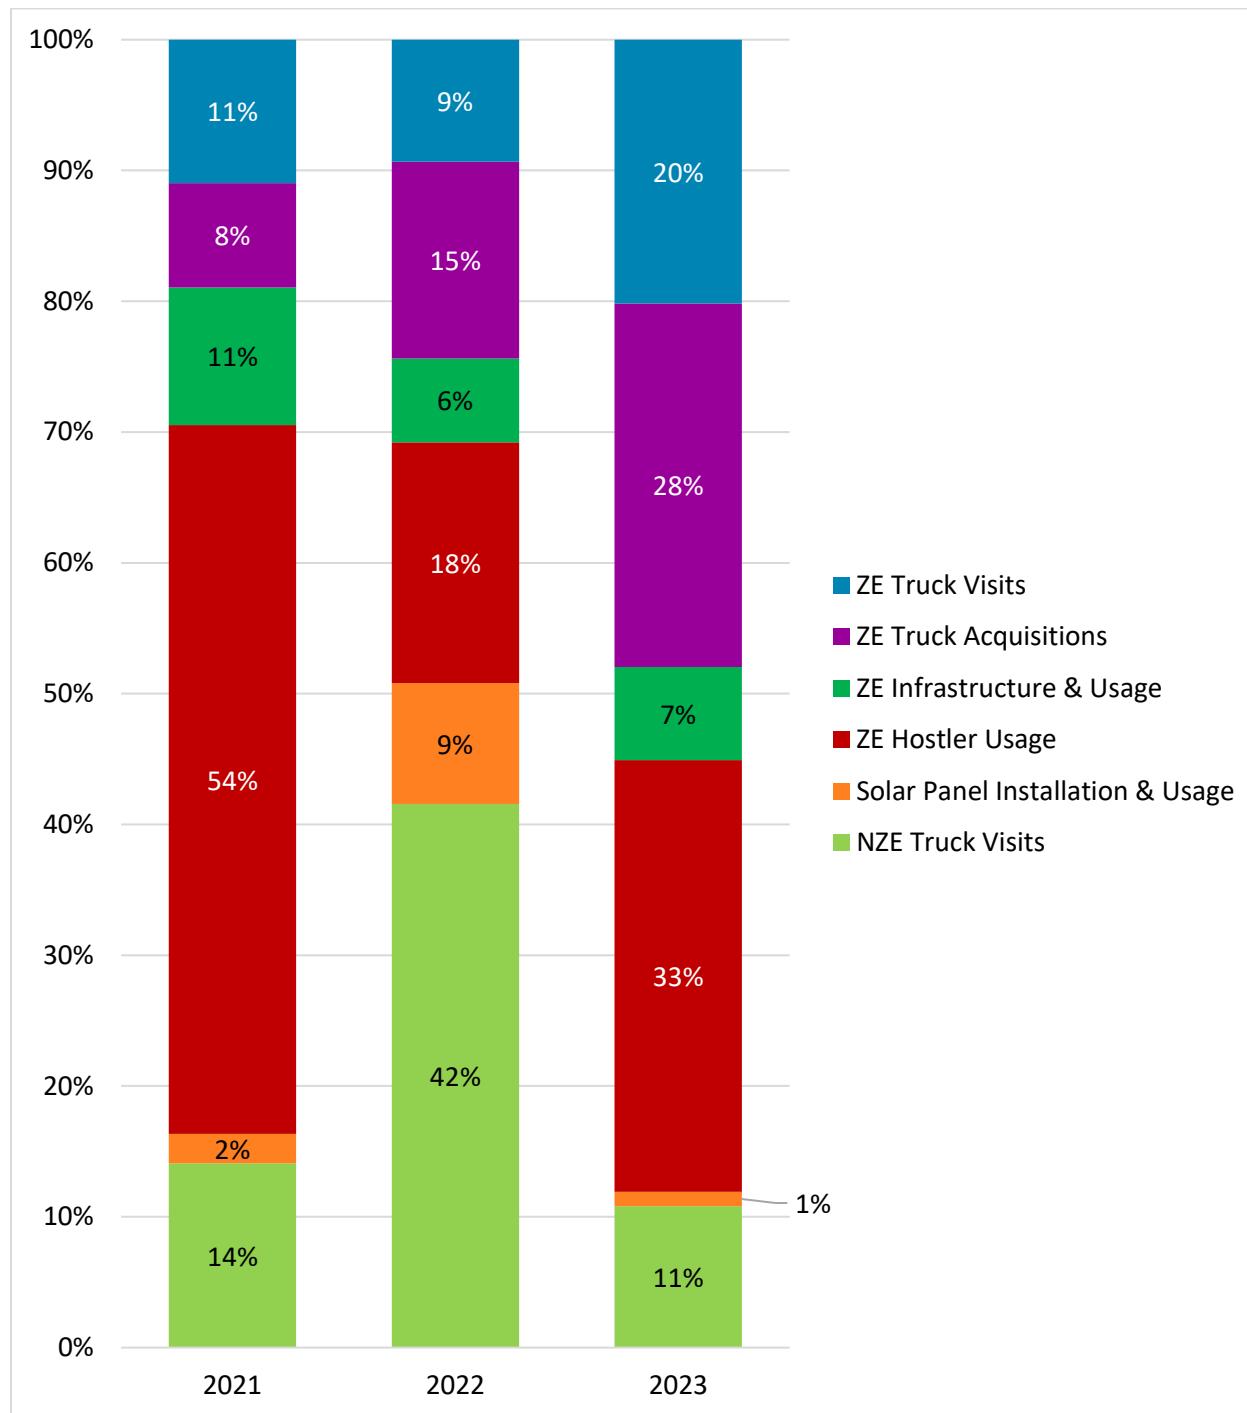

Figure A-7: Early Action AWR WAIRE Menu Items Compliance Period (Normalized)

Appendix D: Estimate of Administrative Fees from WAIRE Program Reporting

Per Rule 316, WONs, ISIRs, and AWRs require a filing fee to be paid per report submitted, excluding some exceptions detailed below.

Please see Table A-4 for cumulative estimates for all compliance periods since rule adoption of the filing fees collected for WONs, ISIRs, and AWRs⁴⁴ as of August 31, 2025, respectively.⁴⁵

Table A-4: Estimate of Filing Fees Paid

Report	Total Filing Fees Paid
WON	\$97,958
ISIR	\$325,946
AWR	\$1,457,584
Total	\$1,881,487

Rule 316 also requires administrative fees to be collected for CWP application evaluations and mitigation fees. A 6.25% administrative fee for the Mitigation Program is collected based on the mitigation fees paid by the warehouse owner or operator. As of August 31, 2025, approximately \$3.3 million has been collected in Mitigation Program administrative fees in addition to what is shown in Table A-4 above.

⁴⁴ AWRs includes Early Action AWRs.

⁴⁵ Subject to final auditing by South Coast AQMD.

Appendix E: Warehouse Indirect Source Rule (ISR) Implementation in Assembly Bill 617 (AB 617) Communities

Introduction

AB 617⁴⁶ is a 2017 California law that addresses disproportionate impacts of air pollution in environmental justice communities. Since AB 617's first year of implementation in 2018, South Coast AQMD has designated six communities for participation in the program:

- Year 1 Communities (2018)
 - East Los Angeles, Boyle Heights, West Commerce (ELABHWC)
 - San Bernardino, Muscoy (SBM)
 - Wilmington, Carson, West Long Beach (WCWLB)
- Year 2 Communities (2019)
 - Eastern Coachella Valley (ECV)
 - Southeast Los Angeles (SELAs)
- Year 3 Community (2021)
 - South Los Angeles (SLA)

AB 617 requires South Coast AQMD to work with each community to develop and adopt a Community Emissions Reduction Plan (CERP) one year from designation. To achieve this goal, each community established a CSC, comprised of people who may live, work, own businesses, or attend school within the community, to lead the CERP development process in partnership with South Coast AQMD and CARB. Through the CERP development process, the CSC identified air quality priorities and worked with various entities (e.g., regulatory agencies, local organizations) to develop exposure and/or emissions reduction measures to address those air quality priorities.⁴⁷

All six of the AB 617 communities within South Coast AQMD's jurisdiction identified impacts from neighborhood truck traffic or diesel mobile sources⁴⁸ as an air quality priority for their respective communities due to the impact from these sources on a day-to-day basis. For example, the community of WCWLB is home to the Ports. The Ports serve as a gateway for the world's markets through the movement of goods. These goods are transported to and from the Ports by ships, trains, and heavy-duty trucks. Trucks travel along freeways that pass through the AB 617-designated communities and often travel near and through local neighborhoods to reach their destinations thus exposing residents to harmful air pollutants.

NOx is the primary pollutant that needs to be reduced to meet federal and state air quality standards, and mobile sources associated with goods movement make up about 52 percent of all

⁴⁶ California Health and Safety Code Section 44391.2

⁴⁷ CERP's for South Coast AQMD's AB 617 communities are available here: www.aqmd.gov/ab617

⁴⁸ AB 617 related air quality priorities include neighborhood and freeway traffic from trucks and automobiles, neighborhood truck traffic, diesel mobile sources, truck traffic and freeways, and mobile sources.

NOx emissions in the South Coast Air Basin. Trucks are the largest source of NOx emissions in the air basin and associated with warehouses. Truck activity is focused at warehouses, which as the Socioeconomic Impact Assessment for Rule 2305 identifies, are disproportionately located in disadvantaged communities.⁴⁹ The population within 0.5-mile of a large warehouse has a population-weighted average CalEnviroScreen 3.0 (CES 3.0) Score of 46.6 (85th percentile statewide), while the South Coast AQMD jurisdiction has a population weighted average CES 3.0 Score of 33.9 (67th percentile statewide). The Final Socioeconomic Impact Assessment for Rule 2305 and Rule 316 identified that risks posed from PM2.5 and DPM are also higher for populations located within 0.5-mile of warehousing facilities.

Figure A-8 through Figure A-13 provide a visual representation of potential warehouse locations subject to Rule 2305 that are within each AB 617 designated community within South Coast AQMD's jurisdiction.

⁴⁹ The Socioeconomic Impact Assessment is Attachment K of the Rule 2305 and Rule 316 Governing Board package (<http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf>).

Year 1 Communities

East Los Angeles, Boyle Heights, West Commerce (ELABHWC)

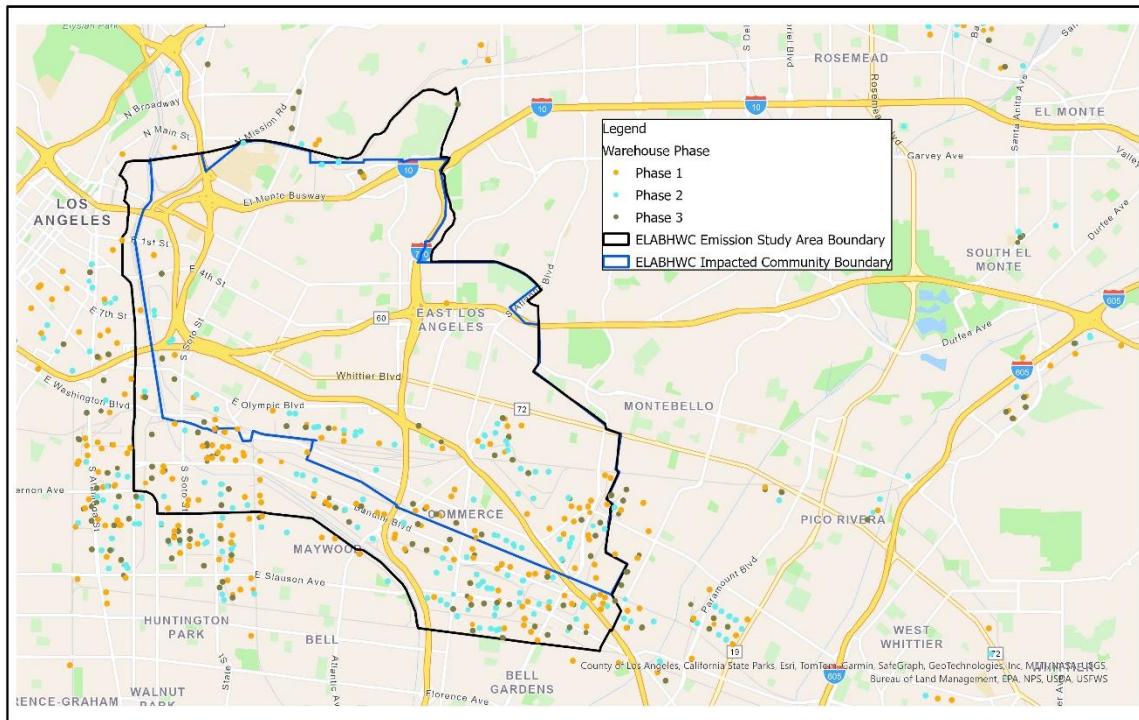

Figure A-8: Potential Warehouses Subject to Rule 2305 Located within East Los Angeles, Boyle Heights, West Commerce (ELABHWC) by Phase

San Bernardino, Muscoy (SBM)

Year 3 Community

South Los Angeles (SLA)

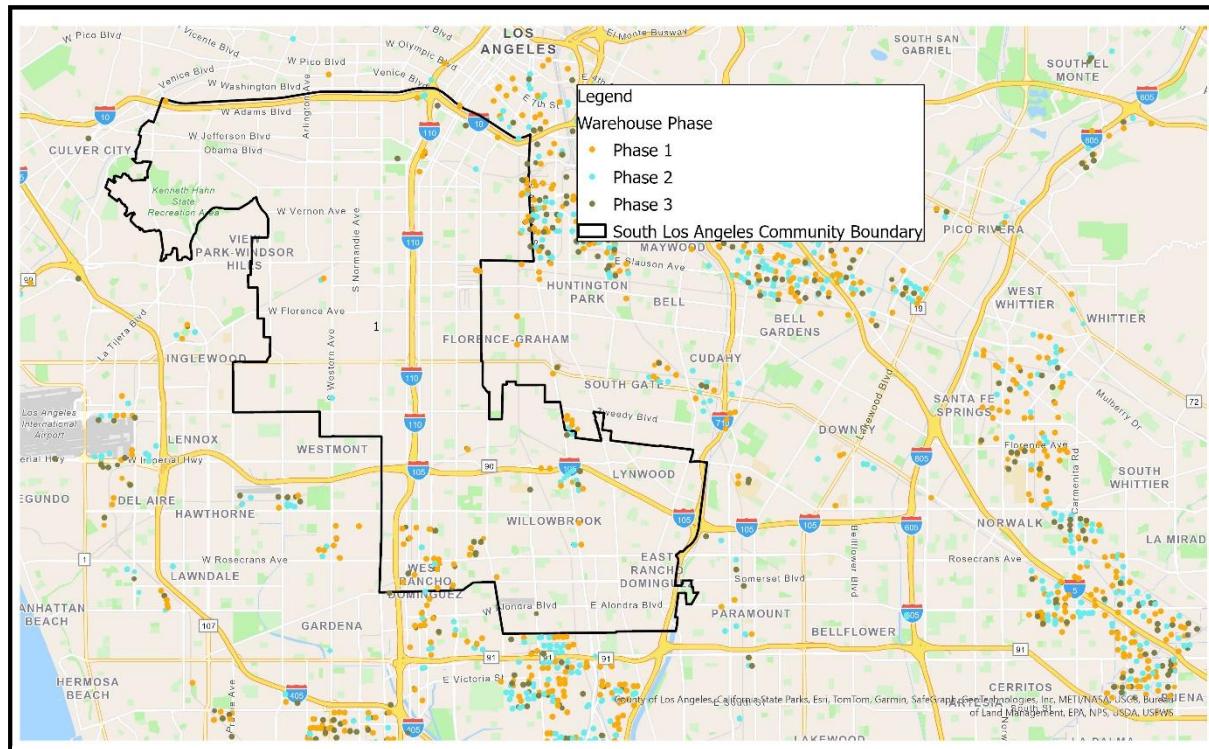

Figure A-13: Potential Warehouses Subject to Rule 2305 Located within South Los Angeles (SLA) by Phase

Appendix F: WAIRE Program Online Portal (POP)

As part of the Board Resolution for Rule 2305 and Rule 316, the South Coast AQMD Governing Board directed South Coast AQMD staff to develop an online portal for regulated entities to submit reports as required by Rule 2305. Rule 2305 requires all reporting be submitted by an authorized official of the warehouse operator or owner through the WAIRE POP reporting system. The WAIRE POP software has been operational for four years and continues to be improved to support compliance with Rule 2305.

Development & Deployment

Following the adoption of Rule 2305 in May 2021, South Coast AQMD partnered with AgreeYa Solutions, Inc. to develop and design WAIRE POP, a web application that provides South Coast AQMD the ability to track warehouse facility owner and operator compliance with Rule 2305's reporting requirements. These reporting requirements include information on activities such as implementing, acquiring, or using NZE and/or ZE on-road trucks, ZE cargo handling equipment, ZE charging/fueling infrastructure, solar panels, or air filtration systems installed or replaced at residences, schools, daycares, hospitals, or community centers.

WAIRE POP was first deployed in August 2021 to allow warehouse facility owners to submit the WON by September 1, 2021. Since then, the system has undergone multiple phases of development, testing, and deployment to external users.

To date, the project has been separated into five major phases:

- **Phase 1 (1.1-1.2):** Phase 1.1 was to develop a publicly available web portal where warehouse facility owners can register, submit, and pay for their WON report. Phase 1.2 was to develop a mechanism for South Coast AQMD staff to process this data into the WAIRE POP database.
- **Phase 2:** This phase added features that allowed external users the ability to add their facilities through WAIRE POP and file ISIRs and AWRs. This phase also implemented the use of outage notifications and informational modals to communicate pertinent WAIRE POP events. An internal administrative interface was created for staff to access report submissions, view invoices, and change role assignments for external users. The administrative tool continues to be enhanced throughout the various WAIRE POP development phases.
- **Phase 3 (3.1-3.5):** Phase 3 was focused on addressing existing bugs and user interface fixes, creating a personal identification number (PIN) validation system for staff to authenticate users that must associate their accounts with existing warehouses, adding validation rules to ensure fields are entered correctly, adding logic for truck trip entries to improve accuracy in reporting, correcting WAIRE POP logic for ISIR submittals to allow users to select the compliance period for the report, adjusting WAIRE POP logic to determine phase by the warehousing activities field rather than building size to align with the rule, updating the AWR report builder to deduct WAIRE Points claimed from the WPCO in the order they were added, correcting WAIRE Point expiration dates,

allowing warehouse facility owners to voluntarily earn WAIRE Points through AWRs, allowing staff to create transfer groups pursuant to the rule, creating an improved payment interface for users to download invoices and make online payments, and implementing an extensive payment sweeper service to accurately update all payment records within WAIRE POP.

- **Phase 4 (4.1-4.4):** Phase 4 was focused on high priority enhancement tasks identified by staff, supplementing backend data management for internal staff, building a functionality for users to download submitted reports and their associated invoices, enabling staff notifications for warehouse operator records created without corresponding WON data, correcting language to prevent reports submittals for incorrect compliance periods, adjusting WAIRE Point expiration dates and WAIRE Point transfers to ensure they are aligned with the rule, correcting WAIRE Menu calculations for TRU plugs, developing and deploying an option to flag the report if the user is offsetting their WPCO by claiming a late action,⁵⁰ enhancing WAIRE POP to automatically display new compliance periods as options, allowing users to submit a report for a partial year (less than 12 months) within the compliance period, adding logic to prevent mitigation fees selection when the WPCO is less than 10, creating a database of Building IDs to assist in tracking the potential warehouse universe and allowing multiple Facility IDs to be created at the same address for warehouse operators who operate in the same building, developing and testing the extensive scope needed to create AWR amendments, which include internal and external features such as request and review modules⁵¹, and enhancing the internal administrative tool further to manage the database of Building IDs and track updates related to AWR amendments.
- **Phase 5 (5.1-5.4):** Phase 5 includes further improving the AWR amendment feature within WAIRE POP, enhancing the transfer feature for facilities who are under the same operational control, ensuring Early AWR submittals are only available for applicable facilities within the authorized compliance periods per Rule 2305, implementing the Post-Reporting Deadline Fee for WONs, ISIRs, and AWRs, enhancing and clarifying the WON submission process for users, integrating Clean Air Support System (CLASS) facilities into WAIRE POP to streamline reporting for facilities who already exist within South Coast AQMD's universe, developing an internal feature to consolidate duplicate facilities, and migrating the relational database from a facility-based to report-based foundation.

Future WAIRE POP Enhancements

As the usage of the WAIRE POP reporting system grows, staff continues to assess and prioritize potential improvements to enhance user experience and internal data management. Proposed enhancements are discussed internally based on user needs and are contingent on resource

⁵⁰ For additional context, see the Frequently Asked Questions document (http://www.aqmd.gov/docs/default-source/planning/fbmsm-docs/r2305_faqs.pdf).

⁵¹ The AWR Amendment feature was deployed in November 2024.

availability. South Coast AQMD is currently considering the following features or enhancements to WAIRE POP:

- Various updates to web application pages to provide clearer direction
- Updating WON excel template to a form-based page on WAIRE POP
- Enhancements to the WAIRE POP relational database structure to facilitate making data publicly available on F.I.N.D. or via bulk data download
- Advanced internal tool for staff users to view and query WAIRE POP reports
- Enhanced database logic to validate approved CWP
- ISIR and early action AWR Amendments
- Internal user tools/features
- Additional high priority enhancement tasks identified by staff as needed

Appendix G: Warehouse Building and Operator Universe

As the implementation of the WAIRE Program is progressing, additional information is becoming available that wasn't possible to know during the rulemaking process. Much of this new information is only available through Rule 2305 mandated reports that are provided by warehouse owners and operators. The estimate of the regulated universe of warehouse buildings and operators has continued to evolve with each annual report. The universe of warehouse buildings is based on CoStar 2025 data, with additional warehouse locations identified through reports submitted by warehouse owners and operators. These numbers do not account for vacant warehouses and other seasonal changes. Table A-5 shows the warehouse building universe as reported in each annual report.

Table A-5: Warehouse Building Universe Identified in Each Annual Report

Reported In ¹	Phase 1	Phase 2	Phase 3	Total
1st Annual Report	1,019	1,041	1,416	3,476
2nd Annual Report	1,186	1,137	1,586	3,909
3rd Annual Report	1,228	1,170	1,644	4,042

¹The building universe for the WAIRE Program is based on the best available data from CoStar, site visits, and facility-submitted data at the time each annual report is prepared and will continue to be updated as new information becomes available. These values are expected to change over time due to normal fluctuations in the warehousing industry, including changes in facility operations, ownership, leasing activity, and building use. Accordingly, the building universe should be considered a dynamic estimate rather than a static count.

Similarly, the number of potential operators is based on the operators identified in submitted WONs, ISIRs, and AWRs. Some of these operators have been first identified through site visits by inspectors. For warehouses identified using CoStar 2025 data only, the default assumption is to count one tenant per building unless other information from submitted reports or inspections becomes available. Table A-6 shows the potential operator universe as reported in each annual report. The first annual report contained a conservative estimate of one operator per warehouse building. Recognizing that many warehouse buildings have multiple tenants, staff analyzed submitted data to capture a more accurate estimate of potential operators for the subsequent annual reports. An ISIR is expected for each potential operator, although some operators must only submit an ISIR with limited information per Rule 2305(e)(2)(A)(i) and (ii).

Table A-6: Potential Operators Identified in Each Annual Report

Report ¹	Phase 1	Phase 2	Phase 3	Total
1st Annual Report	1,019	1,041	1,416	3,476
2nd Annual Report	1,743	1,593	2,056	5,392
3rd Annual Report	1,645	1,579	2,080	5,304

¹The potential operators for the WAIRE Program are based on the best available data from CoStar, site visits, and facility-submitted data at the time each annual report is prepared and will continue to be updated as new information becomes available. These values are expected to change over time due to normal fluctuations in the warehousing industry, including changes in facility operations, ownership, leasing activity, and building use. Accordingly, potential operators should be considered a dynamic estimate rather than a static count.

Operators who must submit an ISIR with full reporting are also required to earn WAIRE Points and submit AWRs. The proportion of operators who must submit an AWR is calculated by phase from Table A-7. They are listed as percentages in Table A-8. The annual variation in the proportions for Phases 1 and 2 are minor, while 2024 data for Phase 3 indicates that many operators will not need to earn WAIRE Points.

Although more reports are needed to determine whether this trend holds across all Phase 3 warehouses, the reporting received so far indicates that individual warehouse operations in these smaller buildings are more commonly smaller than 50,000 square feet. The formula for Table A-8 is as follows:

$$\text{Proportion of Operators Who Must Submit AWR} = 1 - \left(\frac{\text{ISIRs with Limited Information}}{\text{Total ISIRs}} \right)$$

Table A-7: ISIRs Submitted for All Years by Phase

Report Type	Phase 1	Phase 2	Phase 3	Total
ISIRs with Limited Information	10	19	604	633
ISIRs with Full Reporting	894	609	448	1,951
Total ISIRs	904	628	1,052	2,584

Table A-8: Percentage of Limited ISIRs Submitted for All Years by Phase

Percentage Of	Phase 1	Phase 2	Phase 3
Operators that Submitted an ISIR with Limited Information	1%	3%	57%
Operators who Submitted an ISIR and Must Submit AWRs	99%	97%	43%

The estimated minimum expected number of AWRs (Table A-9) is the product of the number of potential operators (Table A-6) and the proportion of operators that must submit an AWR (Table A-8).

Expected Number of AWRs (by Phase)

= Most Recent Estimate of Number of Potential Operators

** Proportion of Operators Who Must Submit AWR*

Table A-9: Estimated Minimum Expected Number of AWRs by Phase per Compliance Period

Compliance Period ¹	Phase 1	Phase 2	Phase 3	Total
2022	1,627			1,627
2023	1,627	1,531		3,158
2024	1,627	1,531	886	4,044

¹ This table reflects the latest potential operators for the WAIRE Program, based on the best available data from CoStar, site visits, and facility-submitted data at the time of annual report preparation. These values are expected to change over time due to normal fluctuations in the warehousing industry, including changes in facility operations, ownership, leasing activity, and building use. Accordingly, potential operators should be considered a dynamic estimate rather than a static count. While each phase's expected number of reports is the same for each compliance period, the total number of expected reports will differ as more reports are submitted.

The values in Table A-6 and Table A-9 represent the minimum expected number of ISIRs and AWRs. The true expected number of reports may be higher due to multiple tenants in non-reporting buildings or because of tenant changes throughout the compliance period.

Item #3

Rule 2202 Summary Status Report

Activity for January 1, 2025 – December 31, 2025

Employee Commute Reduction Program (ECRP)	
# of Submittals:	329

Emission Reduction Strategies (ERS)	
# of Submittals:	157

Air Quality Investment Program (AQIP) Exclusively		
<u>County</u>	<u># of Facilities</u>	<u>\$ Amount</u>
Los Angeles	66	\$ 397,377
Orange	11	\$ 74,874
Riverside	1	\$ 11,542
San Bernardino	10	\$ 174,163
TOTAL:	88	\$ 657,956

ECRP w/AQIP Combination		
<u>County</u>	<u># of Facilities</u>	<u>\$ Amount</u>
Los Angeles	0	\$ 0
Orange	0	\$ 0
Riverside	0	\$ 0
San Bernardino	0	\$ 0
TOTAL:	0	\$ 0

Total Active Sites as of December 31, 2025

ECRP (AVR Surveys)			TOTAL Submittals w/Surveys	AQIP	ERS	TOTAL
ECRP¹	AQIP²	ERS³				
479	7	12	498	98	688	1,284
37.3%	0.5%	0.9%	38.7%	7.6%	53.7%	100% ⁴

Total Peak Window Employees as of December 31, 2025

ECRP (AVR Surveys)			TOTAL Submittals w/Surveys	AQIP	ERS	TOTAL
ECRP¹	AQIP²	ERS³				
371,752	2,486	3,833	378,071	15,788	286,621	680,480
54.5%	0.4%	0.5%	55.4%	2.3%	42.3%	100% ⁴

Notes:

1. ECRP Compliance Option.
2. ECRP Offset (combines ECRP w/AQIP). AQIP funds are used to supplement the ECRP AVR survey shortfall.
3. ERS with Employee Survey to get Trip Reduction credits. Emission/Trip Reduction Strategies are used to supplement the ECRP AVR survey shortfall.
4. Totals may vary slightly due to rounding.

DRAFT VERSION

BOARD MEETING DATE:	February 6, 2026	AGENDA NO.
REPORT:	Intergovernmental Review of Environmental Documents and CEQA Lead Agency Projects	
SYNOPSIS:	This report provides a listing of environmental documents prepared by other public agencies seeking review by South Coast AQMD between December 1, 2025 and December 31, 2025, and proposed projects for which South Coast AQMD is acting as lead agency pursuant to CEQA.	
COMMITTEE:	Mobile Source, January 23, 2026, Reviewed	
RECOMMENDED ACTION:	Receive and file.	

Wayne Nastri
Executive Officer

SR:MK:BR:SW:AS

Background

The California Environmental Quality Act (CEQA) Statute and Guidelines require public agencies, when acting in their lead agency role, to provide an opportunity for other public agencies and members of the public to review and comment on the analysis in environmental documents prepared for proposed projects. A lead agency is when a public agency has the greatest responsibility for supervising or approving a proposed project and is responsible for the preparation of the appropriate CEQA document.

Each month, South Coast AQMD receives environmental documents, which include CEQA documents, for proposed projects that could adversely affect air quality. South Coast AQMD fulfills its intergovernmental review responsibilities, in a manner that is consistent with the Board's 1997 Environmental Justice Guiding Principles and

Environmental Justice Initiative #4, by reviewing and commenting on the adequacy of the air quality analysis in the environmental documents prepared by other lead agencies.

The status of these intergovernmental review activities is provided in this report in two sections: 1) Attachment A lists all of the environmental documents prepared by other public agencies seeking review by South Coast AQMD that were received during the reporting period; and 2) Attachment B lists the active projects for which South Coast AQMD has reviewed or is continuing to conduct a review of the environmental documents prepared by other public agencies. Further, as required by the Board's October 2002 Environmental Justice Program Enhancements for fiscal year (FY) 2002-03, each attachment includes notes for proposed projects which indicate when South Coast AQMD has been contacted regarding potential air quality-related environmental justice concerns. The attachments also identify for each proposed project, as applicable: 1) the dates of the public comment period and the public hearing date; 2) whether staff provided written comments to a lead agency and the location where the comment letter may be accessed on South Coast AQMD's website; and 3) whether staff testified at a hearing.

In addition, the South Coast AQMD will act as lead agency for a proposed project and prepare a CEQA document when: 1) air permits are needed; 2) potentially significant adverse impacts have been identified; and 3) the South Coast AQMD has primary discretionary authority over the approvals. Attachment C lists the proposed air permit projects for which South Coast AQMD is lead agency under CEQA.

Attachment A – Log of Environmental Documents Prepared by Other Public Agencies and Status of Review, and Attachment B – Log of Active Projects with Continued Review of Environmental Documents Prepared by Other Public Agencies

Attachment A contains a list of all environmental documents prepared by other public agencies seeking review by South Coast AQMD that were received pursuant to CEQA or other regulatory requirements. Attachment B provides a list of active projects, which were identified in previous months' reports, and which South Coast AQMD staff is continuing to evaluate or prepare comments relative to the environmental documents prepared by other public agencies. The following table provides statistics on the status of review¹ of environmental documents for the current reporting period for Attachments A and B combined²:

¹ The status of review reflects the date when this Board Letter was prepared. Therefore, Attachments A and B may not reflect the most recent updates.

² Copies of all comment letters sent to the lead agencies are available on South Coast AQMD's website at: <http://www.aqmd.gov/home/regulations/ceqa/commenting-agency>.

Statistics for Reporting Period from December 1, 2025 to December 31, 2025	
Attachment A: Environmental Documents Prepared by Other Public Agencies and Status of Review	63
Attachment B: Active Projects with Continued Review of Environmental Documents Prepared by Other Public Agencies (which were previously identified in the October and November 2025 report)	10
Total Environmental Documents Listed in Attachments A & B	73
<i>Comment letters sent</i>	11
<i>Environmental documents reviewed, but no comments were made</i>	51
<i>Environmental documents currently undergoing review</i>	11

Staff focuses on reviewing and preparing comments on environmental documents prepared by other public agencies for proposed projects: 1) where South Coast AQMD is a responsible agency under CEQA (e.g., when air permits are required but another public agency is lead agency); 2) that may have significant adverse regional air quality impacts (e.g., special event centers, landfills, goods movement); 3) that may have localized or toxic air quality impacts (e.g., warehouse and distribution centers); 4) where environmental justice concerns have been raised; and 5) which a lead or responsible agency has specifically requested South Coast AQMD review.

If staff provided written comments to a lead agency, then a hyperlink to the “South Coast AQMD Letter” is included in the “Project Description” column which corresponds to a notation in the “Comment Status” column. In addition, if staff testified at a hearing for a proposed project, then a notation is included in the “Comment Status” column. Copies of all comment letters sent to lead agencies are available on South Coast AQMD’s website at: <http://www.aqmd.gov/home/regulations/ceqa/commenting-agency>. Interested parties seeking information regarding the comment periods and scheduled public hearings for projects listed in Attachments A and B should contact the lead agencies for further details as these dates are occasionally modified.

In January 2006, the Board approved the Clean Port Initiative Workplan (Workplan). One action item of the Workplan was to prepare a monthly report describing CEQA documents for projects related to goods movement and to make full use of the process to ensure the air quality impacts of such projects are thoroughly mitigated. In accordance with this action item, Attachments A and B organize the environmental documents received according to the following categories: 1) goods movement projects; 2) schools; 3) landfills and wastewater projects; 4) airports; and 5) general land use projects. In response to the action item relative to mitigation, staff maintains a compilation of mitigation measures presented as a series of tables relative to off-road engines; on-road engines; harbor craft; ocean-going vessels; locomotives; fugitive dust; and greenhouse gases which are available on South Coast AQMD’s website at: <http://www.aqmd.gov/home/regulations/ceqa/air-quality-analysis-handbook/mitigation->

measures-and-control-efficiencies. Staff will continue compiling tables of mitigation measures for other emission sources such as ground support equipment.

Attachment C – Proposed Air Permit Projects for Which South Coast AQMD is CEQA Lead Agency

The CEQA lead agency is responsible for determining the type of environmental document to be prepared if a proposal requiring discretionary action is considered to be a “project” as defined by CEQA. South Coast AQMD periodically acts as lead agency for its air permit projects and the type of environmental document prepared may vary depending on the potential impacts. For example, an Environmental Impact Report (EIR) is prepared when there is substantial evidence that the project may have significant adverse effects on the environment. Similarly, a Negative Declaration (ND) or Mitigated Negative Declaration (MND) may be prepared if a proposed project will not generate significant adverse environmental impacts, or the impacts can be mitigated to less than significance. The ND and MND are types of CEQA documents which analyze the potential environmental impacts and describe the reasons why a significant adverse effect on the environment will not occur such that the preparation of an EIR is not required.

Attachment C of this report summarizes the proposed air permit projects for which South Coast AQMD is lead agency and is currently preparing or has prepared environmental documentation pursuant to CEQA. As noted in Attachment C, South Coast AQMD is lead agency for four air permit projects during December 2025.

PROPOSED AIR PERMIT PROJECTS FOR WHICH SOUTH COAST AQMD IS CEQA LEAD AGENCY
Through December 31, 2025

PROJECT PROPOSER/PROJECT TITLE	PROJECT DESCRIPTION	TYPE OF DOCUMENT	STATUS	CONSULTANT
Ecobat Resources California Inc. (formerly Quemetco) <u>Quemetco Capacity Upgrade Project</u>	<p>Ecobat Resources California Inc. (formerly Quemetco) is proposing to modify its South Coast AQMD permits (Facility ID: 8547) to allow the facility to recycle more batteries and to eliminate the existing daily idle time of the furnaces. The proposed project will increase the rotary feed drying furnace feed rate limit from 600 to 750 tons per day and increase the amount of total coke material allowed to be processed. In addition, the project will allow the use of petroleum coke in lieu of or in addition to calcined coke and remove one existing emergency diesel-fueled internal combustion engine (ICE) and install two new emergency natural gas-fueled ICES.</p> <p>The project is located in Los Angeles County at 720 South 7th Avenue in the City of Industry.</p> <p>Reference: State Clearinghouse No. 2018081096</p>	Environmental Impact Report (EIR)	<p>The Draft EIR was released for a 124-day public review and comment period from October 14, 2021 to February 15, 2022 and approximately 200 comment letters were received.</p> <p>South Coast AQMD held two community meetings on November 10, 2021, and February 9, 2022, which presented an overview of the proposed project, the CEQA process, detailed analysis of the potentially significant environmental topic areas, and the existing regulatory safeguards. Response to written comments submitted relative to the Draft EIR and oral comments made at the community meetings are currently being prepared by the consultant.</p> <p>After the Draft EIR public comment and review period closed, Quemetco submitted additional applications for other permit modifications. South Coast AQMD staff is evaluating the effect of these new applications on the EIR process.</p>	Trinity Consultants
Browning-Ferris Industries of California, Inc., doing business as Sunshine Canyon Landfill Republic Services Inc. <u>Sunshine Canyon Landfill Flare Capacity Expansion Project</u>	<p>Sunshine Canyon Landfill Republic Services Inc. is proposing to modify its South Coast AQMD permits (Facility ID: 49111) for its active landfill gas collection and control system to accommodate the increased collection of landfill gas. The proposed project will: 1) install two new low-emission flares with two additional 300-horsepower electric blowers; and 2) increase the landfill gas flow limit of the existing landfill gas collection system.</p> <p>The project is located in Los Angeles County at 14747 San Fernando Road in Sylmar.</p> <p>Reference: State Clearinghouse No. 1992041053</p>	Subsequent Environmental Impact Report (SEIR)	<p>The Draft SEIR was released for a 45-day public review and comment period from September 30, 2025 to November 14, 2025 and four comment letters were received. Staff is preparing the Final SEIR which will include the comment letters and responses.</p>	Castle Environmental Consulting
