

**UPDATE:  
Draft Updated 1-Hour Ozone Attainment  
Demonstration Document Available**

**Public Workshop for Updated 1-hour  
Ozone Attainment Demonstration**

Thursday, September 20, 2018

10:00 AM

South Coast Air Quality Management District  
21865 Copley Dr. Diamond Bar, CA 91765  
Auditorium

The South Coast Air Quality Management District (SCAQMD) has updated the attainment demonstration of the federal 1979 1-hour ozone standard that was presented in the 2016 Air Quality Management Plan (AQMP). The emissions inventory in the updated attainment demonstration is based on the final emissions inventory in the 2016 AQMP in order to be consistent with the attainment demonstrations of the 8-hour ozone and PM 2.5 standards. The updated attainment demonstration also includes revised air quality modeling and an updated attainment strategy for meeting the 1-hour ozone standard. The updated attainment strategy relies only on SCAQMD's proposed control measures in the 2016 AQMP, based on the expectation that progress in emission reductions targeted toward attainment of the 1997 8-hour ozone standard by 2023 will ensure attainment of the 1-hour ozone standard by 2022. As such, emission reductions from California Air Resources Board's State Implementation Plan strategies, including 182(e)(5) measures ("black box" measures), are no longer needed to attain the 1-hour standard. The updated attainment strategy successfully demonstrates attainment of the 1-hour ozone standard by 2022. A public workshop is scheduled to present the updated 1-hour ozone standard attainment demonstration and solicit public comments and a public hearing is scheduled for November 2, 2018 at the SCAQMD Governing Board meeting.

The draft updated 1-hour ozone attainment demonstration document can be found in the attachment or visiting [here](#). The public is requested to provide comments, documents, or other information relevant to the draft updated 1-hour ozone attainment demonstration by Oct 8, 2018 by email or mail to
