Webinar ID: 956 3921 4690

Or by phone: (669) 900-6833

Background

The Annual Air Quality Monitoring Network Plan describes the network of ambient air quality monitors located within the South Coast AQMD's four county jurisdiction. The Plan includes a review of actions taken during the previous fiscal year, and outlines plans for action in the year ahead.

Federal regulations require that the air quality monitoring network be reviewed annually to identify any need for additions, relocations, or terminations of monitoring sites or instrumentation. After a 30-day comment period, the Plan is submitted to the U.S. Environmental Protection Agency (U.S. EPA) on July 1 of each year.

Annual Air Quality Monitoring Network Plan Workshop

Pursuant to Federal regulations, a draft plan of the 2023 Annual Air Quality Monitoring Network Plan will be made available by May 20, 2023 for public inspection and comment for 30 days prior to the submission of the final plan to EPA on July 1, 2023.

South Coast AQMD seeks public input to the plan. The Federal requirements and overview of the plan will be discussed along with the results of the comparability assessment for PM2.5 Continuous Monitors.

Agenda

- Federal Requirements
- Monitoring Network Infrastructure
- Minimum Monitoring Requirements
- Special Programs
- Network Assessment Summary
- Recent and Proposed Modifications to the Network
- PM2.5 Continuous Monitor Comparability Assessment
