## **South Coast AQMD Issues Windblown Dust Advisory for Portions of the South Coast Air Basin and Coachella Valley**

**Valid Sunday April 4, 2021 through Monday April 5, 2021**

*This advisory is in effect through Monday Evening. South Coast AQMD will issue an update if additional information becomes available.*

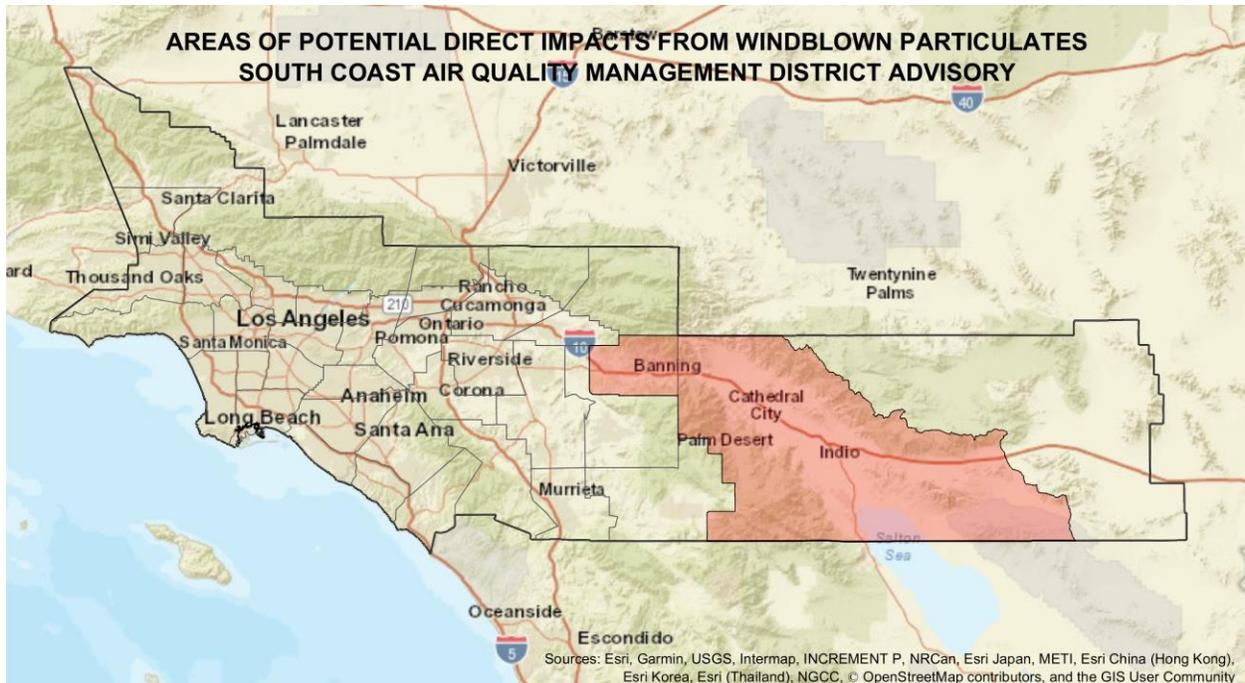

A PM10 Dust Advisory is in effect due to predicted high winds in the San Gorgonio Pass and the San Bernardino and Riverside county mountains.

On Sunday morning, the National Weather Service (NWS) issued a High Wind Watch for portions of the eastern South Coast Air Basin that is in effect from Sunday night through Monday night. For information regarding the NWS High Wind Watch, please visit the NWS San Diego (<https://www.weather.gov/sgx/>) website.

Winds from the west with gusts up to 75 mph are expected in the mountains. Areas of blowing dust and sand in the San Gorgonio Pass and desert areas are predicted throughout this wind event, which may result in **Unhealthy for Sensitive Groups** or higher Air Quality Index (AQI) levels throughout the San Gorgonio Pass area near Banning and the Northern parts of the Coachella Valley. Localized areas of blowing ash are also possible in the San Bernardino Mountains near the 2020 wildfire burn scars.

Areas of direct impacts and poor air quality may include portions of:

- **Riverside County:** San Gorgonio Pass (Area 29), Coachella Valley (Area 30)

**In areas directly impacted by windblown dust:** Limit your exposure by remaining indoors with windows and doors closed and avoiding vigorous physical activity.
