## South Coast AQMD Issues Windblown Dust Advisory for the San Geronio Pass Area and the Coachella Valley

*Valid Tuesday 2:00 p.m. until Thursday 4:00 p.m.*

Wind gusts up to 22 mph on Tuesday morning in the Coachella Valley have already resulted in **Unhealthy** conditions.

To view current air quality in your neighborhood, download the [South Coast AQMD app](#) or visit [www.aqmd.gov/AQImap](http://www.aqmd.gov/AQImap).

### Forecasted Air Quality Impacts

- Periods of elevated particle pollution (PM10) levels in the San Geronio Pass area and the Coachella Valley are expected from now until Thursday evening
- Blowing dust may result in Air Quality Index (AQI) levels that are **Unhealthy** or worse at times
- High PM10 levels in the region are a result of gusty winds, which can lift dust and soil into the air
- Air quality can vary by hour and location depending on wind conditions
- As of Tuesday afternoon, the National Weather Service (NWS) has posted Wind Advisories and High Wind Watches across the area.  
Visit NWS San Diego website <https://www.weather.gov/sgx/> for more information.

### If you are in an area impacted by windblown dust or ash:

- Limit your exposure by remaining indoors with windows and doors closed or seeking alternate shelter.
- Avoid vigorous physical activity.
- Run your air conditioning and/or an air purifier. If possible, do not use swamp coolers or whole house fans that bring in outside air.
- Help minimize dust pollution by stabilizing loose soils and slowing down if driving on dirt roads.

For more information, see the [EPA Guide for Particle Pollution](#) (PDF).

South Coast AQMD is the regulatory agency responsible for improving air quality for large areas of Los Angeles, Orange, Riverside and San Bernardino counties, including the Coachella Valley.
