Eaton and Palisades Air Monitoring Update

DIAMOND BAR – The South Coast Air Quality Management District (South Coast AQMD) continues its expanded air monitoring efforts in response to ongoing debris removal efforts near the Eaton and Palisades fire areas. Air monitoring will provide data for particulate matter (PM2.5 and PM10), air toxics (such as lead and arsenic), and asbestos in communities near the burn zones.

The public within and near the Eaton and Palisades burn areas is strongly encouraged to follow the <u>safety precautions</u> outlined by the Los Angeles County Department of Public Health to minimize the potential risk of exposure to ash, soot, and fire debris. Strong winds can carry ash and soot over a wider area, increasing the potential for exposure, so it is especially important to take extra care during weather fluctuations and windy conditions.

EATON AIR MONITORING RESULTS (April 19-25, 2025)

| Monitoring Site | Sample Date | Air Toxics | Asbestos | Continuous PM2.5/PM10 |
|---|-------------|--|--------------|--|
| Near Altadena Golf Course | 4/19/2025 | All air toxic metals were within background levels | Not Detected | To date, continuous PM2.5 and PM10 data were below federal standards |
| | 4/22/2025 | All air toxic metals were within background levels | Not Detected | |
| | 4/25/2025 | Sample is being analyzed | Not Detected | |
| Christ the Shepherd Lutheran Church | 4/19/2025 | All air toxic metals were within background levels | Not Detected | |
| | 4/22/2025 | All air toxic metals were within background levels | Not Detected | |
| | 4/25/2025 | Sample is being analyzed | Not Detected | |
| Fire Station 11 | 4/19/2025 | All air toxic metals were within background levels | Not Detected | |
| | 4/22/2025 | All air toxic metals were within background levels | Not Detected | |
| | 4/25/2025 | Sample is being analyzed | Not Detected | |

PALISADES AIR MONITORING RESULTS (April 19-25, 2025)

| Monitoring Site | Sample Date | Air Toxics | Asbestos | Continuous PM2.5/PM10 |
|---------------------------------|-------------|--|--------------|---|
| Near Will Rogers State Beach | 4/19/2025 | Air toxic metal vanadium was above background levels, but does not pose a health risk | Not Detected | To date, continuous PM2.5 and PM10 data were below federal standards |
| | 4/22/2025 | Air toxic metal vanadium was above background levels, but does not pose a health risk | Not Detected | |
| | 4/25/2025 | Sample is being analyzed | Not Detected | |
| Fire Station 69 | 4/19/2025 | Air toxic metals such as manganese were above background levels, but do not pose a health risk | Not Detected | |
| | 4/22/2025 | Air toxic metals such as manganese were above background levels, but do not pose a health risk | Not Detected | |
| | 4/25/2025 | Sample is being analyzed | Not Detected | |
