SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

GOVERNING BOARD

Chair: MICHAEL A. CACCIOTTI
Councilmember, South Pasadena
Cities of Los Angeles County/Eastern Region

Vice Chair: LARRY MCCALLON
Councilmember, Highland
Cities of San Bernardino County

MEMBERS:

VANESSA DELGADO
Senator (Ret.)
Senate Rules Committee Appointee

CURT HAGMAN
Supervisor, Fourth District
County of San Bernardino

PATRICIA LOCK DAWSON
Mayor, Riverside
Cities of Riverside County Representative

HOLLY J. MITCHELL
Supervisor, Second District
County of Los Angeles

ADRIN NAZARIAN
Councilmember, Second District
City of Los Angeles Representative

JANET NGUYEN
Supervisor, First District
County of Orange

BRENDA OLMOS
Mayor, City of Paramount
Cities of Los Angeles County/Western Region

VERONICA PADILLA-CAMPOS
Speaker of the Assembly Appointee

V. MANUEL PEREZ
Supervisor, Fourth District
County of Riverside

CARLOS RODRIGUEZ
Mayor, Yorba Linda
Cities of Orange County

Executive Summary

South Coast AQMD is home to the most densely concentrated warehouse and logistics networks in the nation, where clusters of large distribution centers are linked to freight corridors serving the Ports of Los Angeles and Long Beach and local rail yards. This goods movement system is a significant driver of the region's and nation's economic activity. However, it also results in a high volume of heavy-duty truck trips, yard equipment movement, and last-mile delivery activity, generating substantial air pollution that affects regional air quality and disproportionately burdens nearby communities. On May 7, 2021, the South Coast AQMD Governing Board adopted landmark Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program and Rule 316 – Fees for Rule 2305 to reduce regional and local emissions of nitrogen oxides (NOx) and diesel particulate matter (DPM). The WAIRE Program is the nation's first rule designed to reduce smog-forming emissions from the warehouse sector. The rule facilitates emission reductions by providing multiple flexible compliance pathways to reduce air pollution from goods movement and trucking activities associated with warehouses.

Through implementation of the WAIRE Program, measurable emissions reduction benefits have been achieved by accelerating the deployment of cleaner trucks, battery-electric yard equipment, on-site charging and infrastructure investments, and cleaner last-mile delivery operations. These efforts are delivering real-world benefits, including reduced diesel pollution, improved public health outcomes in disadvantaged communities, and technology market transformation. Collectively, these achievements demonstrate how regulating warehouse-driven indirect sources can produce tangible emissions reductions while supporting a cleaner, more sustainable freight system.

Each year, South Coast AQMD staff publishes a WAIRE Program Annual Report to provide an update of program implementation. This 4th Annual Report for the WAIRE Program summarizes the WAIRE Program's implementation from rule adoption on May 7, 2021 through August 31, 2026, including outreach, reporting, mitigation program, enforcement, program results and other rule-related activities. The first five years of implementation for the WAIRE Program were primarily focused on program development, outreach, and providing technical support and compliance assistance for warehouse facility owners and operators subject to Rule 2305. In recent years, South Coast AQMD has strengthened program compliance through increased enforcement efforts, such as conducting site inspections and issuing notices of violation (NOVs) for noncompliance.

As a first-in-the-nation rule, the WAIRE Program has always been expected to evolve as specific implementation practices are adopted across the industry. This latest year has seen continued improvement in the program. As of August 31, 2026, a total of 4,848 Annual WAIRE Reports (AWRs) were submitted by warehouse operators for the 2022 through 2025 compliance periods. The vast majority of WAIRE compliance is achieved through acquiring or using zero-emission (ZE) and near-zero emissions (NZE) trucks and cargo handling equipment, installing and using

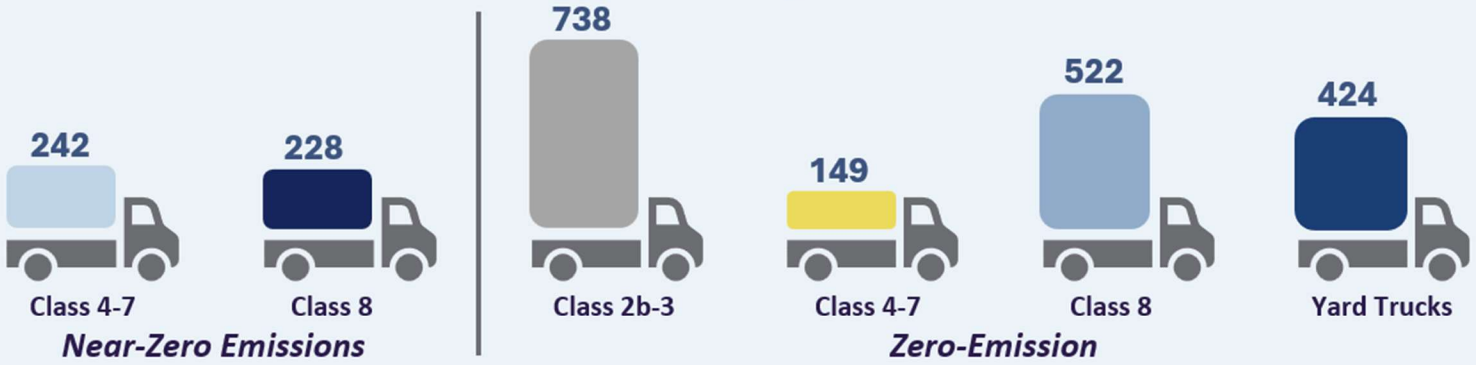

ZE charging infrastructure, and installing and using solar panels, while since the program's inception only about 4% of total compliance relies on mitigation fees. For the 2025 compliance period, mitigation fee points constituted only 3% of earned WAIRE points totaling $21.3 million in mitigation fees. A total of $79.3 million in mitigation fees has been collected through August 2026 which will be used to fund projects that achieve and/or facilitate emissions reductions.

In 2025, the fourth year of its five-year phase-in period, the WAIRE Program achieved approximately 1.71 tons per day of NOx reductions and 0.047 tons per day of DPM reductions, consistent with the projection during rulemaking. Overall, actions from the WAIRE Program have resulted in emissions reductions that go beyond any state or federal regulation to assist in meeting ambient air quality standards and reducing localized air quality impacts in communities that are located near warehouses. The site-based focus of the WAIRE Program is also helping to build the ecosystem needed for ZE operations through the buildout of charging stations and solar installations.

WAIRE Program
4th Annual Report Highlights

The 4th Annual Report for the Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program summarizes the implementation of Rule 2305 from its adoption on May 7, 2021 through August 31, 2026. By driving targeted industry actions, the WAIRE Program has successfully reduced nitrogen oxides (NOx) and diesel particulate matter (DPM), measurably improving air quality at both the local and regional levels.

Introduction

The South Coast Air Quality Management District (South Coast AQMD) is the regulatory agency responsible for improving air quality for large areas of Los Angeles, Orange, Riverside and San Bernardino counties, including the Coachella Valley. This jurisdiction spans across three air basins which are the South Coast Air Basin, and portions of the Salton Sea Air Basin (SSAB or Coachella Valley Planning Area) and the Mojave Desert Air Basin (MDAB) located in Riverside County. On May 7, 2021, the South Coast AQMD Governing Board adopted Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions (WAIRE) Program and Rule 316 – Fees for Rule 2305 to reduce regional and local emissions of nitrogen oxides (NOx) and diesel particulate matter (DPM).

South Coast AQMD Rule 2305 applies to both operators and owners of warehouses greater than or equal to 100,000 square feet (sf) of indoor floor space within a single building. Rule 2305 requires warehouse operators to annually report the truck traffic visiting their warehouse. The truck traffic visiting a warehouse each year is a proxy for the NOx and DPM emissions associated with that warehouse operation. To reduce these emissions, the truck traffic visiting each warehouse is used to determine a specified number of points a warehouse operator must earn annually. To earn points, warehouse operators can choose from a variety of actions that reduce NOx and DPM emissions, such as acquiring or using a zero-emission (ZE) or near-zero emissions (NZE) truck or installing or using electric chargers. Through the implementation of Rule 2305, warehouse operators were phased into the program over a 3-year period based on warehouse size,[1] with the stringency increasing over a subsequent 3-year period once that warehouse phase is implemented into the program.

This annual report provides information on rule implementation activities, including outreach, reporting, mitigation program, enforcement, program results and other rule-related activities, including updates on development and/or enhancement of the WAIRE Program Online Portal (POP).[2] Each annual report includes updates on the status of rule implementation based on WAIRE Program activities that occurred since the previous annual report. This 4th Annual Report for the WAIRE Program provides an overview of the WAIRE Program's implementation from rule adoption on May 7, 2021, through August 31, 2026. The annual report also identifies the anticipated next steps for Rule 2305 implementation for the following year.

[1] Pursuant to Rule 2305(c)(33), "warehouse size" means the indoor floor space, measured in square feet, of an individual warehouse building that may be used for warehousing activities. There may be scenarios where the building's "warehouse size" does not equal the total square feet within the building.

[2] This 4th Annual Report for the WAIRE Program is prepared pursuant to South Coast AQMD's May 7, 2021 Governing Board Resolution No. 21-9.

WAIRE Program Implementation Update

Goods Movement Industry in South Coast AQMD

South Coast AQMD encompasses approximately 10,743 square miles and is home to the nation's largest marine port complex - the Ports of Los Angeles (POLA) and Ports of Long Beach (POLB) (collectively referred to as Ports). These twin Ports serve as a critical gateway for international trade, handling about 31% of the containerized waterborne imports entering the United States (U.S.) through U.S. ports.[3] The goods movement sector experienced significant volatility after rapid growth in 2021-2022, as evidenced by cargo container volumes processed through the San Pedro Bay ports. Following the peak in 2022, the ports saw twenty-foot equivalent units (TEUs) volume decline as consumption patterns normalized. In 2024 and 2025, the ports saw a rebound in TEU movement. While TEU volumes at the ports may vary significantly from year to year, the TEU trucking/rail transportation mode split has remained consistent.[4, 5] The Alameda Corridor Transportation Authority reported that during 2025, approximately 30% of the Ports containers were transported by rail through the Alameda Corridor, while the remaining 70% were moved by trucks, typically to warehouse facilities throughout the region. While TEU volumes at the ports may vary significantly from year to year, and even from month to month, the distribution between truck and rail has remained relatively consistent (Figure 1). The combined throughput of the Ports in 2025 reached a new record of approximately 20.12 million TEUs in 2025, 1% higher and 20% higher than what was reported in 2024 and 2023, respectively. The Ports monthly activity varied throughout 2025, with importers accelerating shipments ahead of the tariff changes announced in April. Monthly volumes fell below the annual average in May and June before strengthening in the second half of the year.[6]

The warehousing and logistics sector within South Coast AQMD's jurisdiction has continued to thrive since Rule 2305 was adopted and implemented, consistent with analysis in the Final Socioeconomic Impact Analysis for Rule 2305.[7] Based on CoStar Data, during the past 10 years (2015-2025), the total inventory of industrial facility buildings, larger than 100,000 square feet that may be used for warehousing, increased by 675 to 3,701 , the total area of these buildings increased by 30% to 955 million square feet (Figure 2), and the direct rent prices increased by 133% to $15.49 per square foot (Figure 3).[8]

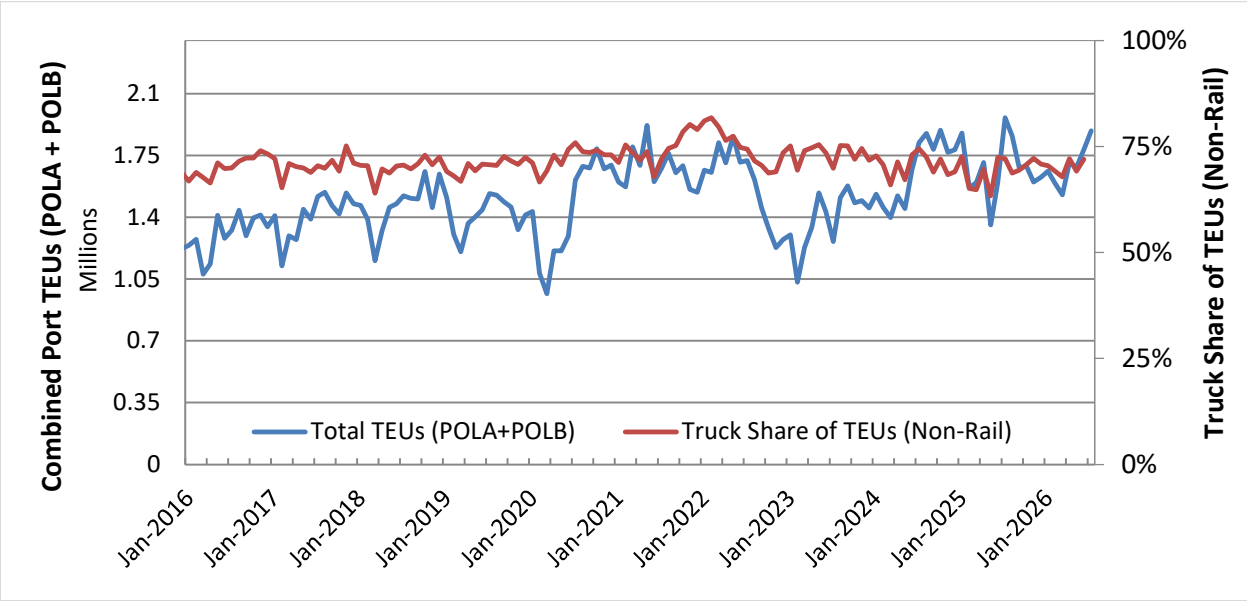

Figure 1: San Pedro Bay Ports Twenty-Foot Equivalent Units (TEU) Throughput and TEUs by Trucks

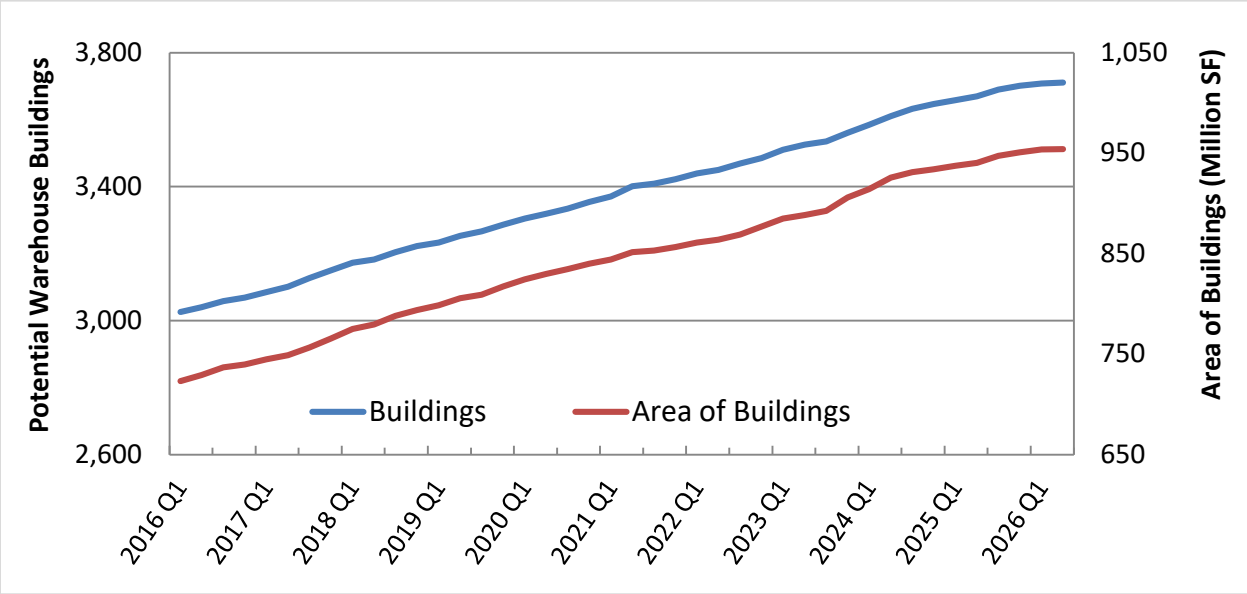

Figure 2: Total Building Area and Number of Potential Warehouse Buildings in South Coast AQMD Jurisdiction Area from 2015 to 2025

After years of accelerated development and record deliveries of new warehouses in 2022 and 2023, a decline in consumer spending on goods, geopolitical tension and tariffs, have increased the availability of warehouse space and driven down rental prices.[8] In the South Coast AQMD jurisdiction area, the vacated area to total inventory area ratio increased from 8.2% in Q1 of 2025

to 9.2% in Q4 of 2025.[9] In the same time frame, the direct rent decreased from $15.72 to $15.49 per square foot (Figure 3). More recent information for the first six months of 2026 shows that the vacancy rate remains at about that level.

A similar trend is observed in other major warehousing and logistics markets. However, the multitude of contributing factors over the last year makes it difficult to generalize a market-wide trend, with some markets demonstrating greater susceptibility to these pressures than others due to the complex interactions between local and national conditions. Nevertheless, when compared on a general basis, the vacancy rate in our region remains lower, and rents remain higher, than in other regions around the U.S. (Figure 4).

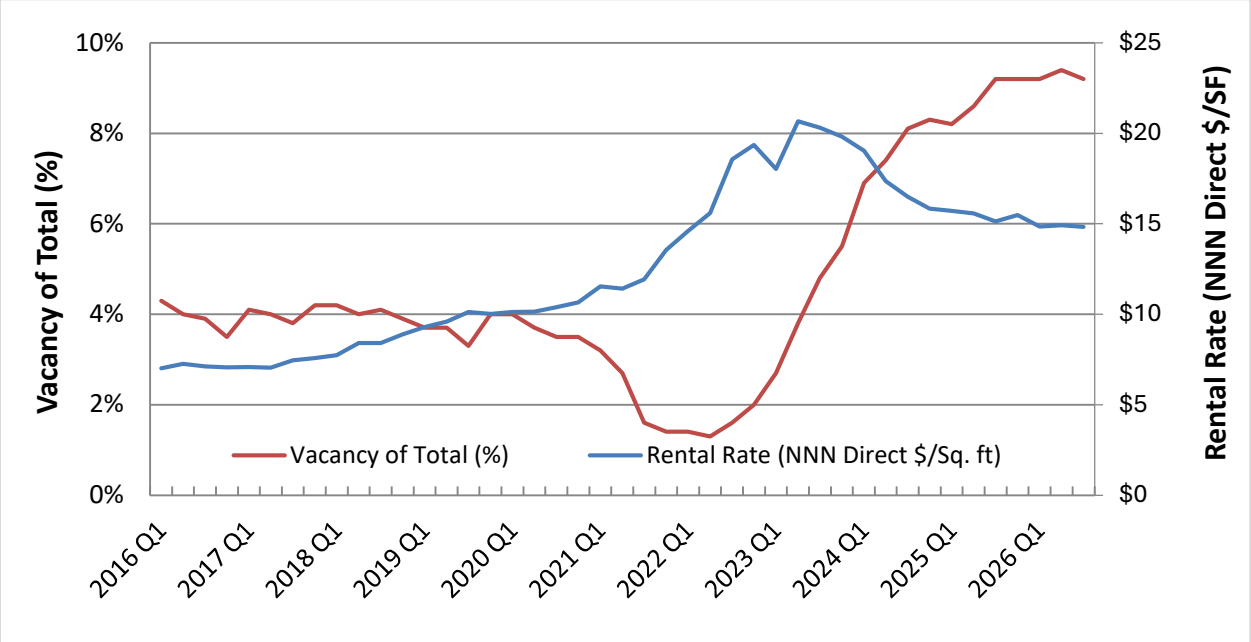

Figure 3: Quarterly Vacancy Rate and Rental Price in South Coast AQMD Jurisdiction Area

[9] Source: CoStar data. Queried on 09/01/2026. Vacancy is based on 'Vacant Percent % Total' values.

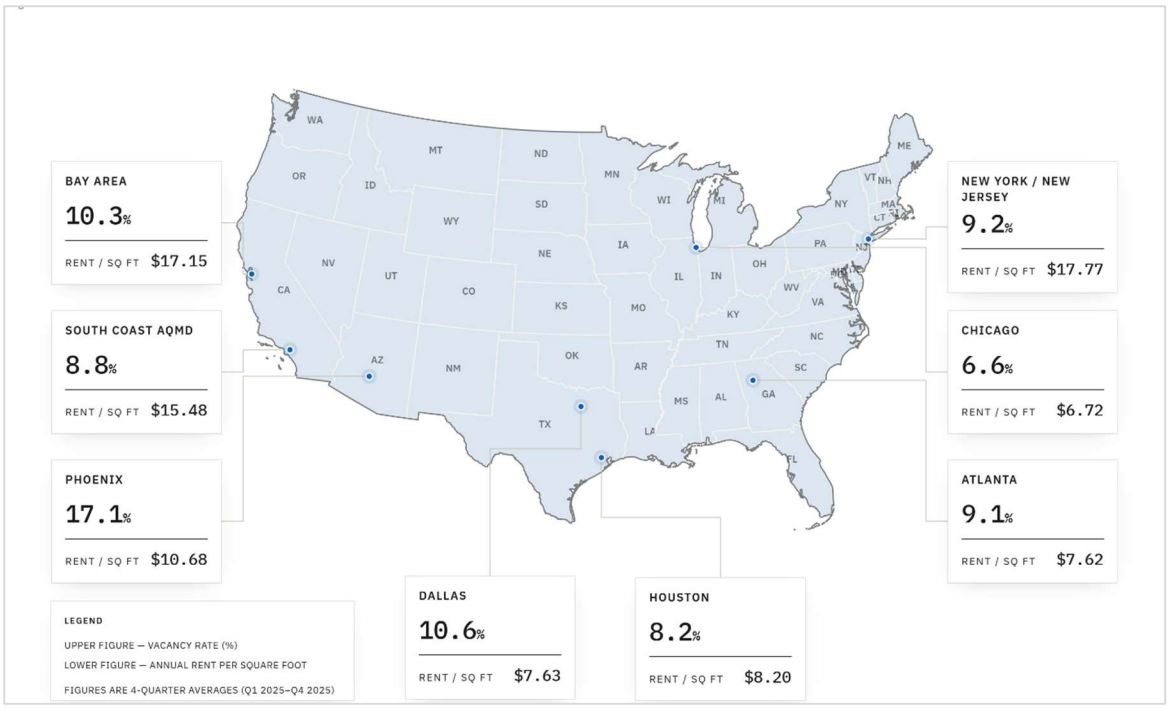

Figure 4: National Overview of 2025 Annual Average Vacancy Rate and Rent Price

Warehouse Building Population Potentially Subject to the WAIRE Program

At the time of rule adoption in 2021, South Coast AQMD staff estimated that approximately 3,320 warehouses may be subject to Rule 2305 requirements.[10] However, not all of these warehouses were expected to be required to earn WAIRE Points if they did not conduct the requisite amount of "warehousing activities" as defined in Rule 2305. For example, recording studios, manufacturing, and retail facilities are typically not considered warehousing activities for the purpose of the rule, but may be in industrial buildings larger than 100,000 square feet.[11] These larger buildings may still be subject to limited reporting of basic facility information.

Recognizing that construction of new warehouses has continued since rule adoption (Figure 2) the estimate of the potential warehouse universe subject to Rule 2305 has been updated for this Annual Report. Based on August 2026 CoStar data, the potential warehouse inventory increased in all three warehouse phases since rule adoption (Figure 5).

[10] The data and the methodology that led to this estimation are described in detail in Appendix C of the Final Staff Report.

[11] In addition, some warehouses may change tenants through time, with some tenants conducting warehousing activities subject to WAIRE Points requirements, while others do not. Thus Rule 2305 requires basic reporting from a larger group of entities than just those conducting warehousing activities in order to determine who needs to earn WAIRE Points.

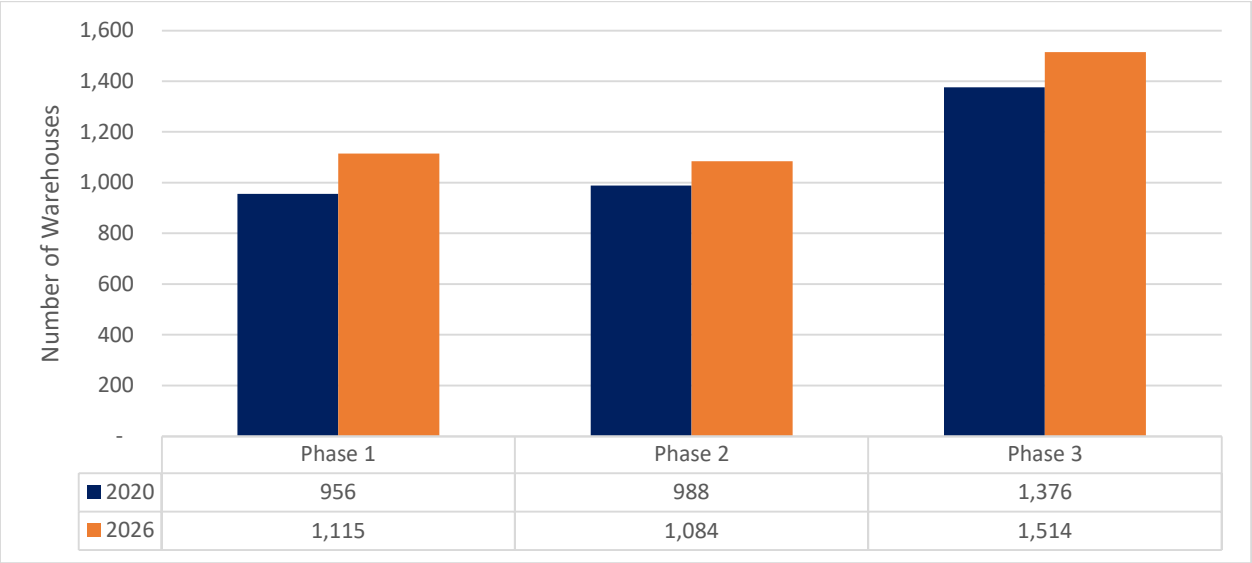

Figure 5: Potential Warehouse Buildings in 2020 vs 2025 Subject to Rule 2305 by Phase, Based Only on Data Available from CoStar

Additional warehouses were identified through reports submitted by warehouse owners and operators, increasing the population to 4,051 warehouses (Table 1). Table 1 also identifies the minimum number of Initial Site Information Reports (ISIRs) and Annual WAIRE Reports (AWRs) expected to be submitted per phase, according to data collected up to August 31, 2026. The number of ISIRs and AWRs differ from the warehouse buildings because there can be multiple operators in a single building, and each operator has its own reporting obligation. There are fewer AWRs required than ISIRs because some operators use less than 50,000 square feet for warehousing activities, exempting them from the need to earn WAIRE Points and filing AWRs. Further details about these figures can be found in Appendix G.

Table 1: Potential Universe of Warehouse Buildings and Expected Reports[1]

Criteria	Phase 1 (≥250,000 sf)	Phase 2 (≥150,000 - <250,000 sf)	Phase 3 (≥100,000 - <150,000 sf)	Total
Total Potential Building Universe [2]	1,202	1,170	1,679	**4,051**
Minimum Number of ISIRs Expected	1,288	1,388	2,346	**5,022**
Minimum Number of AWRs Expected for 2025	1,269	1,334	1,036	**3,639**

[1] Further detail on the methodology can be found in Appendix G.

[2] Values shown in this row are higher than Figure 5 due to additional facilities identified through Rule 2305 reporting.

Figure 6 identifies the locations of the warehouses potentially subject to Rule 2305. The potential implementation phase of each warehouse is color-coded in this figure.

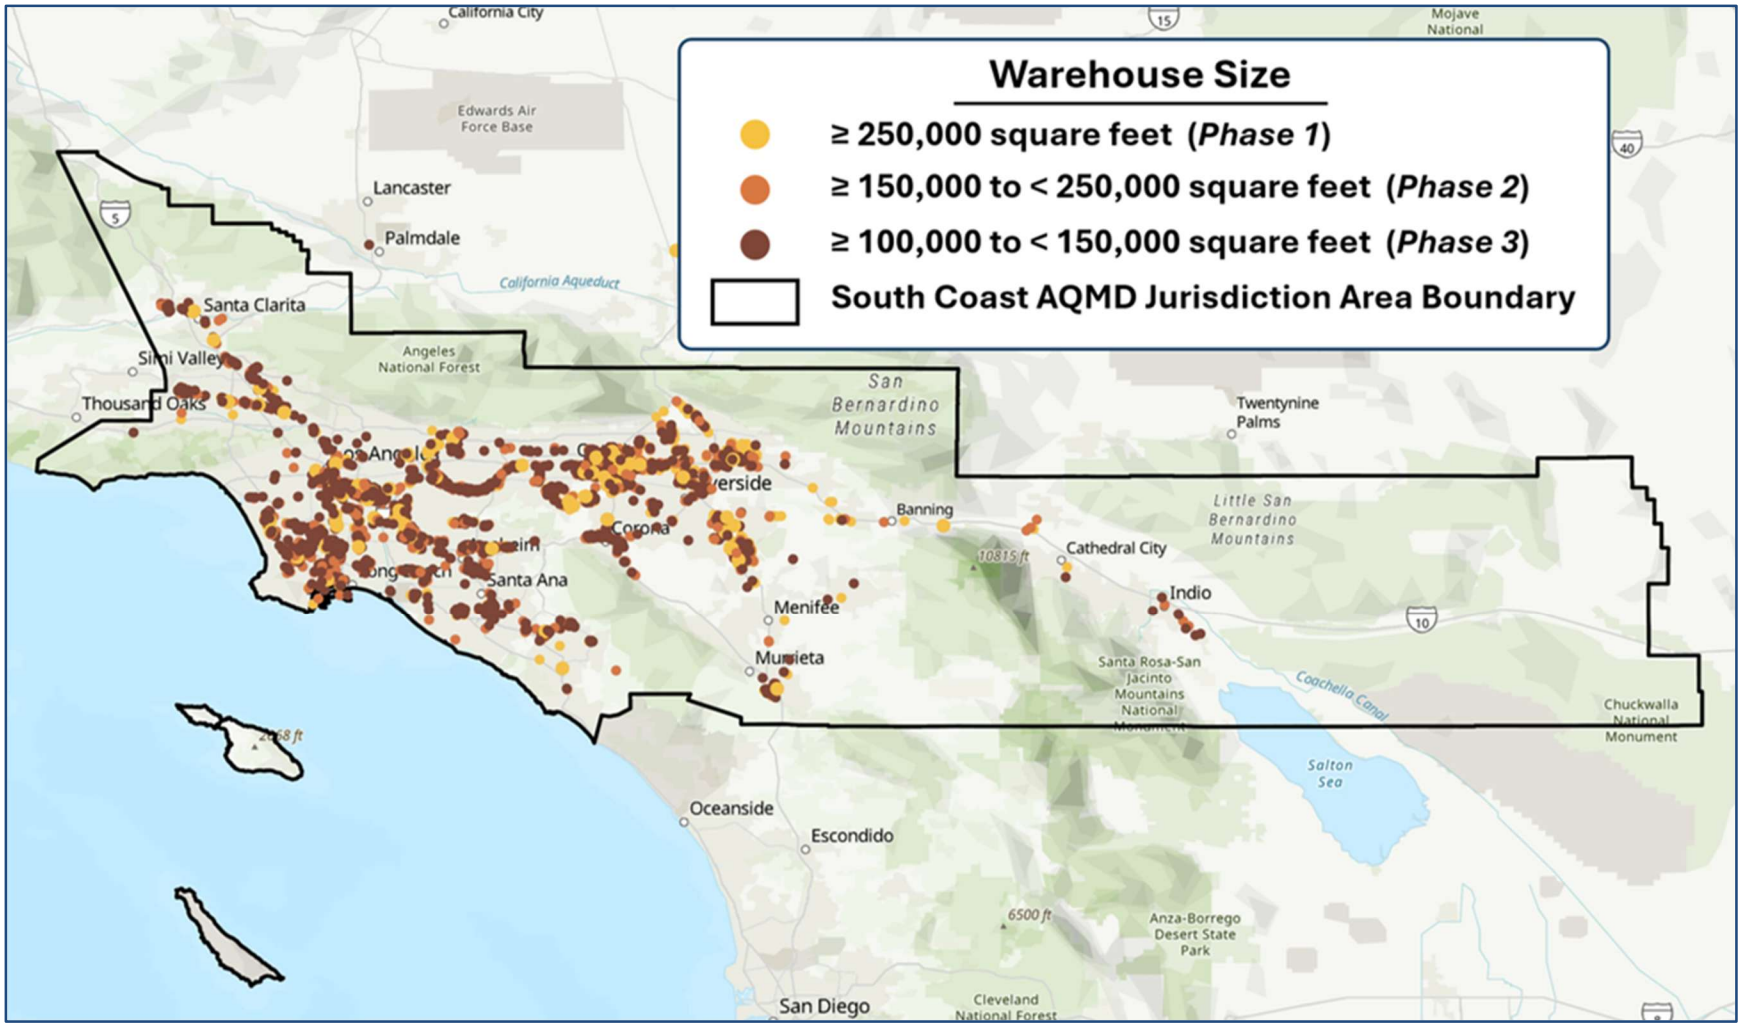

Figure 6: Potential Warehouse Locations Subject to Rule 2305

WAIRE Program Reporting Overview

Warehouse facility owners and operators subject to Rule 2305 are required to submit reports to South Coast AQMD to provide details on their applicable warehouse operations and compliance.[12] Table 2 provides an overview of the reporting requirements for the first three years of Rule 2305's implementation. The full implementation schedule continues through January 31, 2027, when all three phases of warehouses will have to meet their full compliance obligation.

Table 2: Rule 2305 Reporting Overview

		Warehouse Facility Owners	Warehouse Operators			
Phase	Warehouse Size (Square Feet)	Warehouse Operations Notification (WON) Due Date[1]	Initial Site Information Report (ISIR)		Annual WAIRE Report (AWR)	
			Reporting Period	1st Due Date	1st Compliance Period	1st Due Date[2]
1	≥250,000	September 1, 2021[3]	Previous 12 Months and Anticipated for AWR	July 1, 2022	January 1, 2022 – December 31, 2022	January 31, 2023
2	≥ 150,000 - <250,000		Previous 12 Months and Anticipated for AWR	July 1, 2023	January 1, 2023 – December 31, 2023	January 31, 2024
3	≥100,000 - <150,000		Previous 12 Months and Anticipated for AWR	July 1, 2024	January 1, 2024 – December 31, 2024	January 31, 2025

[1] WON is the only required reporting obligation for warehouse facility owners subject to Rule 2305, see Rule 2305(d)(7)(A).
[2] If the warehouse operator vacates the warehouse during the compliance period, the AWR is due the date the operator leaves.
[3] Or within 14 days of operator change or 30 days after renovation that changes the square footage.

Warehouse Operations Notification (WON)

Warehouse facility owners of warehouse buildings with 100,000 square feet or more of indoor floor space in a single building are required to submit a Warehouse Operations Notification (WON). The initial due date for submitting the WON to South Coast AQMD was September 1, 2021.[13] Owners must also file a WON within 14 days of when a new operator has the ability to use at least 50,000 square feet in a warehouse with at least 100,000 square feet used for warehousing

[12] All WAIRE reports must be submitted through the WAIRE POP online reporting software, https://xappp.aqmd.gov/isr
[13] Rule 2305 sets forth requirements for warehouse facility owners to submit updated WON reports in a timely manner if warehouse operators change, if renovations occur and certificates of occupancy are provided, or if a formal request is made by South Coast AQMD. See Rule 2305(e)(1).

activities, within 30 days after a renovation receives a certificate of occupancy that changes the space available for warehousing, or within three days of an Executive Officer Request.

Information required in the WON includes, but is not limited to, the following:

- Warehouse location and building size
- Name and contact information of warehouse owner(s) and lessee(s)
- Start and end date of each lease, square footage used by each lessee, and square footage that may be used for warehousing activities by each lessee

About 200 WONs have been submitted since last year's Annual Report. Through August 31, 2026, a total of approximately 1,558 WONs have been received, covering 2,585 warehouses.[14] This represents about 64% of the total expected warehouse population shown in Table 1 above.[15] The majority of warehouses include one tenant, however there are many warehouses with multiple tenants. Figure 7 shows the distribution of tenancy of the 2,585 warehouses with a WON.

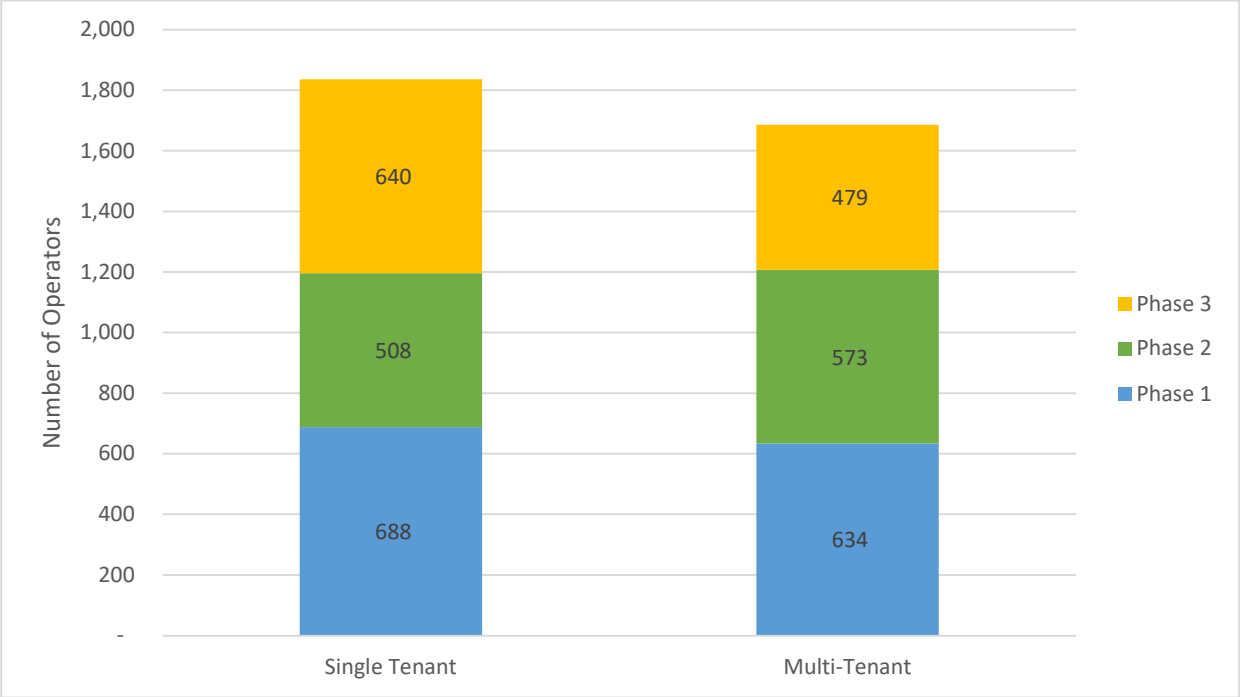

Figure 7: Number of Operators in Single vs Multi-Tenant Warehouses

[14] A single report submittal may include multiple warehouse facilities.

[15] South Coast AQMD plans to continue conducting targeted outreach to the remaining warehouse facility owners that have not submitted a WON. Additional compliance and enforcement actions will be pursued to ensure complete reporting from all applicable facilities as required by the rule.

Initial Site Information Report (ISIR)

Warehouse operators are required to submit an ISIR. There are cases where a warehouse operator may not be required to earn WAIRE Points and would only need to submit an ISIR with limited information.[16] See Figure 8 for details on ISIR applicability for warehouse operators.

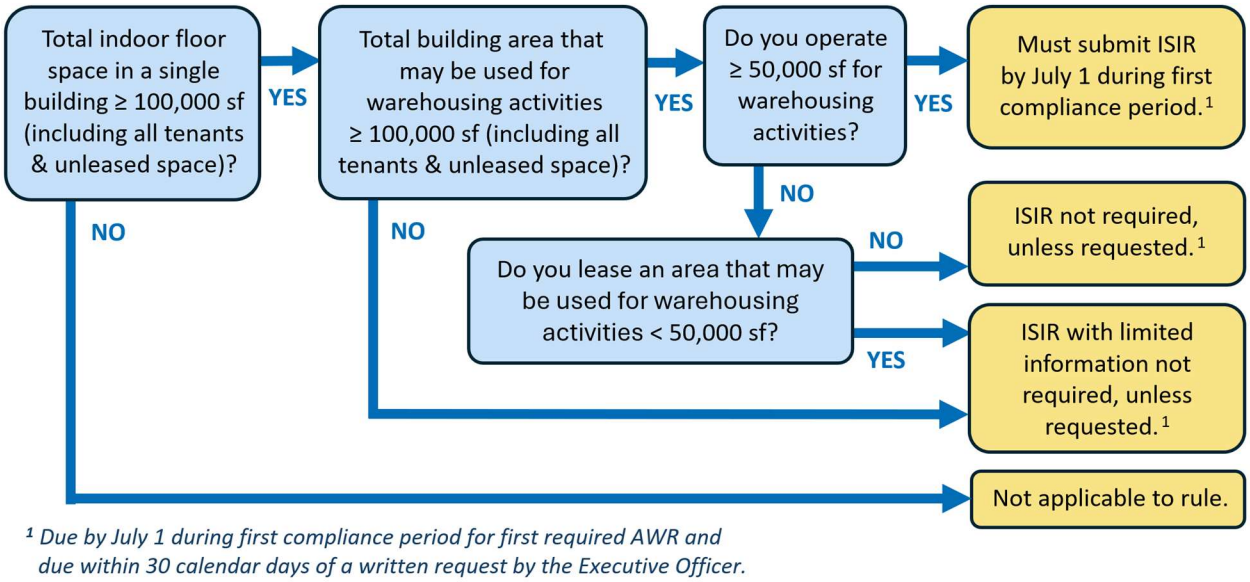

Figure 8: Simplified Flow Chart for Warehouse Operators' ISIR Applicability

Example information required in the ISIR includes, but is not limited to the following:

- Total indoor floor space, in square foot, of the warehouse building and the amount of building area, in square feet, that may be used for warehousing activities
- Truck trip data from the previous 12-month period and an estimate of the number of truck trips for their upcoming AWR
- Fleet information (owned and/or leased), including on-road trucks or tractors and yard trucks used at the facility
- Onsite charging or alternative fueling stations
- Onsite alternative energy generation or energy storage equipment
- Anticipated actions and/or investments the warehouse operator anticipates using to comply with the WAIRE Points Compliance Obligation (WPCO)

As shown in Table 2, all warehouse operators must have already submitted at least one ISIR.[17] Table 3 lists the total number of ISIRs received by South Coast AQMD for the 2025 and 2026 compliance periods as of August 31, 2026.

[16] As an example, if an operator is in a warehouse building greater than 100,000 square feet, but less than 100,000 square feet of that building can be used for warehousing activities (e.g., the remaining space is used for offices), then an ISIR that only includes limited information is required. See Rule 2305(b) and Rule 2305(e)(2)(A).

[17] ISIRs are a one-time report that were required from all operators when the rule first was phased in. A one-time ISIR is also required in the future for any warehouse operator in their first year of operations at a warehouse.

Table 3: ISIRs Received for the 2025 and 2026 Compliance Periods[1]

Criteria	Phase 1 (≥250,000 sf)	Phase 2 (≥150,000 - <250,000 sf)	Phase 3 (≥100,000 - <150,000 sf)	Total
Only Limited Information Required	8	15	238	261
Full Information Required	134	124	102	360
Total	142	139	340	621

[1] Further detail can be found in Appendix G.

See Appendix A for a comparison of all ISIRs received and the potential universe subject to Rule 2305 by phase, including the additional buildings identified in the WONs.

Out of 621 ISIRs received, 261 ISIRs were submitted with limited information as allowed by Rule 2305(e)(2)(A)(i) and (ii) or were otherwise exempt from Rule 2305. An ISIR with limited information includes basic information about the warehouse (i.e., warehouse size and the square footage that may be used for warehousing activities) and contact information. These operators are not required to earn WAIRE Points or submit AWRs.

The ISIR is intended to be a planning exercise to assist the warehouse operators and South Coast AQMD in identifying the anticipated mechanisms that will be used for compliance. ISIRs are also a primary means for South Coast AQMD to collect basic information about regulated entities. 360 ISIRs were submitted by warehouse operators who reported that they would earn an anticipated total of 64,613 WAIRE Points in their first year of implementation.[18] Mitigation fees account for 6.2% of the anticipated WAIRE Points, totaling approximately $4 million. The anticipated aggregate WPCO for ISIRs received is approximately 16,039 WAIRE Points. A complete list of the anticipated WAIRE Points to be earned by each WAIRE Menu action is provided in Appendix A.

Annual WAIRE Report (AWR)

Warehouse operators fully applicable to the WAIRE Program must submit AWRs. AWRs may also be submitted by a warehouse facility owner if they chose to voluntarily earn WAIRE Points at an applicable warehouse location.[19] AWRs must be submitted by January 31 following the compliance period when the WAIRE Points were earned. If a warehouse operator vacates a warehouse before the AWR due date in any compliance period, they must submit an AWR no later than the date they vacate the warehouse. Figure 9 details the circumstances in which a warehouse operator must submit an AWR.

[18] This excludes ISIRs with limited reporting requirements, as those ISIRs are not required to earn WAIRE Points. This is subject to final auditing by South Coast AQMD.

[19] Pursuant to Rule 2305(d)(6)(C), warehouse facility owners may transfer earned WAIRE Points to a warehouse operator at the warehouse facility at which the WAIRE Points were earned.

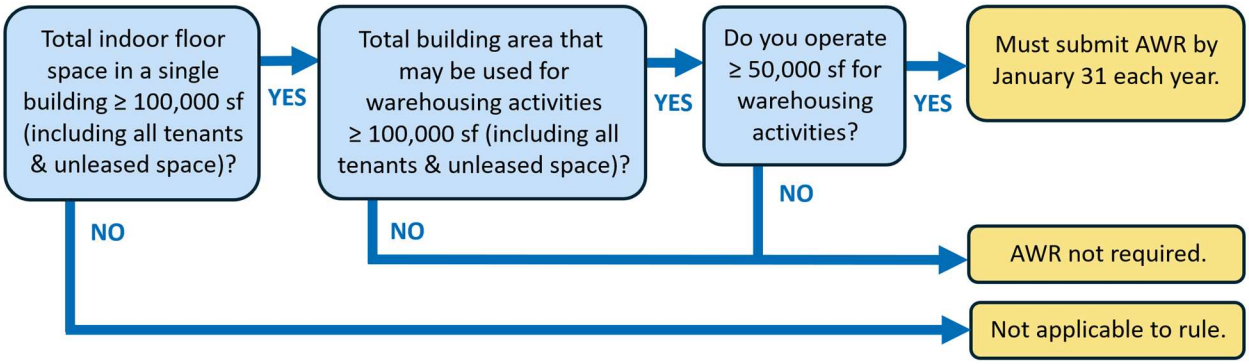

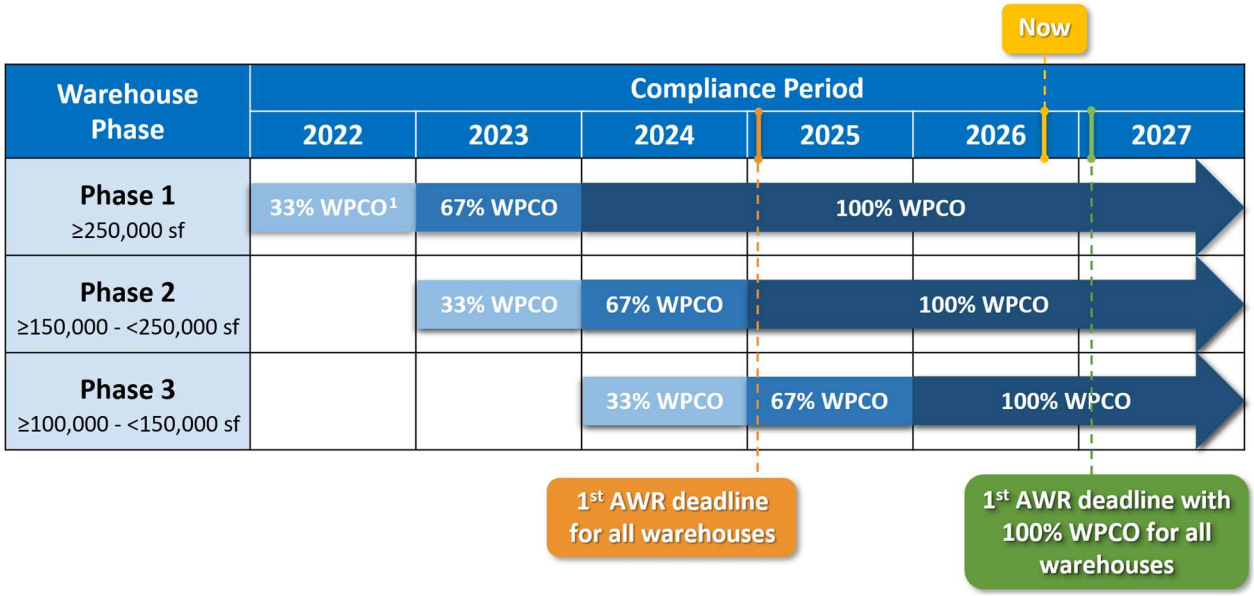

Figure 9: Simplified Flow Chart for Warehouse Operators' AWR Applicability

Key information in each AWR includes the following:

- The number of truck trips entering/exiting the warehouse site for the compliance period, including the number of truck trips based on the truck weight classification grouping (Class 2b-7 and Class 8).
- Details showing how WAIRE Points were earned to satisfy the WPCO including:
  - Each WAIRE Menu action
  - Actions in an approved Custom WAIRE Plan (CWP)
  - WAIRE Points transferred from another site or banked from a previous year
  - Mitigation fees (see "WAIRE Mitigation Program" for more details)

Warehouse operators in Phase 1 were required to submit their first AWR by March 2, 2023. Phase 2 operators were required to submit their first AWR by January 31, 2024. Phase 3 operators were required to submit their first AWR by February 14, 2025.

Rule 2305 establishes a phased implementation schedule for the WPCO, which is reported through the AWR. The phase-in continues through January 31, 2027. As shown in Figure 10, the WAIRE Program is currently in the fifth year of a five-year phased implementation schedule for the AWRs. Once a warehouse operator begins submitting AWRs, they are required to submit a new AWR every year until Rule 2305 sunsets.

[1] WAIRE points compliance obligation (WPCO).

Figure 10: WAIRE Points Compliance Obligation Phase-In Schedule

Table 4 shows the number of AWRs received by South Coast AQMD by phase and compliance period as of August 31, 2026, as well as the estimated number of AWRs that are expected based on the potential universe. Since the last Annual Report, the number of AWRs that have been submitted late for compliance periods 2022, 2023, and 2024 has increased by 53, 69, and 144, respectively. More details on the reporting rates are included in Appendix B.

Table 4: AWRs Received by Phase and Compliance Period

	Compliance Period				
Phase	**2022**	**2023**	**2024**	**2025**	**Total**
Phase 1	717	719	728	679	2,843
Phase 2		416	444	417	1,277
Phase 3			373	355	728
Total	717	1,135	1,545	1,451	4,848
Estimated Number of AWRs Expected[1]	1,188	2,562	3,619	3,639	11,008

[1] Further details can be found in Appendix G. This table reflects the latest potential operators for the WAIRE Program, based on the best available data from CoStar, site visits, and facility-submitted data at the time of annual report preparation. These values are expected to change over time due to normal fluctuations in the warehousing industry, including changes in facility operations, ownership, leasing activity, and building use. Accordingly, potential operators should be considered a dynamic estimate rather than a static count.

The staff report analysis for Rule 2305 anticipated that the total WPCO, representing the total number of WAIRE Points the warehouse operators would be required to earn to offset warehouse

activities, across all warehouse operators during the first four compliance periods would be 1,646,967.

The reported WPCO is based on the total annual truck trips reported in 4,848 AWRs by 1,751 warehouse operators. During the program's first four compliance periods, these warehouse operators reported a total WPCO of approximately 634,743 WAIRE Points, which is significantly less than the total WPCO anticipated in the staff analysis.

During the program's first four compliance periods, the warehouse operators who submitted AWRs reported earning a total of approximately 1,946,121 WAIRE Points across all compliance options, which is three times more than the total reported WPCO. [20] Total WAIRE Points earned to date are about 18% higher than was estimated to be earned at the time of rule adoption.

[20] This figure does not account for WAIRE Points reported in Early Action AWRs. Details on these reports can be found in Appendix C. WAIRE Points earned in excess of the warehouse operator's WPCO in one compliance period may be banked for use in any of the next three compliance periods, after which they expire. Excess WAIRE Points earned for one warehouse may also be transferred to another of that operator's warehouses during that compliance period.

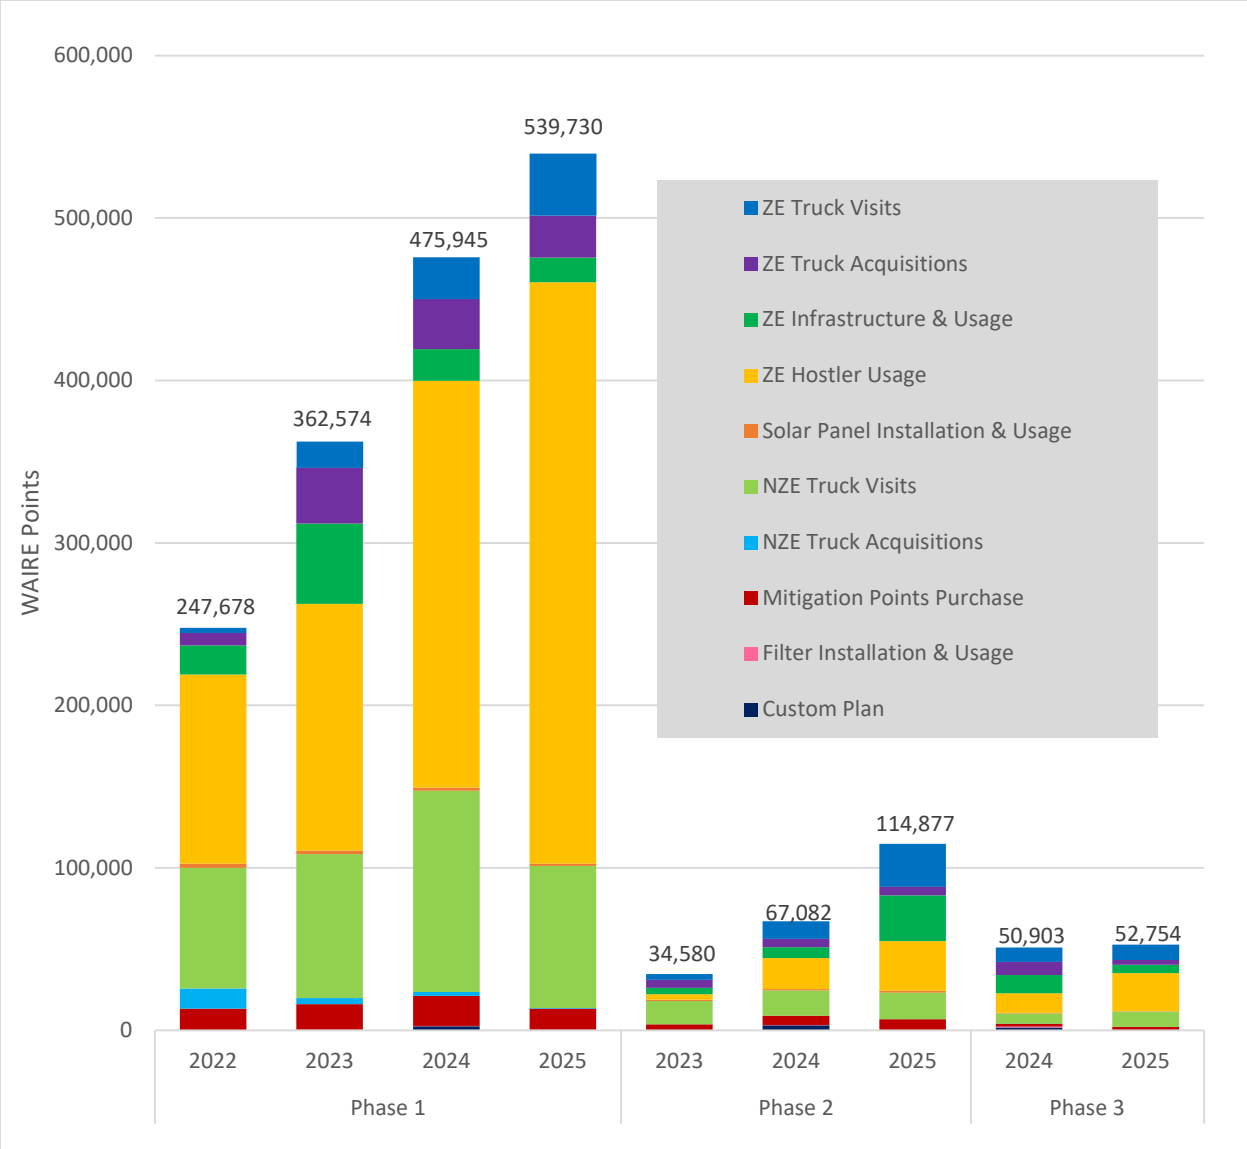

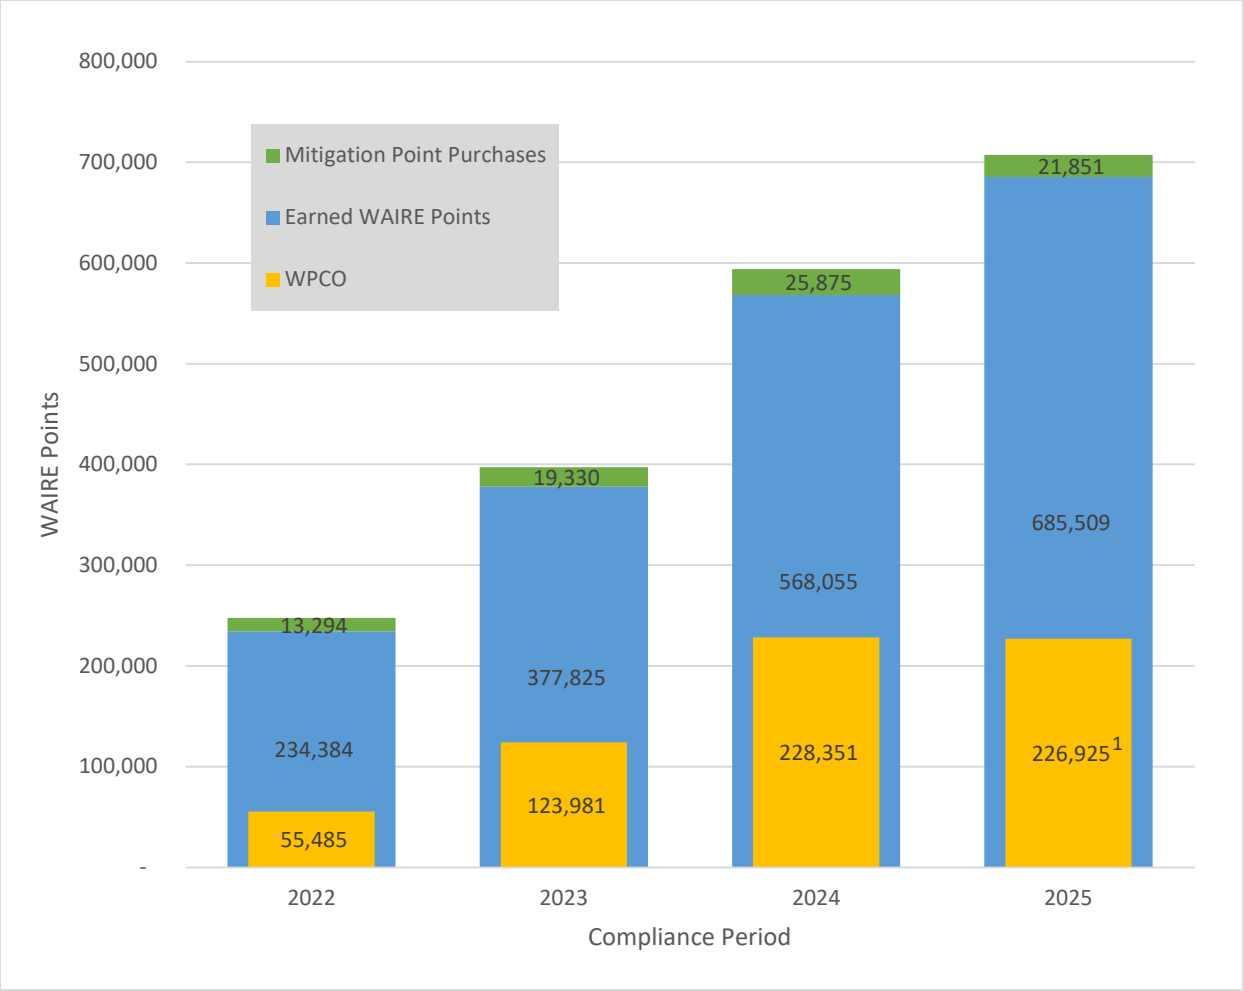

Figure 11: Total WAIRE Points Earned by Phase and Compliance Period for Operators Who Submitted an AWR

[1] While 1,545 AWRs have been received for compliance period 2024, only 1,451 have been received for compliance period 2025 as of August 2026. The WPCO for 2025 is expected to increase as additional AWRs are received.

Figure 12: WPCO, Earned WAIRE Points, and Mitigation Fee Points by Compliance Period for Operators Who Submitted an AWR

Figure 11 provides an overview of the WAIRE Menu actions and Mitigation Fee Points selected by warehouse operators who submitted the AWRs. ZE hostler usage (i.e., yard tractors that move trailers and containers around warehouse facilities) accounts for about 50% of the reported total WAIRE Points earned across all compliance periods. Additional major categories were NZE truck visits (~22%), ZE infrastructure & usage (~8%), and ZE truck visits (~7%).[21] A complete list of all the WAIRE Points by category are provided in Appendix B. Figure 12 shows a comparison of the total WPCO with the total number of earned WAIRE Points and mitigation fee points broken down by compliance period.

[21] Subject to final auditing by South Coast AQMD.

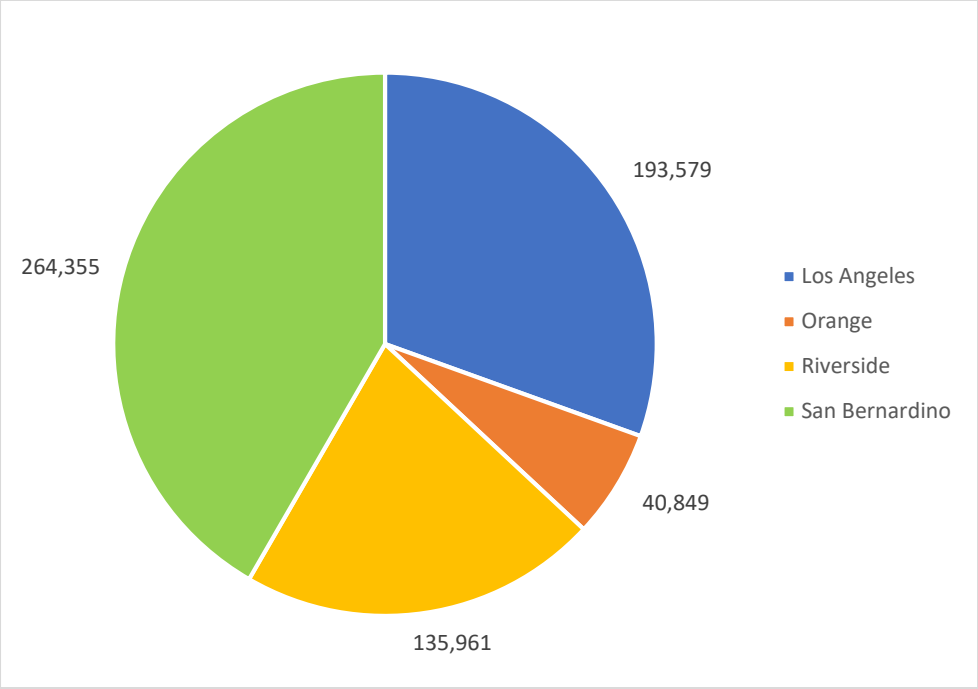

Figure 13:WPCO in the 2022-2025 Compliance Period by County

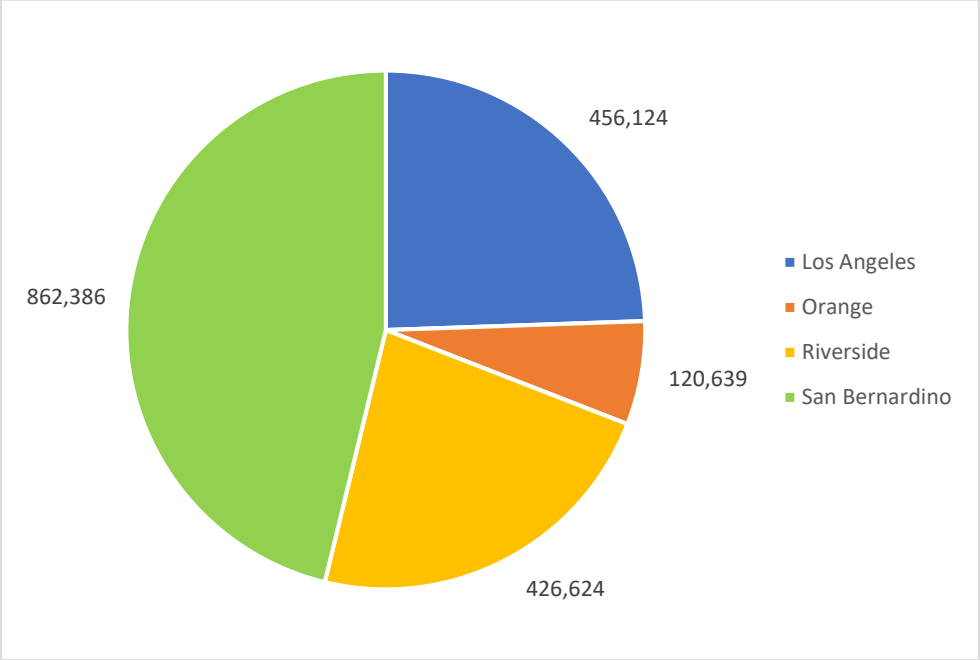

Figure 14: Earned WAIRE Points in the 2022-2025 Compliance Period by County

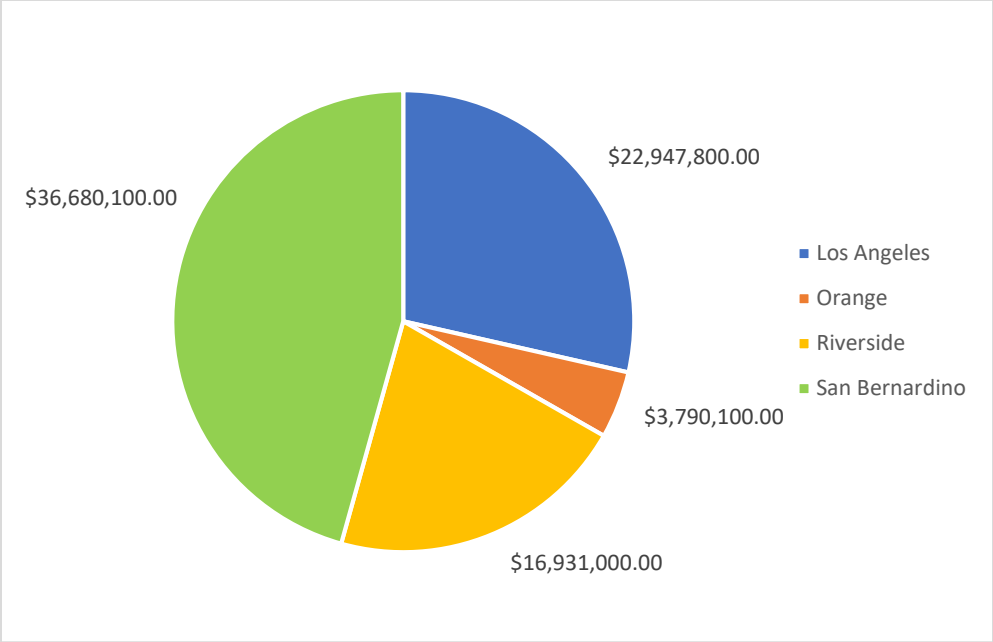

Figure 15: Mitigation Points Purchased in the 2022-2025 Compliance Period by County

Figures 13 and 14 respectively show the breakdown of WPCO and reported WAIRE Points earned for the 2022 through 2025 compliance periods by county. In lieu of earning points from the WAIRE Menu or through CWPs, warehouse operators may elect to earn WAIRE Points by paying a mitigation fee of $1,000 per WAIRE Point. Mitigation fees paid by warehouse operators in each county are shown in Figure 15. Warehouse operators reported approximately $80.3 million in mitigation fees, of which $79.3 million have been received, that accounts for 4% of the total WAIRE Points earned through the AWRs over the first four compliance periods.[22]

AWRs Submitted by Warehouse Owners

Per Rule 2305, warehouse owners may voluntarily earn WAIRE points on behalf of a warehouse operator that is leasing space in their building. This provision was included in Rule 2305 because some actions within the WAIRE Menu, such as solar panels and EVSE installation, may be controlled or financed by the warehouse building owner rather than the warehouse operator. To earn WAIRE Points, warehouse owners must submit an AWR by January 31 of the year after the WAIRE Points actions took place. Once the points are earned, the warehouse owner may transfer points to the warehouse operator(s) to help them meet their compliance obligation(s).

As of August 31, 2026, 57 warehouse owners have submitted 59 AWRs throughout the 2022 to 2025 compliance period, earning a total of 7,397 WAIRE Points, in addition to the 1,946,120 WAIRE Points earned by warehouse operators. Figure 16 shows the distribution of points earned by warehouse owners.

[22] Pursuant to Rule 316, there is also a 6.25% administrative fee associated with the mitigation fee. This results in an additional $5 million in fees that South Coast AQMD will use to administer the WAIRE Mitigation Program.

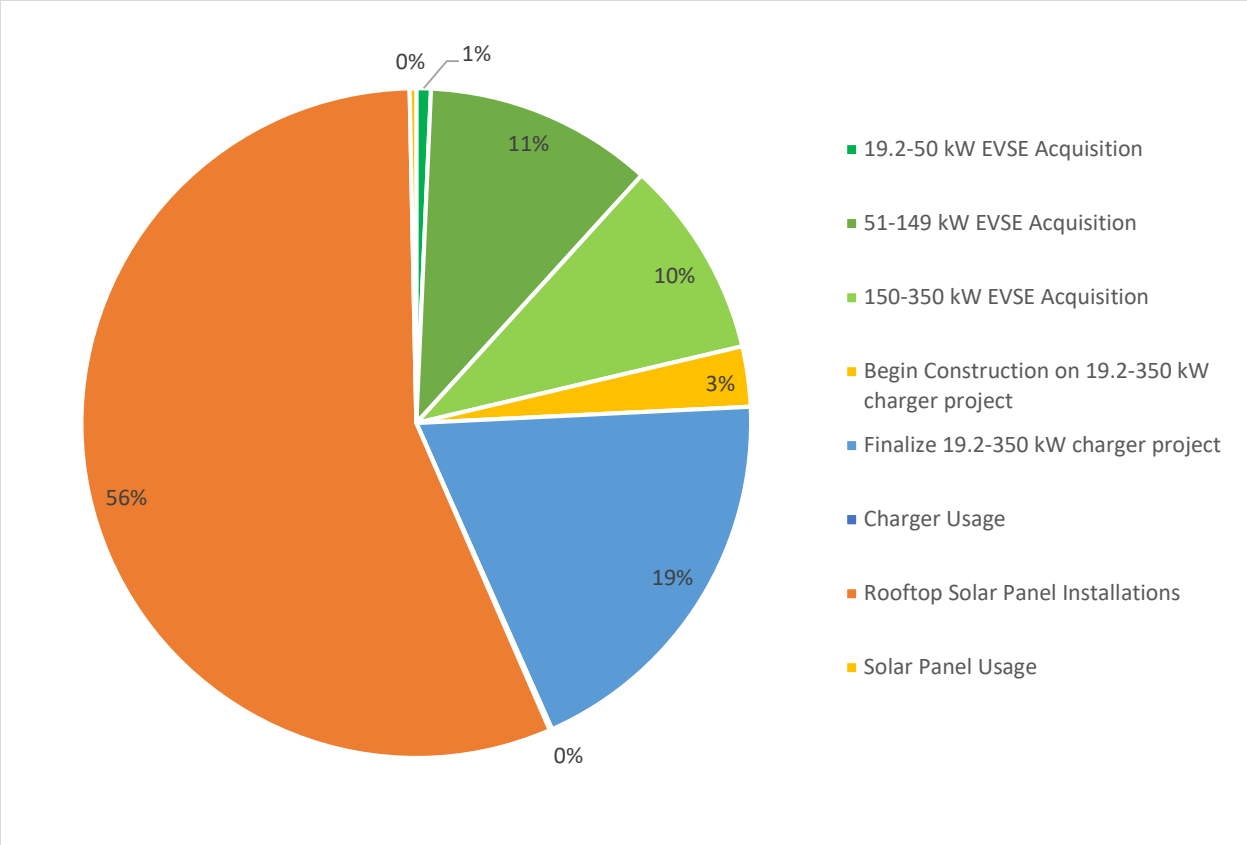

Figure 16: Percentage of WAIRE Points Earned by Warehouse Owners by WAIRE Menu Items

WAIRE Mitigation Program

In the Governing Board Resolution adopting Rule 2305, staff were directed to develop a WAIRE Mitigation Program with the funds generated from mitigation fee payments from Rules 2305 and 316.[23] Rule 2305 may generate funds to the WAIRE Mitigation Program if a warehouse operator opts to offset their WPCO by purchasing mitigation fee points in their AWR submittal. Rule 316 generates revenue through administrative fees that warehouse operators must pay to support South Coast AQMD Rule 2305's compliance activities, including implementation of the WAIRE Mitigation Program.

As of August 31, 2026, a total of $80,349,000 in mitigation fees have been reported for all compliance periods. Of this amount, $79,305,800 was fully paid. The $80.3 million in mitigation fees reported include about $13,293,600 from Phase 1 operators for the 2022 compliance period, $19,329,500 from Phase 1 and 2 operators for the 2023 compliance period, $25,874,600 and $21,851,300 from all three phases for the 2024 and 2025 compliance periods, respectively.[24]

[23] http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf
[24] Total amount may vary after amendments are finalized and/or refunds are issued. Subject to final auditing by South Coast AQMD.

Additional mitigation fees are expected to be reported for the 2026 compliance period. The stringency of Rule 2305 continues to increase for the first five years of the WAIRE Program, increasing the WPCO and potentially the amount of mitigation fees purchased.

Source Receptor Areas (SRAs) are specific geographic regions used by South Coast AQMD to monitor and manage air quality within the jurisdiction that help assess localized pollution levels. Mitigation fees paid by warehouse operators are compiled and tracked according to the SRA, as shown in Table 5 and Figure 17, and county in which they are located.

Table 5: WAIRE Mitigation Program and Total Mitigation Fees Collected by Source Receptor Area and County

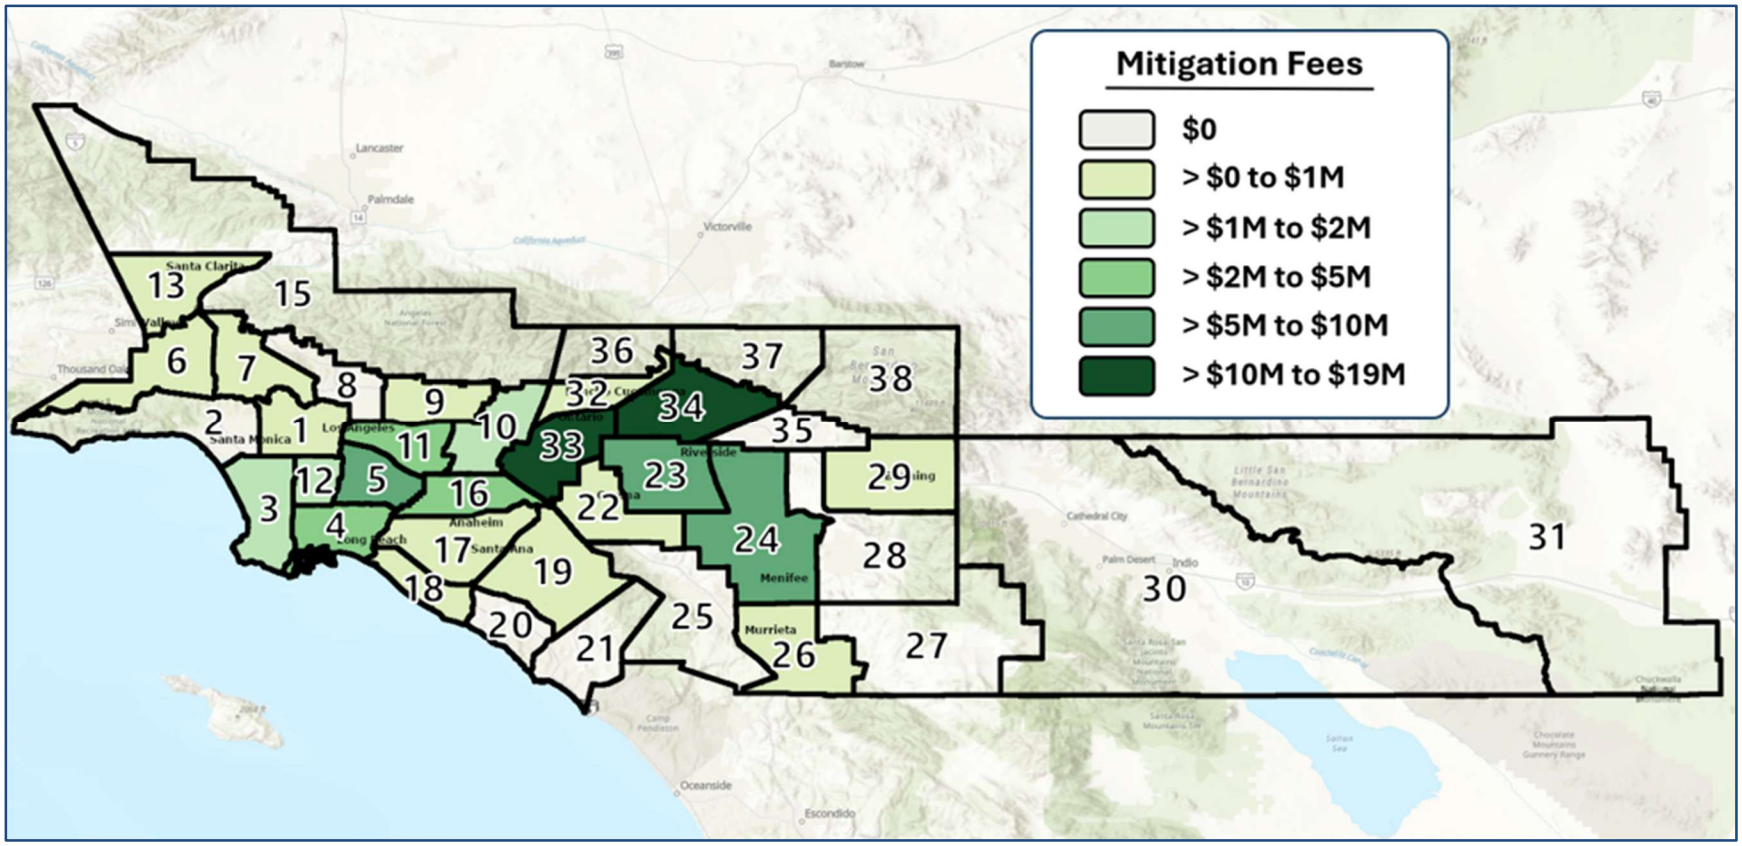

SRA #	SRA Description	Mitigation Fee Funds Available through the WAIRE Mitigation Program [1]	Additional Mitigation Fees Subsequently Collected	Total Mitigation Fees Collected [2]
Los Angeles County SRAs				
1	Central Los Angeles County	$681,900	$70,000	$751,900
2	Northwest Coastal Los Angeles Co.	$0		$0
3	Southwest Los Angeles County Co.	$1,460,300	$0	$1,460,300
4	South Coastal Los Angeles Co.	$4,254,900	$112,700	$4,367,600
5	Southeast Los Angeles Co.	$7,219,400	$739,200	$7,958,600
6	West San Fernando Valley	$585,700	$124,300	$710,000
7	East San Fernando Valley	$158,800	$380,100	$538,900
8	West San Gabriel Valley	$0	$0	$0
9	East San Gabriel Valley	$743,100	$10,700	$753,800
10	Pomona/Walnut Valley	$1,545,500	$18,700	$1,564,200
11	South San Gabriel Valley	$2,389,700	$174,400	$2,564,100
12	South Central Los Angeles Co.	$1,467,800	$29,600	$1,497,400
13	Santa Clarita Valley	$132,400	$0	$132,400
14 [3]	Antelope Valley	$0	$0	$0
15	San Gabriel Mountains	$0	$0	$0
Los Angeles County SRAs Total		**$20,639,500**	**$1,659,700**	**$22,299,200**
Orange County SRAs				
16	North Orange County	$2,581,300	$68,500	$2,649,800
17	Central Orange County	$887,800	$0	$887,800
18	North Coastal Orange County	$19,200	$28,400	$47,600
19	Saddleback Valley	$168,700	$0	$168,700
20	Central Coastal Orange County	$0		$0
21	Capistrano Valley	$0		$0
Orange County SRAs Total		**$3,657,000**	**$96,900**	**$3,753,900**

SRA #	SRA Description	Mitigation Fee Funds Available through the WAIRE Mitigation Program [1]	Additional Mitigation Fees Subsequently Collected	Total Mitigation Fees Collected [2]
Riverside County SRAs				
22	Corona/Norco Area	$837,200	$50,500	$887,700
23	Metropolitan Riverside County	$7,788,900	$246,800	$8,035,700
24	Perris Valley	$6,870,600	$356,200	$7,226,800

[1] The WAIRE Mitigation Funds were allocated by the Governing Board through Program Announcement PA2027-01 on September 4, 2026.

[2] Mitigation fees collected by SRA and County through 8/31/2026. Values are subject to change based on auditing and adjustment.

[3] SRA 14 Antelope Valley is not within South Coast AQMD's jurisdiction.

[1] Mitigation fees by SRA through 8/31/2026.

Figure 17: Total Mitigation Fees Collected by Source Receptor Area[1]

The WAIRE Mitigation Program will fund projects that achieve and/or facilitate emissions reductions in the same SRAs and counties in which the mitigation fees were paid. If sufficient projects are not identified in each individual SRA relative to the available funding, funds may be directed either to an adjacent SRA in the same county or held for a subsequent funding cycle.

On September 4, 2026, the Governing Board approved for the WAIRE Mitigation Program to allocate funds pursuant to Program Announcement PA2027-01. For this first year of the program, up to $73.1 million is available to support the purchase of new zero-emission Class 4-8 trucks, off-road yard trucks, and associated zero-emission charging and fueling infrastructure. The WAIRE Mitigation Program application portal opened for application drafting and saving on September 22, 2026. Applications were accepted beginning October 13, 2026, at 12:00 p.m. pacific standard time (PST) and the application period will close on December 15, 2026, at 12:00 p.m. PST. Applications are reviewed in the order received on a first-come, first-served basis for applicants that meet all requirements of the program. Awards are expected to be recommended to the Governing Board in the third quarter of 2027. Additional information is available on the WAIRE Mitigation Program website.[25]

Custom WAIRE Plans Applications

The WAIRE Program allows the submission of CWPs for innovative actions not listed in the WAIRE Menu. In 2023, staff evaluated eight CWP applications from eight facilities, ultimately approving three. The three approved plans were submitted by Maersk Warehousing & Distribution Services USA LLC (Maersk) and enable Maersk, in partnership with Prologis, to earn WAIRE Points for the construction and installation of 96 electric vehicle (EV) charging ports at an offsite yard (also known as the "Denker Yard") located in Torrance, CA. Figure 18 shows the EV charging ports installed at the Denker Yard and the ZE, battery-electric trucks operated by Maersk plugged into the charging stations. WAIRE Points continued to be earned from these CWPs in the 2024 compliance period but will not be earned in any future compliance periods.

Figure 18: Class-8 EV Truck Charging at Denker Yard

[25] https://www.aqmd.gov/home/programs/business/waire-mitigation-program.

In 2024, staff received, evaluated, and approved one CWP, submitted by United Airlines for their operations at their warehouse at LAX. This CWP allows United Airlines to earn WAIRE Points for the usage of three ZE battery-electric tow trucks and use of onsite ZE charging infrastructure for those electric tow tractors. WAIRE Points continued to be earned from this CWP in the 2025 compliance period.

In 2026, staff received two CWPs. This first CWP proposes that World Logistic Center – Building 6A would earn WAIRE Points for payment of their Settlement Agreement Air Quality Improvement Fee. Pursuant to Rule 2305 (d)(4)(B)(v), this CWP was available for public review 30 days prior to approval, from September 10, 2026 through October 10, 2026. The second CWP is being evaluated by staff and has not been posted for public review.

All of the CWPs that have been made available for public review are available online at: https://www.aqmd.gov/home/rules-compliance/compliance/waire-program/custom-waire-plans.

Administrative Fees

Rule 316 establishes the administrative fees for Rule 2305 to recover the costs associated with implementation of the WAIRE Program. South Coast AQMD staff estimate, based on the potential warehouse universe and the number of reports estimated in Table 1, that the administrative fee revenues should include a total of approximately $4.6 million for the submittal of WONs, ISIRs, and AWRs by the warehouse owners and operators since rule implementation.

Rule 316 was amended in May 2025 to introduce an Additional Post-Reporting Deadline Fee for WONs, ISIRs, and AWRs submitted after their deadline. This fee was adopted to recoup the cost of staff time required to process late reports. More information can be found in Table 1 of Rule 316(d).

As of August 31, 2026, South Coast AQMD has received approximately $2.7 million in administrative fee revenue based on the Rule 316 fee schedule. The revenue collected is expected to increase as the reporting/compliance rates continue to improve. Please see Appendix D: Estimate of Filing Fees from WAIRE Program Reporting for additional details.

Emissions Reductions

The submitted AWRs document the actions and/or investments that were completed by warehouse operators and/or owners to comply with the rule. The following actions completed by warehouse operators can be directly associated with emissions reduction: solar panel usage, NZE truck visits, ZE truck visits, and ZE hostler usage. Other actions completed by warehouse operators can help to facilitate emissions reductions, such as hydrogen (H_2) station usage, charger usage, and transport refrigeration unit (TRU) plug usage. Warehouse operators who select these action items are required to report key metrics associated with each action in their AWR. For example, a warehouse operator that has a rooftop solar panel system installed can report the solar system usage by the annual amount of solar energy that it generated in kilowatt-hours (kWh).

The methodology and data used to calculate the emissions reductions associated with WAIRE Menu actions are described in detail in Rules 2305 & Rule 316 Final Staff Report.[26] The baseline truck emission rates and resulting emission reduction factors for ZE and NZE Class 2b-7 and Class 8 trucks were calculated using EMFAC 2017 at the time of rule adoption. Additionally, the baseline emissions of diesel yard trucks were calculated based on emission factors and deterioration rates from the Carl Moyer Guidelines for 175 horsepower Tier 3 engines and the baseline emissions from local power plants were derived from CEMs, eGRID, and EIA[27] data and used to calculate the emissions reductions associated with solar panel usage. Although new models have been developed since then, the emissions reduction calculations presented are based on the originally calculated baseline emission rates to remain consistent with the methodology and supporting analysis that were adopted with Rule 2305. These methodologies were developed to ensure that there is no double counting with any existing federal, state, or local requirements when the rule was adopted.[28]

Statewide regulations set the floor for cleaner technologies by establishing broad, long-term requirements that influence vehicle manufacturing, fuel composition, and fleet turnover. However, these regulations do not ensure when, where, or how frequently cleaner vehicles are deployed at specific locations, particularly in communities disproportionately impacted by freight activity. The WAIRE Program addresses this gap by incentivizing warehouse operators to prioritize the use of cleaner trucks at their facilities, thereby reducing localized exposure to diesel emissions in frontline communities. In addition, the program supports early and additional adoption of NZE and ZE technologies beyond statewide requirements, generating emissions reductions that would not otherwise occur without local action.

The WAIRE Program is explicitly designed to produce emissions reductions that are supplemental to, and not duplicative of, other regulatory requirements. Pursuant to Rule 2305(d)(3)(A), "WAIRE Points may not be earned from WAIRE Menu items in Table 3 if those same actions or investments are required by separate United States Environmental Protection Agency (U.S. EPA), California Air Resources Board (CARB), or South Coast AQMD rules and regulations during the compliance period […] Actions or investments that go beyond U.S. EPA, CARB, or South Coast AQMD rules and regulations can earn WAIRE Points." As such, the program is explicitly designed to drive actions that exceed regulatory baselines in the compliance period.

[26] Rule 2305 Governing Board package and Final Staff Report, http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf

[27] Rule 2305 Governing Board package and Final Staff Report, http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf

[28] Methods used to calculate emission reductions here are the same as were used during rulemaking in 2021. As an example, baseline on-road emission rates before accounting for any reductions from Rule 2305 are assumed to already include emission reductions from CARB's ACT, Omnibus, and Heavy-Duty Inspection and Maintenance rules as estimated in early 2021. Omnibus and HD I/M were adopted after Rule 2305 and were assumed to achieve greater reductions than the final adopted regulations. At the time of this writing, it is unclear what portions, if any, of these rules will receive full federal approval. Therefore, emission reduction estimates shown here are likely conservative and may be even higher.

The WAIRE Program creates direct incentives for operational usage by awarding points for NZE and ZE truck visits, regardless of whether the warehouse operator owns the NZE and ZE trucks visiting their sites.[29] This structure encourages operators to prioritize the scheduling and dispatch of cleaner trucks to their facilities, resulting in measurable changes in operational behavior and localized emissions reductions. In addition, the program incentivizes the installation and use of zero-emission infrastructure, such as electric vehicle charging equipment, further accelerating the transition beyond minimum regulatory requirements.

Through California Code of Regulations Title 13, section 1956.8, CARB established optional low NOx standards, effective engine model year 2015, to encourage manufacturers to develop engines substantially cleaner than the mandatory standard. Pursuant to Rule 2305 (c)(18) an NZE truck must have an engine meeting CARB's lowest non-zero optional NOx standard applicable at the time of manufacture. CARB's lowest non-zero optional NOx standard is as follows:

Table 6: CARB's Lowest Non-Zero Optional NOx Standard under

Model Year	CARB's Lowest Non-Zero Optional NOx Standard (g/bhp-hr)	California Code of Regulations Title 13, Section 1956.8 Reference
Pre-2015	Not available	N/A
2015 – 2021	0.02	(a)(2)(A)
2022 – 2023	0.01	(a)(2)(A)
2024 – 2026[1]	FTP and RMC Cycles: 0.010 Low-Load Cycle: 0.040	(a)(2)(E)

[1] Only for engines manufactured prior to October 2, 2025.

In response to federal actions on the waiver for CARB's Omnibus rule, on October 2, 2025, CARB issued an emergency regulatory action setting 0.02 g/hp-hr as its lowest non-zero optional NOx standard. 0.02 g/hp-hr is, as of this Annual Report, the lowest non-zero optional NOx standard for engines manufactured after October 2, 2025. If a legal ruling should affect the status of the updated CARB regulation, or if CARB should further amend it, the status of eligibility may change. Under either scenario, new guidance would be made available as needed or appropriate.

Regardless of the evolving state and federal regulatory standards for NZE trucks, there are no requirements that these lower emitting vehicles be used. All of the emission reductions associated with their use calculated here in this report have accounted for the regulations and associated emission reductions anticipated when Rule 2305 was adopted, and are therefore surplus to any regulatory requirement. Similarly, for ZE trucks, because of various actions by CARB and the federal government, there are no requirements that they be used. All emission reductions associated with ZE trucks have accounted for the regulations and associated emission reductions anticipated when Rule 2305 was adopted, and would be surplus to any regulatory requirement. Given the recent withdrawal of, and federal challenges to key CARB mobile source regulations, some regulations incorporated in the baseline emission calculations, such as Advanced Clean Trucks and Omnibus Regulations, may no longer be enforceable or may have reduced

[29] WAIRE Implementation Guidelines, p.13

applicability. Consequently, the baseline emissions used in this Annual Report may be lower than they would otherwise be, and the estimated emission reductions associated with Rule 2305 may therefore be higher relative to this lower baseline that does not account for these less stringent CARB requirements.

Table 7 includes the detailed accounting of key metrics for actions that can be directly associated with emissions reductions (for a complete list of the reported metrics see Table A-2). Based on the AWRs and EAWRs received, the NOx and DPM emissions reductions from NZE/ZE Truck Visits, Solar Panel Usage and ZE Hostler Usage reached 1.71 and 0.047 tons per day (tpd) in 2025, respectively. At the time of rule adoption, staff estimated that the WAIRE Program would conservatively achieve between 1.5 to 3.0 tons per day of NOx reductions.

The reported metrics[30] over the last five compliance periods show a strong adoption and implementation of actions that contribute to emissions reductions (Table 7 and Table 8). The reductions shown in Figure 19 and Figure 20 account for reductions from all ZE or NZE truck visits reported in AWRs. The total emissions reductions per year is represented at the top of each bar and is rounded to the nearest hundredth place. The reported metrics of using ZE charging or fueling infrastructure have also demonstrated strong adoption (Table 8).

Table 7: Total Level of Activity as Reported by Warehouse Operators – Truck Visits and Usage

WAIRE Menu Item	Metric Reported	Total Reported Activity per Compliance Period				
		2021	2022	2023	2024	2025
NZE Class 4-7 Truck Visits	Visits	1	105,973	216,810	331,879	279,813
NZE Class 8 Truck Visits	Visits	69,551	655,101	847,980	1,174,118	904,714
Solar Panel Usage	kWh	24,476,129	101,314,866	95,560,667	114,442,917	120,173,628
ZE Class 2b-3 Truck Visits	Visits		20,933	114,073	224,766	341,623
ZE Class 4-7 Truck Visits	Visits	82	7,021	17,213	45,142	141,734
ZE Class 8 Truck Visits	Visits	44,521	24,487	139,970	273,544	435,610
ZE Hostler Usage	Hours of Use	105,736	409,433	578,587	1,098,350	1,441,812

[30] This information was reported by warehouse operators and may be subject to final auditing by South Coast AQMD.

Table 8: Total Level of Activity as Reported by Warehouse Operators – Zero Emission Charging/Fueling Usage

WAIRE Menu Item	Metric Reported	Total Reported Activity per Compliance Period				
		2021	2022	2023	2024	2025
Charger Usage	kWh	872,411	5,517,135	16,642,150	24,102,496	36,034,371
H_2 Station Usage	Kg H_2		11,541	116,949	8,574	
TRU Plug Usage	kWh		260,822	1,903,949	3,234,750	4,237,092

Figure 20: DPM Emissions Reductions from Reported Actions (tpd)

Key Recent Developments Related to Rule 2305

There have been some key developments related to Rule 2305 since the last annual report which include:

- CARB updated regulation covering its Optional Low NOx standard that affects NZE trucks under Rule 2305
- California Assembly Bill 98 (AB 98), which establishes strict statewide design, building, and operational standards for new or expanded logistics and warehouse developments, became effective January 1, 2026.

Federal Waiver Actions

On October 2, 2025, CARB issued emergency regulatory action setting 0.02 g/hp-hr as its lowest non-zero optional NOx standard to ensure certification programs remain in effect regardless of

federal actions and subsequent litigation on CARB truck rules. Given the recent withdrawal of and federal challenges to key CARB mobile source regulations, the WAIRE Program plays an increasingly important role in promoting and sustaining emission reductions from warehouse-related activities. The WAIRE Program does not require a federal waiver and continues to provide a reliable and enforceable mechanism for achieving near-term air quality and public health benefits in communities most affected by freight operations. The WAIRE Program remains a complementary action that can deliver emission reductions within South Coast AQMD's jurisdiction despite developments affecting statewide vehicle regulations. While the WAIRE Program continues to provide emission reduction benefits, attaining state and federal air quality standards will still require significant action from the state and federal government using their mobile source authority and other tools (e.g., incentives).

California Assembly Bill 98

AB 98, signed into law on September 29, 2024, establishes strict statewide design, building, and operational standards for new or expanded logistics and warehouse developments to protect public health and the environment.[31] Effective January 1, 2026, the legislation requires cities and counties to enforce specific buffer zones and minimum setbacks (ranging from 300 to 500+ feet) between heavy-duty truck loading bays and sensitive receptors like homes, schools, and hospitals, while also requiring local governments to update their general plans with designated truck routes that divert heavy traffic away from residential neighborhoods. AB 98 also requires South Coast AQMD to conduct community outreach to gather feedback on how WAIRE penalty funds collected after January 1, 2025 should be spent. The South Coast AQMD Governing Board will consider community input when determining how to allocate penalty funds collected through WAIRE enforcement. From January 2025 through June 2026, approximately $2.6 million in WAIRE penalties were collected.

WAIRE Program Enforcement

A key component of WAIRE Program implementation is ensuring that applicable warehouses are aware of and in compliance with the requirements of Rule 2305 and Rule 316. South Coast AQMD staff conducted significant outreach to notify the warehousing industry of compliance requirements for the WAIRE Program. The WAIRE Implementation Guidelines[32] provide an initial overview of the compliance program anticipated at the time of rule adoption. South Coast AQMD periodically conducted both desk and field audits to verify compliance with the WAIRE Program. An overview of the main requirements for Rule 2305 was provided in the WAIRE Program Reporting Overview section of this report.

Throughout rule development and in the WAIRE Program's implementation, South Coast AQMD conducted significant outreach to identify warehouses that are subject to the rule. The outreach efforts have included, but are not limited to, field visits, mailing hardcopy fliers about the program,

[31] https://leginfo.legislature.ca.gov/faces/billNavClient.xhtml?bill_id=202320240AB98.
[32] https://www.aqmd.gov/docs/default-source/planning/fbmsm-docs/waire-implementation-guidelines.pdf.

hosting webinars, participating in stakeholder webinars, developing online WAIRE Training Videos, presenting requested topics to stakeholders, sending informational emails through eNewsletter Pro, providing information about the WAIRE Program to local governments, and fielding calls and emails to the WAIRE Program Hotline (909-396-3140) and Helpdesk (waire-program@aqmd.gov). For detailed information on the outreach efforts conducted, please refer to the WAIRE Program Outreach & Implementation Efforts section of this report.

As of August 31, 2026, South Coast AQMD inspectors have conducted approximately 6,030 warehouse location site visits to provide outreach materials. Additionally, facilities were identified that submitted required reports late or failed to submit them, and South Coast AQMD therefore issued over 980 Notices of Violation (NOVs). Subsequently, 1,299 reports (404 ISIRs and 895 AWRs) were submitted late by 582 facilities following NOV issuance. In the 895 late AWRs submitted, operators reported over 175,800 WAIRE Points earned and about $20 million worth of Mitigation Points purchased.

340 of these NOVs have been resolved as of August 31, 2026, resulting in a total of $3,998,491.96 in penalties.[33] Settlement funds are generally paid into the South Coast AQMD general fund and allocated through standard budget processes. Consistent with Health and Safety Code section 40522.7 (enacted in 2024), for any penalties received after January 1, 2025, South Coast AQMD will establish a process for receiving community input prior to spending any of these funds.

South Coast AQMD staff continue to conduct desk audits of the reported information in AWRs and WONs to verify reported information and ensure that the warehouse facility owners and operators are following recordkeeping requirements.[34] Audits will also be conducted to verify exemptions claimed through report submittals, and that AWRs filed late accurately report their actions.

Consistent with South Coast AQMD's standard practice in the field, inspectors may conduct unannounced site visits to evaluate facility compliance and to verify WAIRE Menu items implemented through the WAIRE Program. If noncompliance with air quality rules is identified, an NOV may be issued to inform a business that it is out of compliance with specific South Coast AQMD rule requirements or permit conditions. NOVs are referred to the South Coast AQMD Office of General Counsel for settlement negotiations and can result in civil penalties. If no settlement is reached, a civil lawsuit may ultimately be filed in superior court.[35]

[33] NOVs are settled on a case-by-case basis, considering the facts of each individual violation.
[34] Rule 2305 requires that all records used to demonstrate compliance with all reporting requirements shall be maintained by warehouse operators (or owners if applicable) for a period of no less than seven years and made available to South Coast AQMD upon request during normal business hours to determine compliance.
[35] More information can be found on the South Coast AQMD website: https://www.aqmd.gov/nav/about/authority/enforcement.

WAIRE Program Outreach & Implementation Efforts

As part of the adopting Resolution for Rule 2305 and Rule 316, the South Coast AQMD Governing Board directed South Coast AQMD staff to conduct outreach to applicable warehouse facility owners and operators to provide training and guidance on how to comply with Rule 2305 with emphasis on warehouse operators that are small businesses. The WAIRE Program Hotline (909-396-3140) and Helpdesk Email inbox (waire-program@aqmd.gov) were established to directly assist regulated entities with WAIRE Program questions and information about the WAIRE Program, especially regarding rule applicability and reporting requirements. The hotline and email address were also used to provide outreach, compliance assistance, and schedule individual facility consultations. Since rule adoption, South Coast AQMD has responded to over 23,700 calls and emails to the WAIRE Program Hotline and Helpdesk Email.

Staff developed guidance resources to assist warehouse facility owners and operators in submitting the reports as required by Rule 2305, and to provide information to the public about rule compliance options. As part of the outreach plan, South Coast AQMD staff set up the Rule 2305 WAIRE Program Compliance Website (www.aqmd.gov/waire), which went live in June 2021. This website was designed to provide a central hub for all web-based resources to assist warehouse facility owners and operators subject to the rule requirements by providing online access to compliance guidance documents and program resources such as the:

- WAIRE Implementation Guidelines
- WAIRE Training Videos
- Custom WAIRE Plans
- Compliance and Enforcement Activity
- Frequently Asked Questions (FAQs) document
- WAIRE User Calculator
- WAIRE upcoming compliance due dates

As of August 31, 2026, there have been over 124,800 visits to the website and the WAIRE Training Videos have been viewed more than 8,900 times.

In addition to website resources, South Coast AQMD has sent over 135,000 informational emails about WAIRE Program resources, mailed over 21,875 compliance advisory mailers to warehouse facility owners/operators that may potentially be subject to Rule 2305, conducted over 150 in person and virtual webinar presentations to warehouse facility owners/operators, elected/appointed officials, community/environmental organizations, consultants, Assembly Bill 617 (AB 617) Community Steering Committees (CSCs)[36], various trade associations, and chambers of commerce.

[36] For additional information regarding the Rule 2305's applicability to AB 617, please refer to Appendix E in this report.

Future Implementation

The first five years of implementation for the WAIRE Program were primarily focused on program development, outreach, and providing technical support and compliance assistance for warehouse facility owners and operators subject to Rule 2305. In addition to continuing these actions, South Coast AQMD has also initiated its first technology assessment to evaluate if additional technologies are appropriate for consideration under Rule 2305. The findings and recommendations will be presented to the Mobile Source Committee.

The ongoing implementation of the WAIRE Program will continue to deliver measurable emission reductions by speeding up the adoption of cleaner trucks, battery-electric yard equipment, on-site charging, infrastructure upgrades, and cleaner last-mile delivery practices. These actions help ensure that investments within the goods-movement sector directly reduce air pollution in our region and, in particular, in disadvantaged communities and advance a cleaner, more sustainable freight system.

Appendix A: Initial Site Information Report (ISIR) WAIRE Menu Items Anticipated

Figure A-1 and Figure A-2 include information about the ISIRs including the number of reports received versus the potential universe of operators subject to Rule 2305 (Figure A-1) and a breakdown of the ISIRs received and potential number of operators by county (Figure A-2).

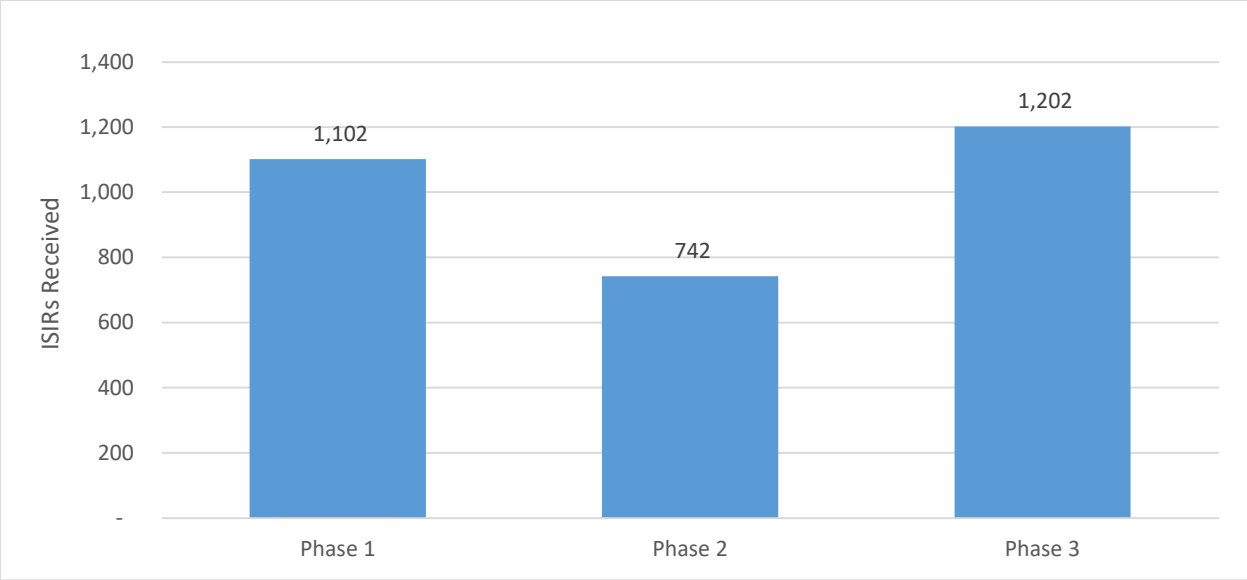

Figure A-1: Initial Site Information Reports Received by Phase

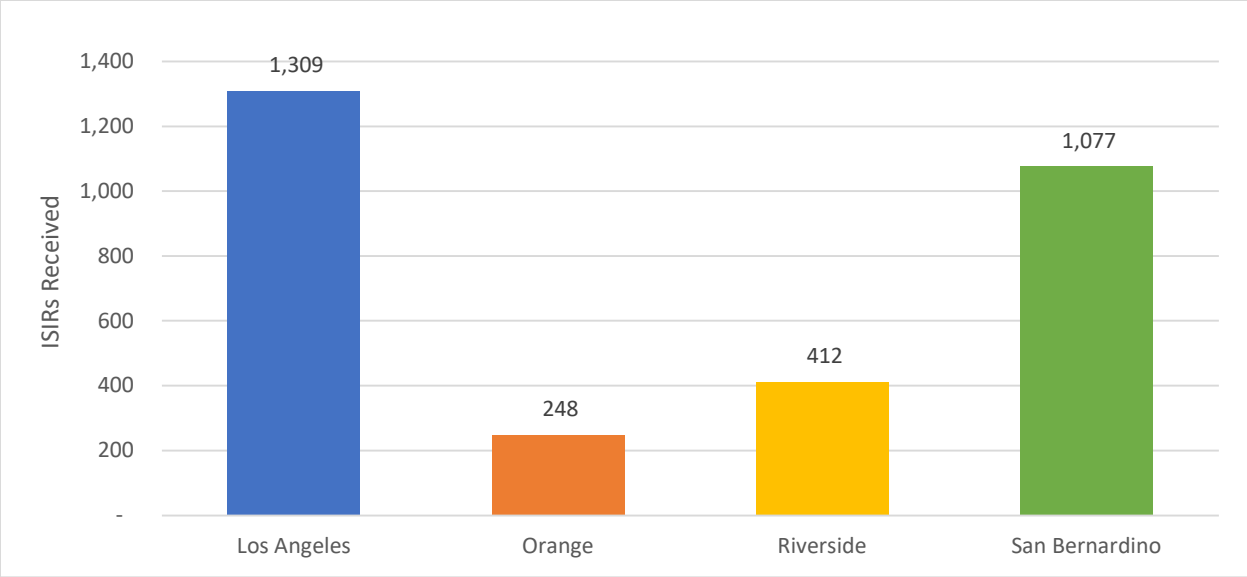

Figure A-2: Initial Site Information Reports Received by County

Table A-1 provides a complete list of the anticipated WAIRE Points to be earned by warehouse operators as reported in ISIRs received through August 2026. This table also includes the number of times, or occurrences, a WAIRE menu action was selected in those ISIRs. Mitigation fee points are also listed in the table, although they are not part of Table 3 – WAIRE Menu in Rule 2305.

Table A-1: Anticipated WAIRE Menu Items as Reported in the ISIRs

WAIRE Menu Item Name	WAIRE Points	Occurrence [1]
ZE Truck Visits		
ZE Class 2b-3 Truck Visits	1,082	73 reports
ZE Class 4-7 Truck Visits	640	83 reports

Custom Plan		
Custom Plan	266	5 reports

[1] Each 'occurrence' metric varies by action. 'Reports' indicates the number of ISIRs that included that action, however multiple actions may be in each report (e.g., multiple truck visits in each report).

Figure A-3 identifies the amount of each WAIRE Menu action, including mitigation fee points, that were anticipated to be used for Rule 2305 compliance by operators who submitted ISIRs. Figure A-4 shows a normalized chart of this information. As shown in this figure, a variety of WAIRE Menu actions were anticipated to be selected by warehouse operators to comply with the rule, and mitigation fee points represent a small percentage of the total WAIRE points that were anticipated for compliance.

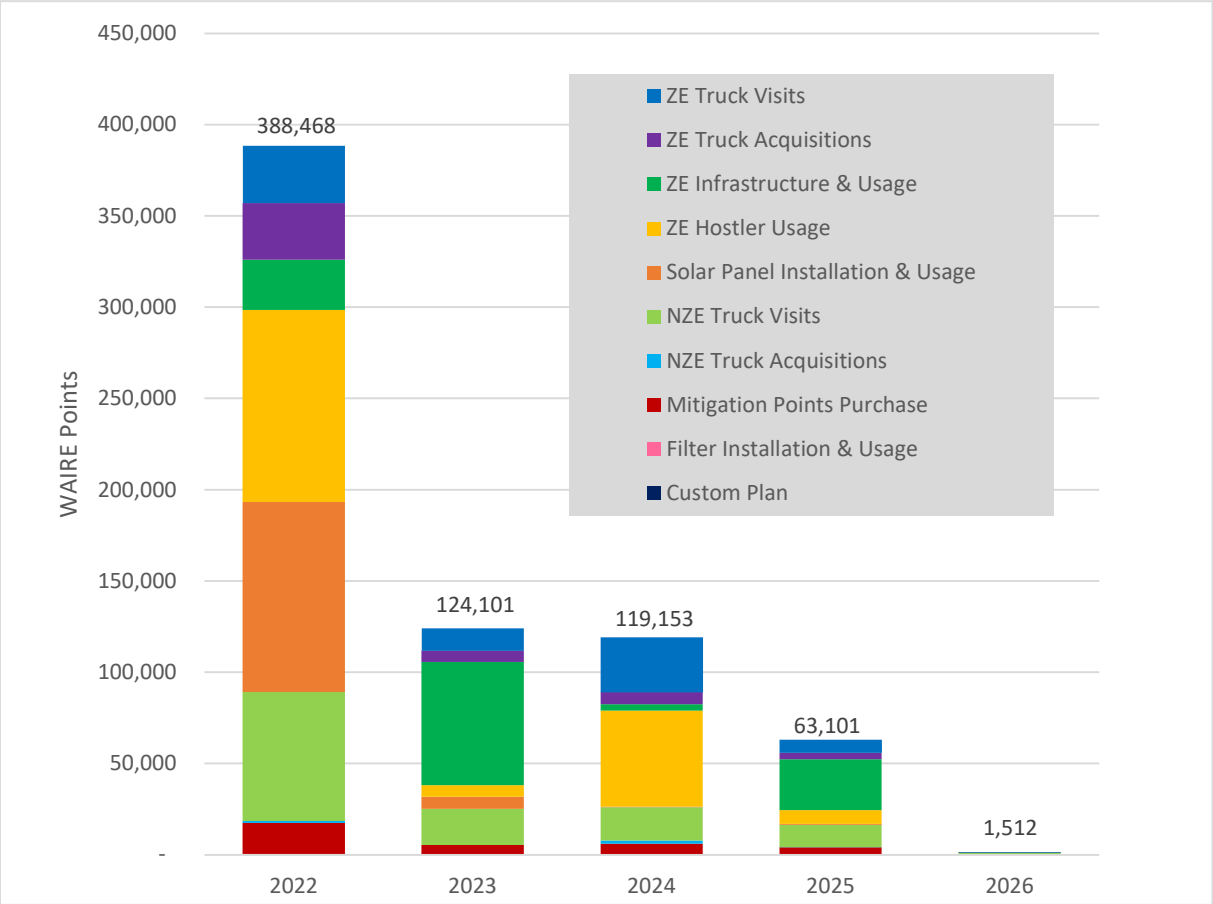

Figure A-3: Total Anticipated WAIRE Points Menu Items and Mitigation Fees in ISIRs

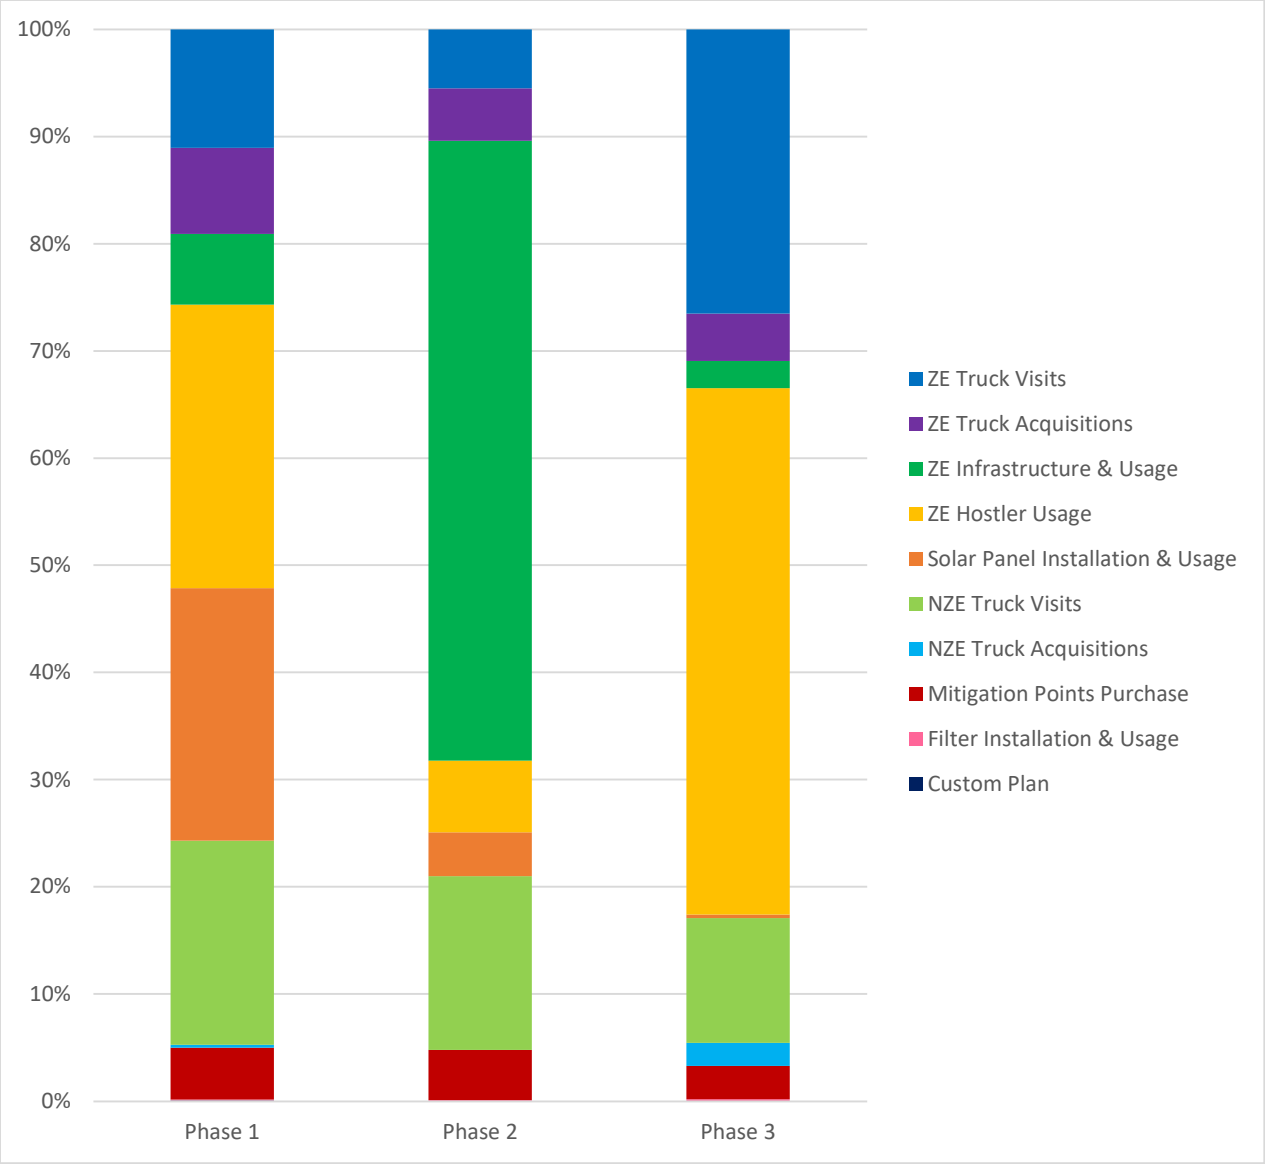

Figure A-4: Total Anticipated WAIRE Points Menu Items and Mitigation Fees in ISIRs

Appendix B: Annual WAIRE Report (AWR) WAIRE Menu Items Implemented

Figure B-1 identifies the number of AWRs that were received by compliance period and by phase. Figure B-2 represents the total number of AWRs received per compliance period and distinguishes the report submitted by and after the reporting deadlines.

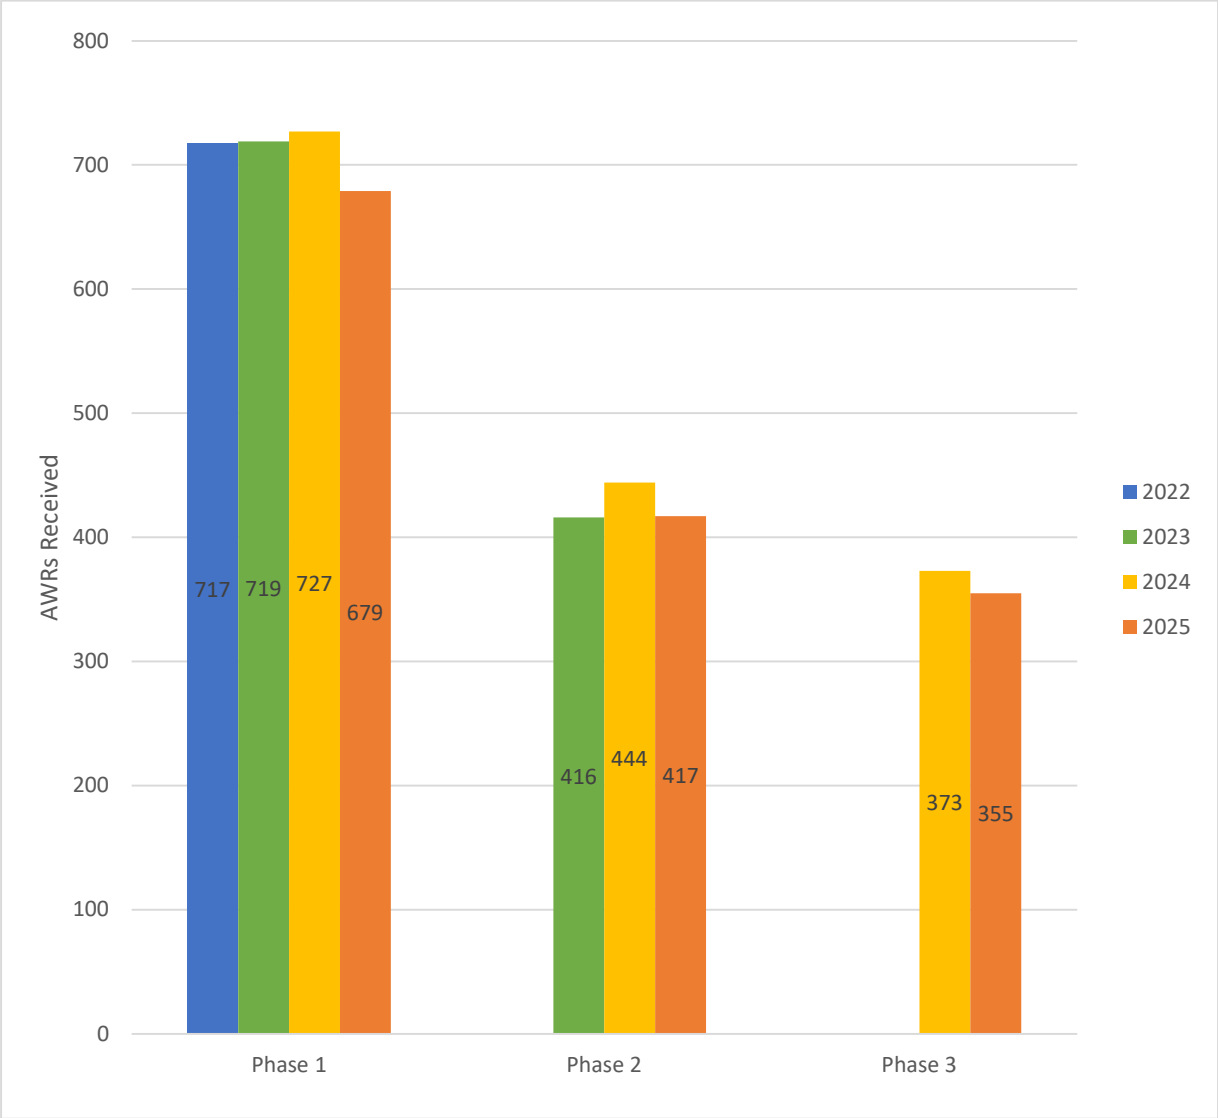

Figure B-1: AWRs Received by Phase

[1] the number of warehouse operators required to report increased during 2023 and 2024 (i.e. Phases 2 and 3 were added in 2023 and 2024, respectively).

Figure B-2: AWRs Received by Compliance Periods[1]

Table B-1 provides a complete list of all 1,946,077 WAIRE Points earned by WAIRE menu action, as reported in the AWRs received through August 2026.[37] This table also includes the number of times or occurrences that a WAIRE Menu action category was selected in those AWRs. Mitigation points are also listed in the table, although they are not part of Table 3: WAIRE Menu in Rule 2305. Warehouse operators are not required to complete any of the actions shown in the table below for any other regulation except the WAIRE Program.

[37] Outliers were identified for each WAIRE Menu item and excluded from this table and corresponding figures related to the WAIRE points earned unless supporting documentation was provided.

Table B-1: AWR WAIRE Menu Actions Implemented

WAIRE Menu Item Name	WAIRE Points	Occurrence [1]

[1] Each 'occurrence' metric varies by action. 'Reports' indicates the number of AWRs that included that action, however multiple actions may be in each report (e.g., multiple truck visits in each report).

Figure B-3 provides an overview of the WAIRE Menu actions and Mitigation Fee Points selected by warehouse operators who submitted the AWRs by phase and compliance period.

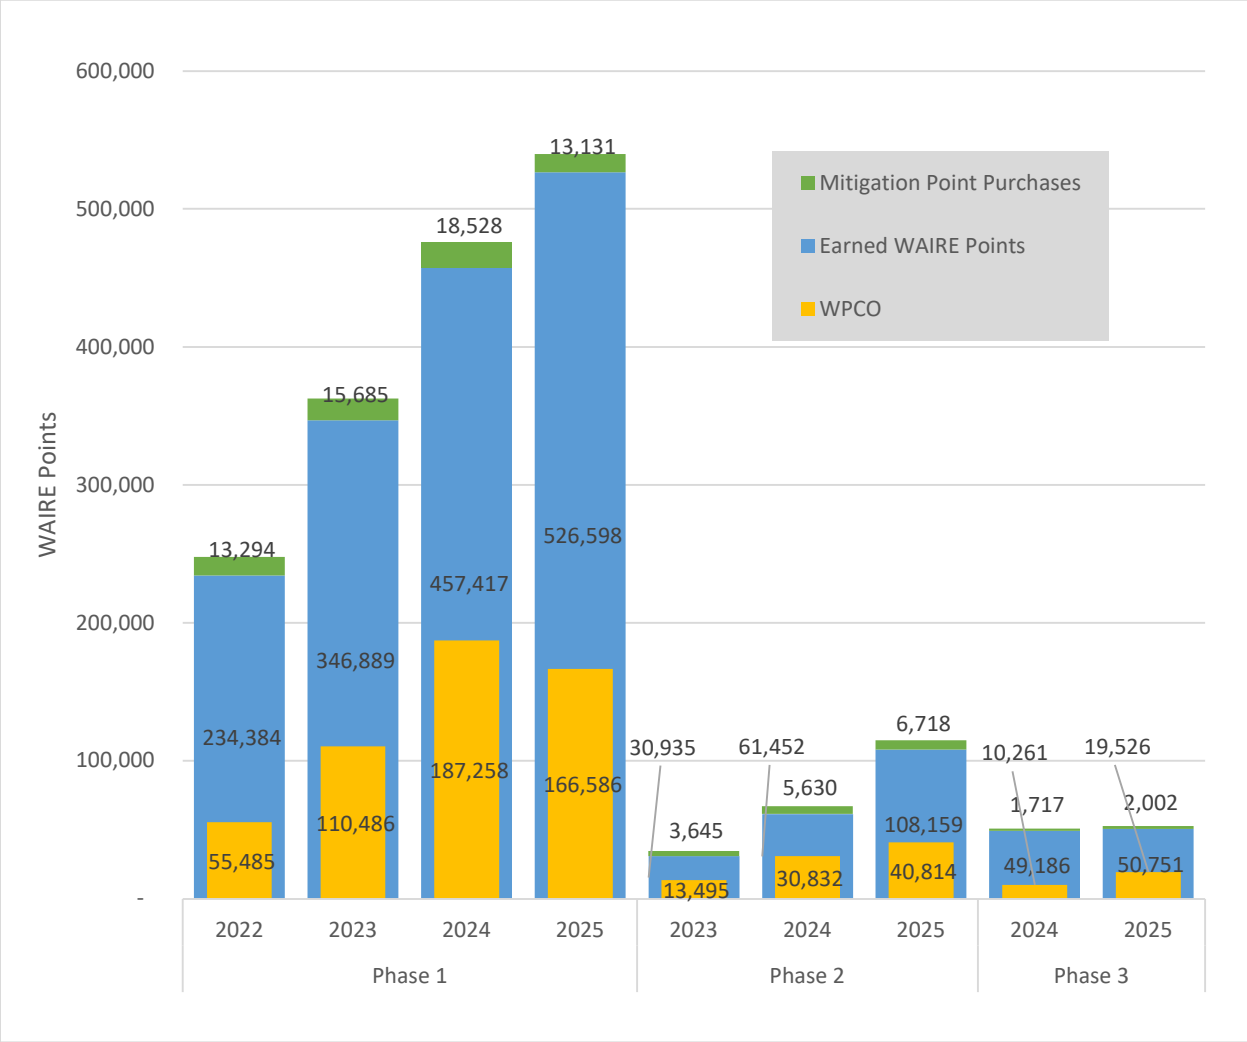

Figure B-3: WAIRE Points, Mitigation Points, and WPCO by Phase and Compliance Period

Figure B-4 identifies the percentage of each WAIRE Menu action reported for Rule 2305 compliance by operators who submitted AWRs.

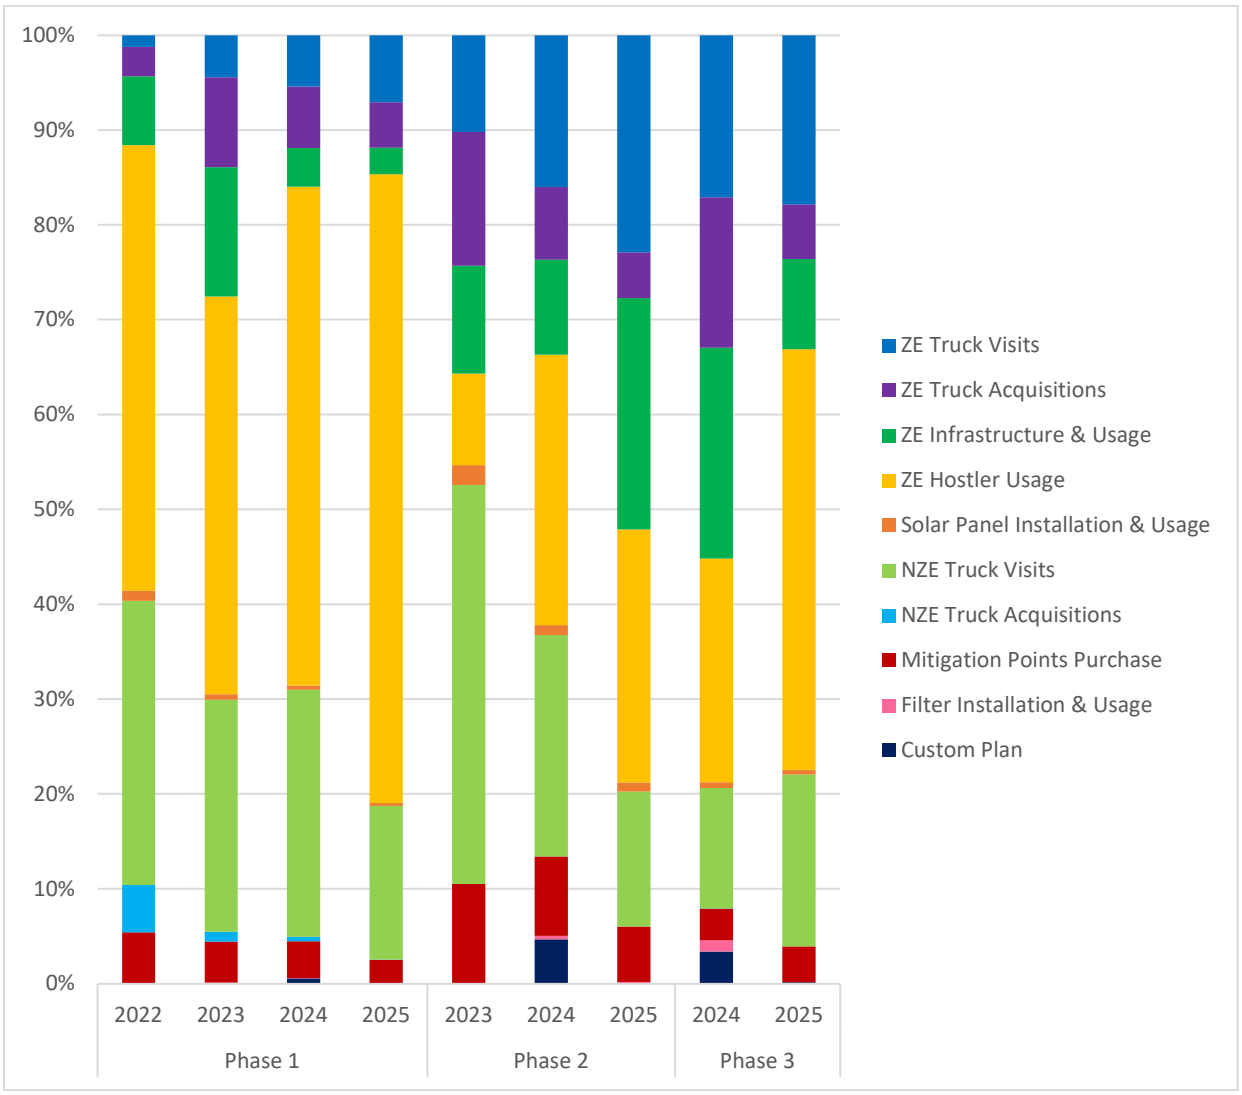

Figure B-4: Total Earned WAIRE Points Menu Items and Mitigation Fees in AWRs

Appendix C: Early Action Annual WAIRE Report (AWR) WAIRE Menu Items Implemented

Table C-1 lists all the WAIRE Points reported in Early Action AWRs received from rule adoption through the 2023 compliance period (from May 7, 2021, to December 31, 2023). This table also includes the number of occurrences a menu item was selected in those Early Action AWRs. Although the deadlines for submitting Early Action AWRs have passed, the table reflects updates due to amendments or late submittals received.

Table C-1: Early Action AWR WAIRE Menu Items Implemented

WAIRE Menu Item Name	WAIRE Points	Occurrence[1]
ZE Truck Visits		
ZE Class 2b-3 Truck Visits	2,865	13 reports
ZE Class 4-7 Truck Visits	26	3 reports
ZE Class 8 Truck Visits	7,606	48 reports
ZE Truck Acquisitions		
ZE Class 2b-3 Truck Acquisitions	3,554	374 trucks
ZE Class 8 Truck Acquisitions	2,239	19 trucks
ZE Hostler Acquisitions	5,841	33 trucks
ZE Infrastructure & Usage		
150-350 kW EVSE Acquisition	182	7 charger
19.2-50 kW EVSE Acquisition	153	3 chargers
51-149 kW EVSE Acquisition	198	22 chargers
Begin Construction on 19.2-350 kW charger project	105	21 projects
Begin Construction on up to 19.2 kW charger project	1,094	47 projects
Charger Usage	5,605	95 reports
Finalize 19.2-350 kW charger project	10	2 projects
Finalize up to 19.2 kW charger project	58	1 projects
H2 Station Installations	6	1 station
TRU Plug Usage	41	1 report
Up to 19.2 kW EVSE Acquisition	95	19 chargers
ZE Hostler Usage		
ZE Hostler Usage	37,572	40 reports
Solar Panel Installation & Usage		
Carport Solar Panel Installations	76	1 system
Rooftop Solar Panel Installations	2,139	10 systems
Solar Panel Usage	257	42 reports
NZE Truck Visits		
NZE Class 4-7 Truck Visits	219	6 reports
NZE Class 8 Truck Visits	13,967	96 reports

[1] These occurrences may differ from menu option to menu option. For example, the number of occurrences that corresponds to "Finalize 19.2- 350 kW charger project" reflects the number of individual chargers, or EVSE, that completed the final energization or permit sign off.

Figure C-1 identifies the WAIRE Menu actions reported in Early Action AWRs by county.

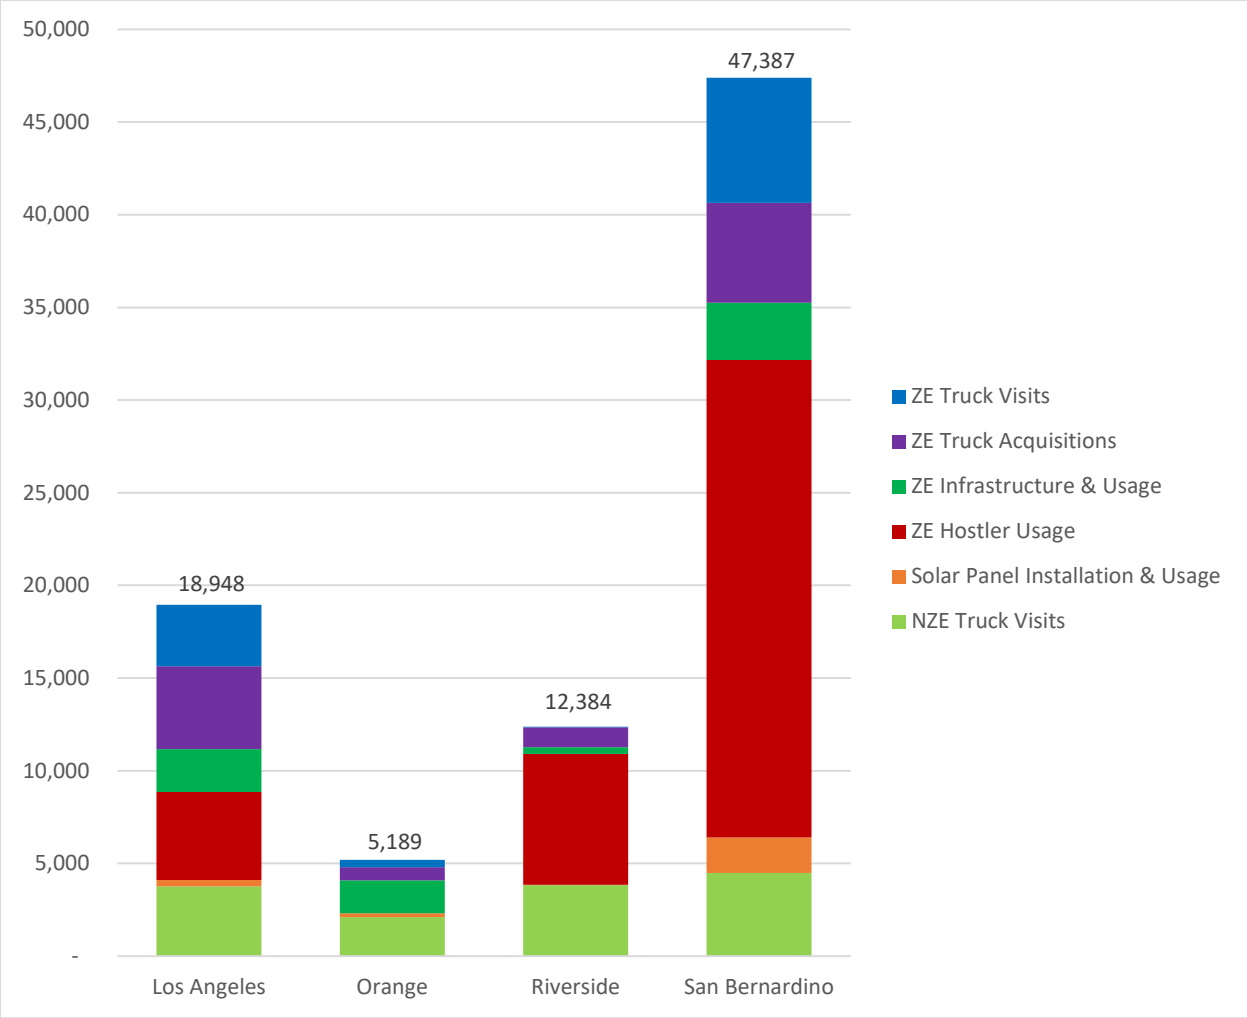

Figure C-1: Early Action AWR WAIRE Menu Items by County

Figure C-2 identifies the percentage of each of these actions taken by year.

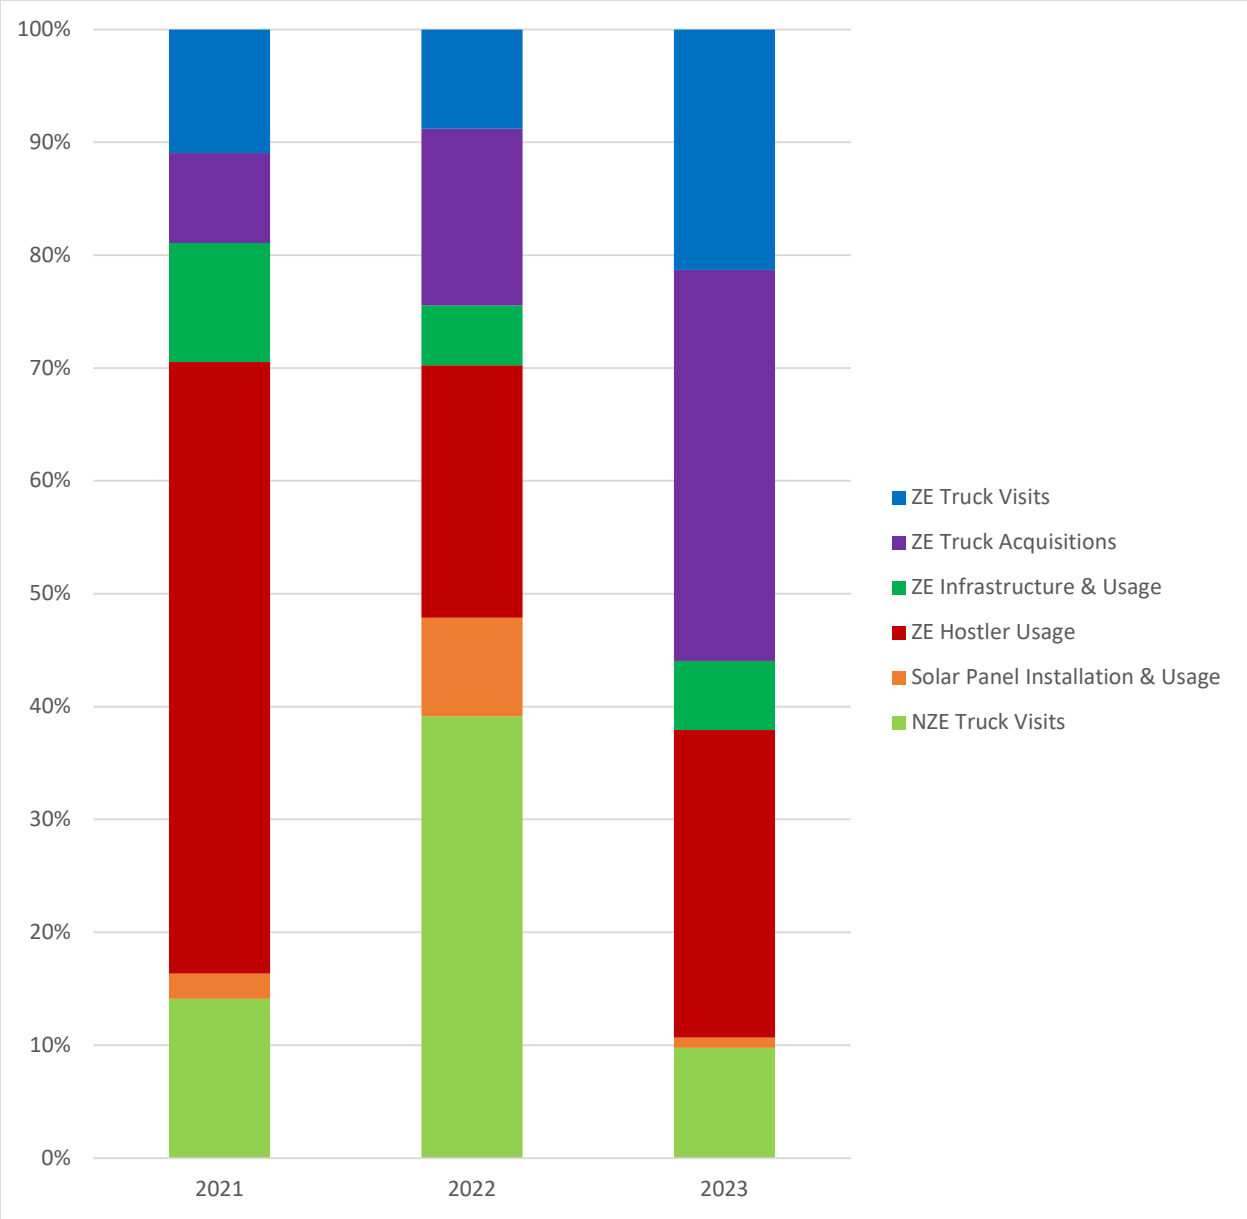

Figure C-2: Early Action AWR WAIRE Menu Items by Compliance Period

Appendix D: Estimate of Administrative Fees from WAIRE Program Reporting

Per Rule 316, WONs, ISIRs, and AWRs require a filing fee to be paid per report submitted, excluding some exceptions detailed below.

Please see Table D-1 for cumulative estimates for all compliance periods since rule adoption of the filing fees collected for WONs, ISIRs, and AWRs[38] as of August 31, 2026, respectively.[39]

Table D-1: Estimate of Filing Fees Paid

Report	Total Filing Fees Paid
WON	$115,728.27
ISIR	$388,608.96
AWR	$2,577,666.24
Total	$3,082,003.47

Rule 316 also requires administrative fees to be collected for CWP application evaluations and mitigation fees. A 6.25% administrative fee for the Mitigation Program is collected based on the mitigation fees paid by the warehouse owner or operator. As of August 31, 2026, approximately $5 million has been collected in Mitigation Program administrative fees in addition to what is shown in Table D-1 above.

[38] AWRs includes Early Action AWRs.
[39] Subject to final auditing by South Coast AQMD.

Appendix E: WAIRE Implementation in Assembly Bill 617 (AB 617) Communities

Introduction

AB 617[40] is a 2017 California law that addresses disproportionate impacts of air pollution in environmental justice communities. Since AB 617's first year of implementation in 2018, South Coast AQMD has designated six communities for participation in the program:

- Year 1 Communities (2018)
  - East Los Angeles, Boyle Heights, West Commerce (ELABHWC)
  - San Bernardino, Muscoy (SBM)
  - Wilmington, Carson, West Long Beach (WCWLB)
- Year 2 Communities (2019)
  - Eastern Coachella Valley (ECV)
  - Southeast Los Angeles (SELA)
- Year 3 Community (2021)
  - South Los Angeles (SLA)

AB 617 requires South Coast AQMD to work with each community to develop and adopt a Community Emissions Reduction Plan (CERP) one year from designation. To achieve this goal, each community established a CSC, comprised of people who may live, work, own businesses, or attend school within the community, to lead the CERP development process in partnership with South Coast AQMD and CARB. Through the CERP development process, the CSC identified air quality priorities and worked with various entities (e.g., regulatory agencies, local organizations) to develop exposure and/or emissions reduction measures to address those air quality priorities.[41]

All six AB 617 communities within South Coast AQMD's jurisdiction identified impacts from neighborhood truck traffic or diesel mobile sources[42] as an air quality priority for their respective communities due to the impact from these sources on a day-to-day basis. For example, the community of WCWLB is home to the Ports. The Ports serve as a gateway for the world's markets through the movement of goods. These goods are transported to and from the Ports by ships, trains, and heavy-duty trucks. Trucks travel along freeways that pass through the AB 617-designated communities and often travel near and through local neighborhoods to reach their destinations thus exposing residents to harmful air pollutants.

NOx is the primary pollutant that needs to be reduced to meet federal and state air quality standards, and mobile sources associated with goods movement make up about 52 percent of all NOx emissions in the South Coast Air Basin. Trucks are the largest source of NOx emissions in

[40] California Health and Safety Code Section 44391.2
[41] CERP's for South Coast AQMD's AB 617 communities are available here: www.aqmd.gov/ab617
[42] AB 617 related air quality priorities include neighborhood and freeway traffic from trucks and automobiles, neighborhood truck traffic, diesel mobile sources, truck traffic and freeways, and mobile sources.

the air basin and associated with warehouses. Truck activity is focused at warehouses, which as the Socioeconomic Impact Assessment for Rule 2305 identifies, are disproportionately located in disadvantaged communities.[43] The population within 0.5-mile of a large warehouse has a population-weighted average CalEnviroScreen 3.0 (CES 3.0) Score of 46.6 (85th percentile statewide), while the South Coast AQMD jurisdiction has a population weighted average CES 3.0 Score of 33.9 (67th percentile statewide). The Final Socioeconomic Impact Assessment for Rule 2305 and Rule 316 identified that risks posed from PM2.5 and DPM are also higher for populations located within 0.5-mile of warehousing facilities.

Figure E-1 through Figure E-6 provide a visual representation of potential warehouse locations subject to Rule 2305 that are within each AB 617 designated community within South Coast AQMD's jurisdiction.

[43] The Socioeconomic Impact Assessment is Attachment K of the Rule 2305 and Rule 316 Governing Board package (http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf).

Appendix F: WAIRE Program Online Portal (POP)

As part of the Board Resolution for Rule 2305 and Rule 316, the South Coast AQMD Governing Board directed South Coast AQMD staff to develop an online portal for regulated entities to submit reports as required by Rule 2305. Rule 2305 requires all reporting be submitted by an authorized official of the warehouse operator or owner through the WAIRE POP reporting system. The WAIRE POP software has been operational for four years and continues to be improved to support compliance with Rule 2305.

Development & Deployment

Following the adoption of Rule 2305 in May 2021, South Coast AQMD partnered with AgreeYa Solutions, Inc. to develop and design WAIRE POP, a web application that provides South Coast AQMD the ability to track warehouse facility owner and operator compliance with Rule 2305's reporting requirements. These reporting requirements include information on activities such as implementing, acquiring, or using NZE and/or ZE on-road trucks, ZE cargo handling equipment, ZE charging/fueling infrastructure, solar panels, or air filtration systems installed or replaced at residences, schools, daycares, hospitals, or community centers.

WAIRE POP was first deployed in August 2021 to allow warehouse facility owners to submit the WON by September 1, 2021. Since then, the system has undergone multiple phases of development, testing, and deployment to external users.

To date, the project has been separated into five major phases:

- **Phase 1 (1.1-1.2):** Phase 1.1 was to develop a publicly available web portal where warehouse facility owners can register, submit, and pay for their WON report. Phase 1.2 was to develop a mechanism for South Coast AQMD staff to process this data into the WAIRE POP database.
- **Phase 2:** This phase added features that allowed external users the ability to add their facilities through WAIRE POP and file ISIRs and AWRs. This phase also implemented the use of outage notifications and informational modals to communicate pertinent WAIRE POP events. An internal administrative interface was created for staff to access report submissions, view invoices, and change role assignments for external users. The administrative tool continues to be enhanced throughout the various WAIRE POP development phases.
- **Phase 3 (3.1-3.5):** Phase 3 was focused on addressing existing bugs and user interface fixes, creating a personal identification number (PIN) validation system for staff to authenticate users that must associate their accounts with existing warehouses, adding validation rules to ensure fields are entered correctly, adding logic for truck trip entries to improve accuracy in reporting, correcting WAIRE POP logic for ISIR submittals to allow users to select the compliance period for the report, adjusting WAIRE POP logic to determine phase by the warehousing activities field rather than building size to align with the rule, updating the AWR report builder to deduct WAIRE Points claimed from the

WPCO in the order they were added, correcting WAIRE Point expiration dates, allowing warehouse facility owners to voluntarily earn WAIRE Points through AWRs, allowing staff to create transfer groups pursuant to the rule, creating an improved payment interface for users to download invoices and make online payments, and implementing an extensive payment sweeper service to accurately update all payment records within WAIRE POP.

- **Phase 4 (4.1-4.4):** Phase 4 was focused on high priority enhancement tasks identified by staff, supplementing backend data management for internal staff, building a functionality for users to download submitted reports and their associated invoices, enabling staff notifications for warehouse operator records created without corresponding WON data, correcting language to prevent reports submittals for incorrect compliance periods, adjusting WAIRE Point expiration dates and WAIRE Point transfers to ensure they are aligned with the rule, correcting WAIRE Menu calculations for TRU plugs, developing and deploying an option to flag the report if the user is offsetting their WPCO by claiming a late action,[44] enhancing WAIRE POP to automatically display new compliance periods as options, allowing users to submit a report for a partial year (less than 12 months) within the compliance period, adding logic to prevent mitigation fees selection when the WPCO is less than 10, creating a database of Building Identifications (Building IDs) to assist in tracking the potential warehouse universe and allowing multiple Facility Identifications (Facility IDs) to be created at the same address for warehouse operators who operate in the same building, developing and testing the extensive scope needed to create AWR amendments, which include internal and external features such as request and review modules[45], and enhancing the internal administrative tool further to manage the database of Building IDs and track updates related to AWR amendments.
- **Phase 5 (5.1-5.9):** The first half of Phase 5 focused on improving the AWR amendment feature within WAIRE POP, enhancing the transfer feature for facilities who are under the same operational control, ensuring Early AWR submittals are only available for applicable facilities within the authorized compliance periods per Rule 2305, implementing the Post-Reporting Deadline Fee for WONs, ISIRs, and AWRs, enhancing and clarifying the WON submission process for users, integrating Clean Air Support System (CLASS) facilities into WAIRE POP to streamline reporting for facilities who already exist within South Coast AQMD's universe, developing an internal feature to consolidate duplicate facilities, and migrating the relational database from a facility-based to report-based foundation.

  The second half of Phase 5 included automating Facility ID updates to improve data accuracy, improving the facility creation process to more clearly account for reported lease and confidential information, enabling reciprocal warehouse owner-to-operator point transfers and better management of points expiration, enhancing the staff-side amendment workflow, adding configurable idle-session timeouts and automated follow ups for

[44] For additional context, see the Frequently Asked Questions document (http://www.aqmd.gov/docs/default-source/planning/fbmsm-docs/r2305_faqs.pdf).
[45] The AWR Amendment feature was deployed in November 2024.

payment due reports, and modernizing WAIRE POP to improve security, performance, and future scalability.

Future WAIRE POP Enhancements

As the usage of the WAIRE POP reporting system grows, staff continues to assess and prioritize potential improvements to enhance user experience and internal data management. Proposed enhancements are discussed internally based on user needs and are contingent on resource availability. South Coast AQMD is currently considering the following features or enhancements for Phase 6 of WAIRE POP development:

- Various user interface editorial changes to improve the clarity
- WON reporting portal enhancements to connect the building universe with reported information and ensure accurate data tracking and operator mapping
- Operator lifecycle improvements to improve tools that flag vacated, exempt, and duplicate operators in the operator universe
- Enhancements to the WAIRE POP relational database structure to facilitate making data publicly available on F.I.N.D. or via bulk data download
- Points ledger refinements to provide clear WAIRE Points history and points transfer trails
- Advanced internal tools for staff users to view and query WAIRE POP reports
- More robust reporting portal for owner AWRs
- Additional enhancement tasks identified by staff as needed

Appendix G: Warehouse Building and Operator Universe

As the implementation of the WAIRE Program progresses, additional information is becoming available that wasn't known during the rulemaking process. Much of this new information is only available through Rule 2305 mandated reports that are provided by warehouse owners and operators. The estimate of the regulated universe of warehouse buildings and operators has continued to evolve with each annual report. The universe of warehouse buildings is based on CoStar 2026 data, with additional warehouse locations identified through reports submitted by warehouse owners and operators. These numbers do not account for vacant warehouses and other seasonal changes.

Table G-1 shows the warehouse building universe as reported in each annual report. Due to the lack of reported information in the early phase of implementation, the phases reported in previous annual reports were based on the total building size of each warehouse identified through CoStar and WONs. To ensure better accuracy in the implementation of Rule 2305, the phases for Table G-1 are updated to be based on the total warehouse size (area that may be used for warehousing activities) when available as reported through ISIRs and AWRs. Because of this improvement in methodology, a significant number of warehouse buildings have shifted into a later phase (i.e. Phase 1 to Phase 2, Phase 1 to Phase 3, or Phase 2 to Phase 3).

Table G-1: Warehouse Building Universe Identified in Each Annual Report

Reported In [1]	Phase 1	Phase 2	Phase 3	Total
1st Annual Report	1,019	1,041	1,416	3,476
2nd Annual Report	1,186	1,137	1,586	3,909
3rd Annual Report	1,228	1,170	1,644	4,042
4th Annual Report	1,202	1,170	1,679	4,051

[1] The building universe for the WAIRE Program is based on the best available data from CoStar, site visits, and facility-submitted data at the time each annual report is prepared and will continue to be updated as new information becomes available. These values are expected to change over time due to normal fluctuations in the warehousing industry, including changes in facility operations, ownership, leasing activity, and building use. Accordingly, the building universe should be considered a dynamic estimate rather than a static count.

The number of potential operators is based on the operators identified in submitted WONs, ISIRs, and AWRs. Some of these operators were first identified through site visits by inspectors. For warehouses identified using CoStar 2026 data only, the default assumption is to count one tenant per building until other information from submitted reports or inspections becomes available. Table G-2 shows the potential operator universe as reported in each annual report. The first annual report contained a conservative estimate of one operator per warehouse building. Recognizing that many warehouse buildings have multiple tenants, staff analyzed submitted data to capture a more accurate estimate of potential operators for the subsequent annual reports.

Staff have also continued substantial data-cleaning efforts to identify and remove building and operator records that should not be included in the estimate of potential operators. Inconsistencies can arise when a building has been demolished or is not a warehouse (e.g., office buildings), multiple addresses are reported for the same building, or tenant turnover results in overcounting the number of tenants that occupy a warehouse building. While CoStar data indicates year-over-year growth in the warehouse building population, improved data accuracy from these efforts has resulted in fewer potential operators identified in the 4th Annual Report compared to previous annual reports. An ISIR is expected for each potential operator, although some operators must only submit an ISIR with limited information per Rule 2305(e)(2)(A)(i) and (ii).

Table G-2: Potential Operators Identified in Each Annual Report

Report [1]	Phase 1	Phase 2	Phase 3	Total
1st Annual Report	1,019	1,041	1,416	3,476
2nd Annual Report	1,743	1,593	2,056	5,392
3rd Annual Report	1,645	1,579	2,080	5,304
4th Annual Report	1,288	1,388	2,346	5,022

[1] The potential operators for the WAIRE Program are based on the best available data from CoStar, site visits, and facility-submitted data at the time each annual report is prepared and will continue to be updated as new information becomes available. These values are expected to change over time due to normal fluctuations in the warehousing industry, including changes in facility operations, ownership, leasing activity, and building use. Accordingly, potential operators should be considered a dynamic estimate rather than a static count.

Operators who must submit an ISIR with full reporting requirements are also required to earn WAIRE Points and submit AWRs. The proportion of operators who must submit an AWR is calculated by phase from Table G-3. They are listed as percentages in Table G-4. The annual variation in the proportions for Phases 1 and 2 are minor, while 2024 data for Phase 3 indicates that many operators will not need to earn WAIRE Points.

Although more reports are needed to determine whether this trend holds across all Phase 3 warehouses, the reporting received so far indicates that individual warehouse operations in these smaller buildings are more commonly smaller than 50,000 square feet. The formula for Table G-4 is as follows:

$$Proportion\ of\ Operators\ Who\ Must\ Submit\ AWR = 1 - \left(\frac{ISIRs\ with\ Limited\ Information}{Total\ ISIRs}\right)$$

Table G-3: ISIRs Submitted for All Years by Phase

Report Type	Phase 1	Phase 2	Phase 3	Total
ISIRs with Limited Information	16	29	672	717
ISIRs with Full Reporting	1,086	713	531	2,330
Total ISIRs	1,102	742	1,203	3,047

Table G-4: Percentage of Limited ISIRs Submitted for All Years by Phase

Percentage Of	Phase 1	Phase 2	Phase 3
Operators that Submitted an ISIR with Limited Information	1.5%	3.9%	55.9%
Operators who Submitted an ISIR and Must Submit AWRs	98.5%	96.1%	44.1%

The estimated minimum expected number of AWRs for the 2025 compliance period (Table G-5) is the product of the number of potential operators (Table G-2) and the proportion of operators that must submit an AWR (Table G-4).

$$Expected\ Number\ of\ AWRs\ (by\ Phase) = Most\ Recent\ Estimate\ of\ Number\ of\ Potential\ Operators * Proportion\ of\ Operators\ Who\ Must\ Submit\ AWR$$

Table G-5: Estimated Minimum Expected Number of AWRs by Phase

Compliance Period [1]	Phase 1	Phase 2	Phase 3	Total
2025	1,269	1,334	1,036	3,639

[1] This table reflects the latest potential operators for the WAIRE Program, based on the best available data from CoStar, site visits, and facility-submitted data at the time of annual report preparation. These values are expected to change over time due to normal fluctuations in the warehousing industry, including changes in facility operations, ownership, leasing activity, and building use. Accordingly, potential operators should be considered a dynamic estimate rather than a static count. While each phase's expected number of reports is the same for each compliance period, the total number of expected reports will differ as more reports are submitted.

To estimate the expected number of AWRs for prior compliance periods, staff accounted for the changes in the warehouse building inventory over time. As shown in Table G-6, CoStar data indicates that the number of warehouse buildings within South Coast AQMD's jurisdiction increased from 2022 to 2025. Because 2025 represents the most recent building inventory, the warehouse building population for each prior compliance period is expressed as a proportion of the 2025 population. These proportions are used to estimate the expected number of AWRs for each prior compliance period.

Table G-6: CoStar Building Inventory per Compliance Period

Compliance Period	Phase 1	Phase 2	Phase 3	Total	Proportion in Comparison to Most Recent Data (Total)
2025	1,115	1,084	1,514	3,713	100.0%
2024	1,108	1,091	1,494	3,693	99.5%
2023	1,092	1,072	1,491	3,655	98.4%
2022	1,019	1,041	1,416	3,476	93.6%

Table G-7 presents the estimated minimum number of AWRs for each phase and each compliance period based on the methodology described above. The actual number of expected AWRs may be higher because a warehouse building may have multiple operators in non-reporting buildings or may experience operator changes during a compliance period, resulting in more than one AWR for the same building.

Table G-7: Estimated Minimum Number of AWRs by Phase and Compliance Period

Compliance Period [1]	Phase 1	Phase 2	Phase 3	Total
2025	1,269	1,334	1,036	3,639
2024[1]	1,262	1,327	1,030	3,619
2023[1]	1,249	1,313		2,562
2022[1]	1,188			1,188

[1] Adjusted for growth based on percentages included in Table G-6
