STATIONARY SOURCE
MOBILE SOURCE

Reduce: To decrease the amount of waste we create and use items more than once.

Reuse: The act of taking old items that you might consider throwing away and finding a new use for them.

Recycle: The process of collecting and processing materials that would otherwise be thrown away as trash and turning them into new products.

Air Pollution: a complex mixture of gases and small particles in the air that can be harmful to the health of humans, animals, and plants.

Air Quality: a measure of how clean or polluted the air is.

Chemist: An air quality chemist takes a sample of air and tests it to make sure it is at a healthy level.

Inspector: An air quality inspector looks at sources of air pollution to make sure air quality rules are followed.

Meteorologist: An air quality meteorologist studies local weather patterns and tracks air pollution.

Stationary Source: A source of air pollution that stays in one place and does not move like a gas station.

Mobile Source: A source of air pollution that moves or travels like a heavy-duty truck.
