RE: 9,300+ Letters from Residents in Opposition to SCAQMD PAR 1111 & 1121

Dear Ms. Vinh:

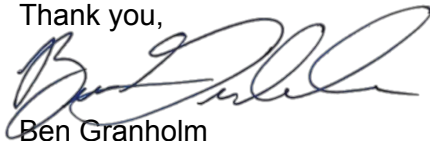

We write today on behalf of more than 9,300 residents in the South Coast Air Quality Management District's jurisdiction, who filed the attached letters in opposition to Proposed Amended Rules 1111 and 1121.

We have recently become aware that, because these letters were sent directly to Members of the Governing Board, they have not been filed in the official record.

In recent public meetings, staff has noted that roughly 91% of the comments received have been in support of the proposed rules. However, we respectfully request that staff update the official record to reflect the opposition and comments of the more than 9,300 residents who previously expressed concern regarding the proposed rule amendments.

We appreciate your time and consideration in this matter.

Thank you,

Ben Granholm
Coalitions Director

Subject: URGENT: Please Postpone Action on Rules 1111 & 1121

Dear SQAMD Board Member,

I am writing as a South Coast Air Basin resident in strong opposition to Proposed Amended Rules 1111 & 1121. These rules directly affect the general public, not just large facilities or industries but homeowners and renters, like me.

Most residents are unaware of the upcoming requirements and the significant costs involved. Despite holding public workshops, the SCAQMD has not conducted sufficient outreach to inform and engage the broader community. Without targeted communication through mainstream media and other accessible channels, residents who are directly impacted have not and will not have an adequate opportunity to understand or voice concerns about these extremely expensive rules.

Additionally, upgrading buildings with new electric appliances and wiring is a costly process, very likely in excess of \$30,000 or more per unit. These high costs will likely lead to rent increases, placing additional financial pressure on tenants in a region already struggling with housing affordability. At a time when the housing market is already under strain, increased costs and the potential for tenant displacement will only make it more challenging for renters and landlords alike, worsening Southern California's housing affordability crisis.

Lastly, under proposed Rules 1111 and 1121, if a gas water heater or furnace needs replacing, a homeowner won't be able to simply replace it with a new gas unit. Instead, the homeowner will be required to install a more costly electric heat pump, with an estimated price tag of \$6,000 compared to the current average of \$1,500 for a gas water heater replacement. Beyond the higher purchase cost, consumers will also need to secure permits, which could mean waiting for months without hot water or renting a temporary heat pump in the meantime. These rules apply not only to water heaters but also to space heating, adding to the burdens already imposed by recent rules on pool heaters. These complex, costly requirements will be a major surprise to consumers, who are largely unaware of what is being proposed.

Thank you for your time & consideration. I hope you will oppose Rules 1111 & 1121 and move to postpone any further action on these Rules.

Sincerely,
