Subject: [EXTERNAL] Comments on SCAQMD PAR 1111/1121

Dear Manager of PRDI Farr,

As a California HVACR professional, I believe the proposed changes to PAR 1111 and 1121 by the South Coast Air Quality Management District (SCAQMD) violate the Energy Policy and Conservation Act (EPCA) and should not be adopted. The rule would ban gas products for manufacturers not participating in the alternative pathway, and the mitigation fees for those who do participate would make gas products unaffordable. This effectively serves as a ban on fossil fuels, which is illegal under EPCA since space and water heaters have a federal energy standard, so no state regulations about a space and water heater's energy use (gas) can be adopted.

Sincerely,

Manuel Garcia
