Hello,

I am writing in support of proposed rules 1111 and 1121. These rules will continue the climate leadership that Californians are known for, and reduce emissions. While it may be expensive (I'm not an economist), I believe that it's critical to ensure clean air for ourselves and future generations, reduce the amount of pollutants, and ultimately do our part to reduce climate change.

Therefore, I ask you to adopt rules 1111 and 1121.

Thank you,

Cody Lewis

I just wanted to let you know that I think switching everyone over to electric is the right move. The person who wrote this article was huffing too much gas while writing.
