

**Jeffrey P. Brown
Senior Engineer
Orange County Sanitation District**

For 12 years, Jeffrey Brown has led the operational research program, which focuses on identifying, evaluating, and implementing innovative processes to improve treatment efficiency, reduce costs, and meet regulatory requirements throughout the wastewater treatment system. Previously he worked in the private sector in environmental compliance consulting and as a research engineer for Unocal. He has Master's degrees in Chemical Engineering from the University of Washington and Public Administration from CSU Fullerton and is a registered Professional Engineer in California.
